March 23, 1959

Mr. Phil Hoffman
General Manager
Station WTCN-TV
Minneapolis, Minnesota

Dear Mr. Hoffman:

Please accept our heartiest congratulations for a job extremely well done on last week's state high school basketball tournament. We are particularly happy with the way your staff handled every phase of sales service and production.

I believe it was the most flawless programming of its type I have seen in the Twin Cities.

The tournament coverage technically and production-wise was excellent. Our commercials for Northwestern Bank were handled in a most professional manner.

Will you please express our sincere appreciation to all concerned who made this a top flight sports presentation.

Sincerely,

Richard Stevens

GOOD GUYS FINISH FIRST!

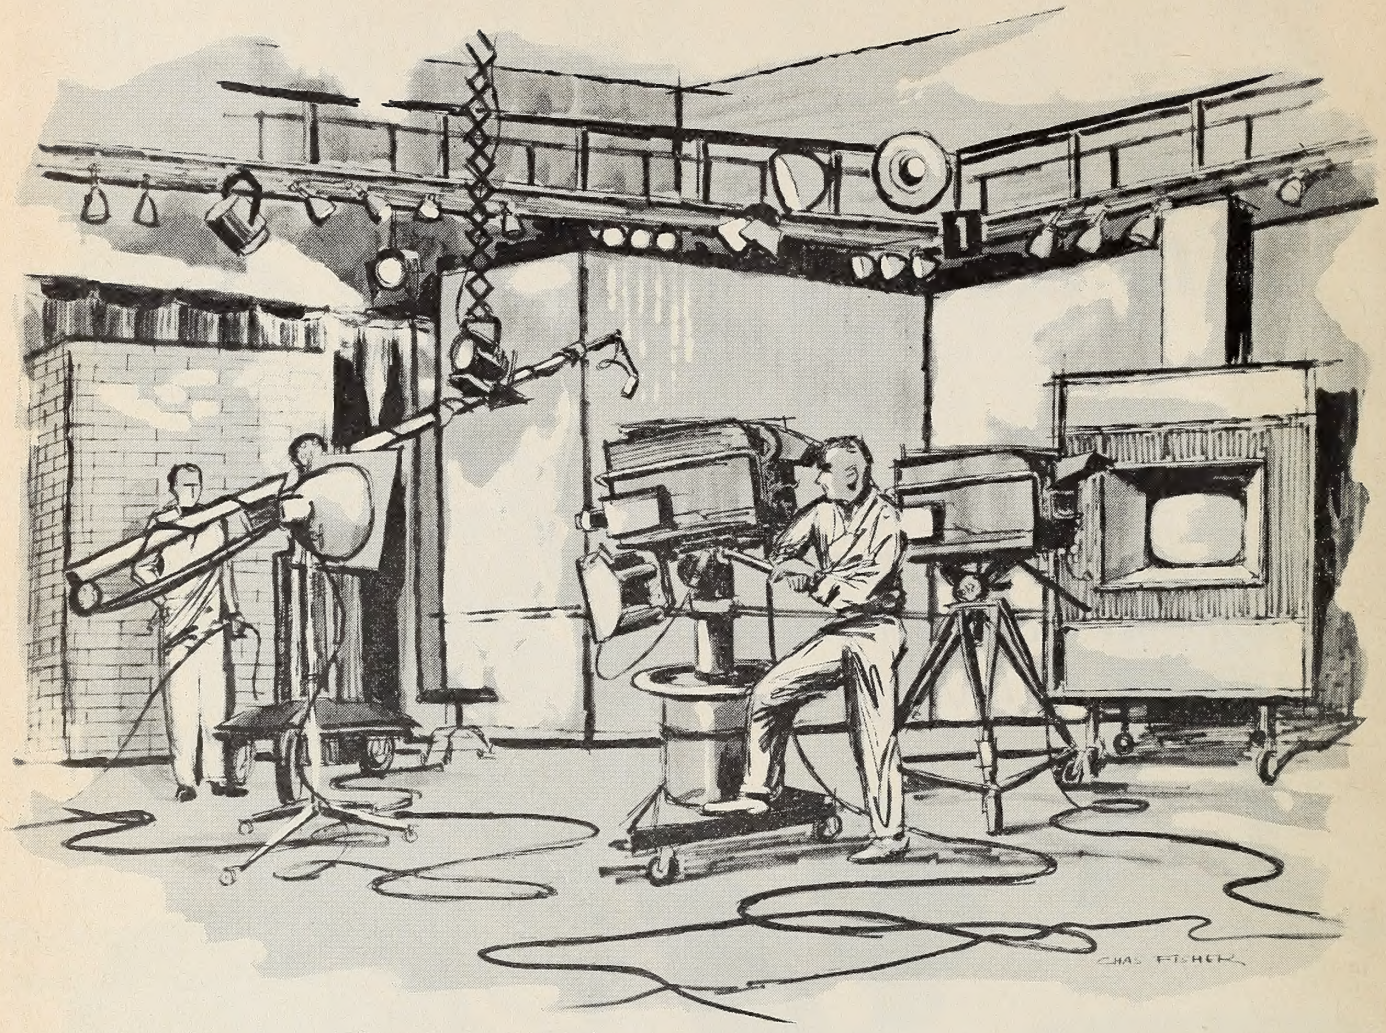
TK6540
.B85

Westernwise, fact bears out fiction—good guys do come out ahead every time. VICTORY PROGRAM SALES has the ARB shares to prove it:

STEVE DONOVAN, WESTERN MARSHAL: Current repeat-runs first in their time-periods . . . with even greater share-averages than previous runs. Pittsburgh, for instance: 1st run 71%, 2nd run 73%. Kansas City: 2nd run 38%, 3rd run 55%. Mobile: 2nd run 71%, 3rd run 74%!

FRONTIER: Increasing its share in its time period with each succeeding run. In Detroit, for example: 3rd run 32%, 4th run 38%. Portland, Oregon: 2nd run 26%, 3rd run 33%. Nashville, Tenn.: 2nd run 23%, 3rd run 54%. Columbus, Ohio: 2nd run 31%, 3rd run 50%!

HOPALONG CASSIDY: Still a strong front-runner. Beat everything against it in Baltimore, 4th through 7th runs (7th run averaging an 81% share). Fresno: continuing 1st, 2nd, 3rd run leadership with 4th run 38% average share. Minneapolis-St. Paul: 6th run 86% share, 7th run average-to-date 92%!



All this at an average cost-per-thousand of $1.19! Strip 'em, rotate 'em, bet 'em back-to-back—with a buy like this, you've got to wind up winners!

CLOSED CIRCUIT®

No sale • Recurring rumor that NBC would be sold, with or without its owned-and-operated stations, was answered last Thursday by Brig. Gen. David Sarnoff, chairman of RCA board, in this exclusive statement to BROADCASTING: "You have asked me whether there is any truth to rumors you have heard that the NBC is for sale. Nothing is further from the truth. It would be interesting to know the source of these rumors since they are unfounded and malicious."

Stiffer labor law? • There'll be effort started in Senate within fortnight to plug loophole in labor law exposed by National Labor Relations Board decision last week upholding coercive picketing and secondary boycotts against WKRG-AM-TV Mobile (story page 79). Sen. Carl T. Curtis (R-Neb.) will offer amendment to Kennedy-Ervin labor bill (S 1555) which would outlaw use of labor pressures like those applied by International Brotherhood of Electrical Workers against WKRG advertisers.

Policy on oversight • In drafting stage is policy statement by FCC on manner in which it will treat applications involving sale or purchase of stations in any way mentioned in House Legislative Oversight Committee proceedings. Presumably intent is to handle such matters on case-by-case basis but with decisions contingent upon whatever action FCC might take in final adjudication.

Similar practice has been followed by FCC in past in making contingent grants to stations, whatever their nature. Some 30 stations were mentioned in one way or another during House Oversight proceedings and in each instance FCC has thrown into executive docket any matters affecting these stations.

Pay is possible • Purchase of WXIX (TV) Milwaukee from CBS by Gene Posner does not preclude possibility that station may eventually file application for pay tv test of Zenith Phonevision system there. While Zenith was known to have been interested in acquiring CBS o&o outlet (CLOSED CIRCUIT, March 16), there's still room for "rapprochement" between Zenith and WXIX, which plans to explore toll tv avenue.

There's also another gleam in WXIX eye: rights for telecasts of Braves road games in next couple of years, possibly in 1961. While uhf station eyes baseball privileges, it will concentrate on film programming (feature movies and syndicated properties, including bowling and wrestling), providing FCC approves sale to Mr. Posner, who is president of WMIL Milwaukee and prominent local real estate owner.

Test tube • Robert Saudek Assoc., production firm (*Omnibus* series and others), understood to be in expanding mood. Firm reportedly is considering acquisition of tv station, preferably in three- or four-station market of respectable but not biggest size. Although spokesmen would neither confirm nor deny report, one assumption is that station might be used to some extent as "laboratory" to test new program ideas.

Board seat • Added recognition to media at Benton & Bowles: Lee Rich, who heads media as vice president at agency, elected to board of directors. There'll be announcement to that effect soon.

Abroad in brief • Two FCC members —Chairman John C. Doerfer and Comr. T.A.M. Craven—are slated for overseas conferences in next few months. At behest of State Dept., Chairman Doerfer is on notice to head U.S. delegation to Tokyo conference having to do with cable project between Japan and U.S., but formal appointment is awaiting Congressional action on deficiency appropriation to be considered about May 1. Conference, probably to last about 10 days, formally would get under way May 4.

Comr. Craven, chairman of preparatory committee for International Telecommunications Conference in Geneva, which begins in mid-August, is understood slated for chairmanship of American delegation, but no formal announcement has been made pending State Dept. clearances. He would head radio conference, which would run August through September, with plenipotentiary conference to begin in October. Francis Colt deWolf, chief, Telecommunications Division of State Dept., is expected to head U.S. delegation to plenipotentiary sessions, which run from mid-October through December.

Radio World Wide • Exact date remains to be set, but that next meeting of stations interested in forming Radio World Wide (BROADCASTING, March 23, 30) will be held during week of April 13 in New York. It will deal primarily with setting up corporation and operating details, and it'll separate men from boys as far as new program venture is concerned: it will be open only to stations which have deposited earnest money toward incorporation. Herbert L. Krueger, WTAG Worcester, heads three-man organizing committee, which probably will be expanded.

In the air • It's conceded at Young & Rubicam that tv is good bet to be included in American Airlines' future media planning. Tv figured prominently in presentation Y&R made when seeking account and reportedly airline officials were "impressed." American is radio user, already has shown signs of considering tv too and Y&R appointment may be clincher.

New slate • New staff for House Legislative Oversight Subcommittee probably will be named this week by Rep. Oren Harris (D-Ark.), chairman. Only few members of 1958 staff remain, among them chief counsel Robert Lishman and investigator Oliver Eastland, with majority to begin work fresh within next two weeks. Many new staffers already have been hired but announcement has been withheld until consultation with Rep. John Bennett (R-Mich.), ranking minority member who spent Easter recess in Florida.

Commercials and Conelrad • Makegoods are occupying agencies and stations and their reps these days in preparation for broadcasting blackout from 11:30 to noon April 17 for Conelrad drill (BROADCASTING, March 30). General procedure is for stations and reps to let agencies know when commercials normally scheduled for that half-hour will be carried, get their ok or, if agency demurs, work out suitable alternative. Lloyd George Venard, for one, says make-goods for Venard, Rintoul & McConnell stations will have agency clearance by April 13.

Time is problem • This is what's behind report that Procter & Gamble may drop *Loretta Young Show* on NBC-TV: P&G seeks new time period for series it's programmed Sunday, 10-10:30 p.m. for several years. P&G would rather stick with show but definitely wants new slot. So far issue hasn't been resolved. Benton & Bowles, New York, is P&G's agency on show.

STORER BROADCASTING COMPANY

WEEK IN BRIEF

Mr. Gunn

'Shock treatment' radio sells Flako • Clinton E. Frank Inc., Chicago, found itself with a marketing problem for Quaker Oats Co.'s Flako which spot radio handled with flexibility and impact. The sales figures are secret, but the success story needn't be hid under anyone's bushel. So Buckingham W. Gunn, Frank's vice president and radio-tv director, tells about it in this week's MONDAY MEMO. Page **21.**

Ferment on tv allocations, spectrum • Heavy activity on tv allocations and the whole spectrum was underway in Washington last week: FCC struggles with tv's uhf-vhf problem, still can't resolve it. Kenneth A. Norton, propagation specialist, resurrects 1949 plan, calls for closer vhf spacing. Plan of Presidential Advisory Committee finally made public. Mobile users push for more spectrum space mostly at expense of tv; broadcast allocations defended by radio-tv spokesmen. Page **35.**

Tv sells telephones • Viewers out-buy non-viewers by three to one, sponsor tells ANA research group in case-history report. Workshop also hears Schachte admonish advertisers to face fact that advertising effectiveness cannot be measured precisely in dollar results. Page **48.**

American Airlines lands • New agency for $6 million-plus account is Young & Rubicam. Page **50.**

Coffee time at JWT • Nation's No. 1 radio-tv billing agency is appointed by Chase & Sanborn for regular and instant coffees. Account moves from Compton July 1. Page **50.**

NAB convention pulse • Survey of delegates shows three out of five approve limiting exhibits to broadcast equipment and shift of film and service firms to hospitality suites scattered around convention hotel instead of bunched as in past years. Page **56.**

Networks off and running • Gross income increases 5% in January for tv networks. Each network shows gain. Page **62.**

Responsibility of U.S. journalism • Panel of editors and writers explores a wide variety of issues touching upon responsibility of mass communications media to the public and concludes there is room for improvement. Page **69.**

Border trouble • KFMB-TV feud with XETV (TV) Tijuana, Mexico, erupts again as San Diego outlet take series of actions against Mexican tv outlet. Page **79.**

Educational tv's own network • John F. White, head of National Educational Television & Radio Center, predicts regional hookups will be connected and tv tape recording will supply new program facilities. Page **81.**

Radio-tv network showsheets • The quarterly rundown of the three tv networks and four radio networks and details of all programs and sponsors. New program cycles and sponsors starting during the next quarter are shown, too. The showsheets are divided into one-hour segments, morning, afternoon and evening, for easy reference. Page **94.**

Miami ch. 7 case reopened by FCC

FCC Friday (April 3) made it official in announcing that it wants to take another look at Miami ch. 7 case as result of testimony before House Legislative Oversight Subcommittee (CLOSED CIRCUIT, Feb. 23). Commission announced that, by its own motion, case was being reopened to determine (1) if any commissioner should have disqualified himself; (2) whether anyone attempted to influence FCC; (3) whether any party in proceedings "directly or indirectly secured, aided, confirmed, ratified or knew of any misconduct or improprieties," and (4) whether the grant is void and whether any applicant should be disqualified.

Biscayne Tv Corp. (Niles Trammell, John Knight and James Cox) received 1956 grant over three competing applicants, East Coast Tv Corp., South Florida Tv Corp. and Sunbeam Tv Corp. Biscayne's WCKT (TV) has been operating since July 1956.

FCC said hearing would be held at future date before unnamed examiner because of testimony before Oversight Committee "which made reference to possible *ex parte* representations made during the course of the Miami ch. 7 proceeding." Justice Dept. was invited to participate as *amicus curiae*.

Ch. 7 grant is fourth case reopened as result of testimony before House subcommittee. Hearings already have been held in Miami ch. 10 and Boston ch. 5, with hearings announced for Orlando, Fla., ch. 9 (see page 80). Mr. Knight testified before House body during its investigation of Miami ch. 10 grant (BROADCASTING, March 24, 1958). His testimony was on this case, however, and not on ch. 7.

FCC refused to approve Biscayne sale of WCKR Miami to Sun Ray Drugs because of allegations made before Oversight Committee. Sun Ray since has withdrawn application to purchase radio outlet.

Westinghouse elects

Election of Mark W. Cresap Jr., president of Westinghouse Electric Corp., Pittsburgh, to additional position of chief executive officer, announced Friday by Westinghouse board of directors. Gwilym A. Price continues as board chairman and member of important committees of board and management. Mr. Price last week was elected president of U. of Pittsburgh's board of trustees. Other Westinghouse board announcements: re-election of E. V. Huggins and John K. Hodnette to vice president and chairman of executive committee, and executive vice president, respectively.

Russell B. Read, former assistant treasurer, named treasurer.

Mack trial Tuesday

Trial of former Comr. Richard A. Mack and Miami attorney Thurman A. Whiteside on criminal charges of conspiracy involving the grant of Miami ch. 10 to National Airlines due to start tomorrow (Tuesday) before U.S. District Judge Burnita S. Matthews. Defense motions to continue trial, change venue, take deposition, and for severance being argued today (Monday) as is prosecution motion to quash defense subpoena on Attorney General William P. Rogers requiring production of certain papers. Both Mr. Mack and Mr. Whiteside were indicted by federal grand jury following disclosures of alleged back-door pressures by House Oversight Legislative Committee last year.

Tv shopping center

"Today's one-stop retail shopping center is turning into a one-stop tv commercial center," Howard P. Abrahams, vice president and retail sales director, TvB, says in speech prepared for delivery today (April 6) before National Retail Merchants Assn. sales promotion convention at Eden Roc Hotel, Miami Beach. With video tape, Mr. Abrahams said, "retail commercials are much easier to produce." Tv stations can move cameras "right into your store, 'shoot' the merchandise and beam the signal right back to . . . the station. . . ." Mr. Abrahams also presents brief video tape session previously recorded in New York and transferred to film for NRMA's meeting. In it, Mr. Abrahams and three other TvB executives discussed virtues of tape for retailers, national advertisers, stations and agencies.

Transoceanic tv rumored in London

Nobody in Washington will admit that it's true, but *Boston Globe* in copyrighted story from London said Friday that negotiations now are underway between London and Washington to establish live transatlantic television circuit to cover Queen's visit to U.S. in June. *Globe* correspondent said program will originate in America and be transmitted overseas via satellite put into space by U.S.

Spokesman at National Aeronautics & Space Administration said NASA knew nothing of plan. He referred to 100-ft. passive reflector balloon scheduled to be thrown up this fall, but pointed out this will be months after June. Dept. of Defense spokesman also said no knowledge of plans; Defense's Advanced Research Projects Agency has plans to put up active repeater soon, but information is that this will utilize only narrow bandwidths. All three tv networks knew nothing of plan or negotiations. AT&T spokesman said company was not engaged in any work on transoceanic tv at present time.

But new method of transoceanic communications has been announced by Navy—use of moon as passive reflector to bounce radio communication signals between Washington and Pearl Harbor. Information on whether link now being used or when system gets underway was refused, Navy claiming information is classified.

Newscasts & Sec. 315

Sen. Gordon Allott (R-Colo.) yesterday (Sunday) was to announce plan to introduce measure exempting newscasts from equal time provision of Communications Act. Sen. Allott hit FCC 4-3 decision in Lar Daly case (BROADCASTING, Feb. 23).

"President Eisenhower has aptly described this action," senator said. "He called it 'ridiculous' (BROADCASTING, March 23). Such a policy, maintained on a broad basis applicable to all news media, would make democracy as we know it, unworkable. . . . I am determined that this part of the law be modified. . . ." Colorado Republican plans to put his bill in hopper tomorrow (Tuesday). He said it will be companion measure to two bills pending in House.

AT DEADLINE

CONTINUED *from page 9*

Daytime filing May 8

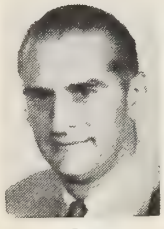
NBC received "half a loaf" Friday (April 3) in request for extension of time from FCC to file comments on proposal to liberalize operating hours of daytime stations during winter months. Network asked for extension from April 8 (Wednesday) to June 12. Commission granted extension, applying to all parties who plan to comment, only to May 8. Rulemaking would permit daytimers to operate from 6 a.m. or local sunrise (whichever is earlier) to 6 p.m. or local sunset (whichever is later). Daytime Broadcasters Assn. opposed NBC request.

• Business briefly

• Revere Camera Co., Chicago, starts saturation spot tv test campaign in four major markets April 20 for eight weeks to demonstrate new EE-127 electric Eye-matic and Cine-Zoom 8mm movie cameras. Announcements to range between 10 and 30 per week on at least two stations in each city. Spot tv to be extended to other markets after introductory drive, with possibility of later network tv purchase. Agency: Keyes, Madden & Jones, Chicago.

• Bakery Div. of Safeway Stores for its Roxbury candies, Jell-Well desserts, Fluff-I-Est marshmallows, appoints Erwin Wasey, Ruthrauff & Ryan, S.F.

• Louisiana Sweet Potato Adv. Commission reappoints Fitzgerald Adv., New Orleans.



WEEK'S HEADLINERS

ALVIN KABAKER, vp and director of radio-tv for Compton Adv., Los Angeles, appointed to new post of general manager of agency's Los Angeles office. Effective immediately, all departments there will come under his management and direction. Mr. Kabaker is veteran of 22 years in agency field and, before joining Compton three years ago, had been with Dancer-Fitzgerald-Sample in Chicago, Los Angeles and New York for more than 18 years.

ALAN D. COURTNEY and CARL LINDEMANN JR. elected NBC-TV programming vp's. Mr. Courtney, director of nighttime programs since September 1957, has been named vp, nighttime programs, and Mr. Lindemann, director of daytime programs since April 1957, named vp, daytime programs. Mr. Courtney joined NBC in L.A. in 1947 and five years later transferred to NBC Station Relations Dept. in N.Y. His later duties have been as sales and programming administrator for *Today, Home* and *Tonight,* administrator for participating programs and executive producer of *Steve Allen Show*. Mr. Courtney was general manager of Metropolitan Theatres in L.A. before going to NBC. Mr. Lindemann's network positions since he joined in 1948 included associate producer of *Kate Smith Hour,* senior unit manager of *Home* and business manager of Tv Program Dept. Mr. Lindemann earlier was with Foote, Cone & Belding.

Mr. Fry

Mr. Burton

G.T.C. FRY and ROBERT R. BURTON elected senior vps, account management, Kenyon & Eckhardt. Mr. Fry, formerly vp in charge of K&E's Detroit office, continues there. Mr. Burton, who has been vp in charge of Chicago office, will join K&E's New York headquarters in May. Moving into Chicago managerial post on May 4 is ROBERT B. SHIREY, now vp and account supervisor in New York. STUART SIEBERT, vp and account executive, appointed assistant manager in Chicago and assigned responsibility for new business development. Mr. Fry had been sales promotion manager of CBS' Detroit office and national sales manager of ABC before he joined K&E in 1950. Mr. Burton has been with K&E since September 1957 as vp and manager of Chicago office, coming from Needham, Louis & Brorby where he had been vp and account supervisor in Chicago. Mr. Shirey joined K&E five years ago and before that was with J. Walter Thompson. Mr. Siebert, with K&E since 1956, had been with Weiss & Geller in Chicago.

Mr. McGavren

Mr. Quinn

DAREN F. MCGAVREN, president of McGavren-Quinn, station representative, announces change of firm name to Daren F. McGavren Co., following resignation of DONALD J. QUINN, executive vp. Mr. Quinn, co-founder of M-Q in 1956, joins WNTA - TV Newark as general sales manager. He headed station rep's Los Angeles office for two years and later was executive vp, headquartering in New York. Other McGavren changes: CY OSTRUP moves from Los Angeles to San Francisco as manager; CHARLYE KING, assistant to president, fills newly-created post of West Coast business manager; WALTER LAKE continues as Los Angeles head with JACK DAVIS joining staff to replace Mr. Ostrup.

ANTHONY S. GEE, media group supervisor at Erwin Wasey, Ruthrauff & Ryan, New York, named media director of agency succeeding HARRY D. WAY, who was appointed executive vice president in charge of EWR&R's New York office last month (BROADCASTING, Feb. 23).

HARRY E. WHOLLEY, vp, Bryan Houston Inc., N.Y., to American Home Foods (subsidiary of American Home Products Corp.) as vp of advertising. WARREN KRATZKE promoted from assistant advertising manager to advertising manager, American Home Foods. At Bryan Houston Mr. Wholley supervised advertising and merchandising of Nescafe and several Colgate products. Prior to his six years there he was merchandising manager of soap products for Lever Bros. Earlier he spent eight years with Swift & Co., where he was district manager.

ROLLAND V. TOOKE appointed executive vp of Westinghouse Broadcasting Co. effective May 1. Since 1956 he has served as WBC's Cleveland area vp in charge of KYW-AM-TV. Mr. Tooke in 1945 was made assistant general manager of WPTZ (TV) Philadelphia (now WRCV-TV), rising to general manager in 1953 when WBC bought station from Philco Corp.

MONDAY MEMO

from **BUCKINGHAM W. GUNN,** *vice president and radio-tv director, Clinton E. Frank Inc., Chicago.*

'Shock treatment' radio sells Flako

We believe in radio.

More than half of our agency's gross billing is in broadcast media and 20% of that billing is placed in radio alone. We are making radio work for most of our clients. Let us give you one example.

A little over a year ago we were given the opportunity to advertise a new line of grocery store products which recently had been purchased by one of our clients, Flako Products Div., Quaker Oats Co. Historically, these products were advertised in a hit or miss sort of way: with small space in many newspapers, scattered radio spots, a few magazine insertions, a little outdoor, etc. The products were of excellent quality, but such scatter-shot advertising won them no real importance in the market place. Additionally, they were now facing strong competition from similar product lines supported by large advertising budgets.

The Challenge • This was our challenge: to successfully advertise these products in one half of the country with a limited budget for 26 weeks and reach as many people as often as we could. This is no small task for a limited budget!

We knew that the success or the failure of the advertising would be largely dependent on the media selected for this unusual job. Guesswork was out. We had to be right in our media selection. We set up a list of the most desirable qualifications against which we would judge various media:

(1) Our medium must adapt itself to the marketing program of 40 selected markets in the eastern half of the country. (2) Our medium must reach the primary audience of housewives, who control food store purchases. (3) The medium selected should give products the opportunity to be as dominant as possible. (4) The medium, if possible, should provide coverage outside the metropolitan areas of the selected markets.

(5) The medium should lend itself to forceful presentations of appetite appeal. (6) The medium should help the establishment of strong brand awareness. (7) The medium should be highly flexible. (8) The medium should have strong merchandising impact with brokers and the trade.

As we analyzed various media against these eight desirable qualities, it became apparent that many measured up in certain respects, but fell down in others.

For instance: national magazines, network tv and network radio did not properly fit the marketing program. Grocery store magazines, while local buys in theory, were better and less expensive buys on a national basis. Sunday supplements reach the consumer just *after* the big shopping days instead of before.

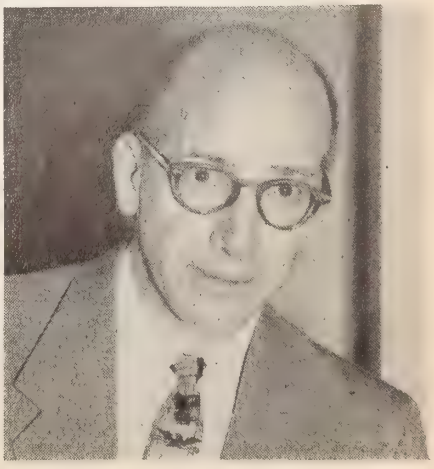
Newspapers, though local and timely, would not make the most of appetite appeal in black and white reproductions and could not give our products the wide extra coverage outside the metropolitan areas. ROP color in daily newspapers would give dominant impact, it's true, but would not give us the repetition we needed. Spot tv could be exciting and highly merchandisable, but would be too costly for our budget.

The Method • And so we enthusiastically selected spot radio: because it it local, because it reaches an audience dominated by women, because it is inexpensive, because it gives extra coverage outside metropolitan areas, because it is flexible, because it lends itself to appetite-appeal selling and because it can be effectively mechandised to food brokers and the trade.

Having carefully selected radio as our medium, we concentrated on developing a highly dramatic use of that medium to do our job. We created an entirely new concept in concentrated radio saturation. We called it "shock treatment." In over 40 markets, on one or more stations in each market, we purchased a commercial announcement every 15 minutes, between 9 a.m. and 4 p.m., on Thursdays and Fridays, for a period of 26 weeks. We knew that in order to give our products the importance needed and deserved, we must dominate our markets with one important medium. Did it work?

The Results • Here is what the "shock treatment" approach gave to our client's advertising:

(1) Complete dominance in the market on the stations that housewives listen to most. (2) Concentration on the days that influence most food sales. (3) Concentrated advertising during the hours most housewives are listening. (4) Impact and selling power that only continuity and repetition can give.



(5) A wide daytime coverage that reached outside the metropolitan areas. (6) Selling announcements that carried the endorsement of local personalities that housewives could believe in. (7) Memorable jingles for strong brand identification. (8) A dramatic "off beat" merchandising approach to the trade.

With respect to the unusual merchandising approach, we gave each of some 80 food brokers a transistor radio with a Flako display sign. They were asked to take along the radio and sign when they called on their customers and they were able to tune in Flako spot announcements on an average of every 15 minutes during actual calls. Giving them the transistor radios—for sales calls and their own personal use—generated a good deal of enthusiastic response.

The Exclusive 'Plus' of Radio • Only radio could have done this job with the money available. Only radio would have been made to work so hard.

Sales figures must be well-kept company secrets, but let it be said that our client was so happy with the results of this radio effort that a new radio saturation plan was developed for the second year's advertising and radio alone was responsible for wider distribution and increased sales.

We know that radio works. We have proved it!

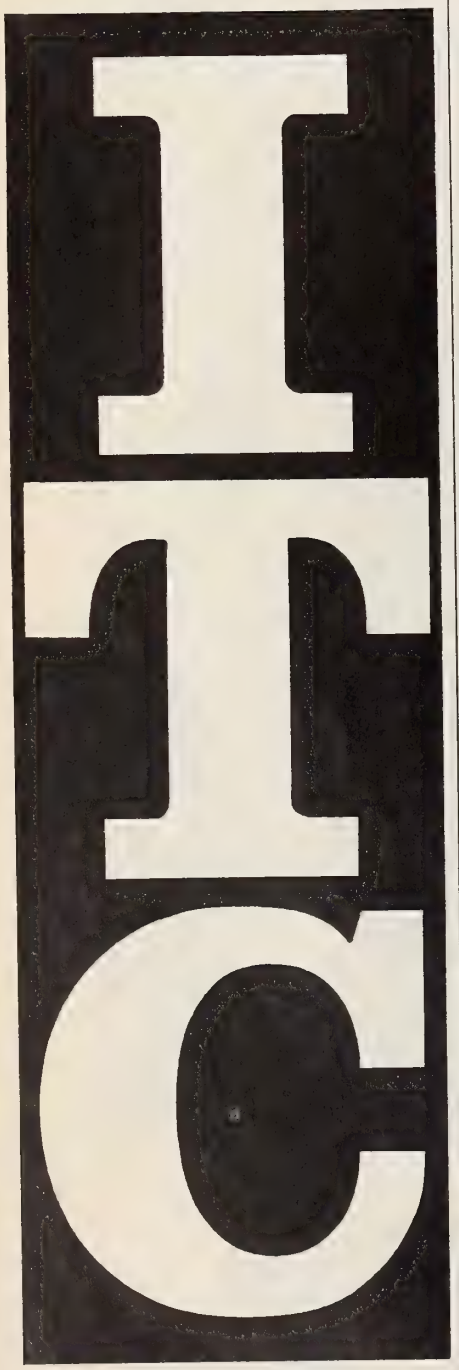
A graduate of the U. of Illinois (1933), Buck Gunn served first with J. Walter Thompson Co., Chicago, then moved to WGN Chicago as program director from 1943-48. He was supervisor of radio-tv for Foote, Cone & Belding next for six years, joining the Frank agency in 1955. Under his aegis are 15 of Frank's 17 accounts (including Formfit Co., Quaker Oats Co.-Flako products, Reynolds Metals Co., Hamilton Beach and Toni Co.'s Pamper, Tame, Bobbi products). Among Frank's new accounts: Bissell Carpet Sweeper Co., Curtiss Candy and Brownsberry Ovens. Mr. Gunn has three children, Giles 21, Charles 5 and Caroline 4.

...and he had a microphone." Ray Newby (right) in 1959 recalls how he, at the age of 16 and Charles D. Herrold founded a radio station in San Jose, California fifty years ago. Credit to Herrold as the originator of broadcasting is many years overdue. While other experimenters were using their wireless equipment for point-to-point communication, Herrold thought of radio as an entertainment medium for a mass audience. Mr. Newby recounts, "Folks with crystal sets in San Jose and for miles around at first were amazed to hear voices instead of code. We'd go on Wednesday evenings and broadcast voice and music for a half hour. And sometimes we could run longer if the microphone and everything didn't get too hot."

That 15-watt station which Herrold started back in 1909 has continued, through KQW, to the present 50,000 watt KCBS in San Francisco. And, Herrold's dream to "broadcast" to a mass

"I bought a one inch coil...

audience has become a striking reality. Today, KCBS is heard by eight out of ten Northern California families each week.



1909 The first radio broadcasting station in the world.
1959 The Bay Area's first station in the world of entertainment.

(Historical data from "Broadcasting's Golden Anniversary" by Gordon Greb, Assistant Professor, San Jose State College and published in the Journal of Broadcasting University of Southern California, Winter Edition, 1958-59. Reprints on request.)

Attention-getter

EDITOR:

For years I have been writing "Monday memos" to the staff and have always felt that like most memoranda from the front office, nobody pays too much attention. However, now that the MONDAY MEMO has appeared in your March 30 issue (page 21, "Supporting the media buy boosts sales"), my faith in human nature has been re-established.

From the comments already received, I am convinced that there are readers aplenty and all seem to react quite favorably. . . .

Walter Damm's 'umbrella'

EDITOR:

After thoroughly digesting BROADCASTING of March 16, I could not help but think back to 1949 when the original Tv Assn. amalgamated with NAB.

It was at this time that I was promoting the "umbrella" concept which you so justly refer to in the lead editorial.

True, it takes time for things to come about. But it seems to me, and always has, that in the radio and television business it takes longer.

Here is to your continued efforts to expound the philosophy of the "umbrella" theory.

Walter J. Damm
2470 Treasure Lane
Port Royal
Naples, Fla.

P.S. I was of course considered all wet at the time mentioned above by most people in the industry.

Convention coverage

EDITOR:

As usual, BROADCASTING did an outstanding job in covering the annual NAB convention. After thoroughly reading the March 23 issue I feel well-informed on all the happenings in Chicago, and the book is certainly the next best thing to being there . . .

Oscar Elder

U.S. Senate

Views about the news

EDITOR:

Three cheers for Phil Wilson's view of reporting the news in depth (March 16, page 26).

We at WPEL firmly believe in a meaningful presentation to let our listeners discern the important, genuine news, not the superfluous conglomeration of odds and ends as is heard on many Top Forty stations.

M. Clare Patterson
News Director
WPEL Montrose, Pa.

EDITOR:

Concerning "News is No Circus" by Phil Wilson, news director, WANE-AM-TV Ft. Wayne, Ind., this "news show" is absolutely the correct title for a Top Forty station. It is an informative show and in accordance with the modern trend of programming.

First, it takes an intelligent news director to put together such a news program instead of the "run of the mill" type straight newscast that audiences are tired of listening to. A so called "circus" news show captures the discriminating type audience and is not a dull commodity.

And, too, there is another difference of the two types of radio stations. Some are satisfied with dining on beans; some prefer steak. Here in our area we are eating steak because we have an audience to our top 100 format and "circus-type news" along with the extra and memory tunes. If they (the listeners) didn't like this type programming we

The everyday miracles of oil

YOUR TWO GALLONS ARE ON THEIR WAY! Every day, every American uses an average of two gallons of oil products. You could carry that much home in a bucket. But—carrying two gallons for *every* American *every* day comes to over a *hundred billion* gallons a year. That takes enough tankships to outweigh the U. S. Fleet... enough tank cars and trucks to reach from Boston to Houston... enough pipelines to go eight times around the world. Quite a job! And all part of the "everyday miracles" oilmen do for you every day.

Helping to build a better future... **Standard Oil Company (New Jersey)** Esso

One of a series of messages appearing monthly in newspapers from Maine to Louisiana—the area served by Esso Standard Oil Company. Other Jersey Standard affiliates and their distributors market elsewhere in the United States and 134 other countries and dependencies.

How did it get so late so early?

Advance reservations are running heavy for the Storz Stations' Second Annual

INTERNATIONAL RADIO PROGRAMMING SEMINAR and POP MUSIC DISC JOCKEY CONVENTION

May 29-30-31, Americana Hotel, Miami Beach

Reason? Tremendous success of last year's Kansas City confab. Almost before that one adjourned, reservations started coming in for 1959, site unseen. Now that news of city, site, hotel and program is out, the mail turned heavy. Suddenly it's late—almost too late. Space in the seven hotels of Bal Harbour is going fast. Soon we'll have to berth you elsewhere on the Beach.

So don't be shut out—rush the registration form below to Bill Stewart . . . convention coordinator for the Storz Stations.

MEET AND HEAR: Harold Fellows, President, NAB

Negro study questioned

EDITOR:

I would like to call your attention to the article, "OK Group Negro study presented," which appeared on page 144 of the March 16 issue. . . . Dr. Henry Bullock of Texas Southern U. stated in essence that the buying habits of Negro purchasers are apparently peculiar to the race. . . . Dr. Bullock bases his conclusions on a survey of 150 Negro families and 50 white families. . . . A sample of 150 out of a 14 million population hardly seems adequate to be typical or representative. From my observations of Detroit Negroes, our market preferences are no different qualitatively from those of any other ethnic group. Obviously there are economic factors that might cause quantitative variations. . . .

I further submit that it is partly because of such statements as those uttered by Dr. Bullock, many of us who are college trained in radio and tv cannot find employment, whereas our white classmates can. Here in Detroit it is virtually impossible for any of us who have university training in radio and/or tv to get jobs. . . .

It is my belief that trained Negroes are not used because the "Negro audi-

In the squared circles of prizefighting, the 8th Marquess of Queensberry gets credit for establishing authoritative standards upon which today's rules of boxing are based. More competitive than anything this 19th Century Englishman ever knew, however, is our business of broadcast advertising. To enter the ring of television or radio, you have to **know** what you're doing – or else. That's why so many busy people look to **BROADCASTING YEARBOOK** as the authoritative standard for latest facts about these twin media (and **keep** looking, all year 'round, whenever they need information). The 1959 **BROADCASTING YEARBOOK** soon goes to press, packing a power-punch of data between its covers that will serve the needs of over 16,000 subscribers in broadcast advertising. If **you** have some facts of your own for them, **your** message will enjoy a guaranteed gate of profitable attention month after month. There's still time before the first round bell: deadline for proofs, July 1; final deadline, July 15. **Call or wire collect to reserve space.**

BROADCASTING
THE BUSINESSWEEKLY OF TELEVISION AND RADIO
1735 DeSales Street, N. W., Washington 6, D. C.

ence" supposedly demands a special type of program appeal. Apparently the trained Negro does not have this appeal. . . . I, however, subscribe to the principle of individual differences as being the most important, general factor in human behavior. I cannot accept the theory that mass media audiences differ racially. . . .

Walter E. Brown
Wayne State U.
Detroit

Past may be prologue

EDITOR:

. . . WFHA-FM believes that the time has passed when the American family is satisfied to sit before a tv screen just because it is there to be peered at. We believe further that network radio, as known in the halcyon days, is also a thing of the past. . . . [But] we believe that "network-type" programming of the type [William] Hayward speaks of (page 26, March 9) is definitely something to be considered on a local level. With more and more of the audience looking for something other than the typical tv fare or "music and news," it is time for radio to offer something "new," no matter that it may be something that's been used before.

. . . WFHA-FM has made arrangements to program the same type programs that Mr. Hayward speaks of so glowingly . . . It is our firm conviction that we are instituting a "new" system of programming that will soon become the standard of our type operation.

Raymond H. Boyce
Program Director
WFHA-FM Red Bank, N.J.

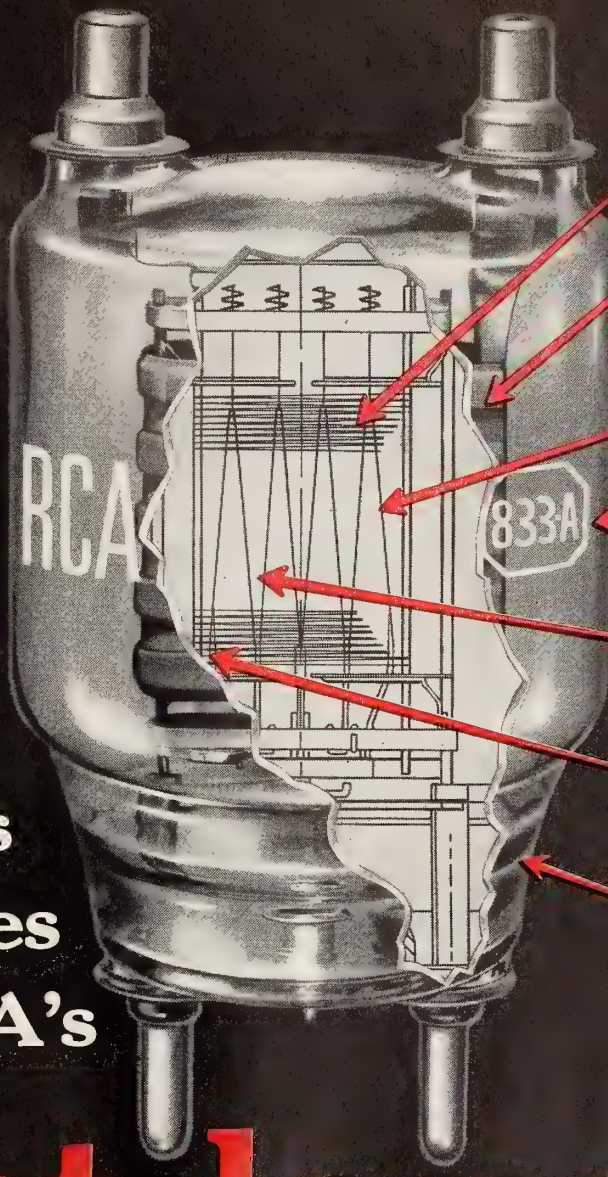
'Air-opinions'

EDITOR:

We have come up with a different term for our on-the-air expressions, usually called editorials. Someone was fussing about using that term. We are calling them "air-opinions." It is put on the air in this manner:

REG. ANNCR: Here is one of KFMJ's *air-opinions* for today.

FEATURE VOICE: (gives opinion).



Lawson Taylor

It's constant attention to little details that makes RCA-833-A's last longer

GRID...Zirconium-sprayed to minimize grid emission.

PLATE..."electron-scrubbed" to remove minute traces of gas, from the plate, and zirconium-coated to help maintain superior vacuum and provide greater heat radiation.

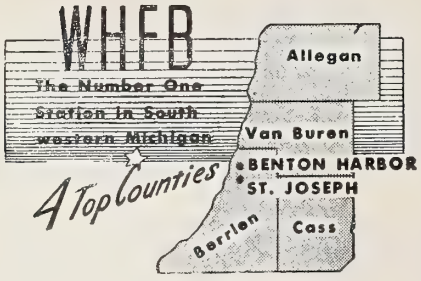
FILAMENT..."double-flashed" for high emission reserve, longer life.

BULB...special hard glass featuring extra low power losses.

FILAMENT..."double-flashed" for high emission reserve, longer life.

GRID AND PLATE...vacuum-fired to reduce gas evolution during tube life.

ENTIRE TUBE...spot-knocked at tens of thousands of volts to provide high dc resistance, and thus low leakage between terminals.



Inside the envelope of this famous power triode are incorporated many modern techniques of power tube manufacture. Some were basic to the "original" design. Many others have been adopted over the years—in line with RCA's never-ending effort to increase tube reliability and operating life.

But whether these techniques are old or new, this fact is sure:
every one pays off for you in lower tube cost per hour of transmitter operation.
A typical example, this, where constant attention to tube engineering details makes the better tube!

Your RCA Industrial Tube Distributor handles RCA Power Tubes for every broadcast and TV station application. He's standing by to serve you.

HOW TO GO ABOUT EXPANDING TV

FCC works toward plan to add some stations soon, more later

The FCC tackled the difficult tv allocations problem twice last week and, as far as can be learned, still has not been able to move off dead center.

The Commission met all day Monday and also on Thursday morning. No meeting of minds took place.

Further meetings are scheduled. An implied three week deadline was understood to have been set by FCC Chairman John C. Doerfer.

As near as could be ascertained the seven FCC members could not get together on the general outline of where tv is going—either on a long range basis or on an interim foundation.

A sentiment seems to be developing, it is understood, to agree that nothing definitive can be accomplished on the tv allocations matter until it has been determined whether or not the military services will trade some vhf space for other areas of the spectrum under FCC control.

Know in Three Months • The position of the military, it is hoped, will become known in two or three months.

If a trade is agreed upon, an all vhf tv system seems certain. The hope is to secure 38 channels contiguous to the present ch. 13 (210-216 mc), to establish a 50-channel tv system.

Failing that, the Commission seems to be at an impasse. Only FCC Comr. Robert E. Lee publicly has spoken out in favor of moving tv to uhf.

Comr. Robert T. Bartley reportedly has indicated that he might not be be adverse to moving to uhf by degrees.

At the other extreme are Chairman Doerfer and Comrs. T. A. M. Craven and John S. Cross. All three feel that a move to uhf would be disastrous.

Chairman Doerfer has from time to time made known that if no other solution is in sight, he might consider relaxing some of the present stringent regulations to permit additional channels to be assigned to troublesome areas —particularly those with less than three comparable assignments.

Cross' Thoughts • Comr. Cross presented his ideas to the FCC last month. In a communication to his colleagues, Comr. Cross suggested that the Commission accept the idea of a 12-channel vhf tv system, that some standards be relaxed to permit additional assignments to be made, and that uhf be used for translators and boosters to broaden service.

The Arkansas Democrat made no bones about his doubt that the Commission could secure additional vhf channels from the military. He said:

"Swapping some existing uhf and some existing vhf spectrum space with the military services so as to permit 25 to 50 contiguous tv channels (starting with ch. 7) involves replacing hundreds of millions of dollars worth of existing military (and allied) electronic equipment. It also has receiver compatibility disadvantages. Moreover, it involves conflicts with existing international agreements to which the United States is a party. . . . Even if the swap could be arranged, and the international agreements changed, I see no possibility of any appreciable relief from this proposal for at least 10 years. I have therefore abandoned this proposal except as a very long range possibility."

He continued:

"I therefore find myself in the uncomfortable position of being convinced that 12 vhf channels are too few; that it is too late now to change from vhf to uhf, and that the proposal to have 25 to 50 contiguous channels (starting with ch. 7) offers no appreciable relief for at least 10 years. . . ."

The answer, according to Comr. Cross, is to recognize as basic that the present 12 vhf channels "offer the only immediate opportunity" for providing the maximum amount of tv service to the maximum number of people. He suggested that the Commission work toward accomplishing two objectives: (1) multiple services to concentrated populations and (2) some service to sparsely settled areas.

U's for Small Towns • In discussing the use of uhf for small town and perhaps rural service, Comr. Cross suggested that maximum radiated power be limited to 10 kw, that separations be reduced and that translator operation be permitted on all uhf channels. He also suggested that uhf assignments be deleted from the rules and that grants be made on an application basis.

Comr. Rosel H. Hyde is believed still clinging to the hope that a combined vhf-uhf allocation—although not intermixture—can be made to work.

Comr. Frederick W. Ford generally has expressed himself as withholding a decision one way or the other until it is learned definitely whether or not extra vhf channels can be secured from government sources.

The tv allocations presentation on which the FCC is working is essentially a status report to the Congress. The Commission has been informed that when it is ready it will be asked to appear before the Senate Commerce Committee.

Hill Beckoning • This call may be coming shortly. Back with the Senate committee for the next two or three weeks is Kenneth Cox, Seattle attorney, who has acted as special tv counsel for the group. Mr. Cox is working with the committee on a matter unrelated to broadcasting.

Mr. Cox still has to submit his report on tv allocations to the Senate committee. He has let it be known that he does not intend to submit this document until the FCC has taken some action. He is also said to be waiting for answers to questions submitted by the committee to the FCC last year.

Government engineer wants more vhfs squeezed into system

A long-range plan for better management of the spectrum

Other users eye tv space, but telecasters argue to keep it

A PLEA FOR SQUEEZING IN MORE V'S

Bureau of Standards expert says shorter separations are answer

The government engineer whose calculations led to fm's present placement in the spectrum urged the FCC last week to create more vhf tv stations by reducing the distances between them.

Dr. K. A. Norton, who is now chief of the radio propagation engineering division of the National Bureau of Standards Central Radio Propagation Lab at Boulder, Colo., told the FCC it ought to radically cut down separation mileage between tv stations on the same channel.

This move would take care of the tv allocations problem, he stated in a March 27 letter addressed to FCC Chairman John C. Doerfer. The letter also was signed by Dr. Norton's three section chiefs (J.W. Hebstreit, P.L. Rice and R.S. Kirby).

Dr. Norton, as an FCC propagation engineer, was the architect of the FCC fm allocation of 1945 which put the fm broadcasting system in the 88-108 mc range it now occupies. In 1949, having moved to the Bureau of Standards, he and associates submitted recommendations like those resubmitted last week for distribution of tv channels.

AMST Attacks • The recommendation was immediately attacked by Lester W. Lindow, executive director of the Assn. of Maximum Service Telecasters. Mr. Lindow charged that the Norton suggestions were precisely the same as these advanced in 1949; "a proposal which was repudiated because it was unsound and impractical."

Mr. Lindow continued:

"They themselves conceded that television service would be concentrated around the transmitters of television stations, and that metropolitan areas would get practically all of the service at the expense of rural areas, suburban areas and other outlying districts.

". . . today some 99% of the families in the United States are able to enjoy television service. Under the proposal of these people this service would be cut to ribbons."

FCC Chairman John C. Doerfer was more astringent in his reaction to the Norton idea. He commented:

"There is an ideal of engineering symmetry, and it looks awfully good on paper. But the resolution of the tv allocations problem is not only a technical matter, it also involves economics, social philosophy and overall policy. The Commission must meld the engineering dreams into practicality."

Dr. Norton's letter began with a reference to the TASO report, submitted to the FCC last month at the NAB convention (BROADCASTING, March 23, 16).

This report represents only a majority opinion, Dr. Norton said, and this is its "strength and a weakness."

The Boulder scientists made three reservations to the findings of TASO:

(1) Methods for defining service area of tv stations are confusing. (2) Claim of the development of a useful prediction method are based on a study of the correlation between the observed and the predicted field strength variations without regard to absolute values; and (3) the finding that CRPL transmission loss prediction formula for specific terrain conditions does not increase the accuracy of prediction relative to universal curves sufficiently to justify the extra labor.

Then the writers turned to what they call the "proper understanding of technical principles of allocation."

Refers to 1949 • The Norton letter refers to the 1949 ad hoc committee report and an addendum written in 1950, in which it was recommended that the FCC should attempt to "maximize the service area per channel rather than maximize the service area per station."

This still seems the correct procedure to adopt, the government radio engineer stated.

Using the information then available the conclusion was reached that stations could be co-channel spaced as little as 110 miles apart and for adjacent channel as little as 40 miles apart. With the TASO information at hand, the letter continued, the FCC could "simply adopt" a reasonably small minimum spacing (e.g., 100 miles) between high power co-channel stations as a basis for a technically efficient and yet administratively convenient method of allocation. Even spacings closer than 100 miles might sometimes be justified, Dr. Norton stated.

Dr. Norton: his instrument, a shoehorn

The present FCC allocation principles of maximum power, maximum antenna height and required spacing appear to be wasteful, the Norton letter stated. This cannot be afforded any longer where the demand for other legitimate and important uses is so great, he said.

Today's Standards • Present FCC television standards require vhf co-channel stations to be no closer than 170 miles in Zone I, 190 miles in Zone II and 220 miles in Zone III. Spacings for uhf co-channel stations are less than these separations. Power and antenna height maximum are based on bands of frequencies—chs. 2-6, 100 kw at 1,000 ft.; chs. 7-13, 316 kw at 1,000 ft., and chs. 14-83, 5,000 kw at 2,000 ft. Antenna heights in Zones II and III—the western regions and the gulf coast respectively—may be 2,000 ft. with these powers.

The Norton letter continued:

"We believe that the trouble the FCC has been having in the allocation of television channels arised from its desire to satisfy everyone, and a tendency to lean too heavily on the advice of industry engineers who obviously have their own selfish interests to protect."

The present allocation was based on the FCC desire to serve rural televiewers, the letter stated, but this is "fallacious". The answer, Dr. Norton said, is that "you can't satisfy everyone—only the majority." Since the majority of people live in metropolitan areas, he continued, rural televiewers will necessarily suffer interference if spacings are shortened.

The move of tv to uhf not only would be economically unsound, Dr. Norton said, but it would be an inefficient solution since the demand for channels will never be wholly met using present wide spacing between tv stations.

Vary Powers • The CRPL letter advocated the use of varying powers for individual stations and also the use of low power vhf translators and boosters. This would encourage "many thousands" of such translators and boosters in the less populous regions. It concluded:

"We believe there is a good chance that all of the really important and economically feasible television requirements of this country can be accommodated on the present 12 vhf channels by

permitting closer spacing between the stations. This will lead to an actually greater coverage of area per channel, and to a very large number of additional stations."

If additional channels are needed, these can come from the present vhf band, Dr. Norton said.

The present uhf band should be abandoned for television use, he stated.

This same approach, also by Dr. Norton, is contained in the Fourth Summary Annual Report of the Boulder Labs. for the year ending June 30, 1958. In it the radio propagation engineering chief declared that the information on which the FCC based its tv allocation was biased. These data were obtained at receiving sites in open terrain, especially selected to be representative of smooth earth, the report said.

However, data obtained in a series of randomly chosen sites in Ohio actually used for television reception showed that tv stations could be placed about 25 miles nearer to each other.

NBS-CBS Measurements • In the same CRPL Report, mention is made of field strength measurements underway in cooperation with CBS. The purpose of this study is to obtain vhf and uhf field strength data on irregular terrain factors and fading of signals beyond the horizon.

First steps were taken by the National Bureau of Standards in a study of such measurements in the Albany, N.Y., area. The second part will be a study of recorded program material using commercial tv transmitters at various locations and the third step is a measurement program to be undertaken by NBS on height and antenna gain within service areas of vhf and uhf tv transmitters.

Some preliminary results have been obtained from a statistical analysis of Phase I, the report said. The other two programs are in preliminary stages.

MANAGING THE SPECTRUM

Special committee report at last disclosed

The rumor-surrounded report of an Administration *ad hoc* spectrum committee became officially available last Thursday (April 2).

Subject of controversy that ranged all the way from the Capital broadcast fraternity to the NAB convention in Chicago (BROADCASTING, Feb. 9, March 23), the report emerged after three months of government review.

A five-man committee headed by Victor E. Cooley, retired board chairman of Southwestern Bell Telephone Co., submitted the report Dec. 29 to Leo A. Hoegh, director, Office of Civil & Defense Mobilization.

The advisory group proposed a study of spectrum management and use by a three-man board to be appointed by the President "by and with the advice and consent of the Senate."

Director Hoegh overruled his *ad hoc* committee in part last Feb. 5 by proposing the study be conducted by a five-man Presidential commission. The Hoegh proposal drew bi-partisan protests from Capitol Hill where legislators said membership of any spectrum commission should be chosen with Congressional participation. Proposed legislation (SJRes 76, HJRes 292) calling for Congressional authorization of a Presidential study is pending.

Other members of the Cooley committee, appointed Nov. 4, 1958, were Frank G. Kear, of the Kear & Kennedy consulting firm; William G. Thompson, retired assistant vice president of the American Telephone & Telegraph Co.; Maj. Gen. W. Preston Corderman (retired), vice president of Litton Industries, and Dr. Irvin Stewart, onetime member of the FCC and former president of the U. of West Virginia.

Need for More Space • This reference was made in the report to the industry's problem: "Non-government users of the spectrum, for example the broadcasters, have indicated a need for additional channels in certain frequency ranges not now available."

The *ad hoc* committee noted the importance of telecommunication systems to national security and the vastly increased need for spectrum space. It spoke critically of the "numerically inadequate" staff of 12 telecommunications people at OCDM. This later drew from Director Hoegh a promise to increase the staff.

Interdepartment Radio Advisory Committee (IRAC), giving technical guidance in assignment of frequencies to government agencies, was described as "primarily a group of co-equal users and as such is not an appropriate group to act, nor does it act, as a policy making or authoritative body." FCC, it was explained, has a staff of 1,000 people, with seven commissioners providing high-level direction.

Under the Communications Act of 1934 the President has the responsibility for assigning radio frequencies to federal agencies and the FCC to commercial and private users, including state and local governments. This sets up a dual control over a single resource, a point stressed by the report of the

wherever they be it's WOV 5000 Watts IN N. Y. C. and VICINITY first in the Negro Community

Wonderful people, Wovbugs. We're just mad about them. They're just mad about WOV. You'll be wild about the sales results they'll work for you. Reach the Wovbugs and you reach the largest Negro Listening Audience in the entire 17 County Area of Greater New York.

Seriously, this alert Negro Community encompasses 1,500,000 people living in New York, New Jersey and Connecticut. Its population has grown over 40% in the past 10 years. Its income level has grown even more. It spends more of its spendable income than any people in America.

WOV programs 11½ hours a day to the needs and interests of this powerful economic force. It is the only radio station of its kind in the market that reaches every one of the 17 counties in it. That's why — in your media strategy it makes sense to include WOV on the schedule.

WOV NEW YORK
Representatives: John E. Pearson Co.

President's Communications Policy Board in 1951.

FCC is Expert • The *ad hoc* group was struck by the lack of high-level consideration by the government of many vital telecommunications, matters whereas the FCC "provides a vehicle for adequate consideration in the non-government area." It added, "There is also an unfortunate absence at present of anyone in the Executive Branch with adequate knowledge, experience and stature to act for the President in these (government vs. non-government) matters and there is not available therein an organization adequate to accumulate the information and experience upon which to base sound action."

In its conclusions the *ad hoc* group felt the Executive Branch should strengthen its telecommunications management and opposed the vesting of additional powers in this area to the FCC.

The proposed three-man board would know plans of all agencies it serves and have a bearing on war plans and production of civilian and military gear.

The board, it was recommended, should study use of frequencies, become familiar with military and civilian operations and research, suggest areas of research, maintain continuing review of allocations, review international telecommunications and advise the President of developments in the field. Provisions for an adequate staff were set out, with the FCC not to be disturbed in its work. The board would have "no responsibility for the operation of any telecommunications." Procedure suggests the President ask for legislation and draft language was submitted.

OTHER USERS STAKE CLAIMS ON UHF

But AMST submits study showing need for both u and v bands

The FCC's touted grand inquiry into the use of the radio spectrum between 25 and 890 mc has turned into a slugging match between AT&T on one side and private mobile radio advocates on the other—and a general game of dart-throwing at the uhf television allocation.

Basic difference between AT&T and others commenting on the requirements of mobile radio users is one of policy.

AT&T recommended a wide-band allocation under common carrier auspices to handle all mobile radio usage —ranging from taxicab service to citizens radio.

Private mobile advocates, led by Motorola, bitterly attacked this principle and plumped hard for a separate, privately-run individual service for each of the mobile services.

But both AT&T and Motorola—and others in the Motorola camp—hit hard at what they termed the large number of television frequencies not heavily used—the uhf. Motorola went one step further and recommended the elimination of chs. 2-6.

Television Defended • Defense of the television allocations was vigorously made by the Assn. of Maximum Service Telecasters and NAB. The present fm allocations were defended by FM Broadcasters.

The 25-890 mc study was instituted by the FCC in 1957. A second inquiry involves the use of the spectrum above 890 mc. Both are designed to tell the FCC the present and future needs of radio users in these two major areas.

The presentations filed last week were in the nature of direct testimony, as requested by the FCC. More than 50 papers were filed at deadline last Monday. The next step, according to the FCC, may be an open hearing.

A digest of the more important filings —particularly those affecting broadcasting frequencies—is contained below:

Maintain Tv Principles • Assn. of Maximum Service Telecasters, a group of 120 top drawer tv stations most of which operate in the vhf band, defended vigorously television's present position in the radio spectrum and urged the FCC not to make any changes in standards or techniques without exhausting all tests to make sure they work. The presentation was made by Lester W. Lindow, executive director.

Mr. Lindow urged that the FCC maintain the present vhf and uhf bands for tv. He also stated that uhf frequencies should not be removed from their allocation to the tv service unless comparable vhf frequencies were added as compensation.

Technical presentation was made for AMST by Howard T. Head, of A. D. Ring & Co., AMST's consulting engineering firm. The fact-packed AMST document presented a channel breakdown of the radio spectrum between 25 mc and 890 mc showing that tv occupied only 82 channels (3.5% of all non-government allocations) in this portion of the spectrum (as against other services' usage ranging as high as 547 for public safety).

AMST agreed that on the basis of space alone, tv uses almost half of the 25-890 mc space. But, it continued, this is "unrealistic" and actually "distorts" the allocations picture.

If only vhf is considered, AMST related, tv has 12 channels, or less than 0.6% of all such channels above 25 mc. Even in uhf, tv has only 70 channels (less than 15%) of all uhf allocated to non-government services.

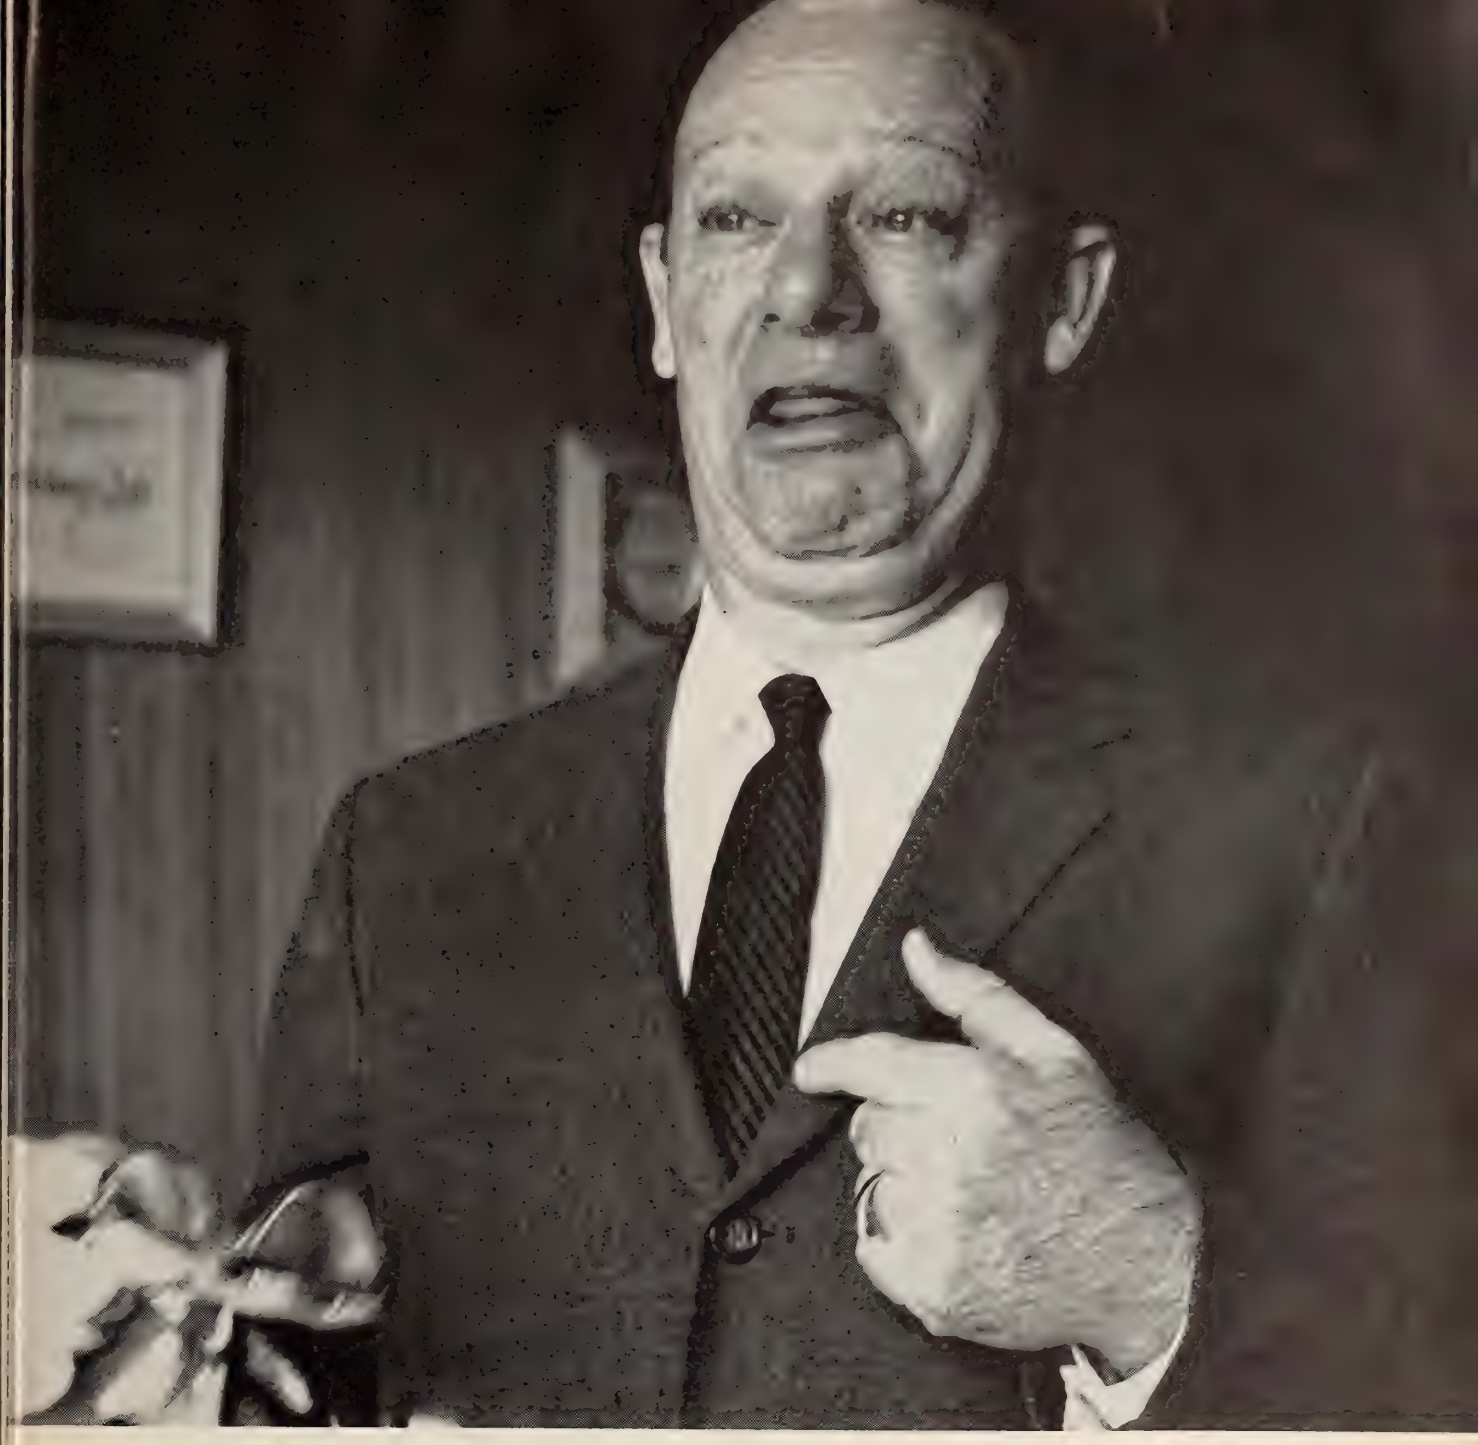
Vital to American Public • Not only is television vital to the American public in bringing news, education and information but tv has contributed to the expansion and vigor of the economy. "Television well deserves its title of the '$100 Billion Pump Primer'" AMST said.

Between 85% and 90% of all tv homes in the U. S. are served by at least three stations. The average U. S. television home has a choice of at least five different signals, and actually views more than three stations.

There are now more than 50 million tv sets in 44 million tv homes (147 million people). There are actually more tv homes than those with telephones (39 million), electric toasters (37.8 million), electric washing machines (43 million), electric irons (43.5 million), electric clocks (36.4 million) or bathtubs (41.2 million).

Moreover, AMST said, "more than 20% of the entire waking life of the average tv viewer is spent watching tv."

Tv's utilization of the spectrum is heavy, AMST said. As of Feb. 21, 708 stations were on the air, 216 additional stations were authorized but not yet on the air, and applications were pending for still another 91 stations. These include translators.



In the 12 vhf channels, 543 stations were on the air authorized or pending. More than 85% were actually on the air. In uhf, 472 stations were assigned, with more than 50% on the air.

The loading of frequency channels is another method of determining usage, AMST said. The 924 on-the-air and authorized stations and translators mean that each frequency has an average load of 11 stations. If only on-air stations are used, the average frequency loading is more than eight stations per channel.

"This is a much higher average frequency loading for television broadcasting than there was for standard broadcasting at a comparable stage in its development," AMST said.

This average is also higher than for fm radio, AMST pointed out. Fm, now in its 18th year, has an average of eight authorized stations on each of its 100 channels.

Segregating the vhf and uhf portion of the tv band, the 12 vhf channels have an average frequency loading of

"Don't tell me Roanoke has 420,000 tv families."

We won't. That's the number of tv families in the greater Roanoke *market,* which is bigger than all of us.

"Top 50" buyers ought to scrutinize our market before they leave us off a schedule. *Whoa, man, that's negative.*

* * *

Well, how's this?

Careful buyers who plan tv schedules for results get what they plan for with WSLS-TV. With full power of 316,000 watts on Channel 10, a healthy assist from NBC, strong local programming, and a signal that leaps off a mountain 3934 ft. high, WSLS-TV welds a 58-county area into the greater Roanoke market of 420,000 tv homes.

42 on-the-air and authorized stations. If pending, non-duplicated applications are counted, this figure increases to 45.

Investments Heavy • As of the end of 1957, AMST said, the 3,076 operating, non-network owned radio stations had an average investment in tangible property of $100,575 and expenses of $125,900. Television's 485 operating, non-network stations had an average investment in tangible property of $871,800 and expenses of $795,900. Tv stations, AMST noted, cost 8.7 times as much as am radio to construct and 6.3 times as much to operate.

All but four of the 82 channels allocated to tv have a station either on the air, authorized or pending a grant, AMST cited. This means that more than 95% of the channels allocated to tv either were in use, authorized or applied for by late February 1959, AMST said. Nearly 80% of the channels were occupied by operating stations. Stations are operating on all 12 vhf channels and 52 of the 70 uhf channels.

The investment figure in tangible broadcast property for tv, AMST said, approximates $600 million under original costs.

From 1946 to 1958, AMST estimated the public invested more than $25 billion in tv receivers, antenna and other components, installation repairs and replacement parts. The public is spending $2.7 million annually on receivers and allied equipment and services, AMST said that Electronic Industries Assn. had estimated.

Each vhf channel serves almost 50.5 million people, AMST noted. Stations on ch. 4 alone, it pointed out, serve more than 87 million persons.

In the uhf band, 71 of the 83 tv stations on the air (not counting translators) bring tv directly to an average of more than 324,000 persons per channel. Stations on nine of the uhf channels serve more than 1 million persons per channel and stations oper-

BACKGROUND: The following programs, in alphabetical order, appear in this week's BROADCASTING tv ratings roundup. Information is in following order: program name, network, number of stations, sponsor, agency, day and time.

Adventure Time (ABC-127): participating sponsors, Tues. & Thurs. 5:30-6 p.m.

American Bandstand (ABC-101): participating sponsors, Mon.-Fri. 4-5:30 p.m.

CBS News (CBS-161): various sponsors, Mon.-Fri. 6:45-7 p.m.

Cheyenne (ABC-127): Johnson & Johnson (Y&R), Armour (FC&B), Harold Ritchie (K&E), Tues. 7:30-8:30 p.m.

Perry Como (NBC-172): various sponsors, Sat. 8-9 p.m.

Concentration (NBC-152): various sponsors, Mon.-Fri. 11:30 a.m.-noon

Desilu (CBS-121): Westinghouse (M-E), Mon. 10-11 p.m.

Father Knows Best (CBS-154): Lever Bros. (JWT), Scott Paper (JWT), Mon. 8:30-9 p.m.

GE Theatre (CBS-147): General Electric (BBDO), Sun. 9-9:30 p.m.

Guiding Light (CBS-129): Procter & Gamble (Compton), Mon.-Fri. 12:45-1 p.m.

Gunsmoke (CBS-173): Liggett & Myers (D-F-S), alternating with Remington Rand (Y&R), Sat. 10-10:30 p.m.

Have Gun, Will Travel (CBS-148): Lever Bros. (JWT), Whitehall (Bates), Sat. 9:30-10 p.m.

Alfred Hitchcock (CBS-164): Bristol Myers (Y&R), Sun. 9:30-10 p.m.

I've Got a Secret (CBS-196): R. J. Reynolds (Esty), Wed. 9:30-10 p.m.

Maverick (ABC-133): Kaiser (Y&R), Drackett (Y&R), Sun. 7:30-8:30 p.m.

Mickey Mouse Club (ABC-127): participating sponsors, Mon., Wed. & Fri. 5:30-6 p.m.

NBC News (NBC-127): various sponsors, Mon.-Fri. 6:45-7 p.m.

Jack Paar (NBC-129): participating sponsors, Mon.-Fri. 11:15 p.m.-1 a.m.

Perry Mason (CBS-146): various sponsors, Sat. 7:30-8:30 p.m.

Peter Gunn (NBC-181): Bristol-Myers (DCS &S), Mon. 9-9:30 p.m.

Playhouse 90 (CBS-156): various sponsors, Thurs. 9:30-11 p.m.

Price Is Right (NBC-153): various sponsors, 11-11:30 a.m.

Price Is Right (NBC-161) Lever Bros. (OB&M), alternating with Speidel (NC&K), Wed. 8:30-9 p.m.

Real McCoys (ABC-123): Sylvania Electric (JWT), Procter & Gamble (Compton), Thurs. 8:30-9 p.m.

Rifleman (ABC-137): Miles Labs (Wade), Ralston Purina (Gardner), Procter & Gamble (B&B), Tues. 9-9:30 p.m.

Search for Tomorrow (CBS-131): Procter & Gamble (Compton), Mon.-Fri. 12:30-12:45 p.m.

Some of Manie's Friends (NBC-162): Liggett & Myers (M-E), March 3, 7:30-9 p.m.

Ann Sothern (CBS-192): General Foods (B&B), Mon. 9:30-10 p.m.

Ed Sullivan (CBS-179): Eastman Kodak (JWT), Lincoln-Mercury (K&E), Sun. 8-9 p.m.

Danny Thomas (CBS-189): General Foods (B&B), Mon. 9-9:30 p.m.

Wagon Train (NBC-171): Ford Motor Co. (JWT) alternating with R. J. Reynolds (Esty) and National Biscuit Co. (M-E), Wed. 7:30-8:30 p.m.

Wells Fargo (NBC-164): American Tobacco (SSC&B), alternating with Buick (M-E), Mon. 8:30-9 p.m.

Wyatt Earp (ABC-136): General Mills (D-F-S), Procter & Gamble (Compton) Tues. 8:30-9 p.m.

Loretta Young (NBC-144): Procter & Gamble (B&B), Sun. 10-10:30 p.m.

ating on ch. 22 alone serve more than two million people.

AMST said that in the spring of 1958, there were more than 3.5 million active uhf tv viewing homes, or an aggregate of 12 million persons.

The 162 translator stations in operation in mid-February, all using the upper uhf band, serve almost 1 million persons, AMST said.

Only 26 stations in the continental U. S. are not affiliated with a network, AMST noted. Nineteen of these are in markets already served by three stations which are affiliated. Eight are located in New York and Los Angeles.

The average tv station furnishes service for about 14½ hours per day, AMST said. For the 546 stations now on the air, this equals 7,900 hours per day, 55,000 hours per week and nearly 3 million hours per year.

This does not count the 162 translators on the air.

Service to Farmers • More than 68% of the 5.3 million farm households have tv, AMST pointed out. This covers more than 14 million persons. Tv, AMST said, is the leading medium on farms—with radio second and reading third.

During the week of Feb. 13-19, 94.7 million persons over 12 years of age—74.9% of the adult population—watched tv some time or other. More people watched tv than listened to the radio, read magazines or attended movies. Although more people over 12 read newspapers than watched tv, AMST pointed out, the total time spent watching television was nearly five times the total spent reading papers.

"In fact, more time was spent by persons over 12 years of age watching television than was spent listening to the radio, reading newspapers, reading magazines or attending movies combined," AMST stated.

The AMST position was predicated on two counts: "Maintain the present high technical quality of American tv and the present wide availability of multiple tv services throughout the country."

Tv's present heavy utilization of existing spectrum space is not the sole criterion, AMST warned. Tv broadcasting is "dynamic and expanding" and requires room for growth.

Move to Uhf? • If tv were reallocated to uhf, a major portion of the investment by broadcasters and the public, exceeding $26¼ billion, would be obsoleted, AMST warned. It added:

"In order to continue to provide the American public with the volume of service which it now receives and to provide room for growth, all 12 vhf channels as well as each of the 12 vhf channels must be preserved for television broadcasting and the 70 uhf channels must also be preserved for television unless an appropriate number of additional vhf channels is allocated in exchange."

If tv were moved to uhf, AMST warned, more than 25% of the total land area of the U. S. would be without "service of consistently good quality," in quoting the "critical distances" developed by the Television Allocations Study Organization.

In spelling out some of these losses, AMST estimated that Iowa would lose 23,700 square miles, or 42% of the total state area. Virginia, for example, would lose 8,100 square miles, or 20% of its land area.

Actually, AMST pointed out, these figures are conservative. The critical distances in uhf become less and less as the frequency is higher in the spectrum. TASO reported, AMST recalled, that the "critical distance" for the upper uhf (chs. 41-83) is only 30 miles—75% of the critical distance for chs. 14-40. The critical distance for the low uhf channels was estimated by TASO to be 40 miles from a transmitter.

"Taking into account long range consideration," AMST said, the most advantageous allocation would be additional vhf space for tv.

AMST also demolished the possible contention that tv should be operated via wire lines. It would cost, AMST said, from $12 to $50 million to install the cable for just one market, Los Angeles. One proponent of pay tv, AMST noted, estimated that a wired system designed to serve 150,000 subscribers in a single market would range from $11 million to $18 million. This is a capital investment of $73.50 to $122 per subscriber.

A wired tv service, AMST said, would serve only the great centers of population in metropolitan areas; at least 36% of the population living in rural and small towns would lose service they now receive from free, broad coverage tv, the organization pointed out.

AMST also insisted that present standards be maintained—a 6-mc channel, directional antennas, precise and very precise carrier frequency control operations. AMST said:

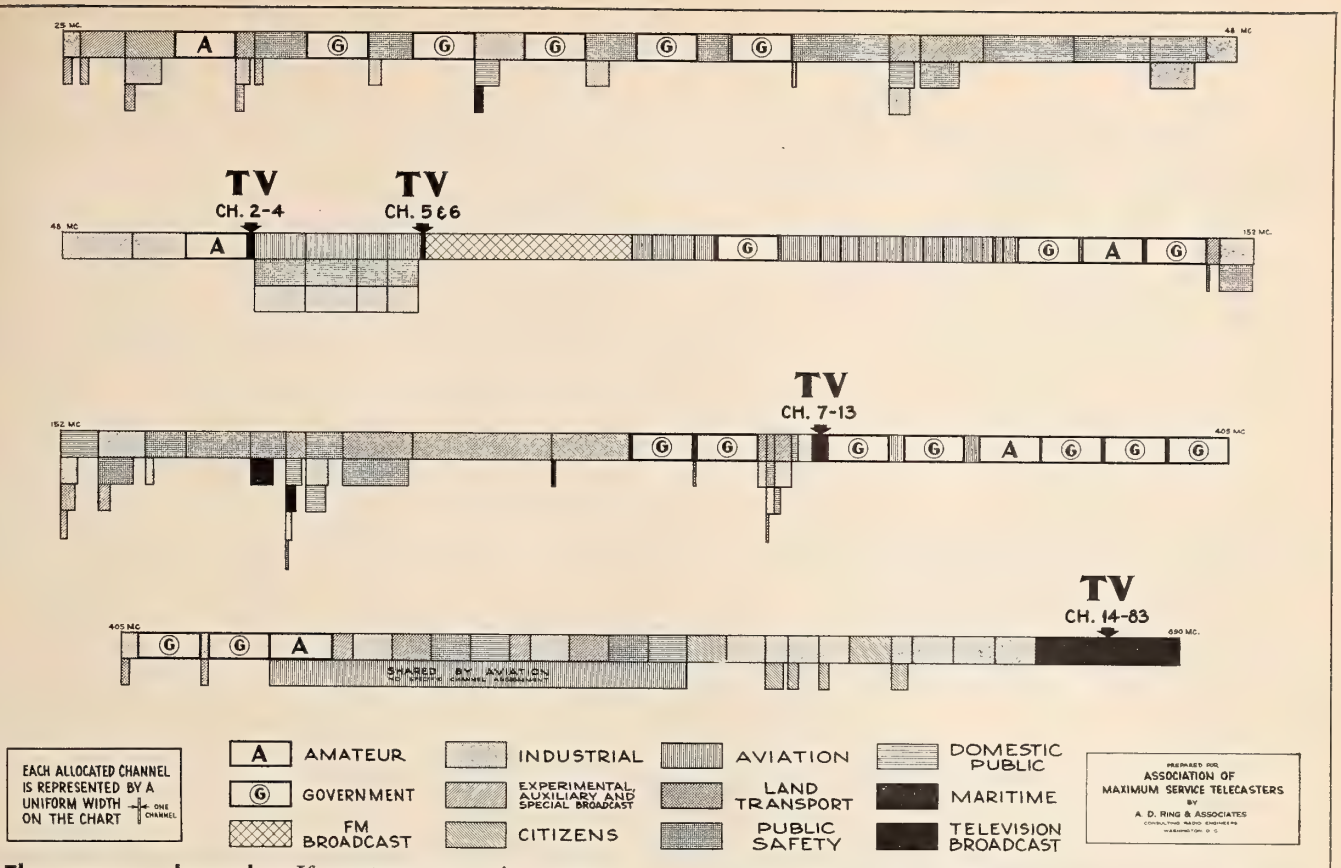
"With respect to these techniques, the TASO Report recognizes that further investigation and reliable field testing in particular is required. Accordingly, AMST respectfully suggests that, until completion of the essential tests, it would be premature to attempt to present details on the feasibility of such techniques and it would be premature for the Commission to consider them, at this time, as a means of reducing the spectrum space now allocated to television broadcasting."

Keep Status Quo • Harold Fellows, president of NAB and speaking presumably for the entire broadcast industry, asked the FCC to maintain the status quo until the findings of the TASO report have been evaluated and until the government has completed its analysis of government and non-government spectrum occupancy.

"It is obvious", Mr. Fellows said, "since television occupies more than 50% of the non-government space between 25 mc and 890 mc that that service holds the key to the entire band."

Tv should be a nationwide, free competitive service, the NAB president said. An allocations plan involves considerations which include economics, social objectives, political aspects and technical factors. It cannot be known at this time whether tv should have 40, 60 or 80 channels. "But I do believe," Mr. Fellows stated, "that it is important that sufficient channels be reserved so that growth will not be stunted."

Mr. Fellows foresaw the day when small television stations serving local communities will be required to serve as outlets for the huge increases in advertising and expenditures to move tremendous upsurge in goods and servicing that will be the economy of tomorrow (A.D. 2000, 273 million people, $900 billion gross national product).



Mr. Fellows also estimated that by 1968 there will be more than 78 million tv sets in use (vs. 48 million today).

"To that end," Mr. Fellows concluded, "it not only is necessary to have sufficient allocations for present usage, but it is doubly important that sufficient space be reserved for the station of tomorrow." And he said:

"No steps [should] be taken which would preclude the reservation of an adequate number of channels for a nationwide competitive television service based upon anticipated growth in the nation's population and economy."

Auxiliary Services • A. Prose Walker, NAB engineering manager, urged that allocations for broadcast and television remote pickup channels in the 25-26 mc area be retained as there are about 1,500 authorizations in these areas. The same should be done with the broadcast pickup bands in the 152-153 mc area, Mr. Walker stated. Mr. Walker asked that the six channels now proposed to be allocated to broadcast at 161 mc be expanded to 10 channels. He also asked that two bands of 10 channels each, separated by about 5 mc, be made available for broadcasting in the 450 mc region. He also called on the present channel width at 160 mc to be retained.

Future of Tv First • American Broadcasting-Paramount Theatres: AB-PT said that "it does not at this point de-

The score on channels • If spectrum usage is measured by the number of channels allocated to various services, instead of the amount of space they occupy, television is the poor relation. This diagram was submitted to the FCC last week by the Assn. of Maximum Service Telecasters. It shows the spectrum from 25 mc (upper left) to 890 mc (lower right) in terms of the channels occupied by various services—not the relative spaces they occupy. Tv has a total of only 82 channels. Other services have many more: public safety, 547; industrial, 541; land transportation, 385; aviation, 256; domestic public, 178; maritime, 106; fm, 100; citizens, 94. The only service that has fewer channels than tv is experimental and auxiliary broadcast, with 57. There are no figures for the number of channels used by the government and the amateur services in this portion of the spectrum.

sire to submit evidence" in the 25-890 mc proceeding. ABC called attention to the TASO report, its own 1957 pleading with the Commission for more vhf channels in major markets and other moves to solve the tv problem.

"Accordingly, . . . ABC remains of the view that the future of television allocations should be determined before any overall reallocation of frequencies in the 25-890 mc band is attempted," the network stated.

Hold Fm Untouched • Ben Strouse, WWDC-AM-FM Washington, director of Fm Broadcasters, championed fm as the only hope for truly satisfactory broadcast stations and strongly urged the FCC to leave untouched the space currently assigned to fm.

"The 88-108 mc band presently allocated for fm broadcasting must in the public interest remain intact," Mr. Strouse said. "Fm should not be transferred to another portion of the spectrum, nor should it be deprived of any of the frequencies presently available . . . and the width of fm channels should not be diminished."

This is required, Mr. Strouse emphasized, because present provisions "provide the best possible allocation in the context of present broadcasting and other radio requirements and because fm broadcasting is now in the process of a second period of substantial growth and popularity which clearly shows that fm frequencies will be utilized to a greater extent and for more significant purposes than any alternative use of those frequencies which might be proposed."

Mr. Strouse pointed out that current fm space was assigned by the Commission in 1945 after lengthy proceedings. He continued: "There can be no claim that frequencies should be deleted from the fm service because its development in the past 12 years has failed to fully utilize the spectrum set aside for it.

No Error • "No evidence has been adduced which indicates that the Commission erred in concluding that fm can function best in the 88-108 mc band. Moreover, it is clear that any shift from that band would virtually doom the ultimate development of fm." He pointed out that there are now 15 million fm receivers in the hands of the public, representing an investment of $500 million. Investment of 591 operating fm stations is approximately $25 million, he stated.

High Fidelity • Alfred M. Zuckerman, chief engineer, Bogen-Presto Co., for the Institute of High Fidelity Manufacturers (85 members, 25 associate members) declared: Fm is the "most effective single service" which stimulates and meets the public demand for high fidelity music and speech. He urged that the present fm allocation be retained. It is "the only reservoir for unlimited aural broadcasting," he stated.

Educational Radio • Harry J. Skornia, executive director, National Assn. of Educational Broadcasters, dwelled principally on the role fm has played in educational broadcasting and urged the Commission not to molest current assignments.

He pointed out that educational radio has survived and grown despite lack of support in the past by the government. During early development stages, educators were constantly shifted around in the spectrum—never

having am space and now with only 20 reserved fm channels (between 88 and 92 mc).

"That an fm service for education exists at all today in the U. S., in view of the reverses it has suffered, is a miracle," Mr. Skornia stated.

Don't Hinder Educational Tv • Ralph Steetle, executive director, Joint Council on Educational Television, urged the FCC not to do anything in the present proceeding that would hinder educational tv. "The underlying strength of the etv movement in the U. S., reflected in its achievements during the past seven years," he said, "is both the desire and demand of American citizens to strengthen the keystone of democracy—an education for all members of this society.

"It is of the utmost importance that this demonstrated demand for educational opportunity through the use of tv . . . is not thwarted in the months and years to come."

Reallocate Tv • Motorola's Daniel E. Noble called for the reallocation of tv to a 30-channel band beginning at 174 mc (present ch. 7) and extending upward in a continuous band to 354 mc. This is similar in part to the proposals of Comrs. T. A. M. Craven and Frederick W. Ford. Mr. Noble added:

"As distasteful as this at first may appear, it is a feature which can be accommodated with proper planning so as to minimize negative reactions. The benefits that will accrue are definitely the lesser of evils. Such an adjustment can be managed over a 10-year period minimizing the obsolescence to set owners. The equipment changes required of the broadcasters are comparatively minor and can be accommodated with minimum hardship."

The Motorola executive vice president also called for the establishment of a single government authority having jurisdiction over both government and non-government allocations.

"No rational pattern for the control of spectrum occupancy will ever be achieved," Dr. Noble stated, "until a single authority is established. . . . The FCC, with its vast experience of federal radio regulation, might be expanded to the degree necessary to extend these activities over the entire spectrum. . ."

The Motorola presentation asked for an additional 55 mc to be allocated to the private land mobile service in the 50-72 mc, 140-150.8 mc, 162-166 mc, and 470-489 mc bands.

The need is imperative, Dr. Noble said. There are today about 700,000 transmitters operating in that service. Electronic Industries Assn. has estimated that by 1978 there will be 5 million such transmitters operating, the Motorola executive noted.

Bell Plan • Harold R. Huntley, chief engineer, AT&T, urged broadband public mobile service on common carrier basis to handle all elements of public service to public and to institutions. He asked for 75 mc of space, running from 765 mc to 840 mc. This is upper uhf television band, ranging from ch. 63 to ch. 83. The presentation was accompanied by exhibits showing locations of uhf stations operating in this area, also translators operating in this area. Mr. Huntley said: "Together these exhibits show that very little use of the spectrum has been made or is planned in this frequency region."

Mr. Huntley continued:

"But equally important is the fact that these stations are so located as to result in minimal interference to public mobile service in metropolitan areas which would be early candidates for this service . . . No broadcast stations and only a few translators are in operation within interference range of the 20 largest metropolitan areas (above about 700,000 population) and only a small handful is planned."

Other elements of the AT&T testimony were presented by John J. Hanselman, Robert Bright and Paul W. Blye.

Manufacturers Speak • For Electronic Industries Assn. the following testified:

Robert Casselberry, manager, product planning and marketing research, communication products department, General Electric Co.:

Mr. Casselberry said land mobile services require 1,200 voice channels or 40.8 mc of spectrum by 1960, for growth between 1962 and 1968, apportioned as follows: below 100 mc (4.8 mc or 240 channels); 100 mc to 300 mc (18 mc or 600 channels); above 300 mc (but below 890 mc) (18 mc or 360 channels).

He said requests by the telephone industry for the 75 mc band between 765 and 840 mc should be dismissed because the 50 mc of space between 890 and 940 mc, reallocated to government use, has been adequately replaced by an allocation of 90 mc between 2110 and 2200 mc.

E. C. Tracy, RCA, chairman of EIA's broadcast and closed-circuit tv equipment section, said various members have studied possible uses of portions of the uhf tv band for distribution of educational program material to supplement closed circuit systems now planned and in use. It appears that while the cost of distribution of educational program material from a central studio site over a whole county or state may be prohibitive using coaxial cables or microwave, this activity may be entirely practical through supplemental broadcast type transmission from one or more strategically-located low power uhf transmitters, he said.

The FCC should consider clarifying the eligibility of educational institutions to use designated uhf tv channels for transmitting classroom program material as part of an associated distribution network, Mr. Tracy said.

Other Testimony • Robert J. McNutt, chairman, Communications & Radio Committee, American Municipal Assn.—"We request that a 'long hard look' be taken at the present allocation of all the frequencies between 470 mc and 890 mc for television . . . [these] are little used . . . [and] not usable in the economic competition with vhf." Recommends use of frequencies between 470 mc and 890 mc for mobile services and reducing uhf television from 70 uhf channels to 56.

Don Rettick, San Francisco service engineer, in behalf of himself and similar companies—Only region available is uhf television. Some of this should be allocated for non-common carrier use for urban, industrial exploitation. Urges that public safety, land transportation and industrial services be expanded either immediately above or below 150-162 mc.

International Municipal Signal Assn. —Fire radio service needs 30 more mobile channels in the 100-890 mc area. Also four or more frequency pairs in the 450-860 mc region.

Lenkurt Electric Co. (equipment supplier to large communications users), Alan F. Culbertson, manager of mobile telephone division—Mr. Culbertson asked exclusive assignment of 840-890 mc (uhf chs. 70-83) for common carrier fixed service. He said Lenkurt concurs in the AT&T proposal that 765-840 mc be allocated to domestic public mobile radio service for use by land line common carriers and that these frequencies be made available to fixed common carrier service on a secondary shared basis.

R.H. Herrick for United States Independent Telephone Assn.—wants the transfer to the common carrier fixed service of the 840-890 mc frequency band . . . "A reduction of 50 mc from this large uhf portion for the essential services of telephone companies would be justified and wholly equitable from the standpoint of the public interest."

United States Independent Telephone Assn. by Donald C. Power, chairman of Gen. Telephone & Electronics—has "an unsatisfied need for frequencies for fixed service located near the upper limit of the spectrum . . . for substituting frequencies immediately below 890 mc. . . ."

Charles R. Cutler on behalf of Alaska Aviation Radio Inc.—"Frequencies between 76-100 mc are also available

in Alaska for operational fixed use on a shared basis with the government frequencies in both of these bands are presently licensed, for example, by AARI for transmitter link and control purposes. The continued availability of these freqeuncies is essential."

Use of spectrum space should be probed: FCC

Any investigation to be conducted of the radio spectrum should consider not only the space allocated to various users, but also just how that space is being utilized, the FCC told the Senate Commerce Committee last week.

The Commission was commenting on S J Res 76, introduced by Committee Chairman Warren Magnuson (D-Wash.) at the request of President Eisenhower (BROADCASTING, March 16). The White House acted after the Cooley telecommunications advisory group had recommended that such a study be made.

Members of Congress and broadcasters, in past pleadings for a spectrum investigation, have pointed up the secrecy surrounding the use made of military-allocated space. Many, such as Rep. William Bray (R-Ind.), have charged the military is wasting space that could be utilized by commercial tv.

The FCC also suggested to Sen. Magnuson that the resolution be amended to specify that the investigative commission have authority and access to such classified information. Also, the FCC stated, life of the investigation should not be limited to one year (as now spelled out in the bill) because there is "some doubt" the work could be completed in such a short period.

Title of the bill should be clarified to specify the investigation would be of the radio spectrum. The FCC said. The broader term "telecommunications," which is used, could be construed to include wire and cable transmissions, the Commission pointed out.

"We continue to believe that a comprehensive study of present and future radio frequency spectrum usage and needs as well as of the organization and procedures employed by the federal government for spectrum management would be useful," the FCC said. In its comments to the Senate, the Commission did not mention a study already announced by Rep. Oren Harris (D-Ark.) for his House Commerce Committee.

Sen. Magnuson also asked for comments on SJ Res 76 from the Dept. of Commerce, Comptroller General, Civil Service Commission, Civil Aeronautics Board, Dept. of Defense, Federal Aviation Agency, General Accounting Office, Dept. of Interior, National Aerounatics & Space Administration, Office of Civilian & Defense Mobilization and the State Dept.

VIDEO AND THE TELEPHONE

ANA workshop gets phone success story; Schachte, Ogilvy heard on ad scientifics

A case history showing how television softens up the advertiser's prospects—producing three times as many sales in this case—was detailed by a New York Telephone Co. executive last week.

Speaking at a research workshop conducted by the Assn. of National Advertisers in New York last Wednesday (April 1), Pitt F. Carl Jr., assistant vice president of the telephone company, reported on studies conducted among both viewers and non-viewers of *Weather 6-1212,* a five-minute early-evening program sponsored by his company on WRCA-TV New York.

Mr. Carl was one of a number of speakers at the closed session, including Henry Schachte, executive vice president of Lever Bros. and chairman of ANA; David Ogilvy, president of Ogilvy, Benson & Mather, and Maxwell Ule, senior vice president of Kenyon & Eckhardt.

Viewer Reaction • Mr. Carl said telephone company statisticians ran monthly telephone surveys to get viewer reaction to the program and its commercials. Later, he said, they chose about 500 who had said they watched the program and matched this group with a comparable sample of non-viewers. Then the business office put girls to work "calling these two groups on a cold canvass to try and sell them extensions or any other items of residence telephone equipment."

The results:

"Sales to viewers were better than three times as great as sales to non-viewers.

"Quite a few of those called said they were planning to redecorate or make some changes in the spring and asked that they be called then. This ran just about three-to-one in favor of viewers.

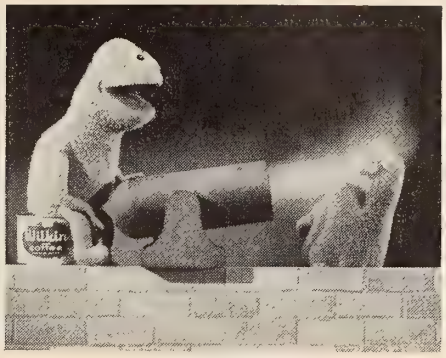
" . . . In doing this particular study we were able to isolate the effectiveness of our weather show from all other media we use, since it must be assumed that both groups, viewers and non-viewers, were more or less equally exposed to all our other sales advertising."

More Long-Distance • Mr. Carl said another survey among the same groups, completed last Monday (March 30), showed the average viewer was using long-distance service—also promoted on the program—more than non-viewers were.

The monthly surveys started last fall dealt primarily with sponsor identification, reaction to the program and commercial remembrance. The telephone company started sponsoring the program in August. The surveys, reaching 1,500 to 2,000 customers each month, were started in September. At that time, Mr. Carl reported, sponsor identification was 61%—and increased to 89% in November. In September, 48% could recall a commercial; in November the figure was up to 82%, and the average viewer recalled two commercials.

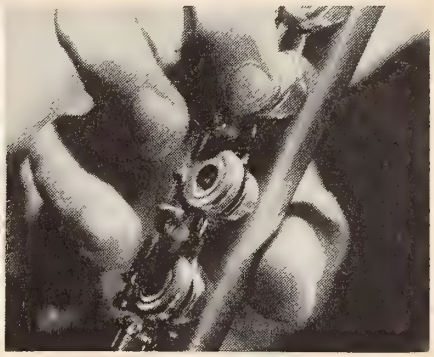
Schachte on Sales Results • In another feature of the workshop program Lever's Mr. Schachte said flatly that advertising management should face up to the fact that the effectiveness of advertising expenditures cannot be measured in terms of dollar sales returns. Nor can it ever be, he asserted, adding: "Isn't it enough that we sell more?" When advertising people stop worrying about "what we can't measure," he said, they will have more time to spend on "what we can," and thus create better advertising.

Mr. Schachte saw an analogy between medicine and advertising, and suggested that advertising work be called "the practice of advertising," as doctors refer to theirs as "the practice of medicine."

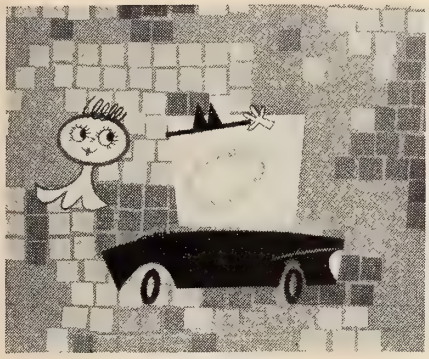


Oglivy on Research Costs • Mr. Ogilvy said advertisers were "short-sighted" when they require agencies to pay for research to evaluate their advertising. "Why spend millions on space and time but refuse to spend a penny on evaluating the message used in that space and time?"

Mr. Ogilvy advised advertisers, "Abandon your attempts to get your agencies to furnish free, unprejudiced evaluations of their own performance. Instead, set aside a small percentage of your total advertising budget and turn it over to the best independent research organization you can find; let *them* evaluate the message."

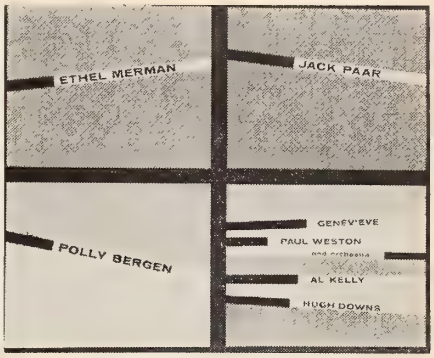


New York Art Directors Club: annual tv awards



Johnson & Johnson (Mr. Frankfurt)

Wilkins Coffee



Anheuser-Busch

Esso Imperial

CBS-TV

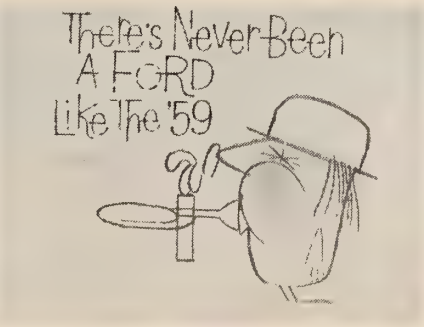
'Chevy Show' (gold medal)

Winners were named March 31 at the awards luncheon of the 38th annual national exhibition of advertising and editorial art and design of the Art Directors Club of New York. On display from March 31-April 8 in the Astor Gallery of the Waldorf Astoria Hotel in New York are a total of 487 entries from more than 14,000 submissions in 30 major classifications.

For the second consecutive year NBC won the club's gold medal for television. The winning entry was the titling for the *Chevy Show* starring Ethel Merman, colorcast March 30, 1958. Edward J. Bennett, manager, design and art for NBC, and Guy Fraumeni, artist-designer, accepted the medal.

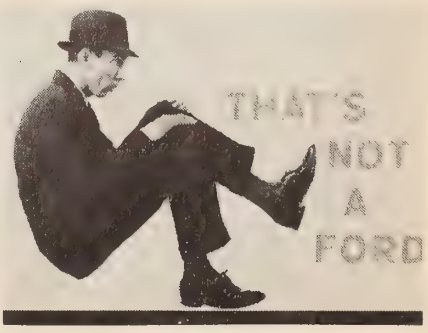
A special medal was awarded to Stephen Frankfurt, tv art director-production director, Young & Rubicam, for general excellence of a group of tv commercials for Johnson & Johnson products.

Mr. Frankfurt



All judging was determined by a jury under the direction of Henry Wolf, art director of *Harper's Bazaar*, and chairman of the exhibition committee.

Recipients of certificates of distinctive merit, their agencies and advertisers in the various classifications of the tv category are:



Tv live action (minimum of 90% live action)—Bob Johnson, D'Arcy, Anheuser-Busch Inc. Tv animation (minimum of 90% animation), two winners—Abe Liss, MacLaren Adv., Esso Imperial; Jack Wohl, J. Walter Thompson Co., Ford Motor Co. Tv limited technique, still art or photography with or without camera movement—Jack Wohl, J. Walter Thompson Co., Ford Div., Ford Motor Co. Tv full stop motion, three dimensional (puppets)—James Henson, M. Belmont ver Standig Inc., Wilkins Coffee. Tv color (in any or all techniques—Robert Gage, Doyle Dane Bernbach, Chemstrand Corp. Tv still art—George Olden, CBS-TV.

Chemstrand

Ford (animation)

Ford (still art)

ARB

ARBITRON'S DAILY CHOICES

Listed below are the highest-ranking television network shows for each day of the week March 26-April 1 as rated by the multi-city Arbitron instant ratings of American Research Bureau.

Date	Program and Time	Network	Rating
Thur., March 26	Real McCoys (8:30 p.m.)	ABC-TV	24.2
Fri., March 27	77 Sunset Strip (9:30 p.m.)	ABC-TV	27.5
Sat., March 28	Perry Como (8 p.m.)	NBC-TV	26.3
Sun., March 29	Maverick (7:30 p.m)	ABC-TV	23.3
Mon., March 30	Desilu Playhouse (10 p.m.)	CBS-TV	28.0
	Restless Gun (8 p.m.)	NBC-TV	28.0
Tue., March 31	Rifleman (9 p.m.)	ABC-TV	28.5
Wed., April 1	Wagon Train (7:30 p.m.)	NBC-TV	33.3

Prudential shopping for alternate sponsor

The Prudential Insurance Co. of America would like to buy network tv for next fall prudently, but in the unpredictable buying season wisdom apparently is not enough. It also takes a dose of luck.

The insurance advertiser, identified with its $4 million sponsorship of the prestige series, *The Twentieth Century*, on CBS-TV, wants to retain identification with that show and buy into a nighttime program but without having to knock the budget into a cocked hat.

Prudential has *Twentieth Century* firm for next season on a 52-week basis. The insurance firm would sell off one-half the series to another "suitable" advertiser if Prudential also could obtain a "suitable" advertiser to share costs on a new fall show on CBS-TV called *Twilight Zone* (tentatively set for Friday, 10-10:30 p.m.).

Objective: identification with two programs appealing to two different audiences at about the same cost for one series.

As of Thursday (April 2), Prudential had no indication whether or not CBS-TV could accommodate its wants on *Twilight*. This part would have to be settled before it could begin contacting other advertisers as possible customers for half of *Twentieth Century*.

Negotiating for Prudential is its agency, Reach, McClinton, New York.

Radio-tv prescribed to pre-sell insurance

The insurance industry was urged Friday (April 3) to consider broadcast media as personal salesmen.

The speaker was Robert H. Teter, vice president and director of radio for Peters, Griffin, Woodward, station representative. The audience: members of the Life Advertisers Eastern Round Table meeting in New York.

Mr. Teter saw radio and tv as preconditioners of the home audience making them aware of the services and relieving "apathy toward the initial contact of the individual insurance salesman."

He said insurance people ought to consider broadcast media as the route to "educate and pre-sell your prospect . . . With radio and televison you are reaching a family audience."

American Airlines account lands at Y&R

American Airlines Inc., New York, last week chose Young & Rubicam as its new advertising agency, to handle an estimated $6 million budget.

Before the year is out, the airline budget is expected to go higher, probably $7 million or more.

About $1.2 million of the budget is in radio.

The account formally lands at Y&R June 1. The airline on March 10 announced termination with Lennen & Newell where it had been for 3½ years (BROADCASTING, March 16).

Charles A. Rheinstrom, executive vice president of American Airlines, had said then American was interested in tv "if we can find a way to use the medium effectively."

Radio sponsorship consists of the late evening-early morning *Music 'Til Dawn* in nine major markets and spot (RAB reported the spot investment for 1958 at about $1 million).

Y&R ranked third last year among U.S. agencies in broadcast billing. It handles an estimated $220 million per year of clients' advertising, of which nearly $100 million is in the broadcast media.

Maine advertising tax

Legislation aimed at imposition of a 3% state tax on advertising awaits action in a joint House-Senate committee of the Maine legislature. The Maine Assn. of Broadcasters testified at a hearing before the joint group, pointing to the defeat of a similar tax imposed last year by the city of Baltimore.

AFTER 10 YEARS Chase & Sanborn back on shelf at Thompson

Chase & Sanborn last week delivered a coffee break for J. Walter Thompson, worth an estimated $6.5 million in yearly advertising.

For the two it was a reunion after a 10-year separation. In the interval, C&S was Compton's account. The coffee billing includes both regular and instant.

Standard Brands Inc., New York, which markets Chase & Sanborn, appointed JWT on Thursday (April 2), only two days after it had dropped Compton effective July 1.

A substantial portion of the account is in the broadcast media.

No "Outsider" • In picking up the new business, J. Walter Thompson, already the nation's top agency both in total advertising revenue and in radio-tv billing, added a feather in its cap. JWT is no "outsider" at Standard Brands, for in addition to its former handling of Chase & Sanborn, the agency also services other Standard Brands' products (namely Fleischmann's yeast and Tender Leaf tea and one or more of the Royal products).

With Compton going, JWT and Ted Bates are the two agencies with the bulk of Standard Brands' food products. In fact, it was Bates and not Thompson to which handicappers initially had given the inside track.

JWT last year had a conservative estimate of $113.5 million in radio and tv combined. Compton, ninth agency on the national listing, had some $47.2 million in radio-tv.

There had been reports at Compton of trouble long brewing with Chase & Sanborn, fomented principally by increased competition in the coffee field (along with the growth of regional and local coffee brands). Standard Brands recently effected changes in marketing personnel.

At one time Chase & Sanborn and competitor Maxwell House (marketed by General Foods Corp.) sold the most coffee in the country. And typically Maxwell House and Chase & Sanborn were associated with the most popular network radio shows.

Majors in Tv • Now Chase & Sanborn's major broadcast effort is in television. In network, the coffee brand sponsors daytime shows. It also is in spot tv and has been active in radio. Television Bureau of Advertising's listings for 1958 show C&S investing more than $2.3 million in network tv and nearly $2 million in spot television (these figures, however, represent gross time charges).

Broadcasting has never had so many opportunities to do so much

"If only someone had stopped and taken the time to try to understand me . . . if only they had!"

Here's the story of a delinquent, beginning when he was 12 years old, told by him *in his own voice* as he lived it. His experiences – muggings, dope-pushing, larceny, and other crimes – were recorded by Helen Parkhurst, eminent psychologist and educator, over a period of twelve years, as they took place.

Last week this unusual and tragic story was presented by the Westinghouse Broadcasting Company in a series of five consecutive nightly one-hour broadcasts called "Autobiography: My Road to Crime"... heard across the country, from Boston to Portland, Oregon, on all six WBC radio stations.

For mothers and fathers, educators and public officials, this WBC-*initiated*, WBC-*produced* series was a definitive and penetrating attempt to understand this serious problem. *(The Saturday Evening Post* adapted the WBC material into a 3-part serialized story; last installment is in the current issue.)

It represented another great opportunity for radio service. For what better way is there to understand and help these youths than to listen to the words of one of them . . .

. . . to actually hear the anger, the problems and decisions, the revolt as it stirs in what is probably the most troubled mind of our times . . .

the mind of a delinquent

IT COULD ONLY BE HEARD ON RADIO!

Liquor ads boost SatEvePost revenue

The *Saturday Evening Post,* which waited 230 years before accepting alcoholic beverage advertising in its Oct. 4, 1958, issue, has reported revenues exceeding $750,000 from that source in the last quarter of 1958.

And, unlike broadcasters who were thoroughly castigated for considering relaxing radio's voluntary ban on such advertising, the publication's new policy has detonated no explosions.

Peter E. Schruth, vice president and advertising director for the family magazine, said, "we are more than encouraged by the initial reaction of the liquor industry to our acceptance of alcoholic beverage advertising." It is estimated that *Post* revenues from liquor advertisers in 1959 will top $5 million.

When asked about reader response to the new policy, a *Post* spokesman replied: "We are surprised by the smallness of the reaction." Aside from protesting letters received from the WCTU and church groups, the general tone has been one of "calm acceptance," he stated. "We have received several letters commending us for being modern," he added.

The advertising switch was contained in an announcement made last August by Robert E. MacNeal, president of Curtis Publishing Co. He explained then that the change in *Post* policy "is deemed appropriate at this time and compatible with the viewpoint of the vast majority of its present and potential audience."

This judgment was backed up by figures released in February which revealed that the circulation of the *Saturday Evening Post* hit an all-time peak of 6,100,000 with its Feb. 14 issue.

Mr. Schruth listed a dozen distillers and breweries currently using the *Post* as an advertising medium, including Anheuser-Busch, Seagrams-Distillers, P. Ballantine & Sons and Four Roses Distillers. Three new accounts reported in the last week are Schaefer Brewing, Miller Brewing and the Wine Advisory Board. A total of 18 liquor advertisers have bought space in the *Post* so far.

Commenting on this advertiser interest, Mr. Schruth said that "business now on the books for 1959 exceeds our most optimistic estimates for advertising revenue in this category."

The Curtis Publishing Co. also publishes *Holiday* magazine, which has accepted liquor advertising since its beginning in 1947. There is no alcoholic beverage advertising in the other Curtis publications, which are *Ladies' Home Journal, American Home* and *Jack and Jill,* a children's magazine.

Lipstick and romance • The glamor of the Orient becomes a promise of new beauty in Pink Jade, product introduced yesterday (April 5) by Max Factor & Co. in a major-market tv spot drive being placed through Kenyon & Eckhardt, Los Angeles. New line is the company's first major promotion of 1959, its 50th anniversary year. The one minute spot uses the Oriental setting to create an emotional appeal for such copy lines as "Pink Jade lights your lips with a seductive glow . . . makes them the most precious jewel you own."

STANDARDIZING Burnett suggestions on tv-tape given NAB

Suggestions for standards being prepared by NAB for video-tape were offered by an executive of Leo Burnett Co. last week.

They were contained in a letter from David W. Dole, vice president in charge of broadcasting business, to Harold P. See, general manager of KRON-TV San Francisco and member of the NAB video-tape usage advisory committee. The Burnett agency has been active for Kellogg Co. and other accounts in taping tv commercials.

Mr. Dole advised Mr. See that Burnett is submitting a standard provisions agreement draft to producers of videotape. Because of the importance of positive identity of the tape, and the large cost of equipment necessary to allow each handler to identify the material recorded, Burnett suggested inclusion of a "coding" provision in NAB's uniform procedures.

Mr. Dole's recommendations also covered "commercial insertion standards" and quantity copying.

Identification • Mr. Dole felt "correct, foolproof, simple and automatic identity of every copy made of the master tapes to be copied is essential" and should "be a part of the industry standards." He pointed out that the "producers of programs and/or commercials on video-tape will not have sufficient machine-hours available for quantity duplication of copies of commercials . . . nor will the economics of duplication . . . operate properly if the overhead of studios, camera, crews and production costs have to be amortized against machine hours used for copying. Just as the film producer uses the film labs, the tape producer needs a 'tape lab' for such service."

Mr. Dole described Burnett's use of film production contracts covering job specifics and standards provisions.

He concluded that coding and other handling details "are problems of the future . . . but this future is coming at us at a terrific rate." He warned: "All that needs to happen to make it a real 'must' is for one completely coded commercial to be sent to stations now equipped with video-tape recorders and have it turn out to be the wrong one. Who indemnifies whom . . . for station time, tape production, copying and shipping costs and the entire carefully worked out, then loused-up advertising campaign?"

Lestoil's competition

Procter & Gamble's new liquid detergent—Mr. Clean—soon expects to blanket the country with spot tv leading the way. It's already in New England, and moved into New York last Wednesday (April 1). It will soon follow with

ACTIVITY

HOW PEOPLE SPEND THEIR TIME

There were 126,564,000 people in the U.S. over 12 years of age during the week March 13-19*. They spent:

2,198.7	million hours	Watching Television
1,201.1	million hours	Listening to Radio
485.6	million hours	Reading Newspapers
233.6	million hours	Reading Magazines
381.4	million hours	Watching Movies on Tv
126.0	million hours	Attending Movies

These totals compiled by Sindlinger & Co., Ridley Park, Pa., and published exclusively by BROADCASTING each week, are based on a 48-state, random dispersion sample of 7,000 interviews (1,000 each day). Sindlinger's weekly "Activity" report, from which these figures are drawn, furnishes comprehensive breakdowns of these and numerous other categories, and shows the duplicated and unduplicated audiences between each specific medium. Tabulations are available from Sindlinger & Co. within two to seven days of the interviewing week.

SINDLINGER'S SET COUNT: As of March 1, Sindlinger data shows: (1) 114,011,000 people over 12 years of age have access to tv (90.1% of the people in that age group); (2) 44,558,000 households with tv; (3) 49,201,000 tv sets in use in the U.S.

*"Activity" summary was not published for the week March 6-12 because of clerical problems.

(Copyright 1959 Sindlinger & Co.)

other regions agency is Tatham-Laird, Chicago). P & G tested its product successfully in California and has adopted a formula of saturation tv spot (minutes and 20-second spots) and some spot radio.

Lever's Handy Andy, via Kenyon & Eckhardt, N.Y., says it entered the last section of the country only last month. It has been using network tv augmented by spot tv in specific markets.

Colgate-Palmolive's contender—Genie—through Street & Finney, concedes the lead to Handy Andy but says it was the first liquid detergent to land on the West Coast. It has extended its spot tv coverage to include that entire region and is testing on the East Coast with plans nearly ready to go.

All three brands are the top companies' answer to Lestoil, No. 1 spot tv brand spender in 1958. Lestoil spent more than $12.3 million at gross rates and expects to be up to the $14-15 million spot level by end of year.

• Business briefly

Time sales

• Pontiac, through MacManus, John & Adams, is planning another series of eight one-hour-long tv specials for the 1959-60 season: with heightened competition anticipated for "special-time" in the coming season, the advertiser is considering placing all shows on one network if necessary in order to attain satisfactory scheduling.

• Barnhart-Morrow Consolidated, Los Angeles, has purchased $1 million worth of time on KHJ-TV Los Angeles, to be used for spots, at all times in the station's schedule over a period of months, to advertise Perky Parakeet Seed and Kitty Kat Products, made by Maginot Products, L.A. Following its purchase of time on KHJ-TV, one of the largest single time buys in west coast history, Barnhart-Morrow is preparing plans to use other tv stations in Los Angeles, New York, Chicago and San Francisco. The company is buying time directly, with no advertising agency involved. Barnhart-Morrow, primarily in oil, has just acquired Maginot Products.

• Dodge Div. of Chrysler Corp. begins a $330,000 spot radio campaign today (April 6). Involved are 150 markets over a six-week period. Agency: Grant Adv., Detroit.

• The heavyweight championship bout between Floyd Patterson and challenger Brian London of England will be broadcast on radio and tv by NBC. Scheduled for May 1 from Convention Hall, Las Vegas, Nev. (10 p.m. EDT), its sponsor is the Gillette Safety Razor Co., through Maxon Inc. NBC has also acquired radio-tv rights to two additional heavyweight title fights over an 18-month period starting May 1, excluding the Patterson-Ingemar Johansson June 25 bout.

• Florists' Telegraph Delivery will repeat its pre-Easter radio-tv saturation campaign for the 12 days prior to Mother's Day, May 10. The schedule calls for spot radio in about 150 markets (an average of 10 spots per week per station) during peak traffic periods and also spot tv in about 25 markets (over 10 per week, per market). Similar campaigns are planned for upcoming peak promotion periods. Agency: Keyes, Madden & Jones, Chicago.

• American Tobacco Co., through Lawrence C. Gumbinner, and Whitehall Labs Div. of American Home Products Corp., through Ted Bates, will alternate sponsorship of *Bachelor Father* when that situation comedy film series moves from CBS to NBC in mid-June. New time period: Thurs. 9-9:30 p.m. From April 16 until arrival of *Bachelor Father*, NBC will be replacing *Behind Closed Doors* with new panel show, *Laugh Line*, sponsored by Whitehall.

• NBC Radio estimates business for the first three weeks of March at nearly $1,700,000 in net revenues. Latest orders, totaling $1,190,596: Liggett & Myers' purchase of *Stardust* series for 13 weeks beginning May 18, through Dancer-Fitzgerald-Sample; Pepsi-Cola's order for 10-week schedule of 30-second spots, which began March 18, through Kenyon & Eckhardt; Chrysler Motors' (for Simca autos) sponsorship of 19 segments per week in *Monitor* for five weeks beginning May 30, through Richard N. Meltzer, San Francisco; American Machine & Foundry Co.'s order for report on stockholders meeting (one shot April 21) through Cunningham & Walsh; 14 weeks of sports segments in *Monitor* starting May 2 for Raybestos Div. of Raybestos-Manhattan Inc., Stratford, Conn., through Gray & Rogers, Philadelphia, and renewal of *Hour of Decision* (Sun. 10-10:30 p.m.) by Billy Graham Evangelical Assn. through Walter F. Bennett, Chicago.

• American Home Products, N.Y., through Ted Bates, N.Y., has purchased nine weeks of *Laugh Line* (NBC-TV Thurs. 9-9:30 p.m.), a game show which begins April 16.

• Perma-lift (women's underclothes), Chicago, will run 30-second announcements on NBC's *Monitor* starting April 25 for four consecutive weekends. The company is suggesting that stores tie in the commercials with 10-second ID spots. Perma-lift reports that 72% of the tie-ins have been bought. Agency: Cruttenden Adv., Chicago.

Agency appointments

• Wheatena Corp., Rahway, N.J., appoints Charles W. Hoyt & Co., replacing Cunningham & Walsh, effective last Wednesday (April 1). Budget and media plans were not disclosed, though the account has used spot radio-tv.

• American Dairy Assn. of Iowa appoints Truppe, LaGrave & Reynolds Adv., Des Moines.

• Norris Manufacturing Co. (sports shirts), Taylors, S.C., appoints Henderson Adv. Inc., Greenville, S.C.

• American Silicone Co. (cleaning-polishing products), Denver, appoints Cunningham & Walsh, San Francisco, to handle its full product line. The company entered field in 1957 when it began producing silicone concentrates for Convair B-58s to increase air speed and reduce maintenance problems and has since adapted its products for general consumer and commercial use. Plans are not set on radio-tv use.

• Molinos Nacionales, Caracas, Venezuela, subsidiary of International Milling, Minneapolis, names Young & Rubicam Inc., Caracas office, for its all-purpose flour.

Almost everyone in Eastern Iowa watches WMT-TV.

KEEP NAB CONVENTION EXCLUSIVE

Broadcasting's annual Pulse survey shows they like limitations

What do broadcasters think of the annual NAB convention, held March 15-18 in Chicago? Which programs do they prefer? What about limiting delegate participation to ownership-management executives?

The questions broadcasters ask themselves and each other are answered in a survey conducted during the convention by The Pulse Inc. BROADCASTING commissioned the research firm to conduct delegate interviews during the convention.

With a 200-delegate and random sample base taken from NAB's official registration list, interviewers contacted delegates registered in the Conrad Hilton Hotel. This formula resulted in a somewhat smaller number of interviews for delegates in the North Central area.

A higher representation of ownership-management delegates was shown than was the case in a similar BROADCASTING survey conducted at Los Angeles a year ago by Pulse.

Three out of every five delegates at the March 15-18 NAB convention approved the new format limiting exhibitions to broadcast equipment.

Seven out of every 10 approve the effort to limit delegate attendance to ownership-management executives.

These findings in the second annual convention survey conducted by The Pulse Inc. are among the opinions voiced by a sample of 200 of the 2,400 registered delegates. Only broadcaster delegates were included in the results.

Biggest Draw • The best attended convention function (not including the annual banquet) was the March 18 luncheon addressed by FCC Chairman John C. Doerfer, according to Pulse results, with 58.9% of delegates present. Second-ranking was the luncheon addressed by NAB President Harold E. Fellows, with the Keynote speech of Robert W. Sarnoff, NBC chairman, running a close third.

Nearly four out of five delegates interviewed felt the convention sessions were of value to them, citing a variety of reasons.

The March 16 labor clinic drew the top vote (55 delegates) as most valuable session, with 41 citing the FCC-industry roundtable and 37 specifiying the Radio Advertising Bureau presentation.

The poll showed that 68% of delegates were in the top management bracket, 21.3% in engineering and 5.6% department heads.

Seven-eighths Satisfied • Seven out of eight convention delegates consider NAB an effective trade organization. The other one-eighth mentioned assorted ways they thought the organization could be improved.

Pulse pollsters found that over half of delegates believe the FCC is doing a good job on allocations, with one-fourth taking the opposite view. Seven out of 10 believe the Commission is subject to political pressures; two out of five believe the Commissioners are influenced by private talks.

The vote in favor of confining exhibits to broadcast equipment thus eliminating the annual film-transcriptions-service "carnival floor," was far off the 1958 Pulse survey (BROADCASTING, May 12, 1958). That poll had indicated that only a small minority, 19.5%, were in favor of limiting exhibits to broadcast equipment, with 63.1% at that time favoring combined equipment and program service exhibits.

Last year's figures closely followed this year's pattern in the percentage who attend conventions regularly, attend autumn regional meetings, percentage of top management (73.4% last year, 68% this year), reason for attending convention (mainly a group category of "new ideas, information, knowledge gained from others and meetings").

Code Vote • About one out of three delegates (34.5%) consider the NAB's Tv Code effective compared to 74.7% a year ago; 29.5% consider it not effective compared to 14.9% a year ago; 36% had no opinion this year compared to 10.4% a year ago. On the other hand only 42.2% felt the code can be improved, compared to 53.9% who saw room for improvement in 1958. Those who wanted improvement cited mainly the need for more enforcement, better definitions of practice and more policing.

Similarly the number of delegates who felt the FCC is doing a good allocations job fell off from 74.1% in 1958 to 53.8% this year. A larger number, 70.6%, felt the FCC is subject to political pressures, compared to 55.8% last year; 39.6% felt the FCC is influenced by private talks compared to 27.3% a year ago.

A year ago 57.8% favored the plan to limit conventions to top management-ownership delegates. At that time 73.4% of the delegates interviewed were in that category. This year 70.1% preferred the ownership-management limitation, but 68.0% of delegates were in this category.

Two-Year Favorite • The choice of the labor clinic as favorite program repeated the results of last year's survey.

Complete results of the survey follow:

Question 1

Do you attend NAB Conventions regularly?

	#	%

PACKS THE BIG SELLING PUNCH! BEATS ALL COMPETITION IN THE HOTLY COMPETITIVE N.Y.C. SEVEN-STATION MARKET

Look at William Tell after only three weeks on the air in New York: Mar. 4 Arbitron shows the program catapulted into number 1 position in its time period with a resounding 8.6 rating, 25.9 audience share. This beats all other competition in this tough 5:00 to 5:30 time period. And William Tell does it all alone! As WPIX's first commerical program of the day, stepping off from a 1.8 public service show lead-in, William Tell increases the WPIX audience almost 500%.

That's how "William Tell's" all-family costume drama appeal works for TROPICANA ORANGE JUICE in New York. It works all around the country, too... punching up sales for such advertisers as MEADOW GOLD DAIRY, FISHER FOODS, LUCKY 7 STORES, GARDEN FRESH FOOD CHAIN in Pittsburgh, Cleveland, Houston, and Clarksburg, W. Va. More important, "The Adventures of William Tell" packs the same big punch for you! For complete details, phone, wire, write

Five more in ABC fold

ABC Radio last week signed three new affiliates, all effective April 27, the network announced. The stations are WLOW Norfolk-Portsmouth Va., WKAL Rome-Utica, N.Y., and WLST Escanaba, Mich.

The new trio follows two affiliates added the first of this month. These were KWJJ Portland, Ore., independent since its founding in 1925, and KLRA Little Rock, Ark., reaffiliating after one month's operation as an independent.

WLOW, owned by the James Broadcasting Corp., operates on 1400 kc with 250 w. Michael Henry is general manager. WKAL (Mid New York Broadcasting Corp.) is on 1450 kc, 250 w. Gordon Gray is president and Richard Gessner general manager. WLST (Lake Michigan Broadcasting Co.) operates with 1 kw on 600 kc. William C. Johnson is general manager and Jay Merrick is station manager.

KWJJ operates on 1080 kc, 10 kw. Rod F. Johnson is president and general manager. KLRA is on 1010 kc, 10 kw day and 5 kw night. Leonard Coe is president.

Headliner Club awards

WWDC Washington has been chosen as the station that most consistently presents outstanding radio editorials, in the National Headliner Club Award. Other winners in the radio and television categories:

CBS Radio and CBS-TV won top honors for their newscasts. WJJD Chicago and free lance photographer-newsman Dick Elliot won awards for their coverage of the December Chicago school fire. WPTR Albany, N.Y., won the local public service award. KOMO-AM-TV Seattle won for "extraordinary effort by a local station covering the Washington U. boat race crew in foreign competition." WTAE (TV) Pittsburgh and news director Herbe Morrison won the award for local tv newscasts.

Overseas newsmen cite 9 in radio-tv

Overseas Press Club of America Inc., New York, announced winners in 10 categories and made 15 citation awards at the club's 20th annual awards dinner March 28 at the Waldorf Astoria Hotel. A record 250 entries were submitted for the 1958 OPC awards by newspapers, radio and tv stations, magazines and book publishers, said William L. Laurence, chairman of the awards committee.

Award and citation winners in the broadcast field:

Best radio or tv reporting from abroad: Winston Burdett, CBS; citations to Joseph C. Harsch, NBC, and John Secondari, ABC.

Best photographic reporting (motion pictures) from abroad: Josef Oexle, NBC; citation to George Markham, CBS.

Best American radio or tv interpretation of foreign affairs: Chet Huntley, NBC; citations to Louis Lyons, WGBH-TV Boston, and Howard K. Smith, CBS.

The Robert Capa Award "for superlative photography requiring exceptional courage and enterprise abroad": Paul Bruck, CBS.

KTTV (TV) sales force

Expansion of KTTV (TV) Los Angeles' sales department, inauguration of a new service concept and creation of a new commercial operations manager post have been announced by John Vrba, KTTV vice president in charge of sales. Changes, he said, are aimed at providing advertisers with the most comprehensive sales information and servicing in television.

Account executives at KTTV are being given sales assistants to help them service clients, prepare availability lists, confirm orders and follow through on orders placed. These sales assistants are either college graduates who have majored in advertising and marketing or young men with business experience in these fields.

NETWORK GROSS UP
TvB reports January 5% ahead of last year

The three tv networks started off 1959 by ringing up more than $52 million in gross billing for January, a gain of 5% over that month's total in 1958.

ABC-TV increased its time billing the most—up 16.1%. CBS-TV was up 0.2% and NBC-TV 5.2%.

Broken into different times of the day, the nighttime slice decreased 2%, with daytime climbing a hefty 21.4%.

Complete data as issued by Television Bureau of Advertising last week based on compilations of Leading National Advertisers and Broadcast Advertisers Reports:

	January 1958	January 1959	Change
ABC-TV	$9,168,609	$10,647,078	+16.1%
CBS-TV	22,094,015	22,129,248	+ 0.2
NBC-TV	18,344,111	19,299,853	+ 5.2
	$49,606,735	$52,076,179	+ 5.0

Day Parts

	January 1958	January 1959	Change

U.S. Leasing Corp. eyes tv station market

"Need new equipment for your television station? You might be better off leasing it than buying it."

That's the sales pitch of the United States Leasing Corp., San Francisco (CLOSED CIRCUIT, March 9). The company is eyeing the television station market as a prime prospect for its business—buying equipment of all types to the client's specification and then leasing it under an arrangement extending over a specified period of years (with monthly, quarterly, semi-annual or annual payments).

The leasing of tv station equipment is virtually a pioneering effort. In fact, the leasing business itself has become big business only in the last five years, although leasing has existed for many years. U.S. Leasing, regarded as one of the top three or four companies of its kind, is only two years old in its present form; it is an amalgamation of four other leasing organizations. In 1952, the original U.S. Leasing Corp. had rentals receivables (the total amount due to the company on existing leases) of $263,000. At the close of 1958, Leasing's rentals receivables had jumped

MEET THE Millers

MONDAY thru FRIDAY
1 to 1:30 pm on WBEN-TV

Western New York's hosts to over a million families

In the WBEN-TV coverage area, taking in well over a million television families, Bill and Mildred Miller are the authorities on better cooking, better serving, better entertaining and better living. Why? Because, since 1949 they have been doing this type of Mr. and Mrs. show better! Troupers, turned gentleman and woman turkey farmers, the Millers bring to their TV shows a warm professionalism, an inherent affability and the sophistication and background that their years of travel and experience have given them.

In this interesting atmosphere of entertainment and information they do a real selling job for their sponsors. And their sponsors read like a "who's who" of the package goods field.

We suggest you MEET THE MILLERS and showcase your product where more homemakers see it and create a desire to buy it.

HARRINGTON, RIGHTER & PARSONS, our national representatives, will be happy to arrange the introduction.

WBEN-TV 4

CBS IN BUFFALO

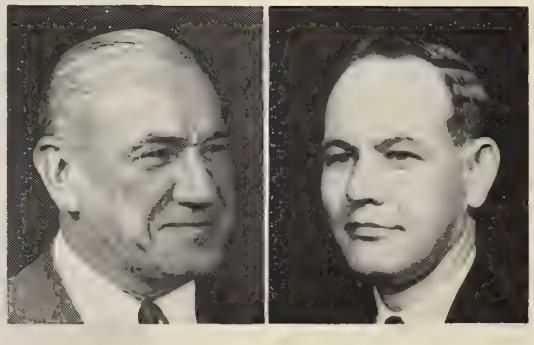
The Buffalo Evening News Station Ch.

STATIONS PRAISE GENERAL

"Saved cost"...

WIIC, Ch. 11, Pittsburgh
"Our transmitter dumps 100 KW into the antenna . . . this input power is no problem for our VHF helical and our signal blankets the Tri-State Area right up to the base of our tower."

Robert Mortensen,
General Manager



WQED, Ch. 13, Pittsburgh
"Simple power division of our sectionalized VHF helical antenna puts our signal in close to our downtown antenna site too . . . a G-E UHF helical antenna for our second educational channel (WQEX) rides piggyback atop the VHF helical — saved cost of another tower."

Edward Horstman,
Director of Engineering

WTEN, Ch. 10, Albany, N. Y.
"Charlie Heisler, our chief engineer, and I are delighted with the performance of the VHF helical. We went on air Dec. 1, 1957, and the only complaint I have heard to date is from the poor fellow who has to climb 1400 feet to change the beacon light."

Tom Murphy,
General Manager

WAST, Ch. 13, Albany, N. Y.
"Extensive field strength tests (and our mail) show that we're putting a good signal where we want it, and that we're meeting FCC requirements to a tee."

W. G. Riple, General Manager
Elmer Snow, Chief Engineer

WJMR-TV, New Orleans, La.
"We've been simulcasting on experimental station KK2XFW, Ch. 12, since September, 1957. Our VHF helical has performed perfectly, both directionally and non-directionally. We've had no pattern variations caused by weather, and no maintenance problems."

George Mayorall,
General Manager & Chief Engineer

ELECTRIC VHF HELICAL ANTENNA

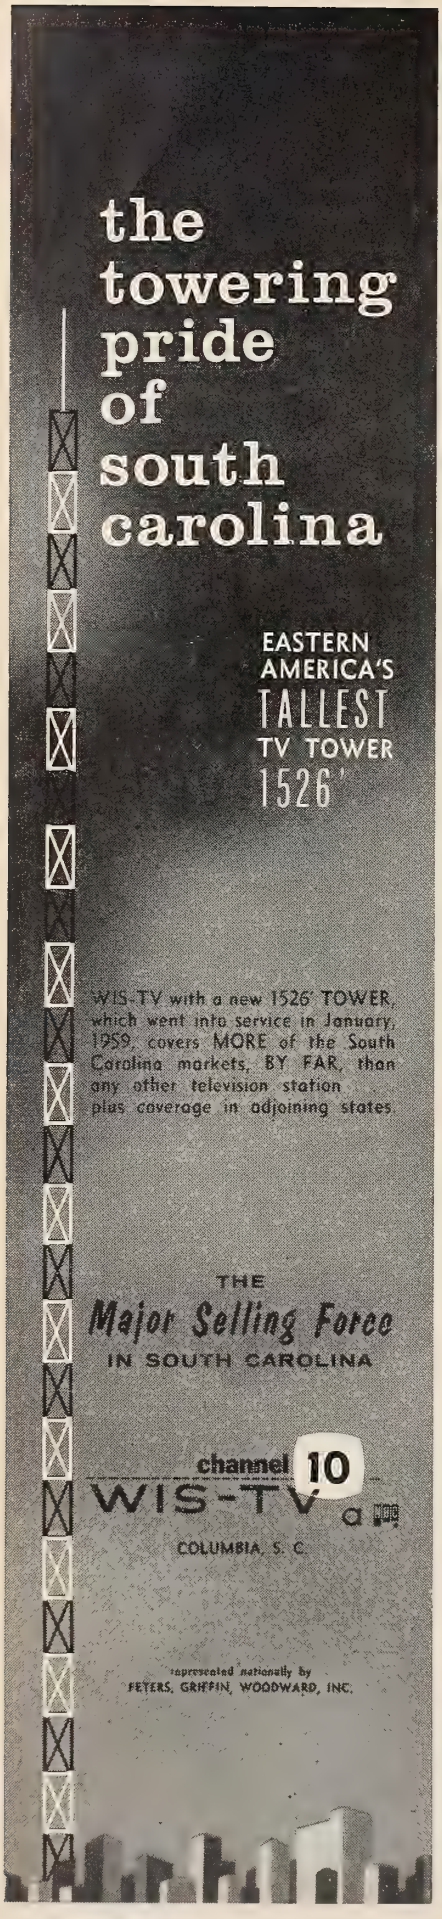
"Delighted"... "Good signal"... "No problems"

STRONGER, SIMPLER, GIVES BETTER RECEPTION IN DIFFICULT AREAS

90% Fewer Components, Easier to Maintain The helical antenna is simpler in design than any other type. Gain for gain, it has 90 percent fewer junctions, feed points and other connections. Transmission lines are *inside* the mast, completely protected from weather and shielded from the RF field. The helical antenna withstands winds up to 112 miles per hour, while its superior rigidity prevents pattern fluctuations. The radiating helix doubles as its own de-icer.

Greater gain, custom coverage General Electric helicals are available with power gains of up to 25. Horizontal field patterns can be directionalized by means of simple tuning stubs on the helix. Power division and phasing between sections provide desired null fill-in. Antenna experts at Electronics Park will work with your consultant for the best coverage patterns.

The helical antenna has been proved in use by TV stations in every section of the country. For further information, contact your nearest G-E Broadcast Equipment representative, or write Broadcasting Equipment, General Electric Company, Electronics Park, Syracuse, N. Y. In Canada: Canadian General Electric Co., Ltd., Broadcast Equipment Sales, 830 Lansdowne Ave., Toronto, Ontario. Outside the U. S. A. and Canada: International General Electric Co., Inc., 150 E. 42nd St., New York, N. Y.



NEW—VHF LOW-CHANNEL WRAP AROUND HELICAL
All the advantages of standard helicals but utilizes tower structure as mast. Stations now using include WKTV, Ch. 2, Utica, N. Y., and KVIE, Ch. 6, Sacramento.

Outstanding Advantages of the G-E VHF Helical

- Fewer feed points and feed lines greatly reduce air leak and coupling problems.
- Another antenna can be "piggy-backed" on the helical, permitting two or more stations to use the same tower.
- Feed lines inside mast protected from weather and shielded from RF field.
- Helical can be readily sectionalized for emergency operation.
- Choice of self-diplexing dual-line feed or diplexed single-line feed.
- Has no separate heating elements for de-icing; using helix as own de-icer takes less power.
- No feed lines smaller than 3⅛" diameter — rugged, durable with high load capacity.
- Structurally rigid; resists shifting of feed lines, eliminates pattern fluctuations in winds.

GENERAL ELECTRIC

to $29 million and is expected to rise to $41 million in 1959.

No Limitations • Eric H. Biddle, vice president and general manager of Leasing's New York office, told BROADCASTING: "We will lease anything. Just let us know what's wanted and we get it. Television station equipment is a new phase of the business for us—we think it will grow. . . ."

Mr. Biddle said he preferred not to disclose the identity of Leasing's several tv station clients. As a matter of public record, Mr. Biddle added, he appeared before the FCC a few weeks ago to explain details of a lease contract planned for Tampa Telecasting Inc., one of six applicants for a Florida vhf channel. If successful in securing the grant, Tampa Telecasting will receive approximately $350,000 worth of studio equipment on lease, payable back over five years at $7,000 per month. Equipment includes four Ampex video recorders (two in mobile units), one helicopter, three station wagons and various lighting apparatus.

Leasing equipment eventually will cost a company more in the long run than if it had bought the equipment in the first place. Mr. Biddle explained that rental charges will cover the purchase price, interest cost on the borrowed money (leasing organizations borrow substantially from lending institutions) and a service fee to the leasing organization. The term of the lease contract is closely related to the useful life of the equipment—usually about 75-80% of its useful life. The leasing organization stands to make more than 50% of its profits on re-sale of the leased item.

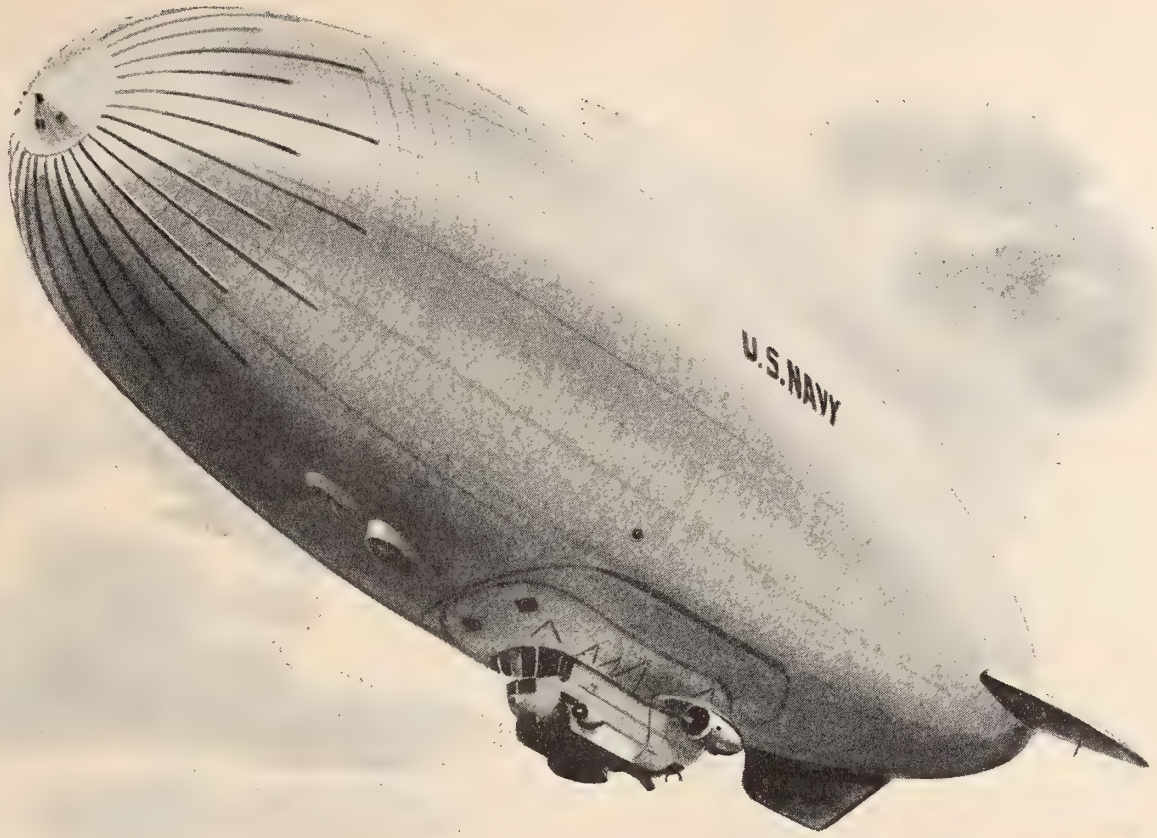
Why do companies lease equipment, rather than buy it, even though it costs them more in the long run? Mr. Biddle gives this explanation: Leasing is advantageous for many companies because it is often the only sound means of acquiring equipment without seriously depleting working capital; others figure their money could be invested more profitably elsewhere; some companies lease because they need their credit line for more pressing funds.

More stations ready for baseball season

Further plans for the 1959 baseball season are being finalized by broadcasters and major league clubs in preparation for this week's opener (BROADCASTING, March 16). Among further reports:

Pabst Brewing Co. through Young & Rubicam, Los Angeles, and American Tobacco through BBDO, New York, are sponsoring KTTV (TV) Los Angeles coverage of 11 games that the Los Angeles Dodgers will play with the San Francisco Giants in San Francisco. Pabst and American Tobacco will underwrite the Dodgers' full 1959 season on a network of which KMPC Los Angeles is the key station.

The Dodgers-KTTV arrangement this year is similar to that of 1958 except that last year the decision to permit the telecasting of the games with the Giants in San Francisco was not reached until after the season had begun and several such games had been played (BROADCASTING, May 5, 1958).



Detroit Tigers' games this season will be carried on a seven-city tv network sponsored by Goebel Brewing Co., Speedway Petroleum Corp., both Detroit, and Phillies cigars, Philadelphia. This is the 18th year that Goebel has underwritten the Tigers' broadcasts. Speedway has sponsored the games for six years. Stations lined up for the 40-game schedule: WJBK-TV Detroit; WSPD-TV Toledo, Ohio; WJIM-TV Lansing; WKZO-TV Kalamazoo; WWTV (TV) Cadillac; WPBN-TV Traverse City, and WJRT (TV) Flint, all Michigan. Games also will be broadcast on a radio network of some 40 stations, with the same sponsorship.

Falstaff Brewing Corp., St. Louis, Mo., is renewing sponsorship of half the KSFO San Francisco coverage of San Francisco Giants schedule. J.A. Folger & Co. (coffee), that city, and American Tobacco Co. (Tareyton cigarettes), split the remaining half. The Giants' games are to be carried by Golden West Network (KFBK Sacramento, KBEE Modesto, KMJ Fresno, KCRE Crescent City, KSYC Yreka, KCNO Alturas, KIBS Bishop, KHOE Truckee-Tahoe, all California, and KOH Reno, Nev.).

N.Y. access bills

The Radio-Newsreel-Television Working Press Assn. and the NAB Freedom of Information Committee have condemned the failure of the New York State Legislature to pass the Mitchell-Savarese bills, which would have permitted radio-tv news coverage of certain proceedings at which witnesses are appearing or may appear under subpoena. The legislative session ended March 25.

The bills would have amended section 52 of the state civil rights laws, which now prevents radio-tv coverage of such proceedings. The amendment would have left such coverage to the discretion of the presiding officer at hearings of the legislature, its committees or of temporary state commissions. The bills were still in committee when the session ended.

TALK, TALK, TALK
But musical spots click under new KLIQ policy

"Top 30" may become the new cry in radio broadcasting if KLIQ Portland, Ore., is successful in its all-news and no-music format which uses 30 different announcer voices for six days a week.

A 1 kw daytimer, KLIQ abandoned its former semi-good music policy March 18. Les Malloy and Stan Bryer, who bought the station March 1, had been planning an all-talk station for years.

There is no music on the independent outlet except for the musical commercials, which stand out like "sequoia trees on an Arizona desert," according to Station Manager Dick Calender.

There are four basic parts of the KLIQ all-news schedule:

• Four staff announcers (replacing three d.j.'s under the old regime) handle headlines, weather and miscellaneous information off the UPI radio and news wires.

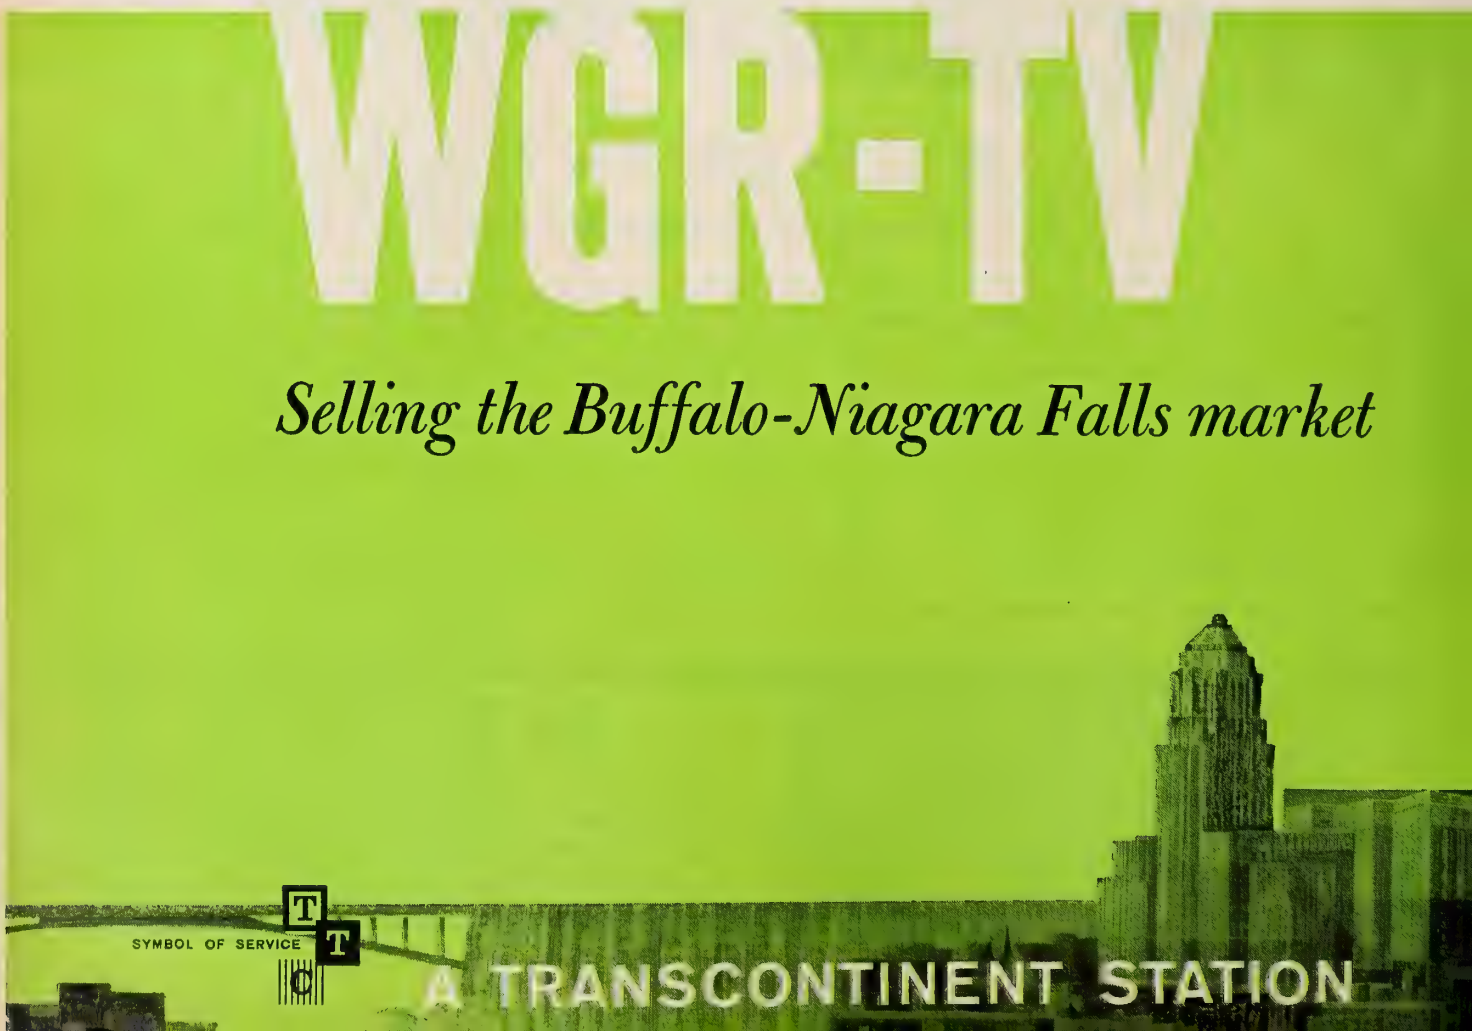
• A "topic of the day" is discussed by station listeners via telephone for 25 minutes of every hour. The April 2 topic upon which listeners expounded: "What do you think of organized labor?"

• A staff of six reporter-announcers in San Francisco read items from some 15 national magazines (including *Time, McCall's, Cosmopolitan*) 2-10 days before publication under a special agreement paid for by KLIQ.

• BBC, London, jets to the station daily an hour tape of interviews by correspondents in England and Europe. These are aired in three-minute segments.

Owner Malloy has laid down a dictum that no one may talk longer than 3-5 minutes at a stretch. His scatter-talk approach has brought encouraging results, including 15 new accounts. Only five written complaints have been received from listeners.

KLIQ gives its announcers a day of rest on Sunday when it offers uninterrupted music except for headlines on the half-hour. Operations manager Allan C. Henry summarized the station's initial reaction: "We've found that people stick with us longer than we dared dream. And the people who do stick with us are the persons all alone who want someone to talk with. In a word, the results are fantastic."



RAB adds 53 members

Radio Advertising Bureau signed 53 stations into membership in March, the highest total for a single month in its history (CLOSED CIRCUIT, March 23). The previous monthly high was 32, set in May 1958.

In announcing this development today (April 6), Warren Boorom, RAB member service director, reported that bureau membership now stands at 938. The total includes stations, networks and representative firms. New RAB members include two stations operated by the Hearst Corp.—WBAL Baltimore and WISN Milwaukee and a group of five southern stations owned by R. E. Hook.

News in depth

"It's the details that count." So Walter C. Shaefer, general manager of WFRX West Frankfort, Ill., has abolished all five-minute newscasts and WFRX now presents three 30-minute newscasts daily, 7 a.m., 12 noon and 4 p.m. WFRX presents 10 minutes of world news, 10 minutes of local news and five minutes each of sports and weather. "The response has been overwhelming," Mr. Schaefer adds. "News is our number one program service."

ARB instant ratings shuttered in Chicago

American Research Bureau shut down its Arbitron instant-rating service for Chicago local tv programs last week before it officially started.

James W. Seiler, ARB director, said the Chicago service failed to get local station support because it showed nighttime ratings about 15% below those reported by another rating service. For some weeks prior to the April 1 scheduled start of commercial operations, the Chicago Arbitron installation had been in operation, with reports distributed free.

ARB's regular diary service will continue in Chicago. So will the Chicago portion of Arbitron's multi-city network report. The Chicago homes linked for the multi-city operation had been augmented by additional homes to make possible a separate Chicago local report. Cost of the additional facilities for the local report was estimated at less than $25,000.

Mr. Seiler said the abandoned local service was a "beautiful" one with a "perfect" sample and equipment operations. He said there was no question about the accuracy of the ratings. But, he said, another service was showing higher nighttime ratings and stations accordingly feared that use of the Arbitron reports might make it necessary for them to reduce their nighttime rates.

The Chicago local service needed about $8,000 a month to break even. Rate to the stations was to be about $1,500 a month, which, with four stations, would amount to $6,000. This was to be augmented by sales to agencies.

Abandonment of the Chicago local service will not affect other Arbitron operations, Mr. Seiler asserted.

ABC, MBS, Don Lee

ABC Radio reported last week that it is continuing negotiations with West Coast stations formerly affiliated with the Don Lee regional network, saying that 99% of those stations have agreed to continue carrying the Don Lee business under ABC auspices. However, none of those stations has entered into affiliation agreements with ABC itself.

BROADCASTING'S story March 30, which reported that 20 of the Don Lee stations would affiliate with ABC, was based on information which proved to be incorrect. Most of these stations have separate affiliation agreements with the Mutual Broadcasting System.

JOURNALISM ROLE CBS-TV show surveys media responsibility

Is American journalism meeting its responsibilities?

A panel of news executives explored this question on CBS-TV's *The Great Challenge* series March 29 (3-4 p.m.) and produced varying answers. But the panel appeared to reach this conclusion: journalism is making an effort to live up to its responsibilities. However, there is opportunity for improvement. (An edited version of the program was presented March 31 on CBS Radio, 4:30-5 p.m.)

The program was the first of a two-part series scrutinizing U.S. journalism. The second was to be presented (yesterday) April 5 on tv and April 7 on radio and will center around this question: "Is the American public getting the information it needs?" The series is produced by the public affairs department of CBS News in cooperation with Sigma Delta Chi on the occasion of the journalism fraternity's 50th anniversary of its founding.

The panel examining the responsibilities of journalism consisted of Barbara Ward, author and formerly for-

REPEAT ORDERS in the nation's 14th market, as anywhere else, are the best evidence of television's selling ability. WGR-TV, NBC in Buffalo, is proud that 25 national and 21 local advertisers, who have used the station continuously since it started in 1954, have renewed for 52 weeks of 1959.

These, and newer advertisers, will get even better sales results in 1959, as WGR-TV continues to provide better service for more viewers in the mighty and prosperous market known as the Niagara Frontier.

Two recent developments that emphasize WGR-TV's continuing leadership in Buffalo are the installation of the first videotape equipment in the area and the purchase of a new tower—300 feet taller—to further extend its coverage in Western New York.

For best results from America's most powerful selling medium, be sure to call Peters, Griffin, Woodward about availabilities in Buffalo.

NBC • CHANNEL 2 • BUFFALO

The panel (l to r): Sevareid, Fischer, Mickelson, Ward, Pulliam, Wiggins

eign affairs editor of *The Economist*, a London weekly; John Fischer, editor-in-chief of *Harper's* magazine; Eugene C. Pulliam, publisher of newspapers in Indiana and Arizona and president of WIRE Indianapolis and WOAV Vincennes, Ind.; J. Russell Wiggins, vice president and executive editor of the *Washington Post and Times Herald*, and Sig Mickelson, vice president of CBS Inc. and general manager of CBS News. Eric Sevareid of CBS News was moderator.

The panel participated in a spirited discussion of the "equal time" issue of political parties. Except for Miss Ward, the panel agreed that it was not the prerogative of the government—but of the individual station or network—to decide how much time to give particular candidates with the criterion being the newsworthiness of the candidates.

Miss Ward indicated that as the media of mass communications become larger and start to rely more and more upon advertising, they tend to present news or programming that will appeal to large masses and to minimize significant news developments, such as the Berlin crisis.

Mr. Mickelson disagreed. He contended that the communication media needed "bigness" to provide the tools and the mechanical devices to accumulate information, sort it out, analyze it and make it understandable to the general public. He claimed there was also room for "smallness," citing the function of *Harper's* magazine.

Miss Ward continued: "I think I meant something slightly different from that, and that is, if the program—this is particularly, I imagine, true, in television (certainly it has happened in Britain)—has to get out to a mass audience, don't you find that the programs themselves have to be, say, of a nature that has greater emphasis on westerns and fun and *I Love Lucy*? This sort of program will inevitably shut out the serious program on the crisis of Berlin and this is one of the elements of our program."

Mr. Mickelson reported that the information media have been covering the Berlin crisis "moderately well," despite the presence of entertainment elements on the air and in the newspapers.

Mr. Pulliam defended large circulation newspapers, claiming the more readers a paper has, the better the opportunity "to focus people's attention if you really have a sense of responsibility." He said that in the past 10 years, the *Indianapolis Star and News* has increased its readers' interest in foreign news.

Mr. Wiggins observed: "I think on the fundamental point that quality and quantity of readership are incompatible, that is not so . . . as the level of education steadily increases, I believe it's possible to have a mass audience and still to have the media, whether it be on the air or in print, one with a rather high quality of content and I think the gulf or abyss between the lady and the lady's maid is nowhere near as great as we often imagine and the range of interest is a lot more universal and more uniform than we might imagine. So you can do both."

Mr. Fischer at one point expressed the view that journalists are doing an inadequate job, failing to focus "on central facts and issues." He felt they tend to underestimate the intelligence of their audience.

At the conclusion, Mr. Sevareid asked whether journalism is meeting its responsibilities in informing the public on the "fallout" problem. The panel agreed that providing this information would be extremely difficult and recommended that a corps of scientifically-trained journalists be developed.

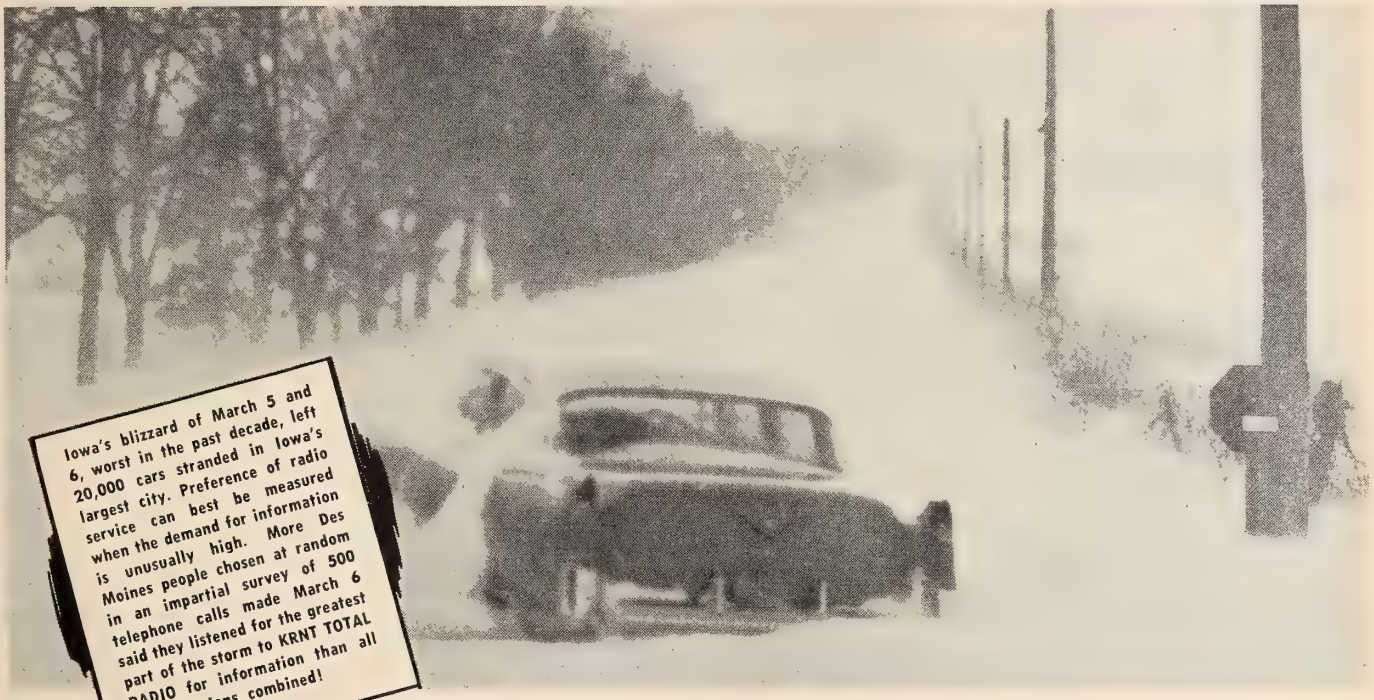
Network unions study closer cooperation

Seven labor unions with network contracts held a closed-door meeting in New York last Thursday (April 2) to discuss the possibility of stronger inter-union cooperation in future industry negotiations.

None of the union officials in attendance would comment later on developments at the session. Representatives at the meeting were from the American Federation of Television & Radio Artists, the American Federation of Musicians, the International Alliance of Theatrical Stage Employes, the International Brotherhood of Electrical Workers, the Radio & Television Directors Guild and the Writers Guild of America.

The meeting was arranged by the National Assn. of Broadcast Employes & Technicians, which holds contracts for technical staffers at both NBC and ABC. G. Tyler Byrne, NABET international executive vice president, said it was the first such gathering of broadcast unions. He pointed out, before the session, that networks cooperated closely during labor negotions but there was no such unity among the unions. He stressed that the session was not called because of any specific dispute now under consideration.

It was reported that some labor organizations, particularly those representing the technical crafts, fear possible displacement of employes because of the increased use of video-tape, leading to stockpiling of programs, and to plans by networks to produce more programs abroad via tape.



FCB told fm is for 'the thinking ad man'

Fm broadcasting was called "a thinking ad man's medium" Thursday (April 2) in a presentation made to media personnel of Foote, Cone and Belding, Los Angeles, by Fm Broadcasters of Southern California. Jack Kiefer, KMLA (FM) Los Angeles, president of the association, described the luncheon session as the first industrywide presentation of fm broadcasting ever made to an agency.

The presentation traced fm's history, described its audience and quoted liberally from the MONDAY MEMO of agency principal Joe Gans (BROADCASTING, Dec. 15, 1958), stating that fm advertising works, and cited statistics on fm sets, homes and income.

It was also claimed that most fm stations strengthen their appeal to intelligent adult listeners by limiting the number of commercials and by banning shouted sales pitches.

76.2% of Des Moines Listened to Radio

Iowa's blizzard of March 5 and 6, worst in the past decade, left 20,000 cars stranded in Iowa's largest city. Preference of radio service can best be measured when the demand for information is unusually high. More Des Moines people chosen at random in an impartial survey of 500 telephone calls made March 6 said they listened for the greatest part of the storm to KRNT TOTAL RADIO for information than all other stations combined!

and more Listened to KRNT Radio than all other stations combined!

During and following a traffic-crippling snowstorm in Iowa last month (March 5th), public demand for information about impassable roads . . . concern for whereabouts and welfare of relatives was critical!

Fortunately, most people in this area have learned from past experience that KRNT always provides service to fill these personal needs. They knew that KRNT would help, and a thousand business executives, school principals and individuals used KRNT'S aired-telephone interview service with the familiarity of daily routine.

The fact that KRNT is the preferred source of help and information in times of emergency stands as proof of KRNT's image of dependability in the minds of people in Central Iowa. Obviously, KRNT has earned this recognition with long-standing excellence in public service . . . reliability that is vital in all selling! KRNT advertisers know this. They used twice as much KRNT Radio in February of 1959 as in the same period a year ago. It's no wonder that most people listen to, believe in, and depend upon the COMPLETE radio station in Des Moines, KRNT TOTAL RADIO!

KRNT

TOTAL RADIO in Des Moines

According to another recent survey (when there was no emergency) . . . a depth study by Central Surveys, Inc.,

KRNT RATED AS THE TOP DES MOINES STATION:

- MOST PEOPLE LISTEN TO MOST
- MOST RELIABLE NEWS
- MOST BELIEVABLE PERSONALITIES

Represented Nationally by **THE KATZ AGENCY**

AB-PT GROSS: $245 MILLION

Goldenson reports 'significant gains' for ABC Broadcast Div. to stockholders

Record gross income of $244,821,000 was set by American Broadcasting-Paramount Theatres Inc. in 1958, Leonard H. Goldenson, AB-PT president, announced last week.

In the annual report to stockholders, Mr. Goldenson stated that the ABC Broadcasting Div. showed improvement in income and earnings in 1958, with ABC-TV "making the most significant gains in audience and billing in the industry." Other highlights of the report: "profitable improvement" was made by the five owned tv stations; ABC radio network operation was streamlined in 1958; the theatre division's profits were about equal to those of 1958.

Gross income for 1958 compared with $215,877,000 in 1957. Consolidated earnings after taxes in 1958 rose to $6,116,000, or $1.40 per share, from $4,894,000, or $1.10 per share, in 1957.

ABC's Record Income • Mr. Goldenson reported that the ABC operating income in 1958 reached a record high of $136,967,000, as against $109,393,000 in 1958.

The ABC Radio loss, he continued, is being kept to a minimum by "streamlining the operation and yet providing the public, our affiliates and advertisers with a well balanced programming structure."

The net worth of AB-PT in 1958 was placed at $85,146,000, equal to $18.97 per share, as against $83,718,000, equal to $18.62 per share, in 1957.

At the year's end, AB-PT had 511 operating theatres as against 537 in 1957; ABC-TV had 228 affiliates, compared with 216 in 1957 and ABC Radio had 330 affiliates, as against 229 in 1957.

Changing hands

ANNOUNCED • *The following sales of station interests were announced last week, subject to FCC approval:*

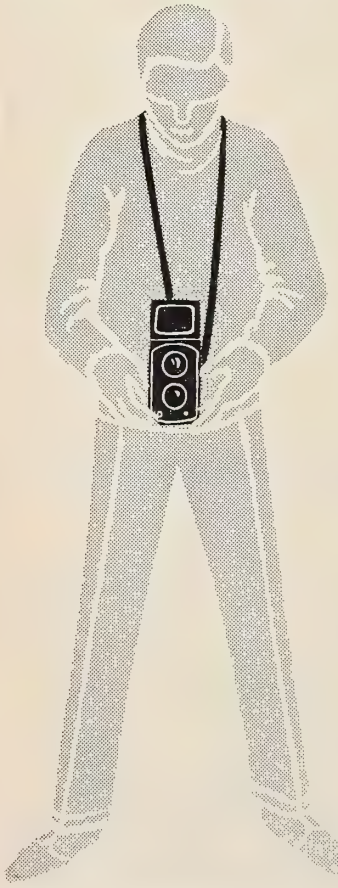
• WEAR-TV Pensacola, Fla.: Sold to Rollins Telecasting Inc. (O. Wayne Rollins) by Charles W. Smith, Mel Wheeler, and others for $1.5 million. Mr. Wheeler, who owns WJDM (TV) Panama City, Fla., will remain with the station as general manager under the new ownership. The sale was handled by Blackburn & Co.

Other Rollins stations include WNJR Newark, N.J., WBEE Harvey, Ill., KATZ St. Louis, Mo., WRAP Norfolk, Va., WGEE Indianapolis, Ind., WAMS Wilmington and WJWL Georgetown, both Delaware, and WPTZ (TV) Plattsburgh, N.Y. Rollins has applied for Wilmington ch. 12 (BROADCASTING, Feb. 23).

• KRKD-AM-FM Los Angeles, Calif.: Sold to Communications Corp. of California for $1.2 million by Continental Telecasting Corp. (Frank Oxarart, Jack Feldman and Albert Zugsmith).

Continental, in addition to KRKD, owns extensive real estate for which oil drilling is in negotiation, and has other radio-tv applications before the FCC. CCC is owned by a syndicate headed by Bob Yeakel, Paul Anka (singer), Bob Fox (KRKD sales manager), Albert Marks, Syd Sundheim, E.L. Brooks (KRKD account executive), Dawkins Espy (broadcasting consulting engineer), Robert Smith (MGM writer-producer), Irvin Feld (Mr. Anka's manager), and Messrs. Oxarart, Feldman and Zugsmith. KRKD general manager Feldman, who has signed a five-year contract with the station, announced that no changes in personnel or operating policies are contemplated.

KRKD is on 1150 kc with 5 kw, day, 1 kw, night. KRKD-FM is on 96.3 mc with 54 kw.



• WAGA-AM-FM Atlanta, Ga.: Sold by the Storer Broadcasting Co. to Plough Inc. for over $800,000. Storer is selling WAGA-AM-FM, it was announced, to obtain FCC approval for the purchase of KPOP Los Angeles (AT DEADLINE, March 30) on the maximum ownership question. Plough Inc. stated that it intends to retain the present management and other personnel of WAGA.

Other Plough stations are WMPS Memphis, Tenn., WJJD Chicago, Ill., WCAO Baltimore, Md., and WCOP Boston, Mass. Multiple owning Storer Broadcasting is to retain WAGA-TV in its present quarters, while WAGA-AM-FM moves under its new management. The sale was handled by R.C. Crisler & Co.

WAGA is on 590 kc with 5 kw, directional antenna night, and is affiliated with CBS. WAGA-FM is on 103.3 mc with 36 kw.

• WEDR Birmingham, Ala.; Sold to Vincent A. Sheehy Jr. (majority owner)

Let's look at the picture

Take a candid view of your radio or television station purchase, sale or negotiation. You'll find that the picture is clearer—sharper—and better when you deal through Blackburn and Company.

and James Bonfils, one time general manager of WTTG (TV) Washington, D.C., by Edwin H. Estes for $225,000. The sale was handled by Blackburn & Co. WEDR is on 1220 kc with 1 kw, day.

• KGHI Little Rock, Ark.: Sold to Michael Heller and Eugene M. Kramer (each 50%) by multiple owner Harold King (who also sold WTTT Jacksonville, Fla., see below) for $125,000. The sale was handled by Blackburn & Co. KGHI is on 1250 kc with 1 kw, day, and is affiliated with MBS.

• WTTT Arlington, Fla.: Sold to Ted and Janet Weber by multiple owner Harold King (who also sold KGHI Little Rock, see above) for $125,000. Ted Weber is a former sales manager of WGN-TV Chicago and Jane Weber is an account executive with Walter Schwimmer, radio-tv producer. The sale was handled by Blackburn & Co. WTTT is on 1220 kc with 250 w, day.

• KTUR Turlock, Calif.: Sold to Danny Landau and others by A.R. McMillen and others for $115,000. Mr. Landau is in advertising and is a broadcasting personality. The sale was handled by Allen Kander & Co. KTUR is on 1390 kc with 1 kw, directional antenna night.

• WALY Herkimer, N.Y.: Sold to Richard Thorman and George A. Baker (former program director of WRC-TV Washington, D.C.) by Louis Adelman (WLLY Richmond) and D.C. attorneys Norman E. Jorgensen and Seymour Krieger for $75,000. The sale was handled by Blackburn & Co. WALY is on 1420 kc with 1 kw, day.

APPROVED • *The following transfers of station interests were approved by the FCC last week (also see* FOR THE RECORD, *page 101):*

• KDDD Dumas, Tex.: Sold to Dumas Broadcasters Inc. (Kenneth E. and Eleanor M. Duke and Alfred A. Tremble) by Lucian W. Spencer and others for $100,835. KDDD is on 800 kc with 250 w, day.

• WDSR Lake City, Fla.: Sold to WDSR Inc. (Charles B. Britt, president, and other stockholders own WIRY Plattsburgh, N.Y., and WJBS De Land, Fla.) by Deep South Radioways for $95,000. WDSR is on 1340 kc with 250 w and is affiliated with MBS.

Wometco registers stock sale with SEC

Wometco Enterprises Inc. (families of Mitchell Wolfson and Sidney Meyer) have filed a registration statement with the Securities & Exchange Commission proposing to sell 325,000 shares of its

Doing the job by going places

In this jet age, where you are has no relation to where you can be in a few hours.

That's why we have built up personnel on the east and west coasts to reach almost any city in the country within a business day.

Our staff comprises a highly experienced service team in the broadcasting field. We criss-cross the continent day and night to contact clients.

We know what's going on, and we discover new things every day. It isn't done by occupying offices.

It's done by traveling in planes, trains and automobiles to see you—when and where you want to discuss buying or selling a TV-Radio property.

ALLEN KANDER AND COMPANY

Negotiators for the Purchase and Sale of Important Radio and Television Stations

WASHINGTON	**1625 Eye Street N.W.**	**NAtional 8-1990**
NEW YORK	**60 East 42nd Street**	**MUrray Hill 7-4242**
WEST COAST	**915 North Commerce St., Stockton, Calif. HOward 5-7367**	

outstanding Class A common stock.

Official name of the firm, which owns WTVJ (TV) Miami, WLOS-AM-FM-TV Asheville, N.C., and 20% of WFGA-TV Jacksonville, Fla., now is Wolfson-Meyer Theatre Enterprises Inc. It is to be changed to Wometco.

Under the plan filed with the SEC, the Meyer family is selling the 290,000 Class A shares it owns to the public through Leo Higginson Corp., underwriter. The Meyer family will retain 82,000 shares of Class B common (10% of Wometco).

Mitchell Wolfson and his family propose to sell 35,000 Class A shares to officers and employes of Wometco. The family group will retain 35,000 Class A shares (9.6% of the total outstanding) and the 458,000 Class B shares it now owns. Mr. Wolfson, individually, will retain 5,481 Class A shares (one-half of what he now owns) and 70,468 Class B shares.

Wolfsons to Control • After the sale is completed, the Wolfson family will hold 55% of Wometco, the Meyer's 10%, and the public 35% (CLOSED CIRCUIT, March 9). Wometco is authorized to issue 3 million shares, of which 540,000 Class B shares and 360,000 Class A shares are outstanding. The stock to be sold has a par value of $1 per share. The estimated offering price is $12.50, with approximately $4 million to be realized from the sale.

After the current stock sale is completed, Wometco shares will be offered over-the-counter.

Sidney Meyer will retire from active participation in Wometco but will remain as honorary board chairman and director. In addition to the broadcast properties, Wometco also owns 22 theatres in Florida and a chain of coin-operated vending machines.

As an adjunct of the stock sale, the FCC last week granted transfer of control of Wometco to the Wolfson family. The company formerly was equally owned by the Wolfson and Meyer families.

10-year trend

The operation of ch. 4 WTVJ (TV) Miami has proved a profitable investment for Wometco Enterprises over the past 10 years. The following WTVJ financial figures were included in a Wometco registration of a public stock offering filed last week with the Securities & Exchange Commission:

	Broadcast Income	Broadcast Expenses
1949	$ 130,949	$ 222,078
1950	551,244	463,153
1951	1,184,814	911,725
1952	1,787,191	1,407,931
1953	2,491,322	1,921,830
1954	3,358,519	1,973,770
1955	3,142,745	1,632,932
1956	4,334,556	2,773,542
1957	4,297,396	3,088,223
1958*	4,476,297	3,432,106

* Includes three-months operation of WLOS-AM-FM-TV Asheville, N. C.

WTVJ was the only tv station in Miami until July 1956 and was the only station owned by Wometco until its purchase of WLOS-TV last September. WTVJ's gross revenue for 1958 was $4,328,490, with 13% coming from NBC-TV affiliation, 47% from national advertisers and 31% from local business. WLOS-TV grossed $547,063 in 1958 (22% from ABC-TV, 47% national and 31% local). Wometco said that the WLOS stations are not making money and that the am-fm revenue is "not significant."

CBS INC. OUTLOOK
Security analysts hear bullish report

A bullish report on the outlook for CBS Inc. and its various operating divisions was submitted by President Frank Stanton last week to the New York Society of Security Analysts.

His speech at the Monday (March 30) luncheon of the society followed the broad pattern of the company's recently released annual report for 1958 (BROADCASTING, March 30) and also ranged across other areas. Highlights of the speech and a subsequent question-and-answer session included:

• CBS invested $53.1 million in television "before we began to make a profit from it."

• The company's tv film sales activities abroad are "only beginning. There are roughly as many television stations in the free world outside the U.S. as there are at home—500 stations ranging from Hamburg to Hong Kong—and they need what we can give them." In addition, the CBS-TV Stations Div., in association with local partners, is building a studio plant and transmitter in Buenos Aires.

• Of CBS Radio's new Program Consolidation Plan: "We believe this new plan gives us a justified hope that we will be able to plug [the] drain on [network radio] profits." Though the plan has been in operation only three months, network audiences are up 29%.

• He displayed a "mesa transistor" not much larger than a speck of dust. Although "barely visible to the naked eye," it "will amplify or switch electronic signals so efficiently that it is opening new fields in electronics." It has military and industrial applications —but limited at present by cost ($45 each)—and may or may not have "entertainment applications."

• Program plans of the CBS News Div. include "a project to deal with the whole question of money management for the general audience—a program that will attempt to provide information on investments, budgeting and related matters."

• There is "every reason to believe" that television sets, now numbering 47 million—"could exceed 100 million units in the not too distant future." And "there are definite signs . . . that developments already in the laboratory appear to produce increased efficiency in television receivers that could double the range of reception."

• He isn't worried that CBS-TV's market share is declining. "It is inevitable that in times of high demand the more the gap will close between the leader and the followers. This is fine; we want to be the leaders of a healthy industry, not of an ailing industry."

• If FCC abolishes option time, this "would create serious problems for the public, the stations, the national advertisers and the networks." CBS also intends to fight the proposal to bar network organizations from spot representation.

• Most entertainment tv programming has moved or will move to Hollywood for origination, Dr. Stanton felt. He recalled that this happened in radio. He did think some entertainment shows would always be done in New York because the talent would not want to move to the West Coast.

• Television is not pricing itself out of the market. As long as cost-per-thousand remains steady or goes down, there is no danger.

CBS Radio's Hayes urges 'free' medium

The importance of recognizing "the role of free broadcasting in our society" and of safeguarding its "freedom from the narrow interests of special groups and from ill-considered legislation" was stressed last week by Arthur Hull Hayes, president of CBS Radio.

He addressed the Downtown Assn. of San Francisco and the San Francisco Advertising Club last Wednesday (April 3). Coincidentally, CBS-owned KCBS San Francisco was honored on its "50th anniversary," based on recently published claims that its predecessor, KQW, was started in 1909 by Charles David Herrold, founder of the radio school (BROADCASTING, Feb. 16).

Mr. Hayes said Mr. Herrold's "unique contribution" was the concept "that radio could talk to all people." In recognizing and demonstrating this function

NEW

RCA 500- AND 1000-WATT AM TRANSMITTERS pace the latest trends!

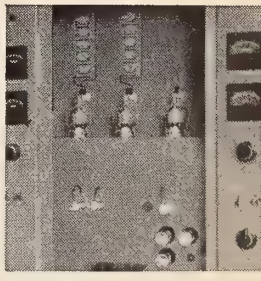
New BTA-500R/1R 500- and 1000-watt transmitters in a choice of colors: red, blue, green, and dark umber gray.

The design philosophy behind these ne broadcast transmitters is based on years experience in developing the most reliable broadcast transmitters, but the features a radically new. Simplified tuning, reduced insta lation time, and built-in provision for remo control are some of the improvements. Al included in the design are provisions for remo Conelrad switching.

NO NEUTRALIZATION REQUIRED
Tetrodes throughout simplify the tuning.

BUILT-IN PROVISION FOR REMOTE CONTROL
Terminal strips are provided in the transmitter for connection of a remote-control unit.

BI-LEVEL MODULATION
The very low order of distortion results in improved soundability.



FEWER TUBES
Smaller tube inventory means reduced cost of operation.

ACCESSIBILITY
Vertical construction permits easy access for maintenance.

SIMPLIFIED TUNING
Only one tuning control—on the front panel. All operating controls are conveniently located on front, at both sides of door.

FUNCTIONAL COLOR STYLING
Fits into any surroundings through choice of color for doors—blue, green, red or gray.

EASE OF ACCESS
All tubes can be reached from the front by merely opening the door. Access to the rear is provided through two interlocked panels behind the transmitter. These panels are easily removed with thumbscrew fasteners. Typical RCA vertical construction permits easy access and maintenance. Removable base makes the transmitter easy to move.

NEW OSCILLATOR
Three switchable temperature controlled crystal units, a spare on t main frequency, plus one for automatic Conelrad switching are inc porated in the new crystal oscillator of both transmitters. Six thum screws hold the etched oscillator-buffer circuit board to the exci subassembly. All oscillator and buffer connections are made through plug type terminal strip. Frequency stability is ±5 cycles for the n RCA crystal units.

SIMPLIFIED POWER INCREASE
The exciter unit is the nucleus of the basic transmitter; all low-le rf and audio stages are built into a single unit used in both 500- a 1000-watt transmitters. Thus, power increase is made easier.

For further information about these and other transmitters, call the nearest RC Broadcast Representative. In Canada call: RCA VICTOR Company Limited, Montre

of radio, Mr. Hayes said, "he contributed to a phenomenon which has helped maintain our political and economic security."

BBDO's Tiss warns of hidden toll in pay tv

If toll tv ever materializes, "there are many palms that may have to be greased along the way," with costs probably passed on to set owners, Wayne Tiss, vice president in charge of BBDO's Chicago office, asserted last week.

Addressing the Chicago alumni chapter of Alpha Delta Sigma, national advertising fraternity, at a dinner meeting Tuesday evening, Mr. Tiss felt it conceivable that, free of FCC control, "not only cities but everyone from big development planners down to tract contractors might demand, and get, a percentage of pay tv's take in return for granting their own 'franchises' in developments, tracts, apartment houses and hotels."

On the other hand, he commented, with FCC now prepared to accept applications for subscription television tests, "there may be some results that will show the public is ready to accept some sort of plan." Yet, with the bulk of social, legal, technical and economy "problems" involved, he added, the whole concept of pay tv may be "tied up for years."

Mr. Tiss quoted the belief of "most experts" that California is "the most likely spot" for a tryout if the Commission proceeds with pay tv tests. He claimed it would probably have to cover a broader segment of population than the Zenith Chicago test in 1951, or that of Telemeter in Palm Springs, (Calif.) and Video Independent Theatres in Bartlesville (Okla.) in recent years.

The BBDO executive also said that "with the exception of first-run movies, there's precious little in the 'golden era' prospectus that we don't get now," under free tv. He added:

"I have a horrible vision of some disenchanted pay-tv booster summing it all up in a column written three or four years hence: 'Alas, the programming we're getting now is just like the programming we were getting back in 1959. There's just one difference: Now it can be tolled.' "

• Media reports

• The National Educational Television & Radio Center, Ann Arbor, Mich., has received a $5 million grant from the Ford Foundation, the center's President John F. White announces. The grant, beginning next year, will go toward five years of operating expenses.

• WHYN-TV Springfield - Holyoke, Mass., has become a primary ABC-TV affiliate. Licensee of the ch. 40 outlet is Hampden-Hampshire Corp. of Springfield.

• H-R Representatives Inc. and H-R Television Inc., which for years have run campaigns on the "working partners" theme, this month begin emphasizing the additionl theme of values and advantages of spot advertising. The campaign is all part of H-R's new and concerted effort to "promote the spot medium," or as Frank Pellegrin, vice president of the firm, noted last week: competition for the ad dollar is "fierce" —print media are stepping up attacks on broadcast advertising and "spot broadcasting needs all the promotional support it can get."

• Four formerly independent radio stations have been signed for affiliation with Mutual, and 13 additional stations have applied for affiliations within the past six weeks, MBS announced Thursday (April 2). With two of the four already programming MBS—KMRC Morgan City, La., and WELY Ely, Minn.—network service was to start yesterday (April 5) to WCBC Anderson, Ind., and April 9 for KSIG Crowley, La. KMRC began airing Mutual programs on March 16 and WELY joined the hook-up on March 30.

• Corinthian Broadcasting Corp., N.Y., reports that starting today (April 6), News Assoc., Washington, D.C., will create a special Washington news service tailored to meet the local and regional requirements of Corinthian stations KOTV (TV) Tulsa, KGUL-TV Houston, WANE-AM-TV Fort Wayne and WISH-AM-TV Indianapolis.

• Mr. and Mrs. Samuel I. Newhouse have added magazines to their radio-television-newspaper interests. They have purchased what is thought to be a controlling interest in Conde Nast Publications Inc., Greenwich, Conn., for an estimated $5.4 million. In this transaction they are said to have acted as private investors, and no resulting personnel changes are contemplated at Conde Nast beyond their appointment to the board. The company's publications include *Vogue, House & Garden, Glamour* and *The Vogue Pattern Book*. The Newhouses and family own 14 newspapers plus radio and tv stations in St. Louis, Mo.; Portland, Ore.; Syracuse, N.Y.; Birmingham, Ala., and Harrisburg, Pa.

• "New KRIB [Mason City, Iowa] Day" was proclaimed March 15 by Gov. Herschel Loveless on the station's first anniversary. An open house, at which state Senator Walter Edelen was guest of honor, attracted about 2,000 to KRIB.

• Benedict P. Cottone and Arthur Scheiner announce the relocation of their law offices of Cottone & Scheiner in suite 1228, 1001 Conn. Ave., N.W., Washington 6, D.C. Telephone: Executive 3-4477.

• N.E. Paton Jr. Assoc., Kansas City public relations consulting firm, announces the establishment of consulting service for broadcasters in fields of public relations, promotion and sales counseling. The firm also offers a new type of programming for radio stations.

• KPLR-TV St. Louis, Mo., has received a new antenna from Siemens & Halske, Munich. The antenna, said to be the first German-made one in the U.S., is being erected 1,100 ft. above ground at Lemay, Mo. The continuous transmission line (no splicers or couplings between antenna and distribution) arrived in three 17-ft.-round drums each weighing six tons. It is claimed that the S&H product needs no gas or fluid for dehydration nor de-icing devices, as it operates regardless of the thickness of ice. Two German technicians are in St. Louis to help install the antenna.

• KPUG Bellingham, Wash., started operating under a one-rate structure Wednesday (April 1). The station became an independent Jan. 1 after many years with Mutual-Don Lee network affiliation.

• WKCB-WKCQ (FM) Berlin, N.H., starts stereophonic broadcasting next week. The stations will air stereo music on afternoons when they are not carrying Boston Red Sox games. During these two-hour musical stints. WKCB-WKCQ will deliver commercials in stereo.

• The *La Grande* (Ore.) *Evening Observer* has been purchased by John McClelland, Robert Chandler and Marvin E. Johnston of KWLK Longview, Wash., according to Hamilton, Stubblefield, Twining & Assoc. Inc. which handled the sale. The price paid for the paper was $275,000.

• Rep appointments

• WDIA Memphis names The Bolling Co., N. Y.

• WGHN Grand Haven, Mich., appoints John E. Pearson Co.

• KPLR-TV St. Louis has appointed Peters, Griffin, Woodward Inc. as its national representative, according to announcement being made today (April 6).

Who pays the bill for "Public Power"?

Every American pays part of the cost of federal government "public power" even though this electricity goes only to a few.

So far, more than $5,500,000,000 in taxes has been collected for federal government power dams and plants. But even that is just a drop in the bucket as far as the "public power" pressure groups and lobbyists are concerned. They are pressing hard for $10,000,000,000 more—with still more and more beyond *that*. All is to be collected from the taxpayers, of course.

Yet the promoters of government electricity can't even point to a justifiable *need* for this multi-billion-dollar spending. America's independent electric light and power companies are ready and able to provide all the power the nation needs—*without* depending on taxes.

So far, "public power" pressure groups have been able to get away with this scheme because most Americans don't realize they are footing the bill. But informed citizens can put a stop to it.

Will *you* help spread the word?

America's Independent Electric Light and Power Companies

Company names on request through this magazine

It's this easy

to get programs and sponsors together, anytime

When television programs and commercials are Videotape* recorded, they can be scheduled to run in almost any combination and at any time. Stations can dovetail schedules for local, network and special events*quickly and easily. "Live" spots can be run at any availability. And both can be timed to reach pre-selected audiences.

And with Videotape recording, stations can plan more "local live" programs . . . increase the number of "local live" commercials . . . build up station income.

But this is just part of the story. Let us tell you how completely the Ampex VR-1000 Videotape Recorder is changing the face of television. Write today.

CONVERTS TO COLOR ANYTIME • LIVE QUALITY • IMMEDIATE PLAYBACK • PRACTICAL EDITING • TAPES INTERCHANGEABLE • TAPES ERASABLE, REUSABLE • LOWEST OVERALL COST

KFMB-TV, XETV (TV) fight flares again

KFMB-TV San Diego's across-the-border dispute with XETV(TV) Tijuana has erupted again.

This time the San Diego outlet, is allying with other border radio and tv stations, it was understood, to seek legislation to prohibit U.S.-originated programs from being transmitted—physically or otherwise—to Mexican stations which broadcast them back across the border.

KFMB-TV also has complained to the Federal Trade Commission that XETV is misrepresenting itself as a U.S. station and has asked FCC to investigate the production of programs by California Western U. of San Diego for broadcast on XETV.

Meanwhile, ABC-TV, which transmits programs to XETV under FCC permit, has asked the Commission for renewal of the "affiliation" authorization. KFMB-TV is CBS-TV primary and ABC-TV and NBC-TV secondary.

KFMB-TV asked FTC to move against Bay City Television Inc., San Diego, XETV sales agent in the U.S., on the ground the station is advertising itself as a U. S. station.

'Educational' Programs • KFMB-TV told the FCC it believes commercial programs are being produced at California Western U. for broadcast on XETV and asked the FCC to investigate. KFMB-TV said the FCC had indicated the institution would produce only non-commercial programs in issuing a permit to the college for such production in April 1958.

FCC officials explained last week that its permit to the college covered program material transmitted to XETV by microwave relay or other means—not physical transmission of films, records and transcriptions. The college's permit for non-physical program transmission expired last February and since programs apparently no longer involve electrical transmission, no permit is required by law, it was indicated.

FCC sources said the U.S. Supreme Court's decision in the Baker case in 1937 found that mere physical transmission over the border to Mexico of films, records, etc., does not violate the applicable section of the Communications Act and that an FCC permit is required only when the transmission to Mexico takes place through electronic process.

The FCC's original permit for ABC-TV to transmit programs to XETV was finalized only after a hearing and an appeal to the U.S. Court of Appeals in Washington in 1957. The court remanded the case, but not on the basic question of the right to transmit programs across the border to Mexico. FCC afterward affirmed the permit.

State tax bites on outside firms probed

The Senate Small Business Committee will begin public hearings Wednesday (April 8) on the impact of recent Supreme Court decisions upholding the right of states to tax firms doing business in interstate commerce.

The hearings are the first step in a "thorough" study of the problem, Sen. John Sparkman (D-Ala.) said last week in announcing the inquiry. He cited three Supreme Court decisions late in February and early March which ruled that a state could tax interstate corporations for business conducted within that state (BROADCASTING, March 2).

NLRB clears IBEW in WKRG Mobile case

The campaign of International Brotherhood of Electrical Workers to drive advertisers away from WKRG-AM-FM Mobile, Ala., did not violate the National Labor Relations Act, according to an April 2 ruling by the National Labor Relations Board.

NLRB affirmed a report by Trial Examiner William F. Scharnikow holding the IBEW practices were not unfair (BROADCASTING, Sept. 1, 1958). The examiner held the union's "sole object and motive for its action was to protect the bargaining with competing union stations by increasing their advertising revenues through a transfer of WKRG's advertising and, by this showing of advantage in operating under union conditions, to enable the respondent union to preserve for the union stations' employes their existing wages and working condtions."

IBEW had lost its representation at WKRG in 1957 at an NLRB election. The union had opposed adoption by the stations of a "combo operation" with announcers operating the control board.

Last Jan. 28 a Mobile local union was certified as technicians' bargaining agent at WKRG-AM-TV after an NLRB election (BROADCASTING, Feb. 16). The vote was 16 to 1 in favor of the local. IBEW abandoned its picketing and advertiser contacts after results of the election were announced by NLRB.

Spot Perfection —"Live"

Mr. George Gould, President
NTA's Telestudios, Inc.
New York

"Agencies and advertisers that use our production facilities demand all the here-and-now intimacy, the depth, the dramatic impact of live delivery – plus the perfection and protection of pre-recording. That's why Norman, Craig & Kummel, Inc. came to us for Videotape* recording of the Speidel Corporation's watch band sales messages."

WKIS asks 'master' hear Orlando ch. 9

WKIS Orlando, Fla., last week asked the U.S. Court of Appeals in Washington to appoint a "special master" under court jurisdiction to rehear the remanded Orlando ch. 9 case. The FCC's 1957 grant of ch. 9 to WLOF Orlando was remanded by the U.S. Supreme Court last October for reconsideration in view of testimony in 1958 on Capitol Hill alleging an *ex parte* representation had been made in behalf of WLOF during adjudication (BROADCASTING, Nov. 3, 1958.

FCC has notified the court it is ready to hold a rehearing of the case as soon as it gets instructions (BROADCASTING, March 30).

Losing applicant WKIS said the court should order a special master to hold the hearing because FCC "would be reluctant to disturb their grant" to WLOF. WKIS added that FCC's "mind has already been made up as to the innocence" of WLOF, although the FCC has told the court that its investigation indicates a new hearing is warranted. The information from this investigation has not been disclosed to WKIS, the station said.

WKIS said the special master should determine from the hearing whether WLOF should be disqualified. If WLOF is found disqualified, WKIS said, the court should remand the case to FCC for "further proceedings not inconsistent with any action taken."

Allegations were made in testimony in June 1958 before the House Legislative Oversight Subcommittee that Florida attorney William H. Dial had made representations to former FCC Comr. Richard A. Mack which favored WLOF.

Appeals court upholds FCC in license renewal

The U.S. Court of Appeals in Washington last week upheld the FCC's denial of a protest by WSAY Rochester, N.Y., against a renewal of license for WBBF Rochester.

WSAY had charged WBBF refused to grant permission for rebroadcast of its programs; had engaged in unfair competition by offering advertisers who also used WBBF-affiliated WGVA Geneva, N.Y., 35 miles away, a 25% reduction in time charges, and that the FCC erred in requiring WSAY to specify "with particularity" the reason it asked for a hearing on the WBBF renewal.

The court agreed WBBF had been justified in refusing to grant rebroadcast rights because WSAY had not specified programs to be rebroadcast, time of rebroadcast and payments to be made for rebroadcasting privileges. The WSAY request for rebroadcast rights, the court said, was "patently unreasonable in scope."

The court also agreed that joint discounts offered by WBBF (and WGVA) were not unreasonable; that no claim was made that advertisers are required to advertise on both stations and that some $16,000 loss claimed by WSAY as a result did not impair its ability to broadcast in the public interest. The court said it was unable to find the FCC erred in failing to disapprove the joint advertising discounts.

The court had remanded the case in an earlier WSAY appeal on grounds the FCC decision was erroneous. Judges handing down the decision last week were David L. Bazelon, George T. Washington and Walter M. Bastian.

Class III power needs cited in FCC filings

Nearly a score of am stations and one network have filed comments favoring FCC action looking toward authorizing up to 25 kw for Class III (regional) broadcast stations. The papers were submitted on petitions for rulemaking filed in January by WERE Cleveland and WPEN Philadelphia.

One group of a dozen stations said FCC has the duty to review limitations imposed on Class IIIs under conditions of 20 years ago. Urban population centers have grown and sizable new urban areas have developed, they said, requiring increased power to provide service.

These stations were:

WFLA Tampa, Fla.; WDSU New Orleans; KOIN Portland, Ore.; KGLO Mason City, Iowa; WWJ Detroit; WIP Philadelphia; WKBN Youngstown, Ohio; WTAD Quincy, Ill.; KVI Seattle; WHBF Rock Island, Ill.; WWDC Washington, and WMBR Jacksonville, Fla.

Another group of six stations and ABC noted that there has been a doubling or tripling of the number of regional stations and the majority no longer provide regional coverage at night. They cited increasing urbanization and said the FCC should consider higher power for Class IIIs as it is now doing for Class IVs. The group said there is a need for Class IIIs to serve both the expanding metropolitan areas and the underserved rural areas surrounding them. These stations included:

KXYZ Houston; KLEO Wichita, Kan.; KEVE Golden Valley (Minneapolis); WZOK Jacksonville, Fla.; KXXX Colby, Kan., and WSAU Wausau, Wis.

Selective Rulings Urged • ABC in additional comments said a horizontal increase of all Class IIIs to 25 kw would provide no improvement, and expressed the opinion that increases should be on a case-by-case basis with the use of new directional antenna systems. For a "limited number" of stations, particularly "along the coast," an increase to 25 kw, with directional antenna, could be effected with no increase in interference to co-channel and adjacent-channel stations, ABC said. Other stations in the center of the country with "reasonably lenient" directional antenna requirements, might be given more modest increases of perhaps up to 10 kw, with slight directional modifications, ABC said.

No final rules can be written now, but a "notice of inquiry" would be an "excellent place to start," ABC said, since this would be introductory toward rulemaking and interested parties could furnish comments and work together to set forth an "adequate philosophy."

KFWB Hollywood cited the need for increased power and signal intensity of regionals, particularly in the Los Angeles area.

• Government notes

• NBC last week asked for more time to prepare comments on Daytime Broadcasters Assns.' proposed rulemaking to extend the hours of daytime am stations. The DBA proposal asks that daytimers be allowed to sign on at 6 a.m. or sunrise (whichever is earlier) and sign off at 6 p.m. or sunset (whichever is later). NBC asked that the time for comments be extended to June 12, five months from the time the rulemaking was proposed (Jan. 12), noting that a five-month period was allowed for comments on DBA's earlier proposal for extended hours (which was denied by the FCC).

• FCC Hearing Examiner Herbert Sharfman issued an initial decision March 31 which would affirm Commission grant of late last year to Tomah-Mauston Broadcasting Co., Tomah, Wis., for a 500 w daytimer WTMB on 1390 kc, with reduced antenna efficiency. The grant had been protested by William C. Forrest, WRDB Reedsburg, Wis. Late in February the FCC made a move to lift a Dec. 10 stay of the WTMB grant after first noting it might maintain the stay (BROADCASTING, Feb. 23).

• Philco Corp., Philadelphia, has filed a registration statement with the Securities & Exchange Commission proposing to offer $20 million of convertible subordinated debentures for public sale. The debentures would be due April 15, 1984, with the interest rate and public offering price to be fixed later.

WILL FOURTH NETWORK BE ETV?

National educational system is predicted

A national educational tv network will be operating within five years, according to John F. White, president of the National Educational Television & Radio Center.

Addressing a conference held April 2 in Washington by the center and the Advisory Council on Educational Television, Mr. White said the development of regional educational tv networks and advances in the use of tv tape recording will trigger a national network.

Since KUHT (TV) Houston took the air May 25, 1953, 40 educational outlets have started operating, he said. Another eight are under construction and many others are in various stages of planning. He cited a recent survey showing 31 educational tv outlets have a total capital investment of $16,069,560.

Ford Foundation last week awarded another grant of $5 million to the educational center for basic expenses and programming, Mr. White said.

Big Difference • Discussing the difference between commercial and educational tv outlets, he said: "The commercial station is on the air because some individual or group invested money, with the honorable hope that from that investment they would receive a fair financial return. Hence, every program decision it makes must of necessity give serious consideration to what that decision does to audience size or make-up and, therefore, to its profit statement. In other words, it is in business to make money.

"The educational or non-commercial station is not in business to make money. It is in business to spend money —every cent it can lay its hands on—in service to the community or region it covers. How well we spend that money will determine not only the answer to our significance, but also to our healthy existence."

Mr. White said educational tv's function is not to compete with commercial programming but to render a service that is not available elsewhere. "Unlike our commercial counterparts we do not at any given time seek to have the majority of television listeners tuned to our channels," he continued. "But, over a period of time we should provide programming satisfying the special interests of the majority of set owners."

Every major city and many smaller ones will have at least one educational tv station on the air and many will be operating multiple channels within a decade, he predicted, citing the two-channel operations in Oklahoma City and Pittsburgh. He added that another 10 years should see regular use of tv as an important teaching tool for all schools within reach of a signal.

The educational tv function, he said, is to serve the needs of millions of "communication orphans," a substantial minority audience.

COLORCASTING

Here are the next 10 days of network color shows (all times are EST):

NBC-TV

April 6-10, 13-15 (2:30-3 p.m.) Haggis Baggis, participating sponsors.

April 6-10, 13-15 (4-4:30 p.m.) Truth or Consequences, participating sponsors.

April 6, 10 (10-10:30 p.m.) Arthur Murray Party, Pharmaceuticals Inc. through Parkson and Lorillard through Lennen & Newell.

April 7, 14 (8:30-9 p.m.) Jimmie Rodgers Show, Liggett & Myers through McCann-Erickson.

April 8, 15 (8:30-9 p.m.) The Price Is Right, Speidel through Norman, Craig & Kummel and Lever through J. Walter Thompson Co.

April 8 (9-9:30 p.m.) Milton Berle, Kraft through J. Walter Thompson Co.

April 9 (8-9 p.m.) Bell Telephone Hour, Bell through N.W. Ayer.

April 9 (9:30-10 p.m.) Ford Show, Ford through J. Walter Thompson.

April 9 (10:30-11 p.m.) Masquerade Party, Lorillard through Lennen & Newell.

April 10 (7:30-8 p.m.) Northwest Passage, sustaining.

April 10 (8-9 p.m.) Ellery Queen, RCA through Kenyon & Eckhardt.

April 11 (8-9 p.m.) Perry Como Show, participating sponsors.

April 12 (8-9 p.m.) Steve Allen Show, RCA through Kenyon & Eckhardt.

April 12 (9-10 p.m.) Dinah Shore Chevy Show, Chevrolet through Campbell-Ewald.

Jack M. Warner forms film production firm

Jack M. Warner Productions Inc., Hollywood, has been formed as a tv-motion picture production company with Samuel Schneider as president-treasurer; Jack M. Warner, vice president in charge of production, and David M. Richman, secretary. Production headquarters will be at the Motion Picture Center studios, Hollywood, and business headquarters at 640 Fifth Ave., New York, N.Y., where Mr. Schneider will be based.

Mr. Warner formerly was a vice president of his father's company, Warner Bros. Pictures. Mr. Schneider previously was a vice president, treasurer and director of Warner Bros. Mr. Richman is a lawyer in Beverly Hills.

FABULOUS

says Tom Garten, Sales Vice Pres.

WSAZ-TV

HUNTINGTON, W. VA.

How do you program a show to be best in its time slot? WSAZ-TV answers that with the Spinach Playhouse. The results they get with POPEYE and WARNER BROS. Cartoons are "fabulous", according to Sales V.P. Tom Garten.

"Our Spinach Playhouse outpulls both competitors in two time slots. We get ARB ratings like 29.7 vs. 15.0 and 8.0. Only recently our M.C. offered club cards and pulled 7,000 requests in just over 2 weeks."

And WSAZ-TV finds that as high as 38% of the Spinach Playhouse audience are adults! No wonder all types of sponsors are enthusiastic about POPEYE and WARNER BROS. Cartoons. They build and hold program loyalty that quickly becomes product loyalty.

Give your station a best-in-its-slot program with POPEYE and WARNER BROS. Cartoons. It's a sure-fire way to snag sponsors and keep them.

MGM-TV begins series of specials April 26

A series of 10 specials, for which the production cost alone is estimated at $2 million, will be produced in a spread over this tv season and next.

The series—to be co-produced by MGM-TV (marking the film studio's first "live" production in television) and Talent Assoc. (David Susskind's production firm)—has its first exposure on April 26. That program is entitled "Meet Me in St. Louis" on CBS-TV sponsored by General Time Co. (Westclox) and Philco (both through BBDO).

The specials—all to be taped and which eventually will be placed in syndication by MGM-TV—will be based on properties selected from Metro-Goldwyn-Mayer's pre-1948 feature library. Six other titles have been selected: "Mrs. Miniver," "Waterloo Bridge," "Green Dolphin Street," "Ninotchka," "Valley of Decision" and "Woman of the Year."

MGM-TV Departure • The disclosure that MGM-TV expects to eventually place the series in syndication marks a departure for the motion picture studio which up to this time has restricted its tv activity to film. And MGM-TV has not yet entered syndication formally, though it is anticipated the company will do so this fall.

George T. Shupert, vice president in charge of tv at MGM, hinted last week that there may be other such arrangements worked out for the co-production of series as well as specials.

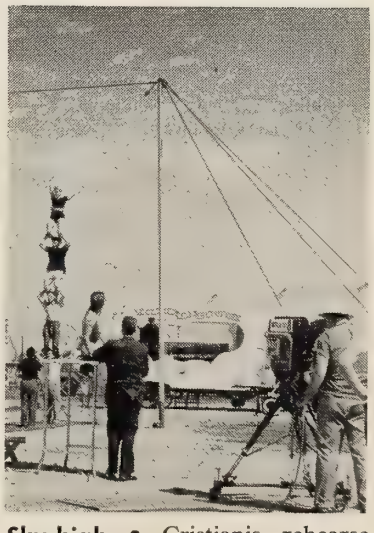
The new pact also catapults Mr. Susskind's tv producing activity. He is associated with *Oldsmobile Music Theatre,* with a projected General Motors series of specials to feature Art Carney, the *du Pont Show of the Month* and *Armstrong Circle Theatre* among others.

Transfilm bought

In another expansion move, the Buckeye Corp., Springfield, Ohio, last week announced the acquisition of Transfilm Inc., New York, producer of tv film commercials and industrial film. Buckeye, a manufacturer of automatic feeding equipment for poultry and livestock, bought Pyramid Productions, New York, a producer of tv film programs and Flamingo Telefilm Sales, a tv film distributor in February (BROADCASTING, Feb. 9).

Buckeye acquired Transfilm for 52,632 shares of Buckeye's common stock, plus 36,250 shares of that company's 5% preferred series A stock. Buckeye is listed on the American Stock Exchange and closed last Tuesday at 9¾. Transfilm will become part of Buckeye's entertainment division, which includes Pyramid and Flamingo. William Miesegaes will continue as president of Transfilm. Other members of the company's management will remain in their present positions.

Tv tape mobile unit puts hour show in can



NBC-TV completed work last week on "Roll Out the Sky," said to be the first hour-long network show by a mobile video-tape unit.

Taped over a three-day period (March 26-28) for presentation on *NBC Kaleidoscope* May 3, it is a "backstage" story of the Cristiani circus family. Scenes are both within and outside the Cristiani three-ring tent at winter quarters, Sarasota, Fla.

The mobile unit consisted of four cameras and one tape machine, from affiliate WFLA-TV Tampa, which also contributed a 17-man crew. Their three-day operation compares with an estimated "week or more" that would have been needed to do the same job on film. One hour and twenty minutes of tape were required for the hour show, whereas the ratio for a similar program on film is assessed at 10 to 1. Overall production costs: one-half of a film counterpart, despite the need for a considerably larger crew in taping.

Heavy rainfall presented problems for the unit. Truckloads of earth had to be brought in to fill a water-covered area before the tent could be set up. They needed a pump to keep the cameraman more or less dry.

NBC-TV's staff: John Goetz, producer-director; Gene Wyckoff, writer; Claude Traverse, unit manager, and Charles Van Doren, host.

Sky-high • Cristianis rehearse their "four-up" somersault act. Looking on is *NBC Kaleidoscope* host Charles Van Doren (c).

• Program notes

• Net income of Desilu Productions for the 40 weeks ended Feb. 7 was $141,730, compared to $26,082 for the corresponding period of last year, the company stated in its first interim report to stockholders. Accompanying the report were checks representing a 15-cent-a-share cash dividend, payable March 27 to stockholders of record March 13.

• The summer replacement for *Person to Person* (CBS-TV, Fri., 10:30-11 p.m.) will be *Ted Mack and the Original Amateur Hour,* effective July 3. Currently on Sundays at 5:30-6 p.m., *Mack* switches to Friday 8:30-9 p.m. May 1 for a nine-week stint before taking over the *Person to Person* slot. Pharmaceuticals Inc., through Parkson Adv., N.Y., continues as sponsor.

• During the Senate rackets committee's proceedings into New Orleans' slot machine business, WDSU-TV there set up a system whereby it could telecast films of the investigations within four hours of their taking place. WDSU-TV arranged with WRC-TV Washington for films of the committee's investigations there to be sent via direct cable to New Orleans for kinescoping. Another line was used by WDSU to carry the proceedings live.

• The Broadcasting Foundation of America is distributing recordings from the Budapest Bartok Festival to American radio stations. These are said to be the first programs released to American broadcasters by the Hungarian government. Performers include Yehudi Menuhin, the Budapest Choir and the Hungarian State Orchestra.

• New musical jingle production company, Roy Ross Enterprises, has opened at 527 Lexington Ave., New York. Mr. Ross has resigned his position as musical director of WMGM New York.

• Charles Boyer, partner in Four Star Films Inc. (tv film producer), has bought the rights to a series of stories by French writer Jean Pierre Clauzet. He will make them into *Gentleman From the Left Bank,* a tv series. Mr. Boyer, now in the "Marriage-Go-Round" on Broadway, goes to Europe this summer to consult with Mr. Clauzet about the series and to scout possibilities of shooting it in France.

• A new Monday through Friday daytime series, *On the Go,* starring Jack Linkletter, will debut April 27 on CBS-TV (10-10:30 a.m. EST). Mr. Linkletter will tour the country in a video tape equipped mobile unit to introduce viewers to interesting people and places. The program is a John Guedel production, in association with CBS-TV. Sponsorship was not named last week.

FATES & FORTUNES

Advertisers

Mr. Edwards

• R.P. EDWARDS named manager of advertising and sales promotion, Westclox Div., General Time Corp., La Salle, Ill. He was previously advertising manager of Anco, auto accessories, Gary, Ind. Earlier he filled various advertising and sales positions with Sears Roebuck, International Harvester and Sunbeam.

• ARTHUR A. FISCHER, chairman of executive committee of Cole, Fischer & Rogow Inc., N.Y., elected to board of directors of Bon Ami Co., Bon Ami Mfg. Co., Bon Ami Mining Co., and Bon Ami Ltd. of Canada.

• WILLIAM K. EASTHAM, formerly merchandising manager of Pepsodent division, Lever Bros., appointed assistant to president of American Home Products Corp.

• WILLIAM J. MCKENNA, promoted from advertising director to vp in charge of advertising and public relations, Old Equity Life Insurance Co., Evanston, Ill.

• H. WILLIAM COULTHURST assumes duties previously performed at Speidel Corp., Providence, R.I., by late HAROLD ROSENQUIST. Mr. Coulthurst is in charge of advertising and sales promotion, also assisting in product development.

• HARRY E.O. HEINEMAN, formerly head of St. Louis research division, Pet Milk Co., named director of product development. DR. EARL A. LOUDER, formerly technical director at Greenville, Ill., named director of research, Pet Milk Co.

Agencies

Mr. Rigrod

• CARL RIGROD, tv-radio director of Donahue & Coe, N.Y., elected vp. With agency since 1943, Mr. Rigrod was writer of *Myrt & Marge* radio series. He was radio director for RKO Pictures before coming to D&C.

• JOHN FORNEY, vp and director of radio-tv of Robert Luckie & Co., Birmingham, Ala., elected executive vp. Other Luckie appointments: ARDEN MOSER, formerly assistant production manager of WABT (TV) Birmingham, to media director; JIM CREAMER, formerly of WBRC-TV Birmingham, public relations account executive; MRS. JOAN HICKS to copywriter, PAUL WYNETT and TED MORTON to art department.

• JACK J. PAGE, formerly president of Page Productions, named vp in charge of tv, O'Grady-Andersen-Gray, Chicago.

• DONALD M. SMITH, vp of Kenyon & Eckhardt, N.Y., since 1955, appointed account supervisor.

• ROBERT W. BODE, vp and executive art director, and DONALD S. GIBBS, vp and copy chief, Kudner Agency, N.Y., made senior vps.

• LATHAM OVENS, account executive of Donahue & Coe's New York publication division, elected vp.

• HILLIARD S. GRAHAM and JOSEPH FURTH, account supervisors of Erwin Wasey, Ruthrauff & Ryan, Chicago, elected vps.

• MARK MARTIN JR. and HUDSON F. MEYER, formerly executive vps in Chicago and New York offices, respectively, of The Caples Co., to Bozell & Jacobs as vps and members of national plans board, remaining in their present cities.

• C. WENDEL MUENCH, founder and president of agency bearing his name, and officer of Henri, Hurst & McDonald, with which he merged in 1957, joins Erwin Wasey, Ruthrauff & Ryan, Chicago, in "new business development capacity."

• JOHN PANAGOS, vp of United Broadcasting Co. (WOOK-AM-TV and WFAN [FM], both Washington; WSID-AM-TV Baltimore, WARK-AM-FM Hagerstown, WINX Rockville, all Maryland; WJMO Cleveland; WANT Richmond; WYOU and WACH-TV Newport News, Va.), nominated for president of Advertising Club of Washington. Uncontested, Mr. Panagos will succeed BASIL FOWLER, *Washington Post-Times Herald*, at formal May election.

• GENE AUSTIN, formerly in Los Angeles office of J. Walter Thompson, named manager of Puerto Rico office of Young & Rubicam, effective immediately.

• LEE PEER, formerly operations-programming consultant of KSHO-TV Las Vegas, Nev., to head new advertising agency in Las Vegas, Adler, Peer & Assoc. ROBERT CAMPBELL will head printed media department, and CROSBY DEMOSS will head art development.

Networks

Mr. Pugh

• EDMUND W. PUGH JR., treasurer and chief finance officer, Coca-Cola Co., to CBS, N.Y., as vp-finance, effective May 1. Before joining Coca-Cola in 1948, Mr. Pugh was assistant dean of Graduate School of Business Administration, Harvard U.

• MICHAEL CAMPBELL, since 1955 office manager of CBS Radio Spot Sales, named assistant to general manager. NORMAN S. GINSBURG, formerly manager of advertising & promotion for film division of NBC, appointed assistant sales promotion manager, CBS Radio Spot Sales.

• JOSEPH R. COCHRANE, program promotion manager of KNX Los Angeles and CRPN, promoted to marketing representative for station and network.

• SANGSTON HETTLER JR., formerly radio and media director of H.W. Kastor & Sons and account executive of CBS Radio Sales, to radio network sales department of NBC Central Div., Chicago.

• FRANK MCGEE, NBC News Washington correspondent, transferred to network's New York correspondents' staff, effective immediately.

• JAN SCHULTZ, formerly of Commonwealth Edison Co., Chicago, to sales planning staff of NBC-TV's Central Div. as sales developer.

• TOM COCHRAN, in charge of talent relations of NBC-TV's *The Jack Paar Show* since last July, named associate producer of show.

• DON RICHARDSON, director for past two seasons of CBS-TV's *The United States Steel Hour*, signed to direct that network's new half-hour comedy series, *The Wonderful World of Little Julius.*

Stations

Mr. Szabo

• JAMES E. SZABO, sales manager of WABC-TV New York, named general sales manager. ROBERT F. ADAMS, WABC-TV account executive, moves up to assistant sales manager. BILL J. SCHARTON, with NBC Spot Sales, Chicago, to station's newly created post of national

Pr committee • The first meeting of an industry-wide committee to draft plans for a nationwide television public relations campaign brought eight members of the nine-man group together March 27 in the New York offices of C. Wrede Petersmeyer of Corinthian Broadcasting, committee chairman (BROADCASTING, March 30). Here (l to r) are Robert D. Swezey, WDSU-TV New Orleans; Roger W. Clipp, WFIL-TV Philadelphia; Michael Foster, ABC; Donald H. McGannon, Westinghouse Broadcasting; Mr. Petersmeyer; Kenneth W. Bilby, NBC; Ward Quaal, WGN-TV Chicago; Charles S. Steinberg, CBS-TV network. Ninth member, Jack Harris, KPRC-TV Houston, was unable to attend the first meeting but sent his views. Also on hand at the session were NAB President Harold E. Fellows, NAB-TV Vice President Thad H. Brown Jr., and Richard S. Salant of CBS Inc.

sales manager. All appointments are effective April 13.

• MAX BICE, chief engineer and assistant manager of KTNT-AM-FM-TV Tacoma, Wash., named station manager of KTNT-TV. He will retain his duties at KTNT-AM-FM.

• JAMES H. SPENCER elected vp of Gross Telecasting Inc. (WJIM-AM-TV Lansing, Mich.).

• SUMNER DEAN QUARTON, 69, formerly manager of WMT Cedar Rapids, Iowa, died aboard German ship, *Sonderburg*, at sea March 27. Mr. Quarton's brother, William B. Quarton, is executive vp of WMT-AM-TV.

• JACK C. BRUSSEL, advertising-sales promotion manager of WJR Detroit, appointed general sales manager, effective April 13.

• JOHN B. (STEVE) CONLEY, special assistant to president of Westinghouse Broadcasting Co., retired March 30 after 34 years with WBC. Mr. Conley was formerly general manager of Westinghouse radio stations.

• RICHARD DAWSON, formerly of NBC-TV, N.Y., named assistant sales manager of KTRK-TV Houston.

• RICHARD W. GESSNER, formerly on sales staff of WIP-AM-FM Philadelphia, named station manager of WKAL Rome, N.Y.

• CAMERON WARREN, general manager of KRCW (FM) Santa Barbara, Calif., elected general manager of Pacific Fm Group. LOUIS GERLINGER, general manager of KJML (FM) Sacramento, Calif., elected secretary-treasurer.

• BOB RYAN, formerly sales promotion manager of KOMO-AM-TV Seattle, Wash., named head of newly-created exploitation department for both stations.

• JAMES A. YERGIN, advertising manager of WOR-AM-TV New York, named director of advertising and promotion, WOR Div., which encompasses both stations.

• MANNY STERNFELD, financial analyst, WRCA-AM-TV New York, promoted to manager, accounting and budgets. ALLAN B. CONNAL, with stations since 1947, named operations manager for WRCA-TV.

• H. S. (HANK) BASAYNE promoted from assistant program director to program director of WCCO Minneapolis-St. Paul. He succeeds WILLIAM H. SCHWARZ, resigned to join KDKA Pittsburgh as program director.

• THOMAS H. O'CONNOR, formerly program director of WBMD Baltimore, to WBAL, that city, as acting program manager, effective today (April 6). GUY L. AYLWARD, formerly air personality of WTIC-AM-FM-TV Hartford, Conn., to WBAL as announcer.

• FRANK OXARART JR., sales promotion assistant in charge of research, KNX Los Angeles and CBS Radio Pacific Network, named program promotion and merchandising manager. MARVIN KATZ, sales promotion department, succeeds Mr. Oxarart.

• JIM KNIGHT named promotion director of WTRF-TV Wheeling, W.Va. Mr. Knight will also act as sportscaster and assistant program director.

• ELLIOTT M. SANGER JR., assistant promotion manager of *The New York Times*, named promotion manager of WQXR New York, radio subsidiary of *The Times*.

• RAY STEWART, formerly director of public affairs of WHTN-AM-FM-TV Huntington, W.Va., to WIIC (TV) Pittsburgh in similar capacity.

• CARL G. ZIMMERMAN, formerly producer of *The Big Picture*, U.S. Army documentary series, named news director of WITI-TV Milwaukee.

• BILL BRUNDIGE, formerly sportscaster of KHJ-TV Los Angeles, named sports director of KDAY Santa Monica, Calif.

• GARY SEGER, formerly program director of KTLN Denver, Colo., to KRIZ Phoenix, Ariz., in similar capacity.

• JIM CASTLE, formerly midwest exploitation director, Paramount Film Distributing Corp., named public relations director of KPLR-TV St. Louis.

• FROSTY MITCHELL named program director of KIOA Des Moines, Iowa.

• HARRY WHITE, formerly station manager of KWTC Barstow, to KFRE Fresno, both California, as merchandising manager.

• GILBERT J. JACOBSEN, sales representative of KOL Seattle, Wash., named assistant sales manager.

• H. ROBERT REINHARD, formerly account executive of WGSM Huntington, to WGBB Freeport, both New York, as sales manager.

• JAY CLARK, with WAVZ New Haven,

Conn., since 1953, named program director.

• CHARLES F. SNYDER, 48, chief technical director of film editing, WROC-TV Rochester, N.Y., died March 23 following heart attack in Pittsford, N.Y. Mr. Snyder entered broadcasting in 1930 when he joined WHAM (now WROC).

• FORREST WILLIS, 54, air personality of WOKO Albany, N.Y., died following heart attack March 27 in Albany.

• PATRICK BARRETT, 70, veteran radio personality and formerly Uncle Ezra of WLS Chicago's *National Barn Dance*, died March 25 in Harvard (Ill.) Memorial Hospital. He started in radio at WTMJ Milwaukee in 1929 and moved to WLS following year.

Representatives

• FRANK M. HEADLEY, president of H-R Television Inc. and H-R Representatives Inc., station representatives, named to new management committee. Other members: FRANK E. PELLEGRIN, DWIGHT S. REED and JAMES M. ALSPAUGH, vps; JOHN BRADLEY, midwestern tv sales manager; FRENCH EASON, midwestern radio sales manager; HAROLD LINDLEY, vp in charge of west coast offices; HAL CHASE, manager of San Francisco office, and AVERY GIBSON, director of research.

• WILLIAM G. HUNEFELD JR., account executive of KPIX (TV) San Francisco, named manager of Los Angeles office of Television Advertising Representatives Inc. Firm begins operations July 1.

• FRANK BEAZLEY, CBS-TV Spot Sales account executive in San Francisco office, transferred to Chicago office. RALPH DANIELS, with KNXT (TV) Los Angeles, will replace Mr. Beazley in San Francisco.

• NICHOLAS R. MADONNA, with NBC Radio Spot Sales, to join Am Radio Sales Co., N.Y., April 15, as account executive.

• WILLIAM E. KELLEY, Storer Broadcasting Co.'s national sales manager for WSPD-TV Toledo, Ohio, will join Am Radio Sales Co., N.Y., as account executive, effective April 15.

• EDWARD SHERINIAN, formerly of John Blair & Co., added to sales staff of H-R Television Inc., N.Y.

• JERRY CRONIN, formerly of KBUC Corona, Calif., has joined San Francisco radio sales staff of Katz Agency.

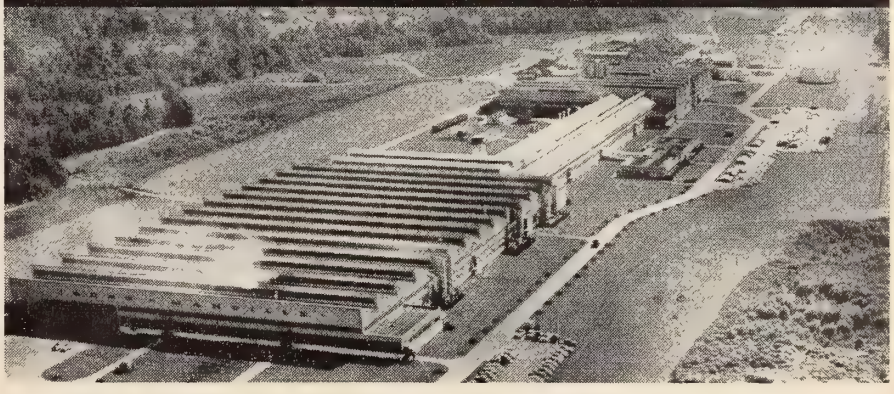
Programming

• ELY A. LANDAU, board chairman of National Telefilm Assoc., and OLIVER A. UNGER, NTA president, elected to board of National Theatres. WILLIAM H. HUDSON, board chairman and president of Beaver Lodge Oil Corp., and BURT KLEINER, executive vp of Cantor, Fitzgerald & Co., investment bankers, formerly director of NTA, also elected to National Theatre's board.

Mr. Spirt

• ARTHUR SPIRT, formerly of Gross-Krasne-Sillerman Inc., named vp of NTA Program Sales, division of National Television Assoc. He will headquarter in Chicago.

• WILLIAM G. ROLLEY, formerly national sales manager of WCAU Philadelphia, named general sales manager of Theatre Network Television Inc., N.Y.



• VERNON BURNS, vp of NTA International and managing director of National Telefilm Assoc. (Ltd.), placed in charge of all operations in United Kingdom, Europe, Near East and Africa. SAMUEL GANG, with NTA International in New York, becomes director of sales for Latin America, Far East, Australia and Asia. KURT UNGER, formerly with United Artists, named sales manager for NTA Ltd. and European sales manager for NTA International. MELVIN J. EDELSTEIN, formerly general manager of RKO Radio Pictures de Cuba, named general manager for Latin America for NTA International.

• ART BREECHER, with Official Films Inc., N.Y., past six years, named midwestern sales manager.

• KEVIN O'SULLIVAN, with Television Programs of America as account executive since 1957, named regional sales manager, New York City division, for Independent Television Corp. GEORGE GRAY, formerly of Ziv Television Programs, appointed northeast district manager in syndicated sales for ITC, and ALBERT G. HARTIGAN, formerly of ABC Films Inc., named account executive in New York City division of ITC syndicated sales.

• MATT GILLIGAN, with Warner Bros. Pictures since 1946, named to newly-created post of coordinator, internation-

Money isn't . . .

D.j. Ed McKenzie, reputed to have earned $70,000 a year on WXYZ Detroit, will join WHFI (FM) Detroit today (April 6), without any pay at all, according to Gar Meadowcroft, WHFI owner.

The change, Mr. Meadowcroft said, is based on Mr. McKenzie's objection to a top 40-news-sports formula and his chance to play standards. A story in the *Detroit Free Press* quoted Mr. McKenzie as saying, "I look on this not as just a job but as a purpose in life. I plan to read poems, passages from the Bible, a book or a newspaper if the material interests me. . . . I intend to provide the kind of music grownups want to hear."

Mr. Meadowcroft said, "This thing won't fail because we believe the listener is an intelligent person." Mr. McKenzie said commercials took up about half the time on the WXYZ program he quit March 9. He will work at WHFI on commission.

Pictured above from left to right: Carson E. Cowherd, Collins Sales Representative Forrest Wallace, Walter R. B. Hall, and Hugh E. Bader of radio station KUEQ, Phoenix. This station purchased the entire Collins Automatic Tape Control display and ordered it shipped direct from the NAB Convention in Chicago to Phoenix.

COLLINS AUTOMATIC TAPE CONTROL

broadcasters called it the hottest item at the NAB

Collins captured the lion's share of AM radio attention at the NAB Convention with new Automatic Tape Control. Broadcasters from all over the country saw this amazing program aid, liked what they saw . . . and ordered on the spot! Installations now on order include equipment for: WHIZ, Zanesville; KUEQ, Phoenix; KONO, San Antonio; WMAL, Washington, D.C.; WHOT, Youngstown; WJET, Erie; KVET, Austin; KLIF, Dallas; KFJZ, Ft. Worth; KENN, Farmington, N.M.; KARA, Albuquerque; WVET, Rochester; WFBG, Altoona; WNBF, Binghamton; WHBF, Rock Island; KFBI, Wichita; KRLD, Dallas; KTXO, Sherman, Tex.; WICE, Providence; WEAV, Plattsburgh, N.Y.; WGAL, Lancaster; WKAN, Kankakee; WLCS, Baton Rouge; WANE, Ft. Wayne; WLIP, Kenosha; WJLK, Asbury Park; WJOL, Joliet, Ill.; WINK, Ft. Myers, Fla.; WBUY, Lexington, N.C.; WKBC, Wilkesboro, N.C.; WDUZ, Green Bay, Wis.; WBIG, Greensboro, N.C.; WBMC, McMinnville, Tenn.; WNAM, Neenah, Wis.; KSTT, Davenport, Iowa; WBBB, Burlington, N.C.; WDBM, Statesville, N.C.; WFMO, Fairmont, N.C.; WENO, Madison, Tenn.; General Electronic Lab.

Just a push of a button gives these stations completely continuous automatic programming. Collins Automatic Tape Control features automatic cueing and stopping, instantaneous no-wow starting, simplified handling and storage.

End your broadcast tape frustration with Collins Automatic Tape Control. For further information call or write your nearest Collins Broadcast Sales office, or Collins Radio Company, Broadcast Sales, Cedar Rapids, Iowa.

• ANDRE OUIMET, director of television at Montreal for CBC since 1953, appointed CBC director of planning of both national radio and tv operations, with headquarters at Ottawa, Ont.

• DONALD C. WEST, budget control officer of Canadian Broadcasting Corp., at national headquarters, Ottawa, Ont., appointed director of operations control, with responsibility to assure maximum use of CBC program production facilities and resources.

EQUIPMENT & ENGINEERING

Tv antennas go hi-fi with new JFD product

JFD Electronics Corp., Brooklyn, N.Y., last week reported "considerable success" with its newly-developed Hi-Fi tv antenna, which is designed to "gather" the signals of channels in specific geographic areas only and thereby improve viewers' reception there.

Ed Finkel, vice president of JFD, said that impetus to develop the "regional" home antenna came from tv stations which had received complaints from viewers about poor reception and other interference. Many viewers blamed the stations, Mr. Finkel added, but JFD felt that the conventional outdoor antenna, designed for the best average reception on all channels from 2 to 13, was the likely culprit. JFD's antenna is based on this electronic concept: peak the signal gathering strength for the two, three or four channels available in most regions of the country.

Six months ago, JFD designed the first prototype for Memphis at the request of WHBQ-TV (ch. 13), with the antenna especially planned to receive channels 3, 5 and 13. JFD instituted an intensive advertising-promotion campaign in the area to persuade viewers to buy the new antennas.

To date, JFD has designed antennas for 12 different city areas and there is a waiting list of more than 20 cities. More than 8,000 of the Hi-Fi antennas have been sold in Memphis and more than 3,000 in Miami, New Orleans and Charleston, W. Va., Mr. Finkel said.

Tape patent invalid

A basic 1947 patent for magnetic tape in the U.S.—the Marvin Camras patent held by the Armour Research Foundation—was ruled invalid in a judgement entered last week in East St. Louis by U.S. District Judge William G. Jurgens. The court found the patent had been preceded by foreign patents and publicly used in the U.S. before the Camras filing with the Patent Office.

Armour licensed Minnesota Mining & Mfg. Co. to produce tape under the patent and has collected nearly $1 million in royalties. The court found they have no exclusive right to the tape and dismissed charges that Armour and 3M violated the anti-trust laws. The case stems from a patent infringement complaint filed against Technical Tape Corp. and C.K. Williams & Co. in 1955. Armour and 3M will appeal.

• Technical topics

• H. H. Scott Inc., Maynard, Mass., announces Model 320 am-fm tuner to sell for $139.95, claimed to be the first it has offered with certain features at less than $200. Among the features (on one chassis): wide band fm and wide range am circuitry, plus "exclusive" silver-plated rf circuitry. A monophonic-multiplex switch on front panel permits instant conversion to multiplex.

• RCA will bring color tv to the American National Exhibition in Moscow this summer. A fully-equipped color studio will originate eight hours of live and filmed programming daily, carried by closed-circuit to sixteen 21-inch receivers situated throughout the Sokolniki Park fair grounds. Under direction of an NBC production crew, the primarily live programming will include a "See-Yourself-on-Color-Tv" feature. RCA plans to make its facilities available to American firms not otherwise participating in the fair who wish to tell their story on film.

• Boonton Radio Corp., Boonton, N.J., has introduced signal generator 225-A for testing and calibration of fm communication systems in the 160 mc and 450 mc bands. The maker stresses its stability, low leakage and rugged construction.

• Unicorn Engineering Corp. (film laboratory equipment), Hollywood, has introduced videotape splicing kit A4809. The product makes overlapping of butt splices on broken tapes. Price: $10. Unicorn is at 1040 N. McCadden Pl., Hollywood 38.

• Video Instruments Inc. (transistorized instrumentation equipment), Santa Monica, Calif., has expanded its industrial activities to replace the consumer products division sold to Edward A. Altshuler (management consultant) and a group of investors.

• Electron Tube Information Council has been formed by eight of the nation's leading receiving tube manufacturers to promote the electron tube industry as a whole. The council is open to all tube manufacturers and presently consists of representatives of CBS-Hytron, General Electric Co., Philco Corp., RCA, Raytheon Mfg. Co., Sylvania Electric Products Inc., Tung-Sol Electric Inc. and Westinghouse Electric Corp.

• Common stockholders of Collins Radio Co. (more than 99% of Class A holders), have voted to reclassify the firm's Class A and Class B common stock into a single class of common, giving all common stock voting rights. Also, the 4% cumulative preferred stock and 5% subordinated debentures of Collins are convertible into voting stock, it was announced.

CAB CONVENTION

Research, ethic code, development plans set

Canadian broadcasters, having won their long battle for an independent regulatory body, are now planning: depth research on the effects of broadcasting on society, a new overall code of ethics embracing radio and television, talent development on a regional and national basis and stricter self-regulation. These facts came out of the 34th annual meeting of the Canadian Assn. of Broadcasters at Toronto, last month.

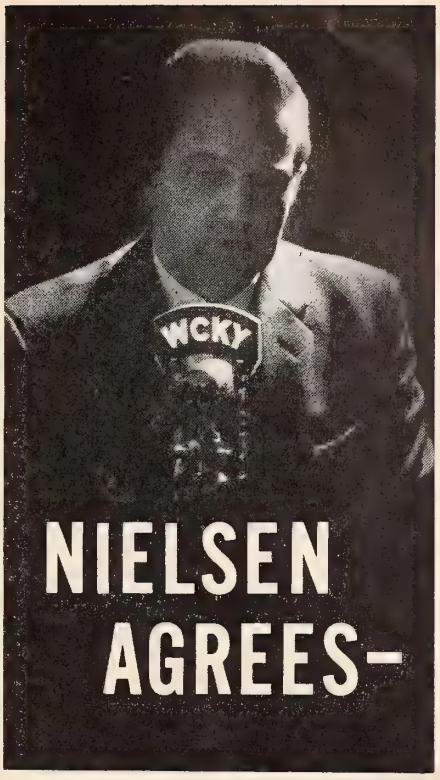
Changes are to be sought in regulations on political broadcasting, especially in connection with restrictions on political broadcasts 48 hours before an election. Detailed changes in broadcast regulations, to be proposed at forthcoming public hearings of the Canadian Board of Broadcast Governors (BBG), were discussed at the final closed business session late on March 26.

CAB is to establish annual radio and television advertising awards for development of electronic advertising. CAB's new board of directors was also instructed to investigate the possibility of convening in Canada at an international conference of broadcasters.

Near Thousand • Over 900 broadcasters, advertising agency executives and advertisers attended the first two days of open sessions of the annual meeting at which research, surveys and closer co-operation between broadcasters and agency-advertiser executives was discussed. Some 400 broadcasters met in closed sessions during the last two days.

Malcolm Neill, CFNB Fredericton, N.B., was re-elected president of the CAB. Murray Brown, CFPL-AM-TV London, Ont., was elected vice president for radio, and Tom Burham, CKRS-TV Jonquiere, Que., elected vice president for television. New CAB board members elected from regional associations for two-year terms were Ken Hutcheson, CJAV Port Alberni, B.C.; Roy Chapman, CHBC-TV Kelowna, B.C.; J.O. Blick, CJOB Winnipeg; Blair Nelson, CFQC-TV Saskatoon, Sask.; J.A. Dupont, CJAD Montreal; Alan Waters, CHUM Toronto; D. Gourd, CKRN Rouyn, Que.; M. Dansereau, CHLN Three Rivers, Que.; Tom Burham, CKRS Jonquiere, and Robert Large, CFCY-AM-TV Charlottetown, P.E.I.

Continuing CAB board members are J.L. Sayers, CFUN Vancouver; Bob Buss, CHAT-AM-TV Medicine Hat, Alta.; D. Dawson, CKCK-AM-TV Regina, Sask.; Wm. Hawkins, CFOS Owen Sound, Ont.; Murray Brown, CFPL-AM-TV London, Ont.; Ralph Snelgrove, CKBB and CKVR-TV Barrie, Ont.; R. Couture, CKSB St. Boniface, Man.; Geoff Stirling, CJON-AM-TV St. John's, Nfld.; and Malcolm Neill, CFNB Fredericton, N.B.



"The Board of Broadcast Governors realizes that it is part of the broadcasting industry of Canada," Dr. Andrew Stewart, chairman of the BBG stated in the opening keynote address to the convention. "We are proud of its achievements over what is after all a relatively short period of time; and we share your optimism about its future."

What BBG Wants • Dr. Stewart urged broadcasters to make suggestions to the BBG, to do more research to improve service to listeners, to train young men to take their place in the industry, to have management keep a closer check on station logs, to develop a diversity of programs and a code of ethics, to develop more self-discipline within the industry, and to keep promises made when licenses are issued. He said the BBG should stay out of station management and would be in favor of more regional networks. About half the BBG attended the CAB convention for the first two days and were head-table guests at the annual dinner Tuesday evening, March 24.

CHAB Moose Jaw, Sask., was presented with the John J. Gillin Jr. Memorial Award for its public service activities during 1958, at the annual dinner.

Establishment of a Harry Sedgwick (CFRB Toronto) Memorial Award was announced by Ken Soble, CHCH-TV and CHML Hamilton, Ont., with first award being made to Gerry Millan, Kingston, Ont., third year student in radio arts at Ryerson Institute of Technology, Toronto. The award will allow an outstanding student each year to attend the CAB convention. Another Harry Sedgwick Memorial Award is being organized by United States friends of the late president of CFRB Toronto, it was announced. Mr. Sedgwick was a frequent delegate to NAB conventions in past years.

CAB plans to establish an educational series of seminars on how best to use audience research material now available to Canadian stations, to study ways and means to assist younger people to apply for radio and television station licenses with private and government loans, to develop a CAB institute for research in mass communications in conjunction with some Canadian uni-

"More people listen to the 6 PM News on WCKY than to any other station in Cincinnati—699,500 people."

CORRECTION
Since we plated this ad, the Jan.-Feb. Nielsen shows a 36% increase in audience to the WCKY 6 PM News. The new figure is 953,600.

We didn't say it—Nielsen did in the November-December 1958 report. We've always known that Cincinnati depends on WCKY for news because WCKY is first and fast. Whenever news breaks, WCKY is there with news tapes and on-the-spot broadcasts with the WCKY Newsmobile. If it's news, it's heard first on WCKY, and Cincinnati knows it!

. . . Your sales can make news too. Call Tom Welstead at WCKY's New York Office, or AM Radio Sales in Chicago and on the West Coast. They'll tell you about the sales-power of WCKY's News—33 times daily.

versity, to develop economical means of pooling live talent for both radio and possible second television stations on a network basis in Canadian cities when the Canadian government gives the green light for television expansion, and to appoint a permanent technical consultant to CAB.

Two-Year Calendar • The 1960 CAB meeting will be March 20-24 at the Chateau Frontenac, Quebec City, and the 1961 meeting at the Hotels Vancouver and Georgia, Vancouver, B.C., March 13-16.

BBG staggers renewal of Canadian licenses

Licenses of Canadian broadcasting stations, both independent and government-owned, will be renewed on a staggered basis over the next few years, according to a recommendation made by the Board of Broadcast Governors (BBG) to the Canadian Dept. of Transport, Ottawa, licensing authority. Licenses of 171 stations expired March 31.

BBG recommended the staggered basis so as not to have to hear all stations at the same time. Its recommendation grouped stations arbitrarily in four groups, with renewals from two to five years. Previously all stations were automatically renewed for five-year periods, without a review of their operations.

Recommended renewals were staggered in such a manner that stations in one area should not come up for renewal in the same year, that stations recently granted power increases requiring substantial investment for new facilities be given relatively long periods between renewal dates, and that stations "whose performances the board might wish to review at an early date be granted a relatively short period of extension."

New Facilities • The BBG also recommended a number of new stations. Geoff Stirling, president of CJON-AM-TV St. John's, Nfld., was recommended for a 10 kw station on 980 kc at Montreal, because of his programming record and because there had been no new English-language station in Montreal for 14 years.

Okayed for Tv • CBC has been recommended five new tv stations for remote areas and French-language audiences. CBC will have French-language stations at St. Boniface, Man. (suburb of Winnipeg), on ch. 6 with 2.87 kw visual power, and at Moncton, N.B., on ch. 11 with 600 w visual power. CBC will also have tv stations at Corner Brook, Nfld., ch. 5, with 63.8 w visual power; at Kenora, Ont., ch. 8, with 493 w visual power, and at Trail, B.C., ch. 11 with 164 w.

R. Bruce Armstrong was recommended for a 250 w station on 1230 kc at Midland, Ont.; Mrs. Madeleine Laframboise for a 1 kw daytime station on 1110 kc, at Cornwall, Ont.

Stanley Shenkman, Montreal, received BBG's approval for ch. 8 television station at Cornwall, with 130 kw visual power, and directional antenna 615 ft. above average terrain; and CHBC-TV Kelowna, B.C., for a satellite tv station at Princeton, B.C., on ch. 70 with 39.2 visual power, and antenna 665 ft. above average terrain.

CKAR Huntsville, Ont., was recommended for an fm station with 2.886 kw on 98.5 mc. CKAR also received approval for a satellite radio station with 250 w on 1340 kc at Parry Sound, Ont.

More Wattage • Power increases went to CKUA Edmonton, Alta., noncommercial station of the U. of Alberta which has been operating for 31 years, from 1 to 10 kw on 580 kc; to CKY Winnipeg, from 5 to 50 kw on 580 kc with change in transmitter site to protect the channel for Canadian use; to CHAB Moose Jaw, Sask., from 10 kw day and 5 kw night to 10 kw night and day on 800 kc; to CKPC Brantford, Ont., from 1 kw to 10 kw on 1380 kc with change of antenna site; to CKLB Oshawa, Ont., from 5 kw to 10 kw day and 5 kw night on 1350 kc; and to VOCM St. John's, Nfld., from 10 kw day and 1 kw night on 590 kc to 10 kw day and night on same frequency.

Stereo, space matters occupy CCIR on coast

The International Radio Consultative Committee (CCIR), organized in Washington in 1927, opened its Ninth Plenary Assembly Thursday (April 2) in Los Angeles to consider such international matters as stereophonic broadcasting and communication systems between the earth and space satellites.

Reports of 14 study groups, which for three years had been working on these and other problems from a strictly scientific aspect, will be presented to the month-long assembly for review and approval. CCIR will then make recommendations to the Radio Administrative Conference to be held August in Geneva, Switzerland. This group will add political and economic considerations to the technical findings of CCIR and in turn make recommendations to the International Telecommunications Union, parent body of both CCIR and Radio Administrative Conference, for final action.

Representatives of 36 nations, 13 private operating agencies, seven international organizations, six scientific and industrial organizations, two specialized agencies of the United Nations plus a delegation from ITU are participating in the ninth CCIR assembly, which in addition to acting on the reports of past study groups will approve new study programs to be conducted during the next three years.

• Abroad in brief

• Swedish Television Broadcasting Service has put six transmitters into operation. They are at Gaevle, Oerbro, Skoevde, Linkoeping, Motala and Karlstadt.

• A West German newsreel theatre company has received a court order to stop public presentation of television shows via receiver-projectors in its theatres. The order stemmed from a suit brought by North West German Radio, Hamburg, against the newsreel company.

• Registered television sets in Sweden number more than 250,000, according to reports from Stockholm.

• Norwegian Television Service is linking with Eurovision (European tv network) via a relay line between Oslo, Norway, and Kralsbad, Sweden. The line, operating on 4000 mc, is designed to carry 600 telephone channels in addition to the tv signal.

Show stopper • WPEN Philadelphia moved north for an evening last month to meet and entertain New York media people at a cocktail party at the St. Regis Hotel. Among the station's guest celebrities was Pat Suzuki (c), Broadway star of "Flower Drum Song," who found a partner for a party game of face-making with Jack Carver (1), media group supervisor at Doherty, Clifford, Steers & Shenfield Inc. Their antics were observed by Lee Kahn (r), media buyer at Grey Advertising, and Bob Widholm (in back), senior timebuyer at DCS&S.

Hat & egg promotions: spring audience tonic

In the annual preoccupation with hats, rabbits and eggs, here's how broadcast promoters have been turning the season to account:

WPAT Paterson, N.J., followed its custom of pre-empting all commercials on Easter for public service appeals.

In the week preceding Easter, WROW Albany, N.Y., played the record, "It Must Have Been the Easter Bunny," 446 times running for 35 hours. For each play, the station donated $1 to the Easter Seal campaign. The bunny finally stopped hopping when a businessman bought the record from WROW with a $500 Easter Seal contribution, which the station matched. The switchboard logged more than 5,000 calls commending WROW.

WQAM Miami, Fla., dubbed a disc jockey the Easter bunny and offered listeners $100 to guess his identity from broadcast clues.

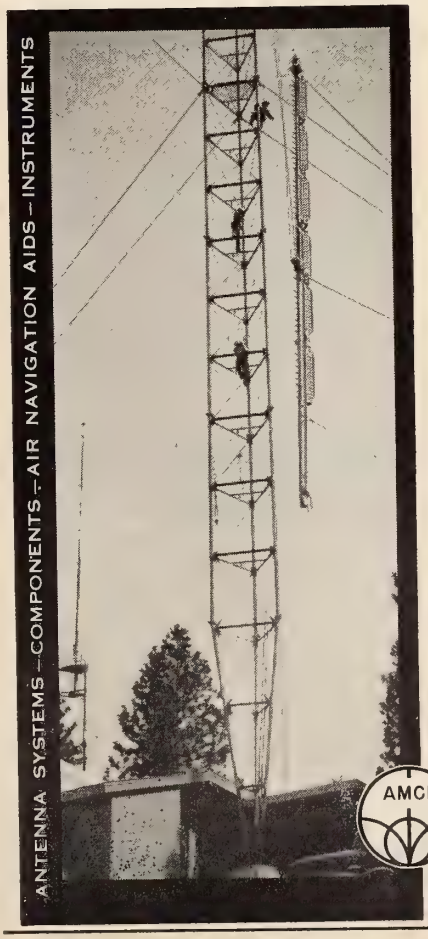
Closet Full • KDKA Pittsburgh staged an Easter wardrobe contest for women of the audience. Some 1,400 wrote letters telling why they wanted to pick out a $500 KDKA "Dream Wardrobe."

A First Annual Grand Easter Egg

Listening man's station

WKRC-TV Cincinnati has launched an elaborate campaign to promote its sister station, WKRC-FM.

Spot announcements, parodying the Viceroy "thinking man" theme, feature a tuxedo-clad gentleman brandishing a baton in one hand and wearing a catcher's mitt on the other.



He is neither a symphony conductor nor a ballplayer, it develops, but a WKRC-FM listener who appreciates the station's coverage of both.

The stations have taken newspaper ads promoting broadcast time of the fm spots on tv.

Driving dog's spot

Enthusiastic reception of the Ford "thinking dog" tv spot (BROADCASTING, March 30) in the West has led to its inclusion in Ford's national advertising, beginning with a showing on last Thursday (April 2) of the *Ford Show* on NBC-TV.

Other spots featuring the animal are in preparation at Playhouse Pictures, L.A., where the original one was produced. Indicative of the spot's popularity was a call from Walt Disney Studios seeking photos of the Ford dog to publicize the motion picture, "The Shaggy Dog."

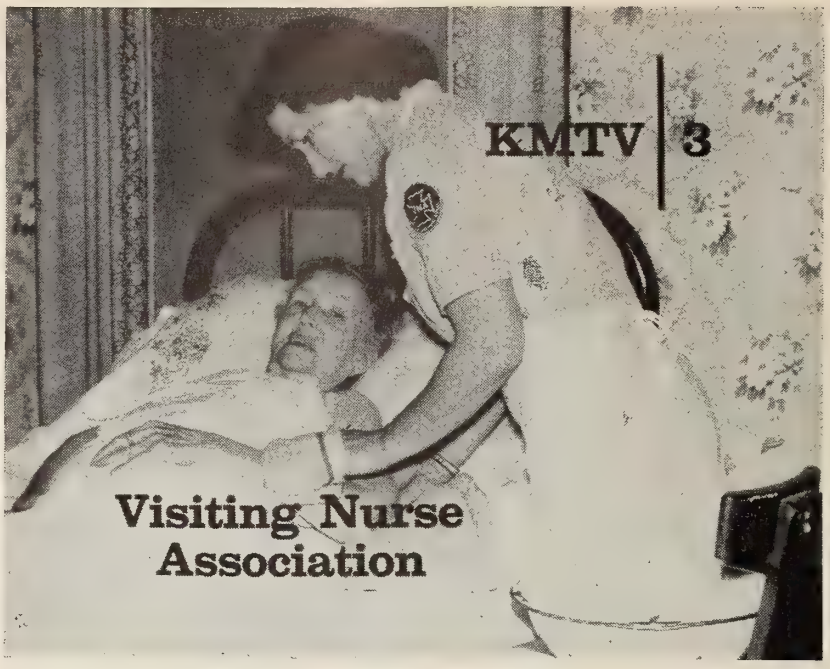
ALFORD
Manufacturing Company
299 ATLANTIC AVE., BOSTON, MASS.

Hunt was scheduled by KTVH (TV) Hutchinson-Wichita in cooperation with Safeway Stores of Central Kansas. Prizes for thousands of children were hidden on the U. of Wichita campus.

WCPO Cincinnati combined ham and eggs in its hunt. Fifty plastic eggs, each containing a gift certificate for a ham. were hidden around town. Clues to their location were broadcast for a week.

An Easter apparel award by KSTP-TV St. Paul-Minneapolis was predicated on guessing the number of jelly beans in a jar at a local clothing store. Certificates worth $700 to the winner were exchangeable for clothes at the store.

Mad Hats • WTOP Washington and the Lazy Susan Inn, Woodbridge, Va., co-sponsored a competition for the "craziest hat" creation by a listener. The winner in a field of 50 got two Lily Dache models, all others consolation prizes. WSAI Cincinnati also collected wild millinery fashioned by listeners competing for 10 prizes offered. WCAE Pittsburgh asked for "crazy" hats, but they were actual headgear from women listeners' wardrobes. The best entry was an imported bird-trimmed model.



Mothers of Marin County, Calif., enlisted Nancy Besst of the *Romper Room* show over KGO-TV San Francisco to appear at their Easter Egg hunt. Instead of 800 youngsters expected, 3,000 showed up, sending the mothers on a hunt of their own to find refreshments to go around.

Chucko, the "Birthday Clown" of KABC-TV Hollywood, set small viewers to decorating eggs. The contest, promoted on the *Chucko's Cartoons* show in cooperation with *Tv Guide* magazine. drew 8,000 entries in five weeks. The winner took his parents to New York for the Easter weekend.

Eggs—Good, Big, Bouncing • WTAR Norfolk. Va., used the theme "Be a Good Egg" to support the fire department's drive for funds. The effort resulted in 604 Easter baskets being distributed to needy children.

In a contest to guess the weight of the "world's largest Easter egg," WITI-TV Miami Beach received over 10,000 entries. The winner reecived the 14 lb. 4 oz. candy egg and presented a similar egg to the children's home of her choice.

WCKY Cincinnati featured a "Flying Easter Bunny" on Easter Sunday. During the afternoon, a plane cruised over the city dropping colored ping-pong balls which the station redeemed with S&H Green stamps. More than 25% of the "eggs" were found and redeemed for more than 30,000 stamps.

Community identification • KMTV (TV) Omaha works public service into crowded prime time with a treatment similar to the commercial ID. Combining station identification with appeals for community campaigns (such as above) during normal station breaks, KMTV gives each project saturation exposure for its duration.

Fort Wayne flashes

An electric moving news sign has been installed in Fort Wayne, Ind., by WANE-AM-TV there. A contest for the first words to be flashed over the telesign was won by Mrs. Robert Wehmeyer of Fort Wayne, who suggested: "To be well informed is the first responsibility of the citizens of a democracy."

Crowded game table

Back in January KREM Spokane, Wash., launched a long-term contest for 50,000 players, competing for an average 10 prizes daily. The station mailed out 50,000 "Lucky Dial" gadgets, designed to attach to telephones and listing the KREM number and space for writing in emergency numbers. In addition, each dial carries a separate numerical designation enabling the owner to play the Lucky Dial game. When a number is drawn, it is announced on the air, and the winner telephones KREM to claim his prize.

KREM-TV has been enlisted in the radio promotion to show prizes, which include merchandise ranging from small items to a $1,100 motor boat and cumulative cash awards in units of $12, commemorating KREM's 12th anniversary. The Lucky Dial promotion continues, with winners exchanging old dials for freshly numbered ones when they pick up prizes at the KREM studios.

• Drumbeats

• The two commercial radio outlets in Evanston, Ill., got some practical support last month, reports WEAW-AM-FM Evanston, when the city's Chamber of Commerce arranged with all local car dealers to set two of the push buttons on new car radios to WEAW-AM-FM and WNMP Evanston. Printed tags affixed to the radios read: "We hope you will make Evanston your shopping headquarters. . . . For your listening pleasure we have adjusted two of your car radio selector buttons to Evanston's two fine radio stations."

• WFBM-TV Indianapolis, Ind., has announced one of the most successful "mail pulls" in the history of the station in the wake of 10 announcements for Rodney Zig-Zag Sewing Machines. Rodney's announcements offered a sewing machine to the viewer who could make the most words from the letters in "sewing machine." A total of 6,458 entries came from 349 communities.

• Two late evening spot announcements "for women only" pulled more than 300 postcards from women who wrote in for free potholders offered by General Electric on WCKR Miami. The two announcements to the ladies were scheduled before and after a "masculine" program—an NCAA championship basketball game.

• A. H. (Chris) Christensen, newly-appointed advertising and sales promotion manager of KPIX (TV) San Francisco, has won a trip to Paris for his promotion efforts on behalf of ABC-TV's "Operation Daybreak," while at his former post, WJZ-TV Baltimore, Md. His promotion is well remembered among New York, Chicago and Philadelphia timebuyers, who received live roosters as part of the theme, "Something to Crow About."

• Longview Hospital in Cincinnati has named a new skating rink after Bob Braun, air personality of WLW-WLWT (TV) Cincinnati. Money derived from "Bob Braun Appreciation Day" (attended by 6,500 teenagers) financed skates for children at the hospital.

• WTVJ (TV) Miami, Fla., has published a 32-page *Ten Year Report,* tracing the station's history in narration and pictures.

• The annual "Tiny Tots Concert" by the National Symphony Orchestra sponsored by WGMS-AM-FM Washington was sold out after two weeks of promotionspots. When the 1,200 seats were gone, WGMS scheduled a stereophonic broadcast for those who could not attend.

• Teams came from 13 schools to compete in this year's Girls Basketball Tournament, co-sponsored for the 12th year by CHAB Moose Jaw, Sask., with the local basketball association. Participants in the two-day event came from extreme points in western Canada.

• KIRO-AM-TV Seattle won a Paul Bunyon "Blue Ox" award for its coverage of international talks in the Columbo Conference in Seattle during October 1958. Awards are given annually to organizations doing the most to focus national attention on the Seattle area.

WOR-TV to host mediamen

WOR-TV New York will be host this week to KHJ-TV Los Angeles for the latter's presentation to New York timebuyers, media supervisors and account executives. KHJ-TV's "new sound in sight" programming will be featured in two special telecasts (April 7 and 9, 11:40 a.m.-noon). Under the new station format (BROADCASTING, March 30), all KHJ-TV programs and features are showcased with original orchestrations and animation. Both KHJ-TV and WOR-TV are owned and operated by RKO Teleradio Pictures Inc.

Striped pants salesman

WAVY - TV Norfolk - Portsmouth, Va., has a new salesman on the street. He's 13 years old and wears striped pants, cutaway, Homburg and ascot tie. Young Allan Smith is charged with execution of WAVY-TV's new client merchandising plan, "The Ambassador Service." The station sends its emissary to call on retailers, brokers, and others, spreading good will for WAVY-TV advertisers. In official calls for the first product to get the ambassador treatment, Esquire shoe polish, the envoy distributed gift shoe shine kits.

Ear on Russian agriculture

Agricultural practices on U.S.S.R. collective farms is the subject of a series broadcast by WREM Remsen, N.Y., April 1-4. The programs, comprising tapes sent by Radio Moscow, were the first in a series of international farm broadcasts projected by WREM, which serves a dairy district. The station plans to air tapes from England, Norway, Mexico and Japan.

WBAL bumper promotion

The "modern sounds of WBAL Baltimore" are being plugged on more than 8,000 car bumpers. A "Miss WBAL" tours Baltimore in a convertible automobile and selects cars bearing a WBAL sticker to present the drivers with RCA portable radios. Listeners get the stickers by writing to WBAL.

The very air in the PRESTO plant is washed with water pumped at 250 gallons a minute from our own private well. The technicians who inspect each PRESTO disc have been on the job for a minimum of 15 years, and have the keen eyes that insure perfection on a scale no mechanical equipment can match. Ask for PRESTO when you order. You'll always know that your discs are PRESTO-perfect.

BOGEN-PRESTO CO., Paramus, New Jersey. A Division of The Siegler Corporation.

Since 1934 the world's most carefully made recording discs and equipment.

P. Lorillard, Hazel Bishop, L.

CONTINENTAL ELECTRONICS
TYPE 317B **50,000 WATT**
TRANSMITTER AT WOAI

IT TAKES A MIGHTY VOICE...

...to adequately cover this giant state. Continental's Type 317B transmitter has just been installed by WOAI, San Antonio to do the job effectively, efficiently and reliably.

WHAT ARE YOUR REQUIREMENTS?

These were the requirements of WOAI – satisfied by the Continental 50KW design:

- ☑ COMPACTNESS (only 72 sq. ft. of floor space)
- ☑ SELF-CONTAINED (only external part is PA blower)
- ☑ FEWER TUBES (only 19 total)
- ☑ DRY RECTIFIERS (silicon and selenium throughout)
- ☑ RELIABILITY (most modern design . . . conservatively rated)
- ☑ SIMPLICITY (. . . in installation . . in operation)

Continental Electronics
MANUFACTURING COMPANY
4212 S. Buckner Blvd. Dallas 27, Texas EVergreen 1-1135

DESIGNERS AND BUILDERS OF SUPER POWER TRANSMITTERS

KLOV Loveland, Colo.—Seeks assignment

KYSL--BAYOU CCA

In a letter to Jerry Hauser, Southwestern Sales Manager of Community Club Awards, Mr. Sylvan Fox, Manager of Radio Station KYSL, Alexandria, Louisiana, said:—"We are now in the last days of selling our CCA Campaign here. I am happy to report we've met with tremendous financial success. We have been able to pull accounts to KYSL that we previously could not sell. The comments we have created with the women's organizations and advertisers is already worth the effort we've put into this promotion. We look forward to many CCA Campaigns in the years to come."

Mr. Fox

Equipping a Radio Station?

Get More Coverage With The New RCA

500- and 1000-Watt

AM Transmitters

The ability of these new 500- and 1000-watt AM transmitters to achieve and maintain a higher average level of modulation assures more program coverage. Simplified tuning, ease of installation, built-in provisions for remote control, and low operating cost make the RCA Type BTA-500/1R your best transmitter buy. Color styling adds harmony to station decor—a choice of red, green, blue, or grey doors. Whatever your equipment needs—SEE RCA FIRST!

Or write for descriptive literature to RCA, Dept. S-22, Building 15-1, Camden, New Jersey.

RADIO CORPORATION of AMERICA

Hearing Cases

FINAL DECISIONS

By order, Commission, on joint motion by applicants, made effective immediately Feb. 17 initial decision, as modified by Commission, and granted applications of Unicoi Bcstg. Co. to increase power of WEMB, Erwin, Tenn., from 1 kw to 5 kw, continuing operation on 1420 kc, D, and Mace, Groves and Mace for a new am station to operate on 1420 kc, 500 w, D, in South Gastonia, N.C. Comr. Bartley abstained from voting. Ann. April 1.

By memorandum opinion and order, Commission granted petition by Radio Wisconsin Inc. (WISC), Madison, Wis., to sever its application from consolidated proceedings in dockets 12329-31, and made effective immediately Feb. 16 initial decision insofar as it granted application to increase daytime power of WISC from 1 kw to 5 kw and change daytime DA pattern, continuing operation on 1480 kc with 1 kw-N; engineering condition. Ann. April 1.

By order, Commission, on request by applicant, made effective immediately Feb. 13 initial decision and granted application of KROY Inc., for new class B fm station to operate on 102.5 mc in Sacramento, Calif.; engineering conditions. Ann. April 1.

By order, Commission, on request by applicant, made effective immediately Feb. 12 initial decision and granted application of Commercial Radio Institute Inc., for new class B fm station to operate on 93.1 mc in Baltimore, Md. Ann. April 1.

INITIAL DECISIONS

Hearing Examiner Herbert Sharfman issued initial decision looking toward affirming Commission's Oct. 15 and Nov. 5, 1958 grants of applications of Tomah-Mauston Bcstg. Inc., for new am station (WTMB) to operate on 1390 kc, 500 w, D, in Tomah, Wis. and mod. of cp to reduce maximum expected operating value which had been protested by William C. Forrest (WRDB), Reedsburg, Wis. Ann. March 31.

Hearing Examiner Elizabeth C. Smith issued initial decision looking toward granting application of Bay Area Electronic Associates for new am station to operate on 1580 kc, 500 w, D, in Santa Rosa, Calif. Ann. March 30.

Hearing Examiner Millard F. French issued initial decision looking toward (1) dismissing application of Jose A. Bechara Jr., A. Gimenez-Aguayo and Reynaldo Barletta, partnership, for new tv station to operate on ch. 12 in Aguadilla, P. R., and (2) granting competing applications of Western Bcstg. Corp of Puerto Rico (Petition to reflect merger of applicants was granted Jan. 30.) Ann. March 26.

Hearing Examiner Thomas H. Donahue issued initial decision looking toward granting application of Virginia Beach Bcstg. Corp. to change facilities of am station WBOF Virginia Beach, Va., from 1600 kc, 1 kw, D, to 1550 kc, 5 kw, D, and denying application of Cy Blumenthal, tr/as Denbigh Bcstg. Co. for new station to operate on 1570 kc, 250 w, D, in Denbigh, Va. Ann. March 26.

OTHER ACTIONS

By memorandum opinion and order, Commission denied petition by Peninsula Bcstg. Corp. (WVEC-TV ch. 15), Hampton, Va., for reconsideration of Commission action of Sept. 3, 1958, granting Peninsula petition of relief from interference to extent of giving it temporary authority to operate on ch. 21, but denying its request for temporary authority to operate on ch. 13. Ann. March 26.

By memorandum opinion and order, Commission denied petition by Frontier Bcstg. Co. (KFBC-TV ch. 5), Cheyenne, Wyo., for reconsideration of Nov. 25, 1958 grant of cp to Albany Electronics Inc., for new tv translator station on ch. 82 in Laramie, Wyo. Ann. March 26.

In report on its inquiry into alleged ex parte representations in Orlando ch. 9 proceeding, Commission believes that further hearing (evidentiary) is warranted, but proposes to withhold further action until Court of Appeals makes known its determination in remanded case of WORZ Inc. vs. FCC. Ann. March 26.

By memorandum opinion and order, Commission postponed oral argument from April 23 to May 21 in Miami, Fla., ch. 10 remand proceeding. Ann. March 26.

By order, Commission dismissed as moot Dec. 17, 1958 joint petition by Gerico Investment Co. (WITV, ch. 17, Fort Lauderdale,

Walley for new am station to operate on 1340 kc, 250 w, U, in Oroville; made KCRA Sacramento; KFIV Modesto; KEEN San Jose, and KOMY Watsonville, all California, parties to proceeding. Ann. April 1.

Routine Roundup

Commission invites comments by April 30 to proposed rule making to assign tv ch. 10 (minus) to Appleton, Minn., for educational use. It is based on petition by Joint Council on Educational Television which claims that such station in Appleton, besides covering large portion of western Minnesota not now served by any present or proposed educational tv station, would be link in planned regional educational tv network interconnecting educational tv stations in Iowa, Minnesota, Nebraska, and North and South Dakota. Assignment would require no other changes in present tv assignment table. Appleton has no current tv channel assignment.

Commission granted requests by Westinghouse Bcstg. Co. and counsel for Lar Daly to extend to April 17 time in which they may file briefs in connection with Commission's telegrams of Feb. 19 to Chicago tv stations concerning applicability of Section 315 (political broadcast provision) of Communications Act to certain news film clips, and subsequent petitions by Columbia Bcstg. System Inc., and National Bcstg. Co. and letters by American Bcstg. Co. and National Association of Broadcasters. Ann. March 26.

BROADCAST ACTIONS
by Broadcast Bureau

Actions of March 27

WTVJ (TV) Miami, Fla.—Granted transfer of control of **Wometco Television & Theatre Co.** (principal stockholder of **WTVJ Inc.**, licensee corp.) from **Sidney Meyer**, et al. (as family group) and **Mitchell Wolfson**, et al. (as family group) to **Mitchell Wolfson**, et al. (as family group).

Take a tip from the doorman

"Land of the outstretched palm," some author once dubbed Florida. His hyperbolic words made entertaining reading and inspired many rib-tickling toastmaster jokes. But on today's Florida scene, their implication just isn't true.

Ask any Florida hotel doorman. He'll tell you the average visitor is neither a "soft touch" for gratuities nor the profligate spender he is reported to be. For that matter, you don't have to take a doorman's word for it—just have a look at these facts.

Florida's official, 1958 Winter Tourist Survey shows that daily expenditures averaged $11.85 per person. And that average includes the spending of those who stay in plush hotels and slip the doorman "king-size" tips, as well as that of more modestly budgeted sojourners.

As could be expected, summer-average expenditure figures drop considerably from the winter highs because of the reduced tariffs in effect at most Florida resorts. Going summer rates for motel, apartment and hotel accommodations are about one-half of the winter peak. In summer, too, many resort owners add packaged entertainment programs to their list of attractions at little or no additional cost.

All in all, there's a time and place for every vacation budget in Florida. And no place else do vacation dollars buy so much breeze-swept fun.

From season to season as you report on the Florida scene, you may have need for more details on the cost of Florida holidays or other aspects of the state's economy. Let us serve you. Simply write:

YEAR 'ROUND LAND OF GOOD LIVING

OUR RESPECTS TO . . .

Harold Guy Cowgill

What are the ideal characteristics for a man to have when you want him to head up broadcast activities at the FCC? Undoubtedly he should have some broadcast experience, some government background, preferably in the FCC, and, of course, some knowledge of communications law.

Mix with these a quiet, almost self-effacing ability to get people to work together and you have the present chief of the FCC's Broadcast Bureau, Harold Guy Cowgill.

Hal Cowgill has one more asset in filling the number one administrative broadcast job in the FCC: he's determined.

It's that last factor that is almost the ultimate requirement in heading up the Commission's broadcast activities.

For broadcasting—particularly television—is beset with more problems today than almost anytime in its short history.

Pandora's Box • There's the tv allocations problem. There's pay tv. There's the network investigation. There's community tv systems. There's the question of on-channel boosters.

And there are the standard radio problems: program classification, longer hours for daytimers, higher power requests from regional stations, and the hangover clear channel and daytime skywave cases.

Only someone determined is able to plug away at these vital and troublesome problems—and keep his sanity.

That's another asset Hal Cowgill brings to his job, sanity.

Mr. Cowgill's broadcast experience was honed on the strap of a uhf station, WTVP (TV), in his home town of Decatur, Ill.

In 1952, then a lawyer specializing in communications law, Mr. Cowgill persuaded a group of Decatur businessmen to apply for tv. This was after the freeze was ended in April of that year.

After the group was organized, it was obvious that it needed someone who understood the intricacies of securing a permit and building a station. The members talked Mr. Cowgill into taking that job.

In 1953, Mr. Cowgill resigned his law association and took over as vice president and general manager of the ch. 17 outlet. The uhf station went on the air in August 1953 and in November was writing in black ink on its balance sheet.

The Decatur Story • Harold Cowgill was born July 22, 1900, in the history-charged area of mid-central Illinois. Decatur is where Abe Lincoln established his first law office. In fact the Civil War was very much alive in Mr. Cowgill's young days. His grandfather had served General Grant personally as a mounted courier. This was in Grant's western campaigns. There were many veterans of the War Between the States in Decatur when young Cowgill was growing up, going through the grade school and high school and three years at the small Presbyterian-sponsored James Milliken U. Mr. Cowgill also attended the U. of Illinois at Urbana, not far away.

During his high school and college days Mr. Cowgill played ball. So well, indeed, that during summers he played semi-pro; he was the catcher on the Litchfield, Ill., team.

He had one other distinction in his youth. In 1918 he was shorthand champ of the state of Illinois.

Mr. Cowgill's first job was with the Wabash Railroad. Decatur is a railroad town and Mr. Cowgill's father was a railroad man. Young Cowgill worked in the railroad office and soon became an expert on rates and tariffs. In 1929 he took a civil service examination for the Interstate Commerce Commission in Washington. He was number one on the list.

That same year he went to Washington and joined the ICC as a rates and tariffs specialist. When the Railroad Retirement Board was established in 1934, he transferred there.

The Road to FCC • But his stay there was short-lived—thanks to the U. S. Supreme Court which declared the act unconstitutional. This was in 1935, the same year he received his law degree from George Washington U.

Mr. Cowgill: calm and determined

He was, in a manner of speaking, out of a job, but only for one week. A friend knew FCC Comr. Paul A. Walker, then in charge of the common carrier panel of the newly organized FCC. Mr. Walker was anxious to get a good rates and tariffs man into the Commission and Mr. Cowgill's availability was a godsend. The Illinois Republican joined the FCC and was immediately put on the telephone probe.

Mr. Cowgill stayed with the FCC for nine years, all with the Common Carrier Bureau which oversees telephone and telegraph rates and regulations.

In 1944 Mr. Cowgill resigned to join the Segal, Smith & Hennessey law firm. He was with the firm for nine years, rounding out his communications law knowledge from the outside. He left in 1953 to take over the leadership of the Decatur tv station.

His year with the Decatur uhf station grounded him well in the business side of radio communications. He was responsible for getting the papers through the FCC. He had to build the station, organize a staff, and make commitments for programs and network affiliations.

This ability to run a "happy ship" is inherent in Mr. Cowgill's whole personality. He very well could personify the skipper who is affectionately known as "the old man" and whose quiet calmness in periods of stress and strain endear him to his people and mark him as an able administrator.

Back to FCC • It was in December 1954 that Mr. Cowgill rejoined the FCC as chief of its Common Carrier Bureau. Two years later he was chief of the U. S. delegation to the Geneva conference on international telegraph matters.

In May 1957 he was named chief of the Broadcast Bureau.

He got the word two hours before the announcement was made. He was asked if he would like the job. When he asked for a couple of days to think it over, he was told, "Too bad, the announcement will be out in two hours."

In 1924 Mr. Cowgill married his home town sweetheart, Rena Belle Landers. They have one daughter, Mary Estelle, now Mrs. Alfred Wheeler Smith. The Cowgills live in Bethesda, Md., just outside Washington.

Mr. Cowgill's present hobbies are limited. Ranking at the top is his grandson, 5-year-old Charles Richard Smith. When Chuck is a little older Mr. Cowgill looks forward to taking him to see the local ball club in action. He figures a grandfather who knows the game first-hand should be good for a boy.

NAB postlude

IF the membership is heeded, the NAB will never return to the wide-open, free-for-all annual convention. Members heavily favor the limited ownership-management format, invoked for the first time at last month's sessions in Chicago.

A Pulse-BROADCASTING survey made during the convention shows this conclusively, as reported in this issue. Seven out of 10 delegates approved the ownership-management limitation, and three out of five favored the scaled-down exhibits, limited to heavy broadcast equipment.

The results come as no surprise. Because there were fewer distractions, regular sessions were well attended. It was a decided improvement over conventions in the recent past.

This, however, is only the beginning of a new convention era. There were more satellite meetings than main sessions. Special groups of broadcasters have special interests. So they met separately. The NAB convention provided the convenient gathering point.

The convention thus was a clear demonstration of the inexorable movement toward a "federation" of broadcasters, with each special interest group conducting its own affairs. Inevitably there will come a physical reorganization of the NAB, which will serve as the policy level "umbrella" over these segments of broadcasting.

The existing NAB structure was laid out under a 1938 reorganization. Changes came with the advent of fm and television. Then came the creation of the Radio Advertising Bureau and later the Television Bureau of Advertising as separate entities to look after commercial exploitation of these media.

The broadcast media have changed radically in the past two decades. The physical structure of the NAB has not.

There is a bigger job to be done, in keeping with the phenomenal growth of radio and television. Businesswise, they are sharply competitive. Philosophically, from the legislative and regulatory standpoints, they are the same. Both use the same free air which must remain free. That is the level at which the NAB must function and on which there can be no conflict of interests among the various segments of broadcasting.

The leadership in broadcasting is cognizant of the problem. Before the next NAB convention in Chicago, a year from now, a full-blown reorganization plan must be evolved.

Television and politics

WHO will win the presidency in 1960? That's anybody's guess. But there's no guesswork involved in how he will win. He will be the candidate, whatever his party, who projects himself best over television and radio.

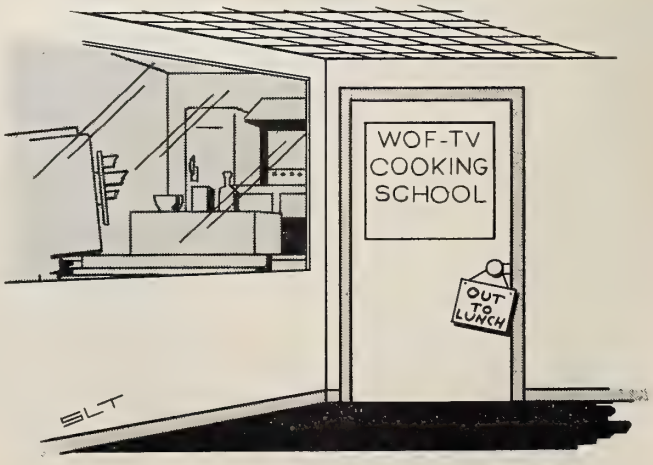
Although the political conventions are 16 months away, the 1960 elections are being talked up ahead of normal schedules. And there's more early talk about the part the broadcast media will play than we've ever heard before, even though party professionals have known for some years now that radio, and latterly television, spell the difference between success and failure at the polls.

Privately, most holders of elective office will tell you that without the electronic media, they could not have won their last contests. Publicly, many of them will cover up, for fear of antagonizing their home newspapers.

But there are not as many who will hedge as there used to be. For example, freshman Sen. Kenneth Keating (R-N.Y.) said recently in a talk before the Washington chapter of the American Women in Radio & Tv that "without any question, I owe my ability to sit (in the Senate) to radio and tv." And he added: "There is no medium which is as effective as radio-tv."

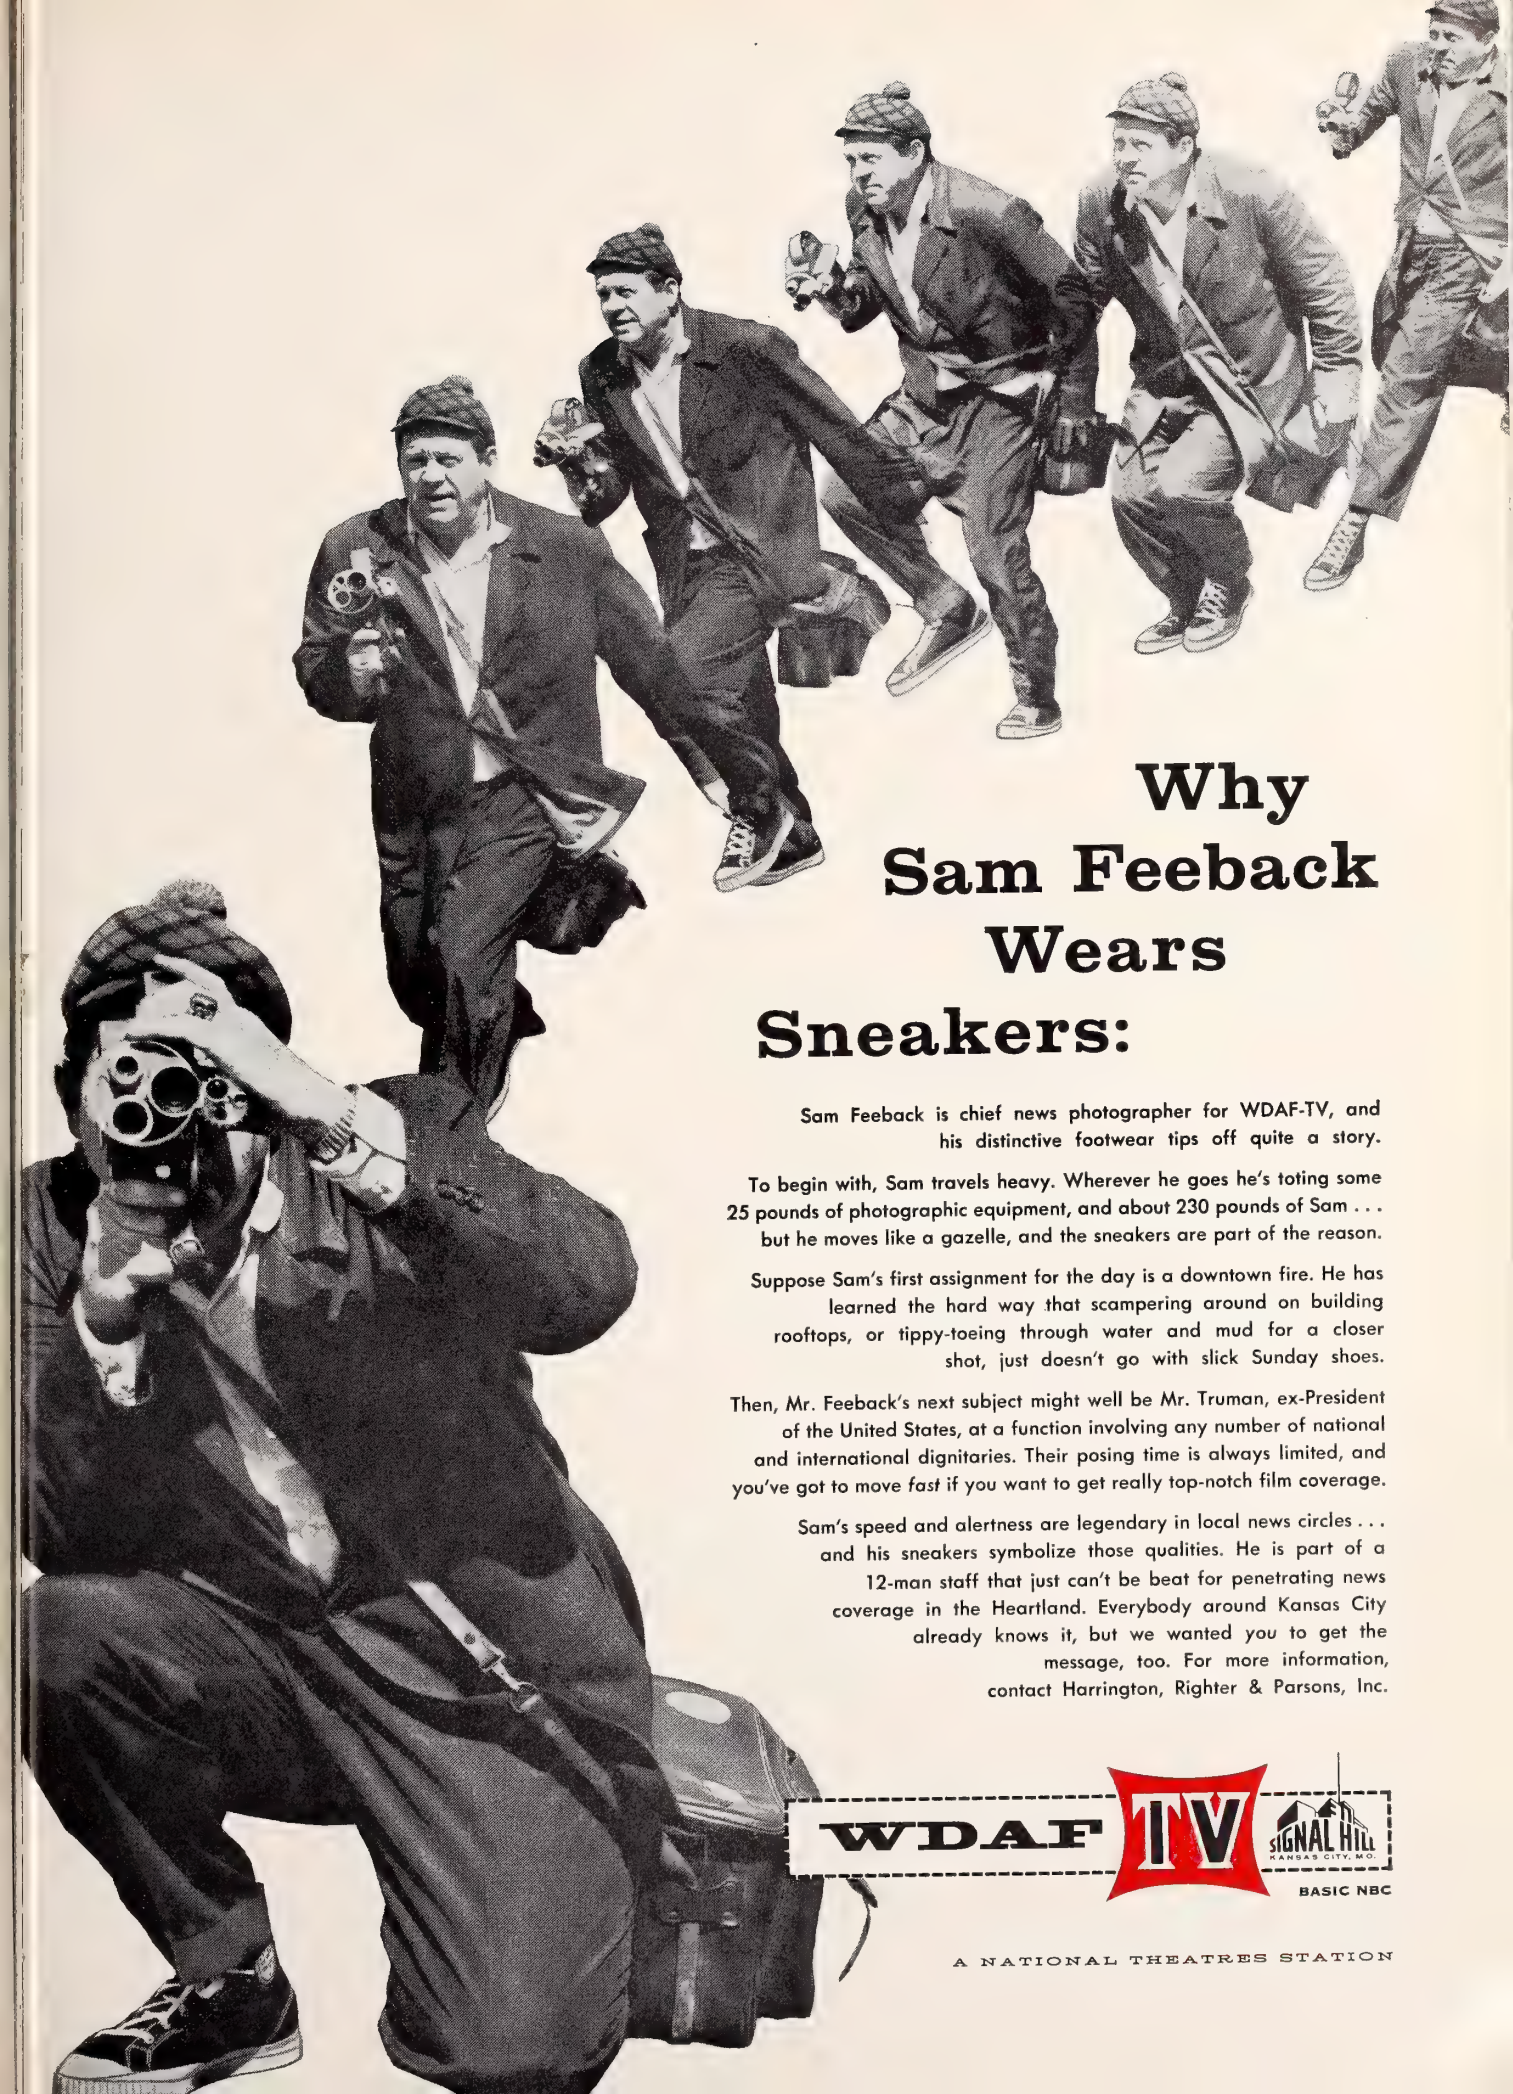
Two other Senators who participated in the same panel—Mike Mansfield (D-Mont.) and Hubert Humphrey (D-Minn.) agreed that the electronic media have become the one dominating factor in winning and losing elections.

The survey conducted by Cunningham & Walsh, New York advertising agency, on the effect of tv in establishing a political candidate's personality and image in the mind of the voter (BROADCASTING, March 23) is bound to enliven interest in tv campaigning. This survey was conclusive in the finding that voters in the New York gubernatorial campaign last year favored one candidate (Rockefeller) over the other (Harriman) because of tv. The survey found, moreover, that tv rates equally with newspapers as the "most important news source about candidates."



There is a sobering lesson in the now universal discovery that the electronic media constitute the greatest single force in electioneering. The politicians will be watching networks and stations for any indication of favoritism, however slight. Partisan politics have never played a part in network or station operations, unlike newspapers. They never should.

From now until the elections in November 1960, broadcasters will be well advised to exercise extreme vigilance in the handling of their political broadcasting. The penalty could be more indiscreet legislation—even worse than the paralyzing effects of Section 315.



Double play

TELEVISION can do many things that newspapers cannot, and it does some that many of them dare not do or at least would be reluctant to undertake. Into the latter category, we venture, falls the study of journalistic responsibility that CBS-TV launched on its *Great Challenge* series a couple of Sundays ago.

The question of whether American journalism is meeting its responsibilities is hardly one to be given extensive space in most newspapers. But the subject is worthy of wide public exploration, and it is to television's credit that CBS-TV, in cooperation with the Sigma Delta Chi professional journalism fraternity, was willing to open it up—with no favors asked for broadcast journalism, which is an increasingly important part of the whole—to frank and open discussion. In the process, by pointing up some of broadcasting's special problems, television not only demonstrated its own responsibility in a sensitive area but also contributed something of value in its own public relations behalf.

Drawn for BROADCASTING by Sherwin L. Tobias

Why Sam Feeback Wears Sneakers:

Sam Feeback is chief news photographer for WDAF-TV, and his distinctive footwear tips off quite a story.

To begin with, Sam travels heavy. Wherever he goes he's toting some 25 pounds of photographic equipment, and about 230 pounds of Sam . . . but he moves like a gazelle, and the sneakers are part of the reason.

Suppose Sam's first assignment for the day is a downtown fire. He has learned the hard way that scampering around on building rooftops, or tippy-toeing through water and mud for a closer shot, just doesn't go with slick Sunday shoes.

Then, Mr. Feeback's next subject might well be Mr. Truman, ex-President of the United States, at a function involving any number of national and international dignitaries. Their posing time is always limited, and you've got to move *fast* if you want to get really top-notch film coverage.

Sam's speed and alertness are legendary in local news circles . . . and his sneakers symbolize those qualities. He is part of a 12-man staff that just can't be beat for penetrating news coverage in the Heartland. Everybody around Kansas City already knows it, but we wanted *you* to get the message, too. For more information, contact Harrington, Righter & Parsons, Inc.

WDAF TV SIGNAL HILL KANSAS CITY, MO.

A NATIONAL THEATRES STATION

WHAT WOULD YOU DO IF YOU RECEIVED 6,137 BIRTHDAY GREETINGS?

Torey Southwick of KMBC-KFRM acknowledged each one by mail . . . and mapped the towns to show his program's coverage!

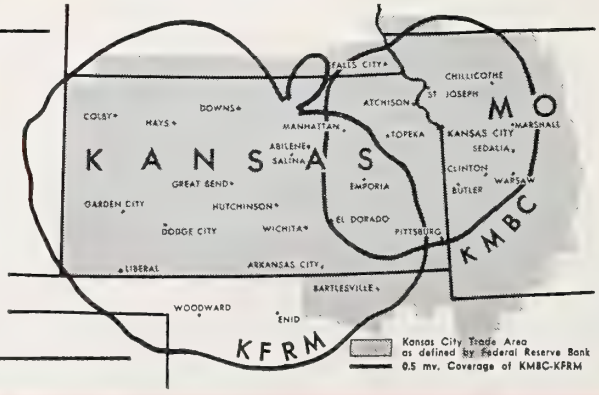
Thirty-nine months ago, radio listeners to KMBC-KFRM were first captivated by a new personality on these pioneer Kansas City stations. His name: TOREY SOUTHWICK who, with his sidekick, Ol' Gus (a second voice done by Southwick), launched his "Time for Torey" program from 7 to 9 a.m., Monday through Friday. On these same five days, he does the "Torey Southwick Show" from 3 to 4:30 p.m.

A speech major from Wayne State University, Detroit, Southwick added to an already-established morning program format of tuneful, wake-up music, time signals, temperature reports, news and sports, that indefinable element known as "personality", to make his shows the most listenable in Kansas City. His afternoon show features the "Top Ten Thousand Tunes" with selections from the best current albums and the old standards.

Listeners love his programs . . . advertisers clamor for spots on his shows . . . people consider Ol' Gus an actual person. The Mayor of Kansas City chose this program as the ideal spot within which to air his daily "Morning Report" to his many neighbors in Kansas City, western Missouri and the state of Kansas.

Recently, KMBC - KFRM celebrated Torey's birthday — and 6,137 listeners sent friendly birthday cards to him.

"SOUTHWICK SHOWS" STACK UP SALES AND SATISFACTION!



Torey's shows fit precisely into our KMBC-KFRM programming concept: to entertain, to inform and to serve. So that you may appreciate the terrific impact of advertising via KMBC-KFRM on this important 17th market, *write us for Torey's own mail map showing origins of his thousands of cards.*

These two little ladies sandwiching Ol' Gus are Torey's daughters, Terri, left, and Gayle. The girls have been doing Daddy's Show on Christmas morning the past two years and loving it! (Ol' Gus loves the attention he's getting here, too!)

Check NOW on "Avails" . . . Get KANSAS Coverage FREE!

Get on one of the two "TORRIFIC" TOREY SHOWS as soon as possible, and spread your message throughout the powerful KMBC-KFRM BONUS range (western Missouri and ALL of the state of Kansas.) BUY KMBC, GET KFRM FREE! Call your colonel at Peters-Griffin-Woodward, Inc., *today for Torey!*

- Note how closely KMBC-KFRM coverage fits huge Kansas City trade area as defined by industrial economists of 10th District Federal Reserve Bank. Nearly 4 million persons — more than 1¼ million families — with buying power exceeding $6½ billion annually!

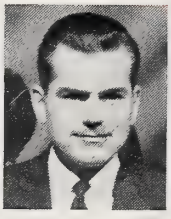
They met yesterday . . .
to give you a great convention in May

These gentlemen and Howard Miller, WIND, Chicago, make up the Planning Committee for the 2nd Annual International. **Radio Programming and Pop Tune Disc Jockey Convention,** May 29-30-31, Americana Hotel, Miami Beach.

They met yesterday at the Palmer House in Chicago, armed with ideas of colleagues in their respective communities. Their discussions assure you of a worthwhile convention.

Don't miss out. Write Bill Stewart, Coordinator for the sponsoring Storz Stations, 820 Kilpatrick Building, Omaha 2, Nebraska. Give name, address, station or company affiliation, type of room, approximate rate. (Rates in hotels of Bal Harbour start at $10 daily, single or double.)



the most watched station in Sioux City...

KVTV CHANNEL 9

Why? News coverage for one thing. KVTV keeps four newsmen busy giving Sioux City viewers a first hand look at life and news around the world. KVTV's Washington Bureau, AP, UPI and Wirephoto services, plus area correspondents help these newsmen show the important happenings first on KVTV. See your Katz man.

WGAL-TV

CHANNEL 8
LANCASTER, PA.
NBC and CBS

In addition to being the first choice of viewers in these three important markets, WGAL-TV is the television station for Gettysburg, Hanover, Lebanon, Chambersburg, Lewistown, Carlisle, Shamokin, Waynesboro, and many other communities.

STEINMAN STATION • Clair McCollough, Pres.

Representative: The MEEKER Company, Inc. • New York • Chicago • Los Angeles • San Francisco

CLOSED CIRCUIT

Five tv's per market • In its almost continuous consideration of tv allocations problem, FCC majority has reached agreement on "umbrella" under which integrated case can be presented to Congress. In substance, it looks toward five comparable services in first 100 markets, on assumption that three competitive networks should be accommodated, with one facility for noncommercial education and fifth for independent or ultimate fourth network operation. Thesis is that nation's expanding economy should anticipate fourth network.

To take care of immediate needs, particularly in areas that do not have three competitive operations (Providence, Syracuse, New Orleans, etc.), plan encompasses temporary deviation from existing standards until adequate allocations become available through long-range program extending vhf band via swap with government. Otherwise existing mileage separations and standards would be rigidly maintained. Five and possibly six commissioners believed agreeable to this formula. Comr. Robert E. Lee, who has doggedly advocated full-scale move to uhf, is outside fold. In next week or two, FCC will be prepared to present its plan to Senate Commerce Committee.

Monitor • New wrinkle in air checks soon to be offered by Radio Records to interested stations and advertising agencies. Plan is to record traffic time programming of top stations in top markets, reproduce it, eliminating music but including commercials and chatter, on 33⅓ rpm discs to be issued at 10-day intervals with three stations covered by each record. Contemplated fees are $40 per month to agencies, sliding scale ($30-$60) to station subscribers.

PR progress • "Substantial progress" was reported by Tv Information Committee in developing all-out public relations program at last Wednesday's meeting in New York. All nine members of committee were present, with two additional meetings planned (April 17 and April 29) before April 30 meeting with NAB Television Board. Project contemplates war chest of possibly $1 million to affirmatively sell television against print and other adversaries (BROADCASTING, March 23, *et seq.*).

Same questions • Although CBS had record breaking year in 1958 (net sales $411,800,203; net income $24,428,812) some pyrotechnics are expected at company's annual stockholders meeting this Wednesday. Among those likely to raise questions about management are Wilma Soss, Gloria Parker and Barney Young, latter identified with music publishing companies, all of whom have popped up at past network annual meetings.

Among matters that may be raised at CBS stockholders' meeting are Ed Murrow's year-long sabbatical, which begins in July; Mr. Murrow's widely publicized "call girl" program of January 19; status of Ralph F. Colin, CBS board member and partner in Rosenman Goldmark Colin & Kaye, law firm representing CBS Inc. and which also represents Broadcast Music Inc.

Space and spectrum • Tucked away in data filed with FCC in its 25-890 mc proceedings (BROADCASTING, April 6) is case of American Rocket Society for ultimate space needs. O. H. Lange, in charge of Army's ballistic missile project, quotes Dr. Wernher Von Braun, Army's scientific chief, to effect that frequencies needed for "passive satellites" will be in 100-1,000 mc area (part of fm band and embracing vhf chs. 7-13,, as well as all of uhf band). "It is probable", FCC was informed, "that a large portion of the spectrum space will be taken by this type of service in the next 10 years." Presentation further states that "active" communications satellites ultimately would be in microwaves, above tv bands, but that identical 100-1,000 mc band might have to be used until microwaves become workable for this service.

Sensitive assignment • Kenneth Cox, Seattle attorney who has been special tv counsel for Senate Commerce Committee last couple of years, is back in Washington on special committee mission—not allied with broadcasting. He's assigned to highly sensitive affairs involved in President Eisenhower's nomination of Rear Admiral Lewis L. Strauss, former Atomic Energy chairman, as Secretary of Commerce. Adm. Strauss was named to Commerce post by President last October as recess appointee, but nomination still must be confirmed by Senate.

Rendezvous • TvB board members will brush shoulders en masse with leaders of some of nation's top advertising agencies in connection with TvB board's next semi-annual meeting. It's set for April 22-23 at Greenbrier, White Sulphur Springs, W. Va., scene also of American Assn. of Advertising Agencies' annual meeting. TvB sessions, under chairmanship of Roger W. Clipp, Triangle stations, will be held while AAAA is in closed meeting. Then members will attend agencies' open sessions April 24-25 and wind up with TvB cocktail party for AAAA members on final night.

News sales • There's two-purpose aim behind CBS Radio Spot Sales' current campaign just getting underway that gives radio news top sales priority: (1) it wants to make local radio newscasts more revenue producing, and, (2) strengthen sales of news programming furnished to stations by CBS Radio, considered by network as cornerstone of PCP (Program Consolidation Plan). Theme of presentation is that news is "right for advertisers and audience," that network news feed plus local news coverage equals "total coverage."

Management study • Implementing action of NAB Board at its February meeting in Florida, Harold Fellows, NAB president, has advised selected stations that management consulting firm of Stewart, Dougall & Associates will be calling them within next few weeks to study reactions to NAB organization and services. Board approved $15,000 appropriation for purpose of determining whether NAB is utilizing its $1 million budget efficiently and whether it is properly staffed.

Stewart, Dougall, Mr. Fellows advised stations, will respect confidences and not reveal information or opinions obtained from any specific broadcaster to NAB but will consolidate returns by station classification. "Obviously", Mr. Fellows wrote, "with complete objectivity guaranteed, the NAB membership will derive the greatest possible benefit from their analysis and interpretation of the facts."

Oversight switch • In approving transfers of WSOC-AM-FM-TV Charlotte ($5.6 million) and of WGAY-AM-FM Silver Spring, Md.—Washington, D.C. ($456,000) FCC embarked upon new policy in evaluating cases involved in so-called House Legislative Oversight proceedings. James M. Cox stations, buyers of WSOC property, were indirectly involved in Miami ch. 7 proceedings in which Cox principals hold less than control, while WGAY sale by John Kluge and associates to Connie B. Gay was affected through FCC scrutiny of ch. 9 Orlando grant because of Oversight overtones.

PEOPLE WHO KNOW ATLANTA TV KNOW WAGA·TV IS THE BUY!

The big news in Atlanta is that the big buy is WAGA-TV. Nobody knows this better than the First National Bank of Atlanta—one of the South's great financial institutions—which has recently bought the "11th Hour News" *across the board*, Monday thru Friday, on a 52 week basis.

Or take the Early Show, the Starlight Movies, and other local programs. Their swelling roster of advertisers is convincing proof that *live* Channel 5 is delivering a big, growing family audience at remarkably low cost.

Get the facts on Atlanta's best TV buy from your KATZ man today.

WEEK IN BRIEF

Mr. Ryner

Sharpen the best agency tool: research • The big budgets of tv are demanding more judgment based on facts and fewer guesses. Stations can help the agency decision-making function with fewer rating pitches, more market "news." Frederick L. Ryner, vice president and director of research, Bryan Houston Inc., New York, writes on the subject in this week's MONDAY MEMO. Page **29.**

Overhaul of option time • FCC is pondering changes, with final determination on issuance of rule-making proposal seen forthcoming before the end of month. Among changes seen proposed will be deletion of 30 minutes and requirement that all time used for straddle programs be counted as network time. Page **33.**

Inter-media sharpshooting • Tv and print media executives tussle on whether or not cost-per-thousand can be used for inter-media comparison. The arena: an AMA workshop in New York. Page **34.**

Films stars in tv selling hats • Hollywood motion picture stars in increasing numbers are benefiting from a tv windfall as agencies turn to "names" to sell on their commercials. Page **52.**

Transmitter makers hit jackpot • FCC decision to accept Class IV station applications for power boosts to 1 kw, day, opens multi-million dollar market for new equipment to increase the present 250 watters' reach. Page **54.**

Radio application processing • FCC wages war on situations which tangle up its processing line on radio applications and issues new cutoff policy to expedite handling. Page **54.**

Peabody Awards • NBC takes seven awards, CBS four, ABC two. Frank Stanton gets special mention. The annual radio-tv awards capsuled. Page **72.**

Screen Gems looks to new conquests • Film production-distribution organization says it's going to get into tv station ownership, video tape programming and co-production of programs with other nations. Page **76.**

Union cries censorship, tells FCC • Telecasters are charged with censorship during a labor dispute between GE and electrical workers union. IUE President Carey asks FCC to take action against four stations which refuse to carry union program. One station recants. Page **94.**

Information: three-way street • Sig Mickelson of CBS says news media can't do the job alone: news sources and the public itself must help if people are to be informed. He calls for lifting of hampering restrictions on tv news coverage. Page **96.**

Better listening formula pays off • WLW Cincinnati rebuilds entire 50 kw plant to attain what it describes as world's best-quality radio signal, including fm. With new easy-listening format, station claims jump in business and size of audience. Page **100.**

Q: What radio station do you listen to most of the time at night?

A: *WWDC was the clear-cut winner in a PULSE poll of Washington, D. C., area residents. Of particular interest is the pronounced majority we scored with the menfolk.*

This special qualitative PULSE survey shows many other areas of WWDC listening leadership—all of them of importance to advertisers. For the full report, write WWDC or ask your Blair man for a copy of "Personality Profile of a Radio Station." It's revealing!

WWDC *Radio Washington*

REPRESENTED NATIONALLY BY JOHN BLAIR & CO.

In Jacksonville, Fla., exciting WWDC-owned Station WMBR is rapidly changing the listening habits of a great growth market.

WRVM, WWTB, WBEL, 4 other sales filed

Station sales filed at FCC Friday:

WRVM Rochester, N.Y. • Sold by Harry Trenner to Frank W. Miller Jr. and Lee W. Miller for $210,000 plus assumption of $100,000 in promissory notes and $40,000 in liabilities. Frank Miller Jr. owns 14.3% of Kelly-Smith Co., newspaper representative, which owns majority of Headley-Reed Co., radio-tv representative. He and his father are two of three trustees controlling *Fall River* (Mass.) *Herald News* (WSAR Fall River), which plans to merge with *Schenectady* (N.Y.) *Union Star*. Headley-Reed owns 1.1% of WKOW-AM-TV Madison, Wis. Lee Miller is account executive at Fuller & Smith & Ross, New York. WRVM is 250 w day on 680 kc.

WWTB Tampa, Fla. • Sold by W. Walter Tison to WPIT Pittsburgh, which has same ownership as Friendly Group (Allen H., Jack N. and Louis Berkman and John J. Laux), for $240,000. Friendly stations are WSTV-AM-FM-TV Steubenville, Ohio; KODE-AM-TV Joplin, Mo.; WBOY-AM-TV Clarksburg, W.Va.; WPAR-WAAM (FM) Parkersburg, W.Va.; KMLB-AM-FM Monroe, La. WWTB is Keystone affiliate with 5 kw day directional on 1300 kc.

KZEE Weatherford, Tex. • Swapped by Horace C. Bowen to J. Fred Case, wife Lucille and son James F., for **KWON Bartlesville, Okla.,** with Cases receiving $25,000 cash and $90,000 in real estate (KWON being valued at $240,000 and KZEE at $125,000). KZEE is 250 w day on 1220 kc. KWON is MBS affiliate with 250 w on 1400 kc.

WBEL Beloit, Wis. • Russell G. Salter, 50% owner, is buying remaining 50% from Lloyd Burlingham for $150,000. Mr. Burlingham owns KCVR Lodi, Calif. WBEL is 5 kw on 1380 kc.

WAUB Auburn, N.Y. • J.R. Poppele, former director of Voice of America and former chief engineer of Mutual, with his family is buying 75% from Herbert P. Michels for about $7,000, with Mr. Michels retaining 25%.

WTTT Arlington, Fla. • Sold by Harold E. and Helen W. King to Theodore Weber for $125,000. WTTT is 250 w day on 1220 kc.

Stanton to speak

Dr. Frank Stanton, CBS president, will be one of three outside speakers at NAB's management development seminar to be held July 5-17 at Harvard U. Names of other two speakers will be announced soon. Some 60 broadcasters have been selected to take 12-day course from among those applying, NAB reported Friday.

More for Ford?

Ford Motor Co., J. Walter Thompson Co., MCA and NBC-TV officials slated to meet this week in Hollywood to discuss proposed weekly series for next fall. NBC-TV is holding open 9:30-10:30 p.m. on Tuesdays for series which would call for expansion in some weeks for 90-minute or two-hour presentation. Dan Seymour, vice president and director of tv-radio, JWT, New York, confirmed Friday that his proposal is in negotiation. Format is being worked out by Mr. Seymour and MCA. Ford's renewal of its current sponsorship of *Tennessee Ernie Ford* and part of *Wagon Train,* both NBC-TV, not certain—it need not pick up option until sometime in May.

WMCA raises rates

WMCA New York raises rates for first time in two years (rate card No. 31 effective immediately). Price hikes are in most announcement and time periods reclassified though hourly basic rates remain same. Class A extended hour to 8 p.m. while old half-hour rate now applies for 25-minute segment (other five minutes is news for which rate has high of $90 for choice morning time to $70 for late evening periods). Basic rate for one-minute in Class A raised from $45 to $50; in Class B from $32 to $35.

Boston ch. 5 argument

FCC Hearing Examiner Horace Stern Friday announced he had cancelled oral argument set for May 1 in Boston ch. 5 *ex parte* rehearing case. He also announced it would be rescheduled at later date if in his opinion it was necessary. Proposed findings by parties in Boston case due April 20. Although Judge Stern's reasons for cancelling Boston argument were not given, it is understood he felt publicity on argument during period when former Comr. Richard A. Mack was on trial in U.S. District Court in Washington (see page 64) might interfere with fair trial. Same reasoning was used by FCC in postponing Miami ch. 10 oral argument, from April 23 to May 21.

Chicago GOP site?

Republican National Committee was to have decided Saturday (April 11) where and when GOP national presidential convention will be held next year. Committee met Wednesday in Washington, but delayed decision to Saturday, when new chairman Sen. Thruston B. Morton (R-Ky.) is installed. Chicago is considered probable choice with week of July 25 date. This would give tv and radio networks one week to move equipment from Los Angeles where Democratic national convention will be held week of July 11. In running for GOP convention site besides Chicago, it's understood, are Miami and Philadelphia. Los Angeles and New York said to have been ruled out because leading GOP presidential hopefuls Richard Nixon and Nelson Rockefeller are from California and New York respectively.

KBET-TV owners shift; Northrop new manager

Ownership of ch. 10 KBET-TV Sacramento, Calif., transferred from stockholders of Sacramento Telecasters Inc. to Great Western Broadcasting Corp., C. Wrede Petersmeyer, Great Western president, announced Friday. Transfer occurred Thursday after FCC consent to $4.5 million sale. Great Western is wholly-owned subsidiary of J.H. Whitney & Co., owner of Corinthian Stations including KOTV (TV) Tulsa, KGUL-TV Houston, WANE-AM-TV Fort Wayne, Ind., and WISH-AM-TV Indianapolis.

Mr. Petersmeyer also announced acceptance of resignation of John H. Schacht, vice president-general manager of KBET, and appointment of Johnston (Jock) F. Northrop as acting general manager of KBET. Mr. Northrop is member of Corinthian's New York staff as assistant to Mr. Petersmeyer and will serve in Sacramento until new vice president-general manager is announced.

AT DEADLINE

CONTINUED *from page 9*

KMBC to drop MBS

KMBC Kansas City (980 kc, 5 kw) is giving up its Mutual affiliation latter part of May, MBS authorities confirmed Friday. Station, headed by Don Davis, currently is dual ABC and MBS affiliate and is expected to go full ABC. (For new MBS affiliate addition, see page 99.)

'Lassie' script awards

Jack Wrather Organization, owner of *Lassie* tv series, announced Friday (April 10) establishment of "The Lassie $15,000 Writer Awards for Merit." All professional writers whose stories and scripts are bought between now and Sept. 1 for production this year will be paid usual fees and be eligible for awards. Panel of judges will review all 39 scripts of 1959-60 season and pick winners. First award will be $5,000; second, $3,000; third, $2,000 and fourth to eighth, $1,000 each. Scripts may be sent to Rose Mathias, story editor, Lassie Productions, 270 North Canon Dr., Beverly Hills, Calif.

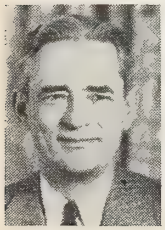
McGavren resigns 3

Daren F. McGavren Co., station representative, announced Friday resignation of KJR Seattle, KNEW Spokane and KXL Portland, Ore., effective May. McGavren plans to represent other stations in these markets.

• Business Briefly

• Three new accounts to Adams & Keyes' Los Angeles office announced Friday: Helms Olympic Bakeries, State Mutual Savings & Loan Assn. and Wallace Moir Co. (mortgage finance). A&K is merged Burke Dowling Adams and St. Georges & Keyes.

• Tidy House Products (detergents), Shenandoah, Iowa, appoints Guild, Bascom & Bonfigli, San Francisco, as advertising agency effective July 1. Advertising budget is $1.5 million and radio and tv are expected to receive substantial share of billing. Account now handled by Earle Ludgin & Co., Chicago.



• Tilds & Cantz Adv., Los Angeles, has moved to 8833 Sunset Blvd. Telephone: Oleander 5-9270.

WEEK'S HEADLINERS

Mr. Eaton

HOWARD EATON JR., media director of Lever Bros., named chairman of Assn. of National Advertisers' broadcast advertising committee, succeeding GEORGE ABRAMS. Mr. Abrams resigned chairmanship and seat on committee because of pressure of new duties as president of Cosmetics & Toiletries Div. of Warner Lambert Pharmaceutical Co., according to ANA, but he will continue on ANA board. Mr. Eaton, who had been media manager of radio and tv at Lever for past two years, was elevated to media director two months ago (WEEK'S HEADLINERS, Feb. 9). He formerly was with Young & Rubicam and before that, from 1947 to 1952, was sports editor of WELI New Haven, Conn.

Mr. Watson

ROBERT W. WATSON, chairman of board of Erwin Wasey, Ruthrauff & Ryan, joins Kudner Adv., New York, on Wednesday (April 15) as senior vp and member of executive committee and of board of directors. Mr. Watson was board chairman of Ruthrauff & Ryan, New York, before agency's merger with Erwin Wasey & Co. in 1957. He joined R&R in San Francisco in 1940 and served that agency continuously, advancing to vp in 1946, executive vp in 1952, president in 1955 and board chairman in 1956.

Mr. Buckley

RICHARD D. BUCKLEY, vice president of Metropolitan Broadcasting Corp. and president of its WNEW New York division, was reported last week to be preparing to leave the organization after selling his approximately 10% interest back to the corporation for $2,275,440 (CLOSED CIRCUIT, March 30). His departure was expected to come by the end of this month. He said he had not yet made definite plans for the future but that he expected to stay in broadcasting. Under his severance agreement, he indicated he may not enter broadcasting in New York, Washington or Cleveland—where Metropolitan owns WNEW-AM-FM-TV, WTTG (TV) and WHK-AM-FM, respectively—for one year. The $2,275,440 purchase price for his stock represents $15 a share for 151,696 shares. Mr. Buckley was president of Metropolitan as well as the WNEW division until last month, when the board named Chairman JOHN W. KLUGE to the additional post of president of the overall corporation. (BROADCASTING, March 23). There had been speculation since that time that Mr. Buckley would sell his stock, perhaps following this move with the purchase of other stations.

Mr. Evans

HERBERT E. EVANS, vp and general manager of Peoples Broadcasting Corp. (WRFD Worthington, WGAR-AM-FM Cleveland, both Ohio; WTTM Trenton, N.J.; WMMN Fairmont, W.Va.; WNAX Yankton, S.D., and KVTV [TV] Sioux City, Iowa), named president, succeeding MURRAY D. LINCOLN, named general chairman, newly-created post. Mr. Evans will also serve as member of board of directors. He has been chosen by NAB to be U.S. delegate to Inter-American Assn. of Broadcasters, which will meet this summer at site yet to be chosen. Peoples Broadcasting Corp. is subsidiary of Nationwide Insurance, Columbus, Ohio.

Mr. Cooper

JOHN M. COOPER, managing editor of CBS Newsfilm since January 1956, is named manager. Mr. Cooper replaces HOWARD KANY, who has left CBS Newsfilm to assume new post as director of international business relations, CBS-TV Stations Div., but who continues to supervise CBS Newsfilm's foreign and domestic sales (WEEK'S HEADLINERS, March 30). Before he joined CBS Newsfilm, Mr. Cooper was director of radio and tv news for International News Service.

FOR OTHER NEWS OF PEOPLE SEE FATES & FORTUNES

OBJECTIVE: *more selling power from your advertising dollars*

The tremendous selling-power of Television is widely recognized—the unmatched power of *sight* plus *sound* plus *motion*.

And the most efficient form of this tremendous power is Spot Television, because it permits you to concentrate your advertising precisely *when* and *where* you choose.

Major question for management today is: how can our products take full advantage of this power?

Helping advertisers and agencies find the right answers to that question is the business of Blair-TV. For in America's top markets, Blair-TV represents the stations that consistently lead in selling-power per dollar.

Sound advertising decisions require up-to-the-minute data on each of these stations – data you can get at a phone-ring's notice through any of Blair-TV's ten offices.

As television's first exclusive national representative, Blair-TV was founded on the basic principle that alert informed representation is a service vital not alone to stations but also to all Advertising, and to the businesses dependent on it for profit-producing volume.

In meeting this year's quotas, keep the power and flexibility of Spot Television in mind. And keep Blair-TV in mind for stations that do the top selling job in many of your best markets.

April 27-May 2—Journalism & Broadcasters Week, School of Journalism & Communications, U. of Florida, Gainesville. (April 27 is Broadcasters Day. Key speakers include FCC Comr.

THAT'S NOT ALL!!

K-7 is first in Amarillo in total rating points, three nights out of the week—with four of the top ten shows.

Let your Bolling man give you the detailed story and show you some amazing figures.

KVII-TV

amarillo, texas

C. R. "Dick" Watts
Vice-President and
General Manager

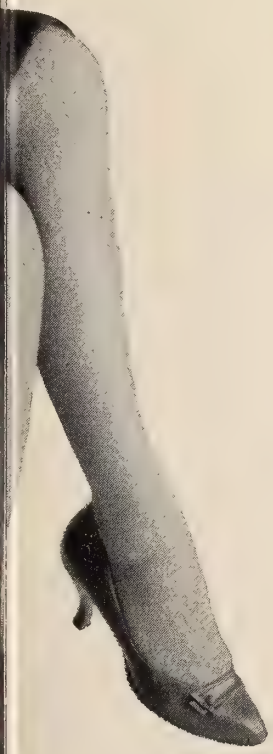
abc

Represented nationally by the Bolling Company

NO TWO RATINGS ARE EXACTLY ALIKE

ABC Television, for example, doesn't always have five shows in Nielsen's top ten.* Sometimes it's four – or three.

And it's not always the same shows. *Maverick* and *Rifleman* are consistently there. *Wyatt Earp, The Real McCoys, Cheyenne, Sugarfoot* are familiar names in the top ten listings . . . but they don't *all* make it *all* the time.**



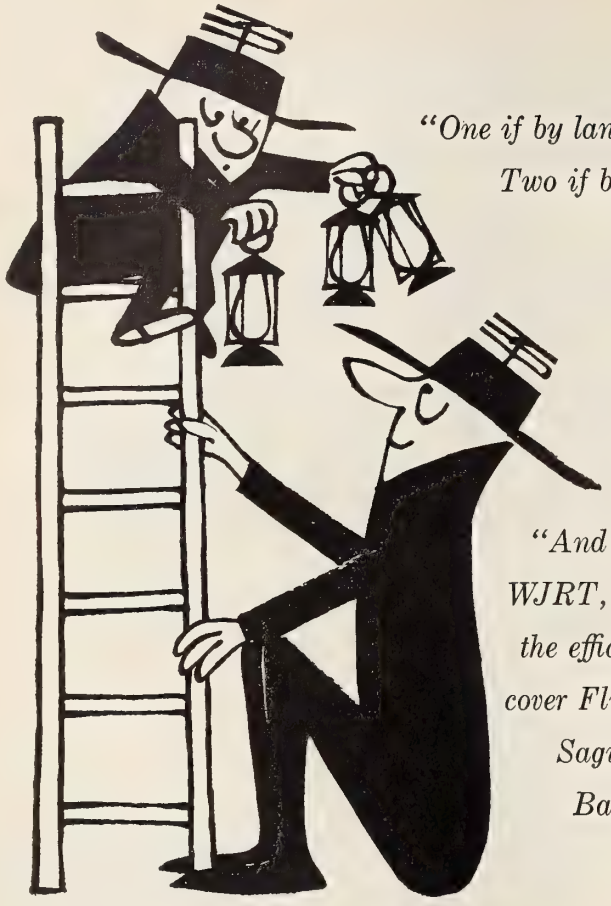
(When they don't, though, they're not far behind.)

We don't always dominate the same number of time periods, either. One report will show us leading the field (No. 1 in 18 half hours). Another will show us in second place (tops in 13 half hours).†

Not *every* Nielsen will prove ABC to be No. 1 network four out of seven nights a week. Every once in a while, we're tops in only three.***

But Nielsen after Nielsen, one thing is consistent.

ABC is consistently going right to the top.



Go right to the TOP...go ABC-TV

ABC TELEVISION

Another thriller-diller from WJRT—

"One if by land! Two if by sea!"

"And four if by WJRT, Ponsonby—the efficient way to cover Flint, Lansing, Saginaw and Bay City."

Listen, admen, and you shall hear—plenty! That WJRT is *the* single-station way to reach the other big Michigan market. That you get Flint, Lansing, Saginaw and Bay City with one buy and a grade "A" or better signal. That you're right where things happen with WJRT's inside-out coverage of mid-Michigan and its nearly half-million TV households. If you're aiming at Flint, Lansing, Saginaw and Bay City, WJRT is your bull's-eye buy. Come on in—it's open season on sales.

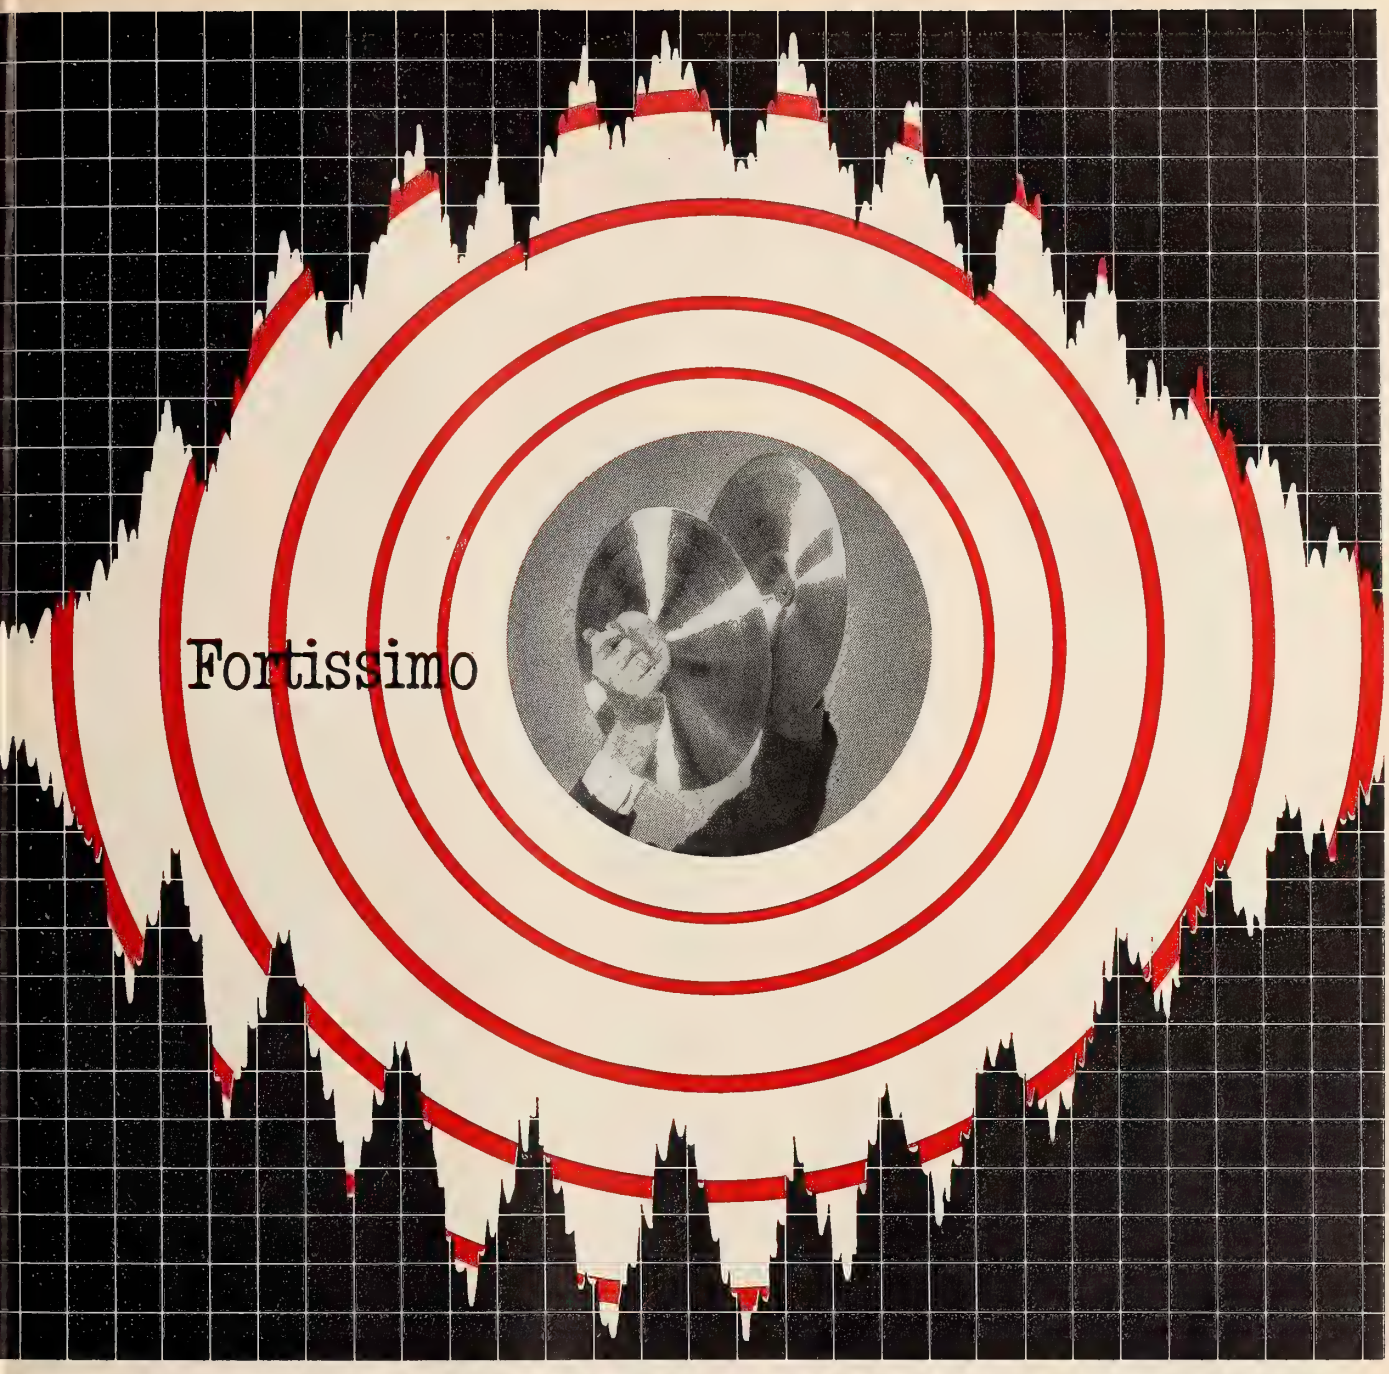
Pianissimo to...

WLW Acclaimed.

Frank H. McIntosh



"A magnificent new WLW-AM transmission system, developed by Crosley Broadcasting engineers, has made WLW Radio unquestionably the World's Highest Fidelity Radio Station!

The revolutionary new broadcasting development now puts WLW-AM transmission on a par with FM in high fidelity . . . providing a perfect illusion of live performance with a sound range from the softest pianissimo to the loudest crescendo."

This distinction was confirmed in a test made by Frank H. McIntosh Laboratory, Binghamton, N. Y.—the world's leading independent radio and high-fidelity transmission expert.

This highest fidelity transmission will increase the WLW Radio audience even more—an audience which for years has ranked among the top 10 of over 3,200 Radio Stations in America.

The result of 3 years of work and ¼ of a million dollars, it's another in Crosley's long line of distinguished contributions to the broadcasting

world's highest fidelity radio station with audience among top 10 in America!

industry, and provides finest commercial clarity for advertisers' commercials!

And it's another crescendo for "subscribers."

Call your WLW representative . . . you'll be glad you did!

*May 29-31—Second Annual International Radio Programming Seminar and Pop Music Disc Jockey Convention, Americana Hotel, Miami, Fla. Speakers will include Matthew J. Culligan, NBC Radio executive vice president, and Gordon McLendon, head of McLendon station group. Storz stations are sponsoring seminar with Bill Stewart, Kilpatrick Bldg., Omaha, Neb., as convention coordinator; NAB President Harold E. Fellows; three station representative executives—John Blair, Robert Eastman and Adam Young.

OPEN MIKE

Rating the tv picture

EDITOR:

I was naturally quite interested in the comments on pages 59 and 60 of the March 23 issue . . . regarding the TASO session at the NAB convention. Although the general coverage of the session was accurate, in a couple of places under the general heading of "other highlights of the TASO panel," the remarks attributed to our speakers were not correct.

First, it is reported that we stated that "visual power should be increased from the present two-to-one to four-to-one." Actually, TASO took no stand regarding the preferred picture-to-sound power ratio. A large amount of information was presented regarding the influence of this ratio on lower adjacent channel interference receiver performance and transmitter economics, but decisions regarding this and all other standards are the responsibility of FCC and not of TASO.

Second, it is reported that we stated that "engineers are less critical of picture quality than householders. On the average, engineers rated a picture as better by 20% than the layman." Actually, the contrary is the case. We reported that on the average, the engineers rated a picture lower than the householder by 0.13 step on a six-point scale of picture quality. We had expected the engineers to be much more critical than the householder and were surprised that the difference found was not greater. Nevertheless, on the average the engineers were still slightly the more critical of the two groups.

BALTIMORE IS A WJZ TOWN!

Baltimore, city of "group" homes . . . a city where, as most folks know, WJZ-TV has been a leader in television for more than a year and a half. Why?

Because WJZ-TV has not lost touch with the community it serves. Prime time public service programming, editorial comment on important local issues, documentary news treatment of civic problems, more local live programming than the other stations combined . . . these are the reasons why WJZ-TV is ABC's top affiliate in 3-station major markets and why most people in Baltimore spend more time with WJZ-TV than with any other station.* Baltimore *is* a WJZ Town!

**Feb. & March ARB Reports continue to reflect WJZ's long-time overwhelming dominance in Baltimore; WJZ leads Station B by 29%, Station C by 33%.*

WJZ 13 TV

Westinghouse Broadcasting Company, Inc.

MONDAY MEMO

from **FREDERICK L. RYNER,** *vice president and research director, Bryan Houston Inc., New York*

Sharpen the best agency tool: research

Today there are more diversified jobs in advertising than ever before yet fewer people qualify to do them. Part of the reason comes into focus in the agency research department where the need is for more and more specialists.

The drive toward specialization has several reasons behind it. One major reason is the increased complexity of advertising media today. Another reason, of course, is the high cost of television time and production. This cost puts the burden of better thinking and more analytic judgment upon agency personnel.

Beyond the great responsibility of committing vast sums to the air media, agency researchers are today also faced with an avalanche of new research techniques, fresh areas of specialization and innovation. It is difficult for an individual research man to be specialized and equally intelligent in such divergent research areas as copy testing, media analysis and market and motivational research, not to mention such rapidly developing new areas as operations research.

Basic Research Need Grows • The greatest responsibility of any top agency research department lies in research directly related to client problems. But of increasing importance to Bryan Houston Inc. is the area of pure or basic research, a knowledge of which will enrich the department service and will eventually transfer itself to everyday use for client situations.

Under the pressure of resolving day-by-day research problems the agency man can so easily overlook the importance of staying abreast and perhaps ahead of new developments. Any agency that does forget the importance of doing this strays from the basic fact that the pure research of today inevitably becomes the broadly applied technique of tomorrow.

Think of the new vistas which operations research may eventually open up This technique, while still in its infancy where advertising application is concerned, has become the subject of a series of Advertising Research Foundation seminars. The attendance at these reflects the increased scope and interests of agency research. It is in these areas of pure research that we find the greatest need for free exchange of ideas and opinion. Indeed, in some fields a nucleus of people willing to exchange thoughts is being built up. These are the men who realize that everything which increases the scope of advertising research will help to (1) further reduce the need for unsubstantiated judgment where big money investments are concerned and (2) raise the stature of advertising research as a whole.

How Stations Can Help • However, the basic function of agency research is still related to current client problems. And it is in these areas that the individual media can help agency research departments. Radio and television stations, for instance, can supply valuable market data about their own community, preferably supplementing rather than duplicating the data available from varying national research organizations. Such market information is far more useful to the agency research man than the individually interpreted media and ratings analysis from stations to which most major agencies subscribe nationally anyhow.

An indication of the value and importance of such market data is a system for tabulating it which we use at Bryan Houston Inc. We have a tabulating and computing machine room at the agency in which we record all market and coverage information by individual media and by individual counties for the entire U.S. From this card file and computing room we have compiled our annual *Major Media and Market Coverage Book*. This book includes over 300 counties and accounts for 74% of U.S. purchasing power. It is continuously up-dated for use by the agency account people and clients.

Fred Ryner, b. Omaha. He was graduated from Northwestern U. in 1931. He went into sales and promotion with Wrigley Co., Cudahy Packing Co. and Lever Bros. Subsequent agency experience entirely in research. He was with Foote, Cone & Belding 1944 - 46, Dancer - Fitzgerald - Sample 1946 - 52, then Bryan Houston Inc. Mr. Ryner lives in Manhasset with his wife, two sons and "one beat up old dog."

The information which we record on the individual market cards is derived from all the varying national surveys to which the agency of today must subscribe. But this information could be supplemented through reliable additional data provided by individual local media such as radio and tv stations.

The Necessary Data • There is no question but that we often look to individual stations for information about changed coverage, change in frequency or strength, and all factors affecting the station's reach.

Another area where the individual stations can help agency research departments is in supplying information not as quickly available from national surveys. For instance, when a major new industry is attracted to the market where the station is located, there may be rather quickly a change in the economic complex of that market and eventually in its purchasing power. Or when a major supermarket chain opens up or closes a retail outlet in that market, distribution patterns will be affected. While national surveys will eventually reflect such changes, the local station could be particularly helpful by providing this information as fast as it occurs.

It is important for station management to realize that everything that happens in its market affecting the business conditions, consumption patterns and general economic conditions of that market is news to an agency research department, news that it has to search out for itself through various national surveys or its own field men, but even more importantly, news that it appreciates getting in a reliable and useful form from local sources such as the station.

The Right Emphasis • Unfortunately too many stations today still concentrate on research intended to prove their ratings are the highest and the best. It would be so refreshing if stations instead paused to find out through available research facilities just what it is that their audiences want.

WSB-TV viewers watch as a deaf child learns to speak

"The one hope of every parent of a deaf child is for the public to know and understand their handicap. WSB-TV gave us an answer to that hope Sunday." So wrote the mother of a little student at Atlanta's Junior League School for Speech Correction after seeing WSB-TV's presentation of "A Sound Life" In an entertaining way this dramatic documentary showed how deaf children are being taught that they have voices—and how to use them. The film was written and produced by the WSB-TV staff, and shot at the school. Responsible, imaginative programming in the public interest has earned heart-warming rewards for WSB-TV. And for this station's advertisers also.

THE BUSINESSWEEKLY OF TELEVISION AND RADIO

April 13, 1959
Vol. 56 No. 15

THE SQUEEZE ON TV OPTION TIME

- **FCC aims to reduce time networks can command from stations**
- **Action could lead to clearance trouble for network clients**
- **Meanwhile, new investigation of network programming begins**

The FCC has all but approved major changes in its regulation of television option time. They could produce new problems for the networks and network advertisers in obtaining program clearances, especially in prime evening time.

Last week the Commission ordered its staff to prepare a notice of proposed rule-making which would:

- Reduce option time from the present 3 hours in every broadcast segment to 2½ hours. The broadcast day is divided into four segments—8 a.m. to 1 p.m., 1 p.m. to 6 p.m., 6 p.m. to 11 p.m. and 11 p.m. to 8 a.m.
- Require that when a program starts in option time but extends into station time its entire time be counted as network option time. This refers to the so-called straddle program which, under present rules, is counted against option time only in that portion which runs in option time.
- Require networks to give 13 weeks notice to affiliates that their option is to be exercised. Under present rules, networks can pre-empt specified option hours on only eight weeks' notice.
- Permit affiliates to reject a network program on the grounds that it is unsuitable for their audiences—even after the program period has begun. A broadcast licensee now has this privilege only if some outstanding local public interest event intervenes.
- Permit an affiliate to substitute a program of community interest in lieu of a network program.

These changes in the 18-year-old network regulations have the backing of a majority of the seven commissioners—although this majority, it is understood, ranges from a 5-2 split on some elements to 4-3 on others.

The staff was asked to bring back a draft of the more formal rule-making notice in two weeks. This would place the item on the executive FCC agenda April 22 if no hitch develops.

During consideration of the option time recommendations, the FCC also turned down a number of other suggestions submitted by the staff. These would have:

- Required a network to publish its criteria for affiliation and disaffiliation

How it began • The action on option time is an outgrowth of a special television network study conducted for the FCC by a 13-man staff headed by Roscoe Barrow, dean of the U. of Cincinnati Law School. The study took two years and cost $221,000. It resulted in the Barrow Report which was issued in October 1957.

The Barrow Report recommended 30-odd vital changes in the FCC's rules governing network broadcasting, including the prohibition of option time.

Still other FCC proceedings are underway as a consequence of the Barrow study. Now pending is a rule-making proposal to prohibit networks from acting as spot sales representatives for any tv stations other than its own. Comments on that proposal are due April 29.

Programming probe • A major area of investigation untouched by the original Barrow project is programming. That investigation will erupt into a hearing to begin probably May 4.

Network lawyers met three days last week with FCC officials to discuss procedure.

The upshot of the meetings with Chief Hearing Examiner James D. Cunningham, chosen to preside at the inquiry; Broadcast Bureau Chief Harold G. Cowgill and Network Study aides Warren Baum, Ashbrook Bryant and James Tierney, was an agreement to start a hearing record with exhibits and documents.

Dean Barrow: his memory lingers on

The FCC's program inquiry was announced last February (BROADCASTING, March 2). It is based on allegations that networks have pressured program producers to cut them in on program packages. Where this alleged tactic has failed, it is charged, networks have refused to consider such programs, or have failed to provide prime time for their showings. Complaints along these lines were submitted to the Dept. of Justice, and that agency has turned over its information to the FCC.

The inquiry also will take up other elements of programming, it was learned, including such fundamentals as how programs are chosen, how the time is allocated, and what standards are used when programs are changed from initial or original times spots.

Representing the networks last week were:

Joseph J. Jacobs, ABC; Thomas K. Fischer, CBS, and Thomas E. Ervin, NBC.

and to report each such action.

• Placed an affirmative obligation on a network to disregard as an aid to affiliation the fact that a prospective affiliate is owned by a multiple broadcast station owner.

• Required a network to supply a program to another station in the same community as its affiliate when the affiliate cannot carry the program or cannot carry it in the ordered time slot.

• Forbidden a network to withhold a program for placement on a station in another community when the sponsor so requested, despite objections of the affiliate whose coverage might overlap the other community.

The Commission majority has taken its stance in the face of Dept. of Justice assertions that option time is illegal.

In April 1958, Assistant Attorney General Victor R. Hansen told FCC Chairman John C. Doerfer and other Commission officials that the option time and must-buy practices of television networks were antitrust violations *per se*.

In January 1959 the Commission by a bare 4-3 majority found that option time was reasonably necessary in the operation of tv networks. FCC Comrs. Rosel H. Hyde, Robert T. Bartley and Frederick W. Ford were in the minority on this. The finding was submitted to the Dept. of Justice in line with the agreement reached at the April 1958 meeting. In March of this year, Mr. Hansen replied, upholding the theory that option time is a Sherman Act violation (BROADCASTING, March 9).

No mention was made of must-buys because toward the end of 1958 CBS-TV and NBC-TV voluntarily eliminated this requirement. In the must-buy practice, those two networks had maintained a basic list of affiliates which advertisers were required to buy. ABC-TV has historically adhered to a minimum dollar buy, with advertisers free to choose any station lineup.

The whole concept of option time has been under fire twice before. During the 1939-1941 network study, the first FCC proposal doomed option time in its entirety. This was revised, however, to limit the number of hours that might be optioned when the final regulations were adopted in 1941.

The same recommendation was made three years ago by Harry M. Plotkin, former assistant FCC general counsel, acting as special majority counsel to the Senate Commerce Committee.

In hearings which the FCC held last year on the Barrow recommendations against option time, all the networks, several leading national station representatives and a group of leading network affiliates testified to the importance of option time. The essence of their testimony was that option time was the instrument that enabled the networks to sell in competition with other national advertising media.

BROADCAST ADVERTISING

A SINGLE ALL-MEDIA DENOMINATOR?

Question on C-P-M ignites fireworks at AMA workshop in N.Y.

It was a researcher's delight but an advertiser's nightmare.

The event: a discussion of "how to compute cost per thousand for intermedia comparisons." In the ring: six speakers, two from tv networks, one from an agency, one from the newspapers, and two from the magazines. At ringside: The Market Workshop Group of the American Marketing Assn.'s New York chapter lunching at a New York restaurant.

Moderator or referee was the affable Dr. E.L. Deckinger, vice president of Grey Adv., who is schooled in radio-tv audience research.

Another such agency authority—Dr. Seymour Banks, Leo Burnett vice president—was on the panel.

People Not Units • Said Dr. Banks: data for cost per thousand should be expressed in terms of actions of people rather than in terms of physical media units—"people" exposure, participation and involvement in media.

In simple terms, Dr. Banks seeks information which shows the communication's performance—how the context affects the people exposed to the media, the nature and amount of information transmitted and the influence on moods and emotions.

The gentle and scholarly talk by the Leo Burnett executive failed to tip the audience on what was to come. Round by round this followed:

Dr. Howard D. Hadley, research vice president, Bureau of Advertising of the American Newspaper Publishers Assn., thought that measurements of prospects viewing commercial content was "far more needed for television than for print because prospects viewing television commercials are selected by the program; but in print media they are largely selected by the advertising itself. An advertiser in the newspaper can expect a readership bonus of about 50% among prospects for his brand, and it can range up to 250%."

Observing there would be increased emphasis placed on psychological response to advertising in different media, Dr. Hadley remarked: "This has long been available in print media."

A Sham • Dr. Thomas E. Coffin, research director at NBC, came out swinging: Comparing media by the size of audience is, he said, a "sham." An advertising medium has two dimensions: breadth and depth and the latter, said Dr. Coffin, was the "degree of impact created on each person . . . reached."

The way to compare media, observed Dr. Coffin, was by the multiplying of the number of persons times the impact per person.

But, he said, there's no meaningful comparison because "I seem to detect that my print-media friends are spending their time these days on two quite different efforts: one, banging away at tv; and, two, devising ways to produce ever larger and larger audience-only figures."

And, Dr. Coffin continued, the attack on tv shows the "very intensity of their [print media] concern betrays their evaluation of the depth of impact of our medium."

Dr. Coffin took issue with magazine and newspaper audience claims which include anyone who even looked into any part of a printed issue. But tv, he declared, does not include homes tuned for less than six minutes, and if "we followed the lead of the print media" tv would pick up more than three million homes over the total claimed. "In other words, in our effort to be sound and conservative we are throwing away—failing to claim—3 and a quarter million homes (nearly 8 million viewers) which the magazines and newspapers would include under their definition."

Throw-away • He then tweaked the audience with this one: "This throw-away is about equal to the number of readers who note the average full-page ad in *Life*.

Edward MacDonald, director, advertising planning for *Look* magazine, said the total audience size was precisely the

base on which to measure the advertising vehicle, print or tv, but reminded there was the "reduction factor" in the audience size of commercial. He charged that the print media's claims were understated because ad exposure was based on individuals in print but on households in tv. The inference: What's in the household and who is really watching?

Julius Barnathan, vice president-director of research at ABC-TV, agreed with Dr. Coffin that "impact" was most important, that the print media, "particularly newspapers," have decided "the best defense is a good offense." He attacked the newspaper theme of one never knows who actually views a commercial by citing commercial exposure and recall studies. After delving through the various measurement specifics provided by the research services in broadcasting, Mr. Barnathan came through with the conclusion that tv can provide cost per thousand but "you tell me how to do it for print." His inference: newspapers are not as well measured as tv.

Summit Shaky? • Charles E. Swanson, research manager of the *Saturday Evening Post,* murmured "this summit conference seems to be holding to a disagreement."

He than proceeded to talk about combinations of media or "media mix." He said media must document in full its potential and stressed as "exposure." But Mr. Swanson did not specifically refer to tv, and the net effect being an implication that tv as well as other media must document for the advertiser. As for advertising influence, Mr. Swanson directed attention to the "advertising page." Ignored: tv.

More sponsors set for baseball season

Further baseball plans were firmed up before the season officially opened this past weekend.

For the 12th consecutive season, WGN-TV Chicago is airing local White Sox and Cubs home telecasts, with Theodore Hamm Brewing Co. (Hamm's beer) and Oklahoma Oil Co. as co-sponsors. Agencies: Campbell-Mithun for Hamm's and Needham, Louis & Brorby for Oklahoma. Hamm's now is in its seventh year of Chicago telecasts.

WGN radio will carry all Cubs home and road contests with four sponsors: Phillips Petroleum Co., Bayuk Cigars, Goebel Brewing Co. and Oak Park Federal Savings. Respective agencies: Lambert & Feasley; Werman & Schorr; Campbell-Ewald, and Connor Assoc.

WCFL Chicago will broadcast the complete White Sox radio schedule under sponsorship of Anheuser-Busch for Budweiser beer (through D'Arcy Adv. Co.), General Finance Co. (Gordon Best Co.), General Cigar Co. for White Owls (Young & Rubicam) and Interstate Bakeries Corp. for Butternut Bread (Potts-Woodbury).

Messrs Coffin, Deckinger and Barnathan explore all-media measure

WCFL also will feed an approximate 25-station White Sox regional network.

WEMP and WTMJ, both Milwaukee, again will share coverage of all Milwaukee Braves' games, numbering P. Lorillard Co. for Old Gold, Kent, Newport cigarettes (through Lennen & Newell), Clark Oil & Refining Co. (Tatham-Laird) and Miller Brewing Co. (Mathisson & Assoc.).

Braves' broadcasts also will be piped to a 30-35 station network. Again, there will be no television permitted, though the Braves' management is considering tv in the early 1960's (CLOSED CIRCUIT, April 6).

Anheuser-Busch Inc. (Busch-Bavarian beer), St. Louis, Mo., GFC Loan Co., and Chevrolet Dealers of Greater St. Louis are sharing sponsorship of the KMOX St. Louis coverage of the Cardinals' 154-game schedule.

The Phillies' games on WFIL-TV Philadelphia are being underwritten by the Atlantic Refining Co., Philadelphia; P. Ballantine & Sons, Newark, N.J.; Bayuk Cigars Inc. (Phillies), and Tasty Baking Co., both Philadelphia.

Marketing seminar plans set by AFA

Applications for the management seminar in advertising and marketing must be in by May 25, Advertising Federation of America said last week in announcing that Emerson Foote, McCann-Erickson senior vice president, would serve as general chairman. AFA is sponsoring the seminar.

Robert Douglass Stuart, advertising consultant, is to be vice chairman and director of the policy-level study group which gathers at Harvard U. July 5-11. Three faculty members of the university's graduate business school will preside at the sessions, with Prof. Martin Marshall, who heads the advertising department, acting as educational director.

Through use of the Harvard case method, top advertising executives and their agency counterparts are to be exposed to the problems of corporate management. Mr. Foote said the seminar's goal is to help develop ". . . ability to look at advertising from the top down rather than from the bottom up."

Attendance is open to 55 qualifying corporate management and advertising agency executives, plus one official from each national media association which applies.

Good old radio time

Soft drinks and summer radio were made for each other.

That was the conclusion reached by Robert V. Coppinger, national account executive of the Radio Advertising Bureau last Monday (April 6) in an address before a joint convention of the Minnesota and South Dakota Bottlers' Assns. in Minneapolis. "Radio is at its best during the hot weather months, and so are you," he said.

Mr. Coppinger maintained that in summer the time spent with radio increases—96.9 million more hours of radio listening during average July week than in similar February time period—while other media experience a downward trend. He said radio's summer gain results from the upsurge in out-of-home listening.

'Zorro' sells Seven-Up, ABC-TV interviews find

Further evidence of television's cash-register advantages for the advertiser was reported last week by ABC-TV. It released results of a survey showing that Seven-Up, a sponsor of *Zorro*, sells substantially better in homes that watch *Zorro* than in homes that don't.

Conducted for ABC by The Pulse, the study covered 1,500 homes in six major markets with in-home interviewing done while *Zorro* was on the air (ABC-TV, Thursday, 8-8:30 p.m. EST). Seven-Up was the major sponsor that night, AC Spark Plugs the minor. Opposite on the other networks were *Steve Canyon* on NBC and *December Bride* on CBS-TV (*Zane Grey Theatre* was on CBS in Los Angeles because of the repeat pattern on the West Coast).

According to ABC-TV, the survey showed that:

"Of all the homes tuned to *Zorro*, 38% said they used Seven-Up regularly —at least once a week. This compares to 28.4% of *December Bride/Zane Grey's* audience and 30.6% of the *Steve Canyon* homes. Furthermore, *Zorro* homes were the only ones in which Seven-Up had a higher usage score than Coca-Cola (38% vs. 30.8%). In both the *Bride/Grey* and *Canyon* homes as well as the non-viewing homes Coca-Cola outscored Seven-Up.

Proof of Purchase • The interviewers also wanted to know whether the homes actually had Seven-Up on hand. Said the report: "The presence of the sponsor's product in the home shows that a sale has been made. In 21.3% of the *Zorro* homes, Seven-Up was found to be present at the time of the interview (Thursday, prior to the two major shopping days), as compared to 17.8% of the *Bride/Grey* homes and 16.3% of the *Canyon* homes. Only 15.5% of the non-viewing homes had Seven-Up on hand. In addition, as many *Zorro* homes had Seven-Up as Coca-Cola, while the latter beverage outranked Seven-Up in the homes tuned to the other programs as well as in the non-viewing homes."

Of interest to sponsor AC Spark Plugs, the survey found that 85.3% of all *Zorro*-watching homes owned an automobile. The report said this was "relatively the same level of car ownership exhibited by other groups in the study, except for non-viewing homes." Non-viewers were at the bottom of the group, with 78.6% of them owning cars. Ownership among other audiences ranged up to 86.2% in the case of *Steve Canyon*.

Pepsi ad budget up

Pepsi-Cola Co. and its bottlers expect to spend $30 million in advertising this year—about $5 million more than in 1958, its officers estimated at the company's two-day "Ad-orama" meeting in Chicago earlier this month.

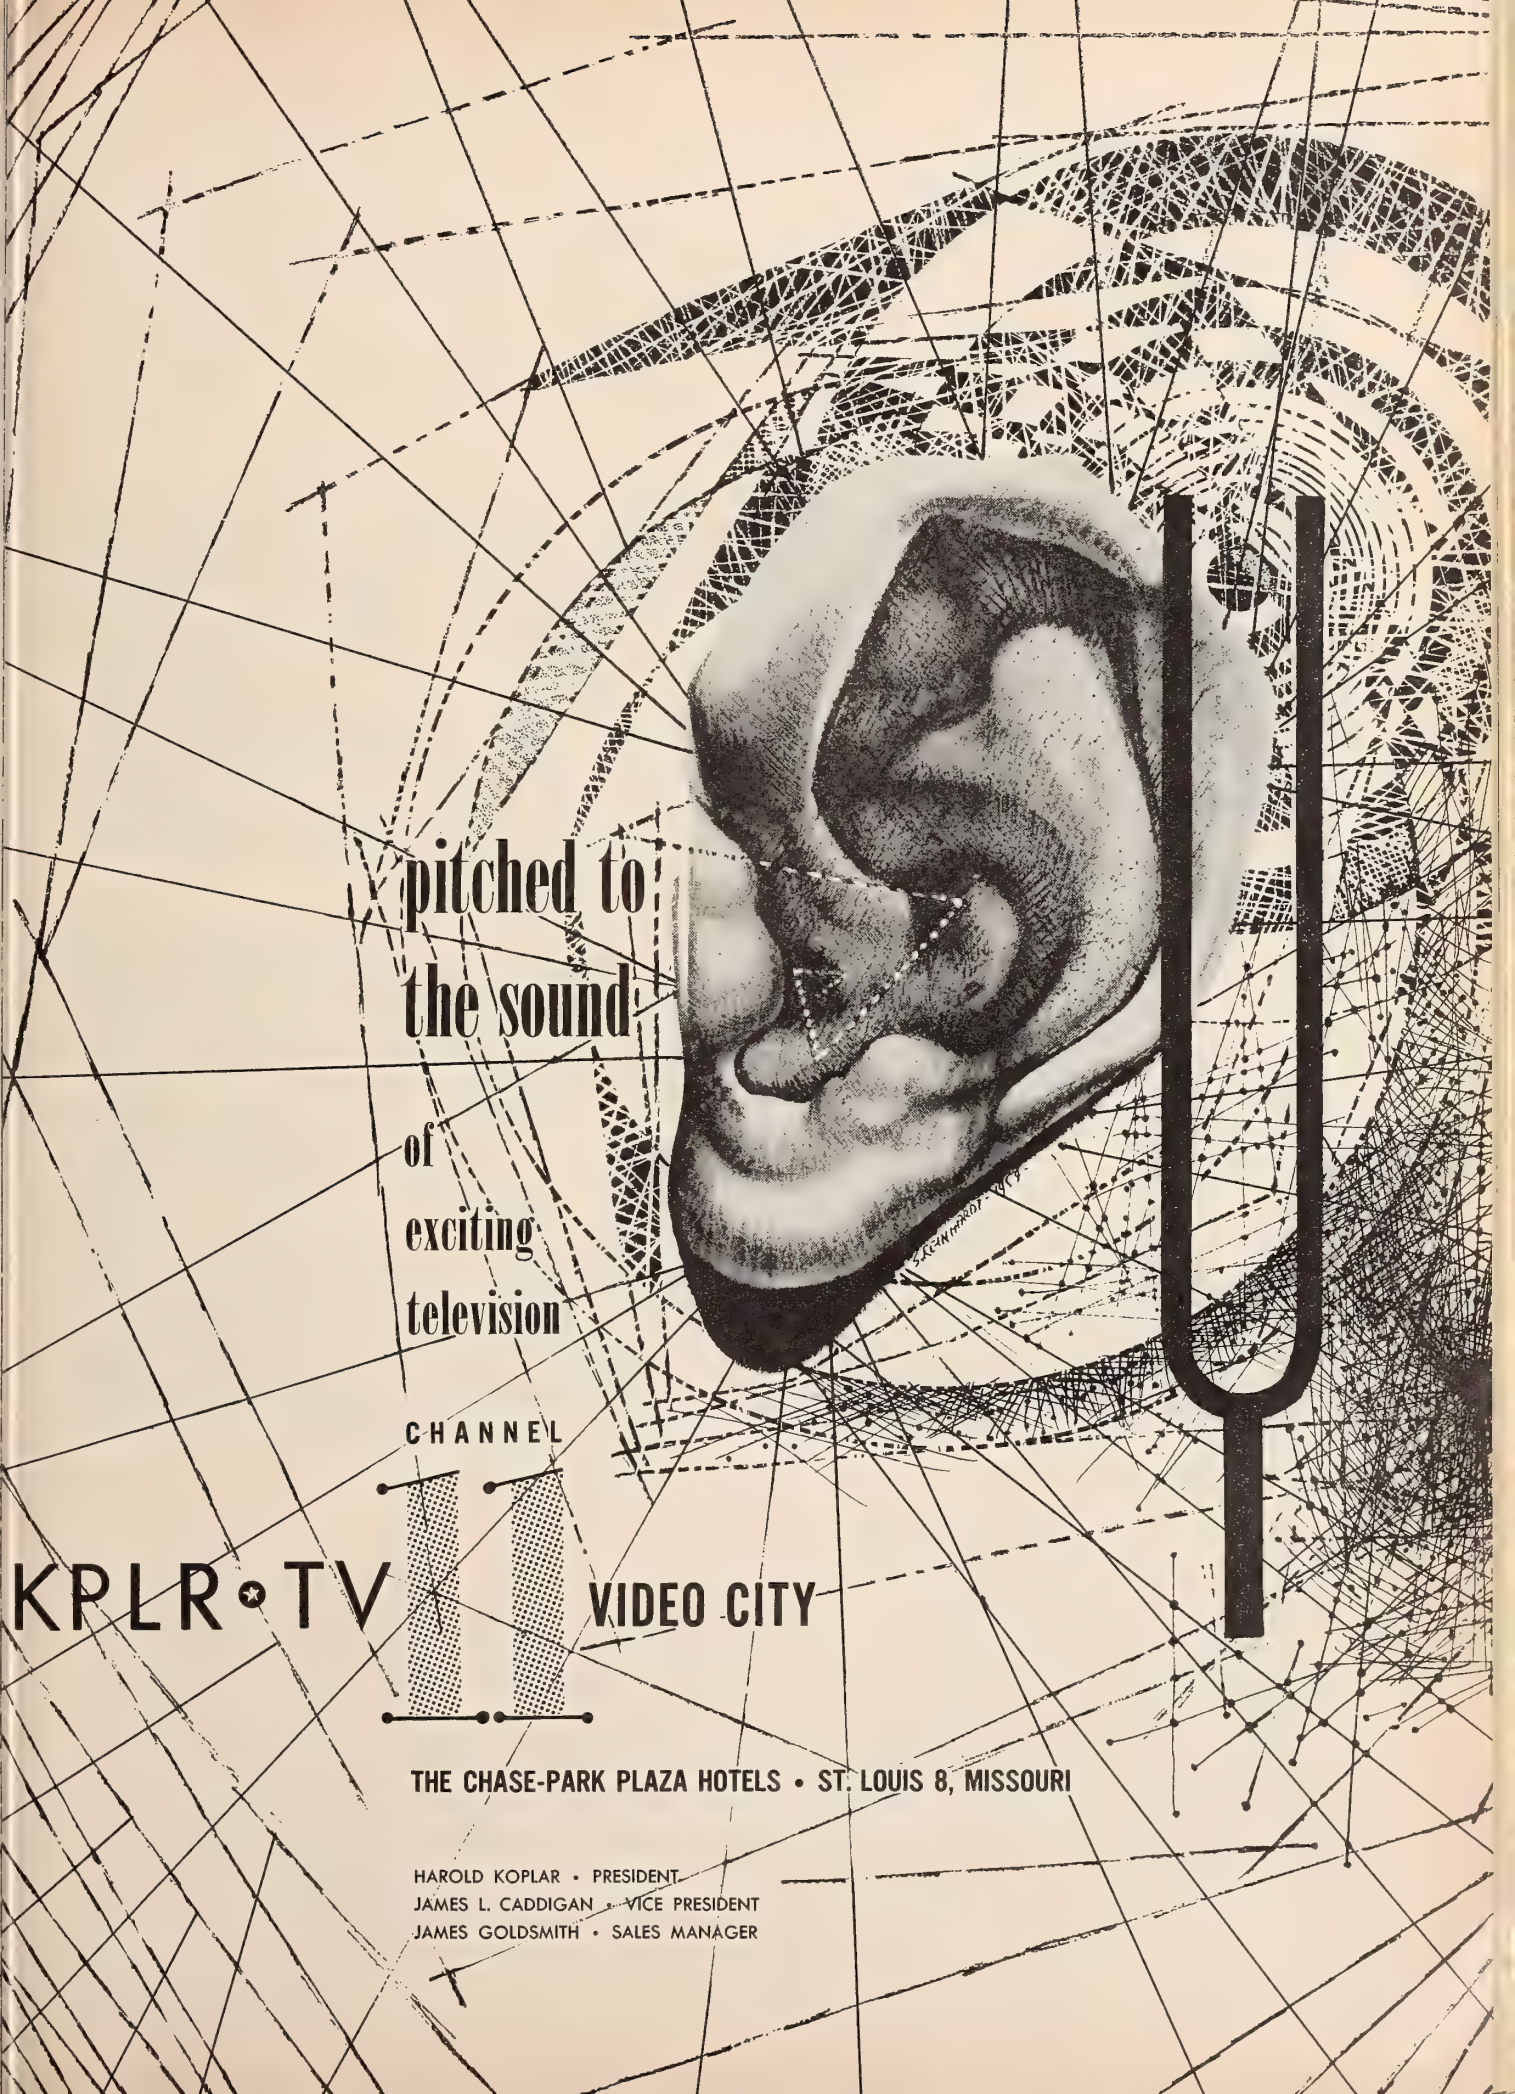
Alfred N. Steele, board chairman, and Herbert L. Barnet, president, reported a 160% sales increase since 1950 compared with the 32% boost for the overall soft drink industry. They stressed the need for increased appreciation of advertising in all media and the need for boosting expenditures. Pepsi-Cola spent an estimated $3.1 million—or about an eighth of its budget—in television last year. The Chicago meeting was one of a series of nine regional sessions for bottling officials. Discussions involving mechanics and techniques for making broadcast advertising more effective also touched on point-of-purchase promotion and public relations.

American Dairy media

The American Dairy Assn. merchandising committee will meet late in May to map preliminary plans for 1960

ACTIVITY

HOW PEOPLE SPEND THEIR TIME



There were 126,564,000 people in the U.S. over 12 years of age during the week March 20-26. They spent:

2,074.0 million hours	Watching Television
1,190.4 million hours	Listening to Radio
486.4 million hours	Reading Newspapers
213.5 million hours	Reading Magazines
404.9 million hours	Watching Movies on Tv
132.2 million hours	Attending Movies

These totals compiled by Sindlinger & Co., Ridley Park, Pa., and published exclusively by BROADCASTING each week, are based on a 48-state, random dispersion sample of 7,000 interviews (1,000 each day). Sindlinger's weekly "Activity" report, from which these figures are drawn, furnishes comprehensive breakdowns of these and numerous other categories, and shows the duplicated and unduplicated audiences between each specific medium. Tabulations are available from Sindlinger & Co. within two to seven days of the interviewing week.

SINDLINGER'S SET COUNT: As of March 1, Sindlinger data shows: (1) 114,011,000 people over 12 years of age have access to tv (90.1% of the people in that age group); (2) 44,558,000 households with tv; (3) 49,201,000 tv sets in use in the U.S.

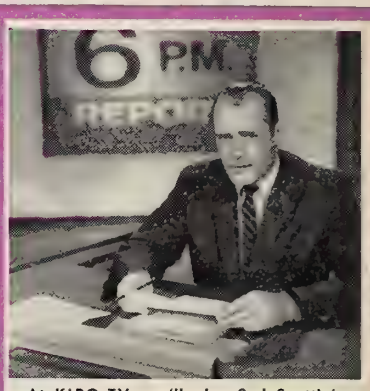
from its first year...KIRO-TV views the future



The first year of a business often gives the best clues to the future. In this respect, KIRO-TV, on its first anniversary can view the years ahead with great confidence. We count hundreds of thousands of western Washington families as loyal friends . . . and as the population of this great area grows, so will this important audience. We have made strides in important fields of television broadcasting that enable us to serve these families to a greater degree than ever before.

Seattle TV viewers find outstanding movies on Channel 7, KIRO-TV, a direct result of our investment of over a million dollars in top quality Hollywood feature films.

We've developed a host of local personalities, such as the irrepressible J. P. Patches, hero of all Northwest children.

At KIRO-TV you'll also find Seattle's most on-the-go news team operating under the direction of veteran news-analyst Sam Rinaker.

In both equipment and personnel, advertisers enjoy the finest production facilities in Seattle for live commercial telecasts.

At our first birthday party gifts given by the station included six trips to Alaska. They were won by the following people:
Frank Hixson, Central Ticket Agency, Seattle, Washington.
Barry Jackson, Stauffer System, Tacoma, Washington.
Miss Evon Prose, Campbell-Mithun, Minneapolis, Minnesota.

product promotion including selection of media.

American Dairy deferred action, at its annual convention in Chicago March 18-19, on the choice of a network tv property to replace its participation in the *Perry Como Show* when its contract expires in September. It is currently scouting properties.

American Dairy Assn. is losing the Como show to a competitor, Kraft Foods Div. of National Dairy Products, which signed a two-year $25 million pact with the personality for his services in the Wednesday 9-10 p.m. time period (BROADCASTING, March 9).

Radio can give movies shot in arm: McLendon

The value of advertising motion pictures on radio-tv was stressed by Gordon McLendon, president of McLendon Corp. (station and theatre properties), in an address to the United Theatre Owners Assn. in Kansas City, Mo.

In describing how it can be done, even in small towns, Mr. McLendon told of an exhibitor in Stephenville, Tex. (population 8,000), who arranged to show the movie "Perfect Furlough" for $300 flat rental on the understanding he would put on an extensive publicity campaign. The exhibitor used 85 radio spots at a cost of $85. In four days the movie grossed $1,174, Mr. McLendon said. The same theatre played "Glenn Miller Story" without radio ads and grossed $880, he added.

The McLendon Corp. has been able to judge the results of movie publicity by using spots on McLendon's KLIF Dallas to promote movies at the company's local movie house, the corporation's president said. They first experimented with giving a second chance to an art feature that had "died a slow death on its first run," he said. The second time around, with radio promotional help, the movie did seven times its first-run business. Mr. McLendon added that other box office records were broken by using KLIF to promote the theatre's movies.

Mr. McLendon said that his stations are working with the imagery-transfer technique. Copy used in radio spots for movies demands the creation of an image in listeners' minds. "No picture can be put upon a television screen, no advertisement in a newspaper, can paint a picture as vividly as the one human imagination can paint upon the human mind," Mr. McLendon said. He told the theatre owners that "in many metropolitan cities, only 70% of homes subscribe to any daily newspaper. That means that if you use newspaper alone, you automatically miss 30% of these homes. . . . Yet over 98% of these homes have radio."

'Verboten' story

Backing up Gordon McLendon's advice to the United Theatre Owners to use radio to promote movies (this page), comes a report from Detroit crediting nearby CKLW-AM-TV Windsor, Ont., with the box office success of RKO's "Verboten." Advertising for the movie in the area was carried almost exclusively by the CKLW stations.

Receipts of $20,283 for the movie's first week and about $12,000 for the second week were counted. The theatre manager said, "It is my belief that the concentration of advertising on CKLW-AM-TV was directly responsible for the wonderful public response to our picture."

Propaganda war report given Hollywood admen

Russia is out-advertising the United States 100 to 1, Bill Rea, manager of KUDU Ventura, Calif., told the Hollywood Advertising Club at its meeting last week. On the other hand, the U.S. spends 20 times what the U.S.S.R does to help the rest of the world, he said. Mr. Rea urged admen to press for a bigger government budget to tell others about America.

Mr. Rea used last year's World's Fair in Brussels to illustrate the difference between the U.S. approach "that as a powerful, rich nation, we should not boast of our accomplishments" and that of Russia, which was to show the best and latest of everything from silks to satellites. The U.S. building was like a museum, beautiful but largely empty, at least at the time of his visit in the spring, Mr. Rea reported, whereas the Russian building was like a huge department store, jam-packed with manufactured articles, most of them for sale at low prices.

The impression of Russia as a land of up-to-date plenty is not a true one, Clyde Wallichs, owner of Music City, Hollywood record and musical instrument store, stated. A visitor to Russia last year, Mr. Wallichs said television is at least 10 years behind that in the U.S., with little of the modern equipment displayed at the fair; phonograph records are "not bad but not good and certainly not hi-fi"; a portable radio is selling for $87.50 in Russia that "we wouldn't try to sell for $15 in our store."

Rambler agency gears for local advertising

Dealer groups and associations handling the Rambler car are expected to use more radio and tv as a result of the new Detroit advertising service department organized by Geyer, Morey, Madden & Ballard Inc., New York, agency for Rambler and all other divisions of American Motors Corp.

Neal Nyland, vice president and board member of GMM&B, is in charge of the operation based in Geyer's Detroit office (see FATES & FORTUNES, page 84).

Full agency services for local and regional advertising will be offered to the dealers as individual accounts, with support from the Geyer automotive account staffs in Detroit and New York. The agency cited a trend toward more intensive local advertising and pooling of dealer forces for greater impact in their own markets as reasons for the new function. National advertising for Rambler, including network radio and tv, will continue through GMM&B in New York.

Faith in advertising urged by Fred Manchee

"Be sure you understand and believe in business and in advertising, the voice of business," advised Fred Manchee, retired BBDO executive vice president and author of *The Huckster's Revenge*. The counsel was offered college advertising seniors Thursday (April 9) at the ninth annual Inside Advertising banquet in

ARBITRON'S DAILY CHOICES

Listed below are the highest-ranking television network shows for each day of the week April 2-8 as rated by the multi-city Arbitron instant ratings of American Research Bureau.

Date	Program and Time	Network	Rating
Thur., April 2	Playhouse 90 (9:30 p.m.)	CBS-TV	28.5
Fri., April 3	Person to Person (10:30 p.m.)	CBS-TV	25.5
Sat., April 4	Perry Como (8 p.m.)	NBC-TV	28.5
Sun. April 5	Loretta Young (10 p.m.)	NBC-TV	23.0
Mon., April 6	Oscar Awards (10:30 p.m.)	NBC-TV	47.4
Tue., April 7	Rifleman (9 p.m.)	ABC-TV	26.8
Wed., April 8	Wagon Train (7:30 p.m.)	NBC-TV	31.5

Copyright 1959 American Research Bureau

New York. Co-sponsored by the Assn. of Advertising Men & Women and The Advertising Club of New York, the banquet climaxed a week of instruction and entertainment for 65 students, who also received graduation certificates at the banquet.

Mr. Manchee, in outlining a five-point program for young people in advertising, added that "too many people in advertising . . . give it only lip service." He called on the students to "be quick to defend against ridiculous and unfair charges of business and advertising," citing charges that "advertising is wasteful, increases the cost of goods and is sinful because it creates wants." He said deficiences can be corrected through greater vigilance by media groups and associations. Mr. Manchee also called on the ad industry to undertake a positive public relations program to tell the public basic, economic truths about advertising and business.

du Pont fibers set for new CBS-TV show

If the parent company finds network tv good enough for its institutional "image," the medium ought to be a powerful salesman for one of the company's departments.

This appeared last week to be the decision at E. I. du Pont de Nemours & Co., Wilmington, Del. Parent du Pont is sponsor of the *Show of the Month* on CBS-TV, which continues next fall. And from Wilmington came the announcement: another show for the fall, also on CBS-TV, will be sponsored by the textile fibers department.

The program is a new weekly film series given the working title of the *June Allyson Show*. Production of 52 weekly presentations has been set via Four Star Productions, Hollywood, with which Miss Allyson's producer husband (Dick Powell) is associated. The series is a dramatic anthology of contemporary America with Miss Allyson as hostess and will occupy the Monday, 10:30-11 p.m. position in the CBS-TV fall schedule.

Du Pont's textile fibers unit cannot be described as a stranger to network tv, however, since it has dabbled in participation shows. But the new signing represents a boost in du Pont money to network tv.

BBDO, New York, handles both the *Show of the Month* and the new series.

Tv commercial job tough for old brands

"It gets harder and harder to produce a significant change in readiness to buy as a brand gets better and better known," according to Dr. William D. Wells, head of the methods development unit of Benton & Bowles, New York, who spoke Thursday (April 9) to the New York chapter of the American Marketing Assn. on his experimental work in measuring effectiveness in tv commercials. Dr. Wells developed a scale to study the readiness-to-buy effect of tv commercials and in his talk described the uses of the scale.

A 10-step attitude scale covers a range from complete readiness to buy ("I am going to buy some right away") to complete unreadiness to buy ("If somebody gave me some, I would give it away just to get rid of it"). The respondent is presented with a list of brands on which he assigns the number of the statement which best exemplifies his attitude toward it. Attitude changes are studied by repeat questionnaires some months after the first reading. The measuring device was subjected to various checks for validity.

Almost all of the really large changes shown in these experiments were associated with brands which had been on the market less than two years, and most of the smallest changes were associated with old, established brands, Dr. Wells said. A final implication he cited is that meaningful differences in effectiveness of tv commercials are likely to follow only from radical changes in treatment or theme.

SP can tell, but not necessarily sell

Subliminal experiments conducted by Indiana U. and WTTV (TV) Indianapolis have led to these conclusions: subliminal devices possess the ability to communicate, but do not have persuasive powers.

The first test, designed to measure the communications possibilities of subliminal devices, found that persons participating in the experiment made correct identifications of five abstract symbols superimposed over a televised motion picture in 34% of the 103 trials conducted. Conductors of the experiment, Robert Petranoff and Melvin L. De Fleur, said these results are "significantly greater than the chance expectation (of 20% correct)."

To determine persuasive powers of subliminal devices, the experimenters conducted a series of weeklong tests on the general public; using the week-night 8-10 p.m. feature motion picture program of WTTV and the 15-minute news program featuring Frank Edwards which follows.

In the first week, subliminal devices suggested to listeners that they buy a certain food product. Sales of the product increased a negligible one percent, indicating that a subliminal message alone has no measureable effect.

In subsequent weeks, subliminal stimuli were used on the motion picture program, in combination with ordinary sales messages for the same food products as "Tv Specials" on the Frank Edwards news show. Here, substantial effects resulted as sales increased from 282% to over 500%.

However, food products advertised as "Tv Specials" without the aid of subliminal devices showed even more dramatic results as sales increased from 1,802% to over 3,300%.

The experimenters state "We must conclude that the large increases in sales of food products which occurred, were solely due to the ordinary advertising techniques involved in those treatments. In terms of persuading an audience to purchase several standard food items, subliminal persuasion failed completely to produce any noticeable results."

Stating that the "act of going to a store and purchasing specific food items may be regarded as relatively complex," the experimenters next gave consideration to an extremely simple action—that of remaining tuned to WTTV for the 10 p.m. news. The subliminal suggestion that viewers "Watch Frank Edwards" required that the audience member remain passively in front of his set and continue viewing WTTV.

However, a two-week subliminal effort to boost the size of Mr. Edward's audience caused the program to suffer a slight rating decline.

On the basis of their experiments, Messrs. Petranoff and De Fleur suggest that "the current controversy with regard to the ethics of subliminal persuasion may be a controversy without a factual issue. Subliminal phenomena are apparently little more than interesting effects which can be produced under laboratory conditions or in classroom demonstrations. . . . Those who have feared subliminal persuasion as insidious devices, by means of which defenseless people can easily be led to respond to suggestion, are probably more concerned than the facts warrant. Subliminal messages apparently have less persuasive power than ordinary messages which are perceived at the level of awareness. In fact, if the present experimental evidence is a reliable criterion, subliminal persuasion has no power at all."

SAVE YOUR CONFEDERATE MONEY, BOYS

It doesn't spend in the economic state of Ark-La-Tex any more. But Uncle Sam's greenstuff is crossing counters with growing alacrity.

Last year's recession was never felt here. *Shreveport*, capital of the Ark-La-Tex, was among the *ten best cities in the nation economically.**

Sitting atop some of the most valuable oil and gas reserves in the nation, serving as one of the most important distribution centers in the Southwest, with widely diversified industry and agriculture . . . the Ark-La-Tex maintains a handsome growth and healthy economy.

Yes, there's *money in motion* in Shreveport, and that which is designated for television advertising usually finds its way to KSLA-TV.

Income Tax Forms... and WMAL-TV

ABC IN THE
NATION'S CAPITAL

A day after tomorrow you'll probably (if you're like most of us) be burning midnight oil running down deductions. If you're in Washington that will mean foregoing the pleasures of watching WMAL-TV—just for that evening, of course.

Hardly anyone enjoys the task—even if he's hoping for a refund. Yet it's essential, for obviously income tax forms provide tools for supporting the national government.

Equally essential—in the Greater Washington Area—is WMAL-TV. Our dependents are the thousands who enjoy ABC variety, features and special events—plus the contributions made by local personalities like Louis Allen, Pete Jamerson and Bill Malone.

Tax forms are complex and difficult. WMAL-TV makes things easy for advertisers, with programming that provides sensibly-priced one-minute spots in *all* time classifications.

Hawaii retail theme to include radio-tv

"Live Hawaiian! It's a Way of Life" is the theme selected for the first nationwide spring and summer sales promotion in the 10,400 member stores of the National Retail Merchants Assn. Details of the drive to promote merchandise for casual living were announced by Edward F. Engle, manager of the sales promotion division of NRMA.

Merchants will be expected to utilize both radio and television advertising, Mr. Engle said. Stores will be using tv to tie in with national publicity, according to Howard P. Abrahams, vice president of Television Bureau of Advertising, who said the bureau will send suggestions for increasing sales to its member stations. Mr. Engle reported similar support will be forthcoming from Radio Advertising Bureau.

Publisher on the air

Pennington Press, a new Chicago book publisher and a division of Merrick Lithograph Co., Cleveland, has launched a test radio-tv campaign in Chicago and expects to follow suit in Cleveland, Boston, Los Angeles and San Francisco. The complete advertising drive includes billboards, car cards, newspapers and magazines. It is being handled by William Henricks Adv., Chicago. The company bought participations in *Storyteller* and three-week sponsorship of *Lunch Time Theatre* on WGN-TV Chicago and announcements on *The Brickhouse-Hubbard Show* on WGN Radio.

• Business briefly

Time sales

• Lever Brothers Co., N.Y., is new sponsor for *The Jack Benny Show* and *The George Gobel Show* (BROADCASTING, March 30) which will alternate Sundays, 10-10:30 p.m. EDT, starting Sept. 27 on CBS-TV. Mr. Benny has had a CBS-TV show since 1950. Mr. Gobel will be switching networks after five years with NBC-TV. Lever's agency: J. Walter Thompson.

• Jeris (hair tonics) has scheduled the largest spot radio campaign in the firm's history, beginning May 4, and running a minimum of 26 weeks, throughout the South. Featured will be Jeris Antiseptic hair tonic and Jeris hair oil, the company's two biggest sellers. Agency: Kastor, Hilton, Chesley, Clifford and Atherton Inc., New York.

• U.S. Steel Corp., Pittsburgh, has renewed its *Steel Hour* series for the 1959-60 season on CBS-TV. Produced live by the Theatre Guild, *Steel Hour* will continue to alternate with *Armstrong Circle Theatre* on Wednesdays, 10-11 p.m. EST. Agency for U.S. Steel is BBDO, N.Y.

• Ralston Purina Co., St. Louis, Mo., will sponsor *High Road* (ABC-TV, Sat., 8-8:30 p.m.), next fall. The new travel-adventure series will be in place of *Bold Journey* which the company now sponsors. Agency: Guild, Bascom & Bonfigli, San Francisco.

• State Farm Insurance Cos. through Needham, Louis & Brorby, Chicago, is participating in sponsorship of the CBS-TV *Game of the Week* which began Saturday (April 11), 2 p.m. EST to conclusion. The sponsor is using Broadway stars in filmed commercials which tie in both copy and art with its print media campaign. Film producer: Van Praag Productions, N.Y.

• Mars Inc. (candy), Chicago, will sponsor *Broken Arrow* when its returns to ABC-TV Oct. 11 (Sun., 4:30-5 p.m.). *Arrow* has been part of ABC-TV's Tuesday evening programming this season and last. Agency for Mars: Knox Reeves Inc., Minneapolis.

• Campbell Soup Co., Camden, N.J., and Johnson & Johnson, New Brunswick, N.J., have signed as co-sponsors for *The Donna Reed Show* on ABC-TV next season in a new time period (Thurs., 8-8:30 p.m. EST). Agencies are Young & Rubicam, N.Y., for Johnson & Johnson and BBDO, N.Y., for Campbell Soup, which goes into its second season with the show.

• Pacific Telephone, San Francisco, has launched a tv institutional cam-

Sponsor good will

Sponsorship of tv "specials" apparently creates good will for the advertiser. A survey on the relationship between program type and sponsor image, undertaken by Schwerin Research Corp., New York, shows that specials scored about 50% higher than the average of all half-hour weekly non-dramatic shows in gaining increased viewer approval of the sponsor.

These findings are incorporated in the March SRC "Bulletin," distributed last week. Schwerin reported that dramatic specials were slightly more influential than musicals, and documentary and public service programs gained "very strong approval for their sponsors."

paign using six evening spots weekly in Los Angeles and San Francisco, four a week in Portland and San Diego. BBDO, San Francisco, is agency.

• Western Airlines is using about 75 spots a week in Los Angeles and the same number in San Francisco in a spring radio campaign for its air coach service. Copy is in a humorous vein, featuring the "relaxed bird" which is Western's symbol on tv. Spots were placed on eight stations in L.A. and five in San Francisco by BBDO, L.A.

• Walter N. Boysen Co. (paint), Oakland, Calif., on April 7 started 26-week sponsorship of *Frank Goss News* on 22 stations of Columbia Radio Pacific Network, 5:45-5:55 p.m. on a Tuesday-Thursday-Saturday, Monday-Wednesday-Friday, alternating week basis. Agency: Reinhartt Adv. Inc., Oakland.

• W. F. Schrafft's & Sons Corp. (candy), N.Y., comes to network tv April 24. There will be participations on NBC-TV's *Jack Paar Show* occurring sparsely until September, becoming more concentrated for the year-end holiday season. Agency: Richard K. Manoff Co., N.Y.

• Jacob Ruppert Brewery (Knickerbocker beer), N.Y., has launched an extensive spot radio-tv campaign in New York, Connecticut, Massachusetts, Vermont, Rhode Island and Maine, using 19 tv stations and more than 100 radio stations. Length of the campaign is indefinite, according to Ruppert spokesman. Agency: Compton Adv., New York.

• *The Dinah Shore Chevy Show* (NBC-TV, Sun. 9-10 p.m.) has been renewed by its automotive sponsor. Covering a 52-week period beginning in October, the agreement includes the *Chevy Show*, on which other entertainers substitute for Miss Shore occasionally during the regular season and throughout the summer. Chevrolet's agency: Campbell-Ewald.

• Coca-Cola Bottling Co. of Los Angeles last week launched a six-week $125,000 introductory campaign for Bubble-Up, 16-oz. bottled lemon-and-lime drink, which is promoted as "bigger than king size." Saturation schedules are running on three tv and 12 radio stations. Carson/Roberts, L.A., is the agency.

• Fun Bilt Toys, L.A., is introducing a new item for children, Clay Doodle, in New York and Los Angeles, using live participations in *Terry-Toon Circus* on WOR-TV and *Little Rascals* on WABC-TV, both New York, and *Little Rascals* on KHJ-TV and *Chucko's Cartoons* on KABC-TV, both Los Angeles. The

for broadcast recording applications!

On splice-free Mylar* or acetate bases, *RCA Sound Tape* is a premium quality product designed for critical broadcast recording applications. eight-week campaign is placed by Frank Moreland Adv., La.

• Procter & Gamble, Cincinnati, will go for its sixth consecutive season as sponsor of Ralph Edward's *This Is Your Life* on NBC-TV (Wed., 10-10:30 p.m. EST). Continuing in the same time period for 1959-60, the program has been sponsored in full by P&G since 1956 and was co-sponsored by the firm 1954-56. Agency: Benton & Bowles Inc., N.Y.

• The *United States Steel Hour* (CBS-TV alternate Wed. 10-11 p.m.) has been renewed for next season through BBDO, N.Y.

• Bulova Watch Co., N.Y., has signed for four nighttime programs on NBC-TV, sponsoring *M-Squad* (Fri., 9-9:30 p.m.) on five alternate weeks, starting last week (April 10); one-third of *Cimarron City* (Sat., 9:30-10:30 p.m.) on four dates between April 11 and May 30; *NBC News—The Huntley-Brinkley Report* (Mon.-Fri., 6:45-7 p.m.) on four alternate Mondays, starting today (April 13) and *The Bob Cummings Show* (Tues., 9:30-10:30 p.m.) on three alternate weeks, starting May 12. Agency: McCann-Erickson, N.Y.

Agency appointments

• Medomack Canning Co. (One Pie pie filling and Bird's creamed products), Rockland, Me., names Charles F. Hutchinson Inc., Boston. Campaigns to introduce new products are in the planning stage.

• Heifetz Pickling Co.. St. Louis, appoints Weintraub & Assoc., St. Louis. The account is using spot tv.

• Pharma-Craft has shifted its Coldene stick chest rub back from Cunningham & Walsh to J. Walter Thompson. Just last September the account went from JWT to C&W.

• Volkswagen of America Inc., Englewood, N.J., to Doyle Dane Bernbach Inc., N.Y., for U.S. advertising of its passenger cars. The account formerly was at J.M. Mathes Inc., N.Y., which handled both cars and trucks. Fuller & Smith & Ross, N.Y., has been awarded the truck portion. Size of the billing and the media to be used are still undetermined.

• MacManus, John & Adams, N.Y., named to handle $1 million in U.S. Air Force, previously at Erwin Wasey, Ruthrauff & Ryan. The account is put up for solicitation each year; MJ&A reportedly was chosen from some 100 agencies who sought it.

• The Friendly American Hardware & Houseware Stores, with 408 outlets in New York, New Jersey and Connecticut, appoints the Getschal Co. N.Y. An estimated 85% of Friendly's budget is in local tv.

• Super Concrete Emulsions Ltd. (wall paints), L. A., appoints Boylhart, Lovett & Dean, L. A.

• American Home Foods Div. of American Home Products Corp. assigns BBDO, N.Y., a new product line: mashed bananas under the Chiquita label. American Home Foods in an arrangement with United Fruit Co. will have exclusive U.S. and Canadian sales and distribution of the product.

Eavesdropping

Women's unmentionables—well exposed on tv—also will get multiple mention on network radio this spring. A. Stein & Co., Chicago (Perma-lift self-fitting and Double Date bras, Magic Oval panties), through Cruttenden Adv. there, has bought a schedule of seven 30-second spots each weekend on NBC *Monitor* for four weeks beginning April 25. Radio spots allow the listener to eavesdrop on the telephone conversation of a corset department salesgirl giving a prospective customer the answer to her problem of the girdle "that keeps creeping up." Local stores are buying 10-second ID tags. Radio drive is being supported by newspaper and magazine ads.

• Also in advertising

• A bundle of transcribed radio endorsements by 15 baseball players from nine major league teams has been gathered for this year's Sport Spots series. It consists of 15-20-second "open-end" endorsements to be used as part of one-minute commercials for local or regional advertisers. Categories covered are bread, tires, milk, banks, automobiles and soft drinks, with 60 different favorable comments available in each. Sales are limited to two categories in one market. Harry S. Goodman Productions, New York, said to have placed the series on 117 stations last year, will again be sole distributor.

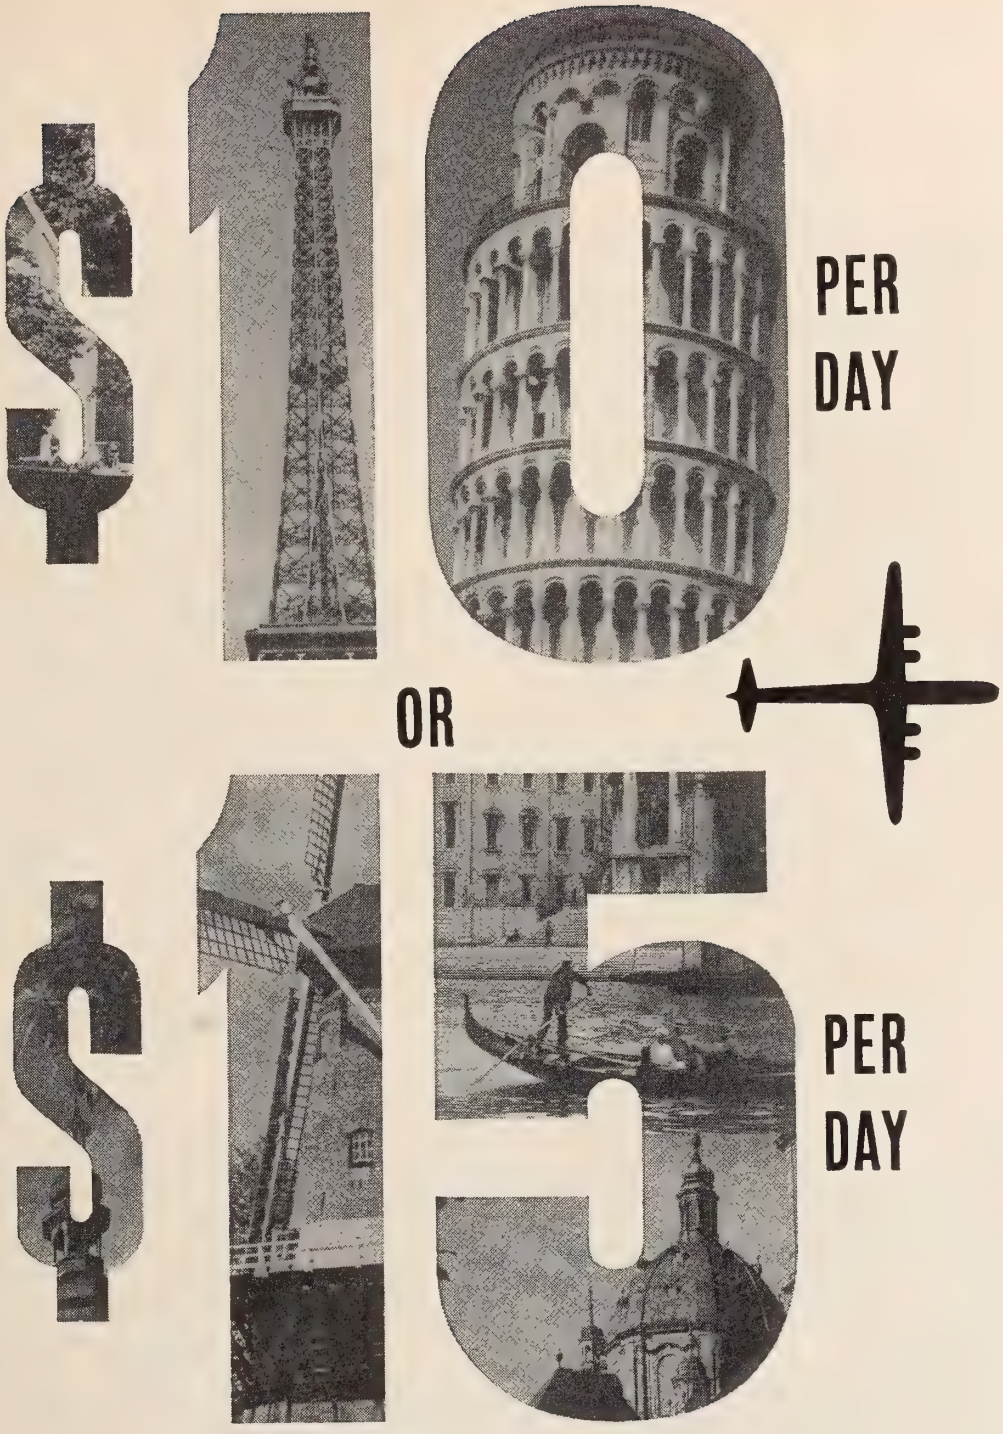
• Richard S. Mulford Assoc. Inc., Beverly Hills, Calif., a new advertising agency, has been organized by Mr. Mulford. He formerly was head of Desilu Production's Commercial Div. Office: 205 S. Beverly Dr. Telephone: Crestview 5-0454.

• Ridgway Adv. Co., St. Louis, announces the opening of a Memphis (Tenn). branch in the Joyner-Rembert Bldg., 3340 Poplar Ave. The office is under the joint management of Ruth Taylor, Jan Gardner, both formerly of Time & Copy, Memphis radio agency, and W.L. Chesman, a former vice president of Erwin Wasey (now Erwin Wasey, Ruthrauff & Ryan) Adv., New York.

• Garfield Advertising Inc. and Hoffman Advertising, both San Francisco, have merged to form Garfield, Hoffman & Conner Inc. Sidney Garfield is chairman of the board, Robert P. Hoffman is president, and Alan Conner, executive vice president of the Garfield agency, continues in that capacity for the new firm. Address: 301 Broadway; telephone: Garfield 1-0575.

• Erwin Wasey, Ruthrauff & Ryan Inc., N.Y., has closed its Cincinnati office because of the strictly local nature of accounts. John L. Magro, former v.p. and manager of the office, will open his own agency to handle EWR&R's accounts, including Candle-Lite Inc., Joseph P. Day of Ohio Inc., Kenton Pharmacal Co., Netherland-Hilton Hotel, Terrace-Hilton Hotel and Steelcraft Mfg. Co. The new firm will serve as corresponding agency for EWR&R in Cincinnati area, it's reported.

• The Bresnick Co., Boston advertising agency, is in new offices at 334 Bolyston St., Boston 16, Mass.



• Advertising Research Foundation Inc., New York, has revised its by-laws to admit local advertisers, agencies and media to membership. Formerly only organizations which operated nationally or regionally could join ARF. The amendment is one of several incorporated into ARF's revised by-laws which have been included in a 16-page booklet available on request by writing to ARF, 3 E. 54th St., New York 22, N.Y.

• Guenther-Bradford, 74-year-old Chicago agency, moves from 15 E. Huron St., to Carbide & Carbon Bldg., 230 N. Michigan Ave.

• Consolidation of New York headquarters staff of Geyer, Morey, Madden & Ballard Inc. has been completed in offices at 595 Madison Ave. An addition of 6,000 square feet to space previously occupied by Geyer agency was required after the Jan. 1 merger of Geyer with Morey, Humm & Warwick Inc.

• Rich, Bryan & Curtis Inc. is a new agency in New York. Its president is Bill Rich. Address: 50 E. 42nd St.; phone: Murray Hill 2-1612.

• O'Grady - Andersen - Gray, Chicago agency, has moved from 720 N. Michigan Ave. to 230 N. Michigan Ave. (Carbide & Carbon Bldg).

THAT'S ALL IT COSTS TO STAY IN EUROPE!

These two new KLM tour plans give you more seeing *and* more saving. For $10 a day (standard hotels) or $15 a day (first class hotels), all Europe is your playground. With 59 cities to visit, your choice of tours is almost unlimited! You'll see the sights you've heard about, and plenty you haven't. It's everything you could want in a trip abroad, for the price of an at-home vacation. Your non-stop KLM flight from New York to Europe is budget-priced, too. Example: visit 6 European cities for just $502.20 round trip. For complete details of these and the many other KLM tours available, mail the coupon.

MOST HONORED

...MOST OFTEN !

An important measure of the performance of a television network is the recognition accorded its programming by responsible independent groups with varied interests. NBC has just received seven Peabody Awards for distinguished achievement and meritorious public service – more than the other two networks combined.

So far this year, NBC has also won:

13 out of 20 Sylvania Awards

15 out of 22 Radio-Television Daily Awards

7 out of 14 Look Magazine Awards

15 out of 30 first places in Television Today's poll for Fame Magazine

10 out of 15 Freedoms Foundation Awards

4 out of 9 Christopher Awards

the only Alfred I. DuPont Network Award (for a news commentator).

Thus 1959 is following the pattern set in 1958 when NBC, its programs and personalities, received more awards than any other network.

These awards span the full spectrum of NBC's programming: drama, news, public service, entertainment, education, music, variety, sports, religion and comedy. In their breadth and diversity they illustrate the basic philosophy of America's first television network: totality of program service, rewarding television for every program taste.

NBC TELEVISION NETWORK

HOLLYWOOD GOES COMMERCIAL

Tv spot flooded with film stars; agencies woo 'names' who like the hours and money

Hollywood stars are putting themselves on the spot—on tv spot, that is.

Motion picture players have been featured in commercials for many years. But during the past television season, the parade of familiar faces pitching for products on the tv screen has multiplied considerably. Why?

A New York talent agent offers this answer: "Agencies and advertisers are becoming more and more 'name-conscious.' And movie actors are becoming more and more available as fewer pictures are made. Even top names are willing to spend a day or two to make commercials. The returns to the big names, and even to the lesser known, can be fabulous."

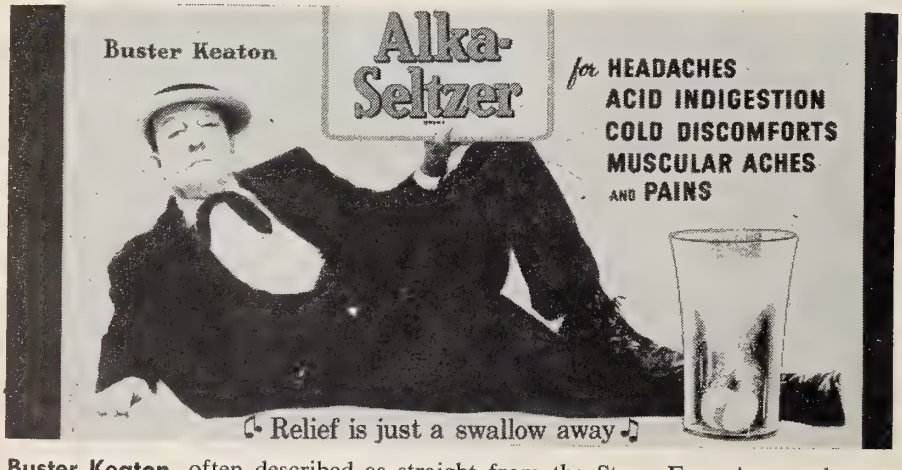
Sky Limit • The money an actor can earn from a commercial is practically indeterminable. The ordinary performer, for example, operates under the Screen Actors Guild contract with producers, to which advertising agencies sign letters of adherence (see table, opposite). An official of Schwartz-Luskin, New York talent agent, reported that a commercial for a detergent in which a model appeared was used on 10 different programs and she grossed more than $8,000 in four months. On the other hand, a commercial could be produced and then scrapped, and the performer would only be paid the $80 minimum.

The name star generally does not work for scale. The amount he is paid depends largely on the desire of the agency and the demands of the actor. The fees they are paid are never disclosed, but Zsa Zsa Gabor is reported to have received $15,000 for workin- in a Gillette commercial used four times during the 1958 World Series. Rock Hudson, who appeared in a similar commercial for Gillette, is said to have commanded more than $25,000.

As a matter of protocol, producers rarely, if ever, offer a star the SAG scale. However, producers realize that a substantial sum paid to a star frequently does not exceed the SAG scale, since contracts generally stipulate that the spot may be used over a period of several years for as many as 20 times. Business-wise talent agents are not unaware of this economic fact of life, but the star usually insists on the prerogative of a flat payment.

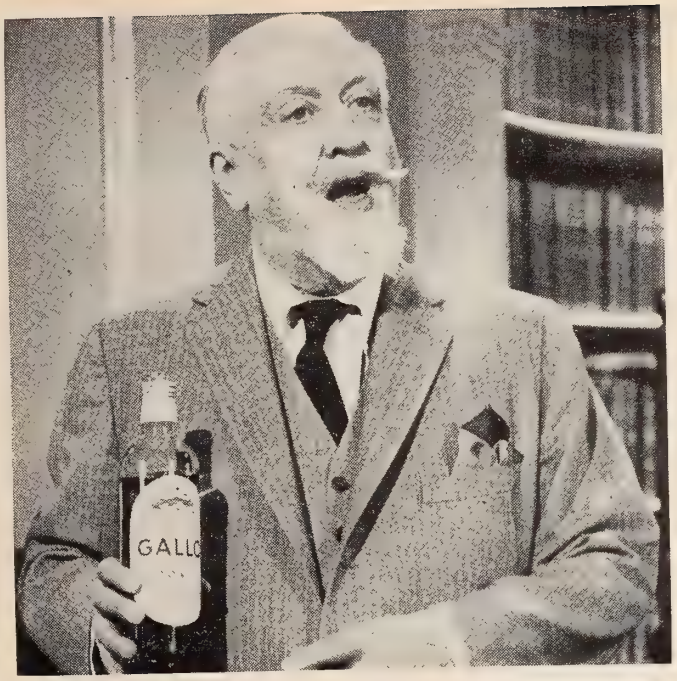
One exception to the rule: a star who appears in a commercial for a program series in which he is featured often will work for scale. Film program syndicators, thereby, are in a position to sell star-sponsor identification as part of the program package.

Hidden Talent • Off-camera voice stints often can be "a gold line" for performers. There is a coterie of actors still cashing in on residuals for off-camera commercials made five or six years ago. Hollywood agents single out such artists as Mel Blanc, Art Ballinger, Ed Reimers and Gloria Wood as "extremely well paid" examples of off-camera talent. They normally work for minimum scale but are reported to make as much as $150,000 annually.



A tv film producer, pondering the economic windfall tv film commercials have brought Hollywood performers, suggested that this story might be titled: "Get More Out of Life—Go Out to a Tv Studio."

Mary Astor for Ovaltine (Wander Co., Chicago) through Tatham-Laird, Chicago, filmed by Swift-Chaplin.



John Wayne for Gillette Safety Razor Co., Boston, through Maxon Adv., N.Y., Four Star Films, Hollywood.

Buster Keaton, often described as straight from the Stone Face Age, makes an "emotional" pitch for Alka-Seltzer (Miles Labs, Elkhart, Ind.) through Geoffrey Wade Adv., Chicago. Swift-Chaplin, Hollywood, filmed the commercial.

George Sanders for Halo shampoo (Colgate-Palmolive through D'Arcy, N.Y.; Universal-International Tv, N.Y.

Monty Wooley recommends Gallo port (E&J Gallo Winery, Modesto, Calif.) through Doyle Dane Bernbach, L.A. MPO Productions, N.Y., filmed the spot.

Rock Hudson, Hollywood's number one box office draw, learns how to pitch for the Gillette Safety Razor Co. through Maxon. Four Star Films preserved the moment.

Zsa Zsa Gabor reveals the leg that launched a thousand quips in a commercial for Gillette Safety Razor Co. (women's razors), through Maxon Adv., filmed by Four Star Films.

SAG spot scales

It's not the basic fee ($80 per day performance), it's the rerun money that counts for artists appearing in filmed commercials. The following is a summary of the scale set up in the 1958 contract between the Screen Actors Guild and film studios:

SPOTS

			On Camera	Off Camera
C	Use: 1-5 cities (the first 13 weeks; $45.00 each additional)		$80.00	$55.00
B	Use: 6-20 cities	(each 13 weeks)	125.00	72.50
A	Use: 21-60	(each 13 weeks)	170.00	105.00
AA	Use: 61-125 cities	(each 13 weeks)	220.00	150.00

	Advance guarantee of 13 uses in 13 weeks		580.00	425.00

AM PROCESSING SHORTCUT READY

FCC adopts deadline cutoff policy in move to eliminate the application merry-go-round that slows down new radio station grants

The FCC thinks it has found the answer to the radio processing merry-go-round.

It has determined that a cutoff policy will be instituted. After the cutoff date, no applications will be accepted that require consolidation with existing applications.

The hope is that this policy will drastically cut the backlog of standard radio applications for new stations and for changes in existing stations.

That backlog stands at 1,010 today, the highest in the history of the federal agency.

The seriousness of the situation was pointed up only last week when the Commission was required to add 17 new applicants to a hearing which already involves 23 applicants. These are the applications for 1550 kc and include the adjacent frequencies, 1540 kc and 1560 kc.

Procedure • The processing line was established for am radio to maintain reasonable fairness in processing applications. Standard broadcast applications cannot be treated singly—they must be processed in conjunction with other applications impinging directly or indirectly on the particular frequency involved.

This has meant that an application might be processed, and just as it was about to be granted or set for hearing, another application was submitted which required a complete re-examination of all the applications.

Here's what the Commission is going to do henceforth, according to its announcement last week:

From time to time it is going to announce the top 50 applications in the processing line. They will be listed in the *Federal Register*. After 30 days from that date, no application will be received which will be considered with these top 50. It may be received, however, and placed at the bottom of the processing line.

Under present rules, an application is entitled to consideration with one already on file if it is filed by the close of business on the day before the prior application is granted or designated for hearing.

The new policy provides that this procedure will be followed as an alternative to the new rule—whichever is the earlier.

This prompted a warning from the FCC that:

"Potential applicants, as in the past, must be guided in their decisions as to filing their applications by the public notices of the acceptance for filing of competing applications and the status of the processing line."

Amended Applications • The Commission also made one further drastic change in its rules (Secs. 1.106 [b1], 1.354 and 1.361 [b]). It provided that where a pending application is amended to change engineering proposals that application will be given a new processing number and placed at the bottom of the processing line.

The first action under the new policy was taken immediately. The Commission last week issued a list of 276 standard radio applications seeking new stations or changes in existing facilities. This list includes the 50 top applications on which nothing has been done, a group of applications which is being processed and another group which has been processed and on which Sec. 309(b) letters have been issued. The 309(b) letter, more commonly known as a McFarland letter, tells an applicant that his application cannot be granted without a hearing, giving the reasons.

In many cases a slight engineering amendment makes it possible to grant such an application. This will now cause the application to be returned to the processing line, but with a new

1 KW DAY OPEN TO CLASS IV'S

FCC says around 1,000 stations, now limited to 250 w, can file for increases in day power

A $5 million horn of plenty has appeared on the horizon for radio transmitter manufacturers.

The FCC last week decided to permit Class IV (local) stations to apply for 1 kw daytime power. And, it's expected that there will be a flood of takers who will be prime targets of the equipment manufacturers.

There are approximately 1,000 Class IV outlets on the six local frequencies. These are now limited to 250 w for both daytime and nighttime operation, in accordance with the North American Regional Broadcasting Agreement. The FCC's action permitting applications for the power boost is effective April 16.

It is anticipated that most of the stations eligible for the power hike will take advantage of the opportunity in order to maintain competitive parity. The increase in power will enable the Class IVs to expand their coverage somewhat and to strengthen their signals within their market areas.

It is estimated that it will cost a 250 watter about $5,000 to buy 1 kw transmitter, revise antenna coupling and make associated changes. This is for non-directional operation.

How It Will Work • Under the amended notes to Sections 3.21 (c) and 3.28 (b) of the FCC rules, Class IV applications for increases will be processed on a case-by-case basis except for two geographical locations. The stations requesting boosts cannot be located within an area 62 miles or less from the U.S.-Mexican border or in an area covering approximately the southern half of Florida, south of 28° north latitude and 80-82° west longitude.

The Commission also last week denied a petition by Community Broadcasters Assn. Inc. for reconsideration of part of last summer's FCC action rejecting the CBA's request for a mandatory power increase for Class IVs (AT DEADLINE, June 2, 1958). The case-by-case method of consideration was adopted at that time, instead.

number which will place it at the end of the line.

This list is reprinted below:

The top 50

(These are the first 50 applications on processing line on which no work has been done.)

BP-12197—NEW, Bibb City, Ga., Bibb City Broadcasting Co. Req: 850 kc, 500 w, DA-1, U.

INFLATION...just an Indian Giver

Not only is inflation an "Indian giver"—he's a pickpocket to boot.

Under inflation you think you get a few more dollars in pay. But then you go to spend them. Now you find that inflation has already *taken back* those dollars!

Inflation is caused by a lot of things. But one of the most important is rising labor costs without a substantial increase in the nation's productive efficiency. The reason: 75 percent or more of the final cost of what you buy goes for labor.

It's kind of a chain reaction. With each round of wage and price increases, your dollars lose another chunk of purchasing power.

If things keep on this way another twenty years—or ten—or five—what will happen to your savings, your insurance, your pension plans, your children's education?

Isn't it time to stop this spiral of inflation that eventually robs you of your future security?

This message is being brought to you by

REPUBLIC STEEL

as a member of the

AMERICAN IRON AND STEEL INSTITUTE

Republic Steel makes many products which are sold directly to the public, besides the thousands of tons of steel that go into other industries for additional fabricating. Among the consumer goods are Truscon Metal Windows, Steel Doors, and Sliding Closet Doors; Republic Steel Kitchens; gutters and downspouts; metal lath; bolts, nuts, and nails.

Caught in the Act!

Thomas Mitchell—And He's Great As

GLENCANNON

Almost one billion reader impressions via GLENCANNON stories in The Saturday Evening Post punctuate the powerful plus of pre-acceptance you get with this high-spirited, high seas half-hour comedy series. You're in great company, too, because advertisers such as OLYMPIA BEER in 47 West Coast markets, as well as BLUE PLATE FOODS, HOLSUM BAKERIES and FISHER FOODS SUPERMARKETS are already cashing in on the fact that situation comedy such as GLENCANNON sets up a uniquely ideal commercial climate. It's a conclusive fact which Schwerin Research stated in no uncertain terms in a recent issue of Television Magazine. And here's another fact: Academy Award winner, "Tony" Award winner, "Emmy" Award winner, THOMAS MITCHELL is on deck to sell for you personally. That's right—THOMAS MITCHELL is all set to charm sales resistance out of existence for you. Want to catch him in the act? Just say the good word: GLENCANNON. For full details, phone, wire, write

REGULATION OF WIRED PAY TV

Harris enters bill that would give FCC same controls over wired, on-air systems

Rep. Oren Harris (D-Ark.) last week introduced a bill that would subject wired subscription television to the same limitations the FCC has imposed on broadcast pay tv.

Mr. Harris, chairman of the House Commerce Committee, said the FCC does not now have the authority to regulate wired systems of subscription tv. His bill would give it that authority.

"To sum it all up in one sentence," he said in a statement made before the House, "you cannot have uncontrolled tests of pay television by wire if tests of pay television by radio are subject to strict limitations prescribed by the FCC."

The FCC on March 23 adopted a Third Report authorizing rigidly controlled tests of on-the-air subscription tv (BROADCASTING, March 30).

Putting on a Brake • Mr. Harris told the House last week he was opposed to subscription tv. "Let me emphasize," he said, "that the introduction of this bill in no way should be construed as proposing to authorize pay television by wire on any extended or permanent basis . . .

"Instead of contemplating pay television by radio or by wire on a permanent or extended basis, my new bill is intended to prevent runaway tests of pay television by wire which might result in the virtual establishment of a new service without the Congress having had an opportunity to consider whether the establishment of such service on a permanent basis is in the public interest."

Mr. Harris' bill would give the FCC authority to regulate intrastate wired pay tv as well as systems operating in interstate commerce. It thus would strike at plans by Skiatron to wire Los Angeles and San Francisco for subscription tv systems built around big league baseball as the central program feature.

Only one wired system of any size has actually been operated. In September 1957 Video Independent Theatres Inc. began a wired system of home movies in Bartlesville, Okla., under the name "Telemovies." After nearly nine months of operation, the system failed (BROADCASTING, May 26, 1958).

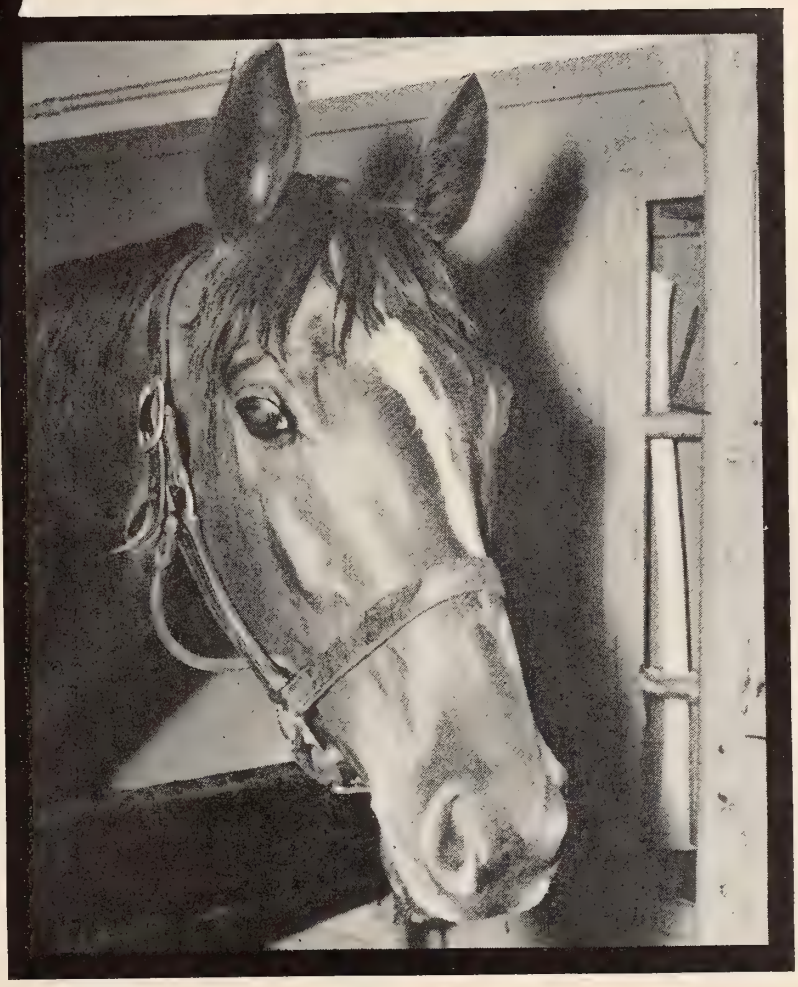
Oversight organizes

The House Legislative Oversight Subcommittee of the House Commerce Committee held a closed organizational session Thursday (April 9). Rep. Oren Harris (D-Ark.), chairman of both committees, said the Oversight group discussed procedure, policies and staff organization. He said several new staff members had been hired. The Oversight Subcommittee will meet again this week.

Harris offers Ike's spectrum resolution

The House version of a Senate resolution recommended by the President for a study of the spectrum was introduced last week by Chairman Oren Harris (D-Ark.) of the House Interstate & Foreign Commerce Committee.

But Rep. Harris, who already has $150,000 for a spectrum study by a special subcommittee of his House Commerce Committee, introduced the White House measure (HJ Res 331) only out of courtesy to the Chief Executive, not because he favors it, according to a spokesman.



The White House recommendation drawn up by Leo A. Hoegh, director of the Office of Civil & Defense Mobilization, was introduced on the Senate side by Chairman Warren G. Magnuson (D-Wash.) of the Senate Interstate & Foreign Commerce Committee (BROADCASTING, March 16, 9).

The Commission on Telecommunication Management would include five members, all appointed by the President and none subject to Senate confirmation; all would be experts in the telecommunications field. They'd be exempt from Civil Service Commission requirements.

They would study (1) the role of the government in managing the U.S. telecommunication resource; (2) the administration organization for discharging government responsibilities, particularly "the division of responsibility under the Communications Act," to determine if any organizational or legal changes are desirable; (3) present methods of allocating bands of frequencies between federal government and non-government users to determine if any practicable changes should be made to use the frequencies to the maximum degree, considering technological

changes that might enhance maximum use; (4) present apportionment of frequency allocations between government and non-government users to determine if, in the national interest, any frequency space should be reallocated to other uses and, if so, the amount.

Sen. Warren G. Magnuson (D-Wash.), chairman of the Senate Commerce Committee, announced last week that five government agencies had approved the Presidential plan to appoint a five-man commission to study the use of the radio spectrum by both government and civilian groups.

Government agencies urging the enactment of SJ Res 76—introduced March 10 by Sen. Magnuson at the behest of the White House (BROADCASTING, March 16)—were State, Interior and Commerce Depts., Office of Civilian & Defense Mobilization and the FCC. The FCC suggested that the study not be limited to one year.

Sen. Magnuson said that he hoped to start hearings on the bill at an early date.

The White House-sponsored legislation would establish a five-man commission, with members appointed by the President. It would study the management, administration and usage of the entire radio spectrum, including both classified and public use, and report its findings and recommendations to the President in 12 months. Commissioners would receive $75 per diem when engaged in this job.

In addition to Rep. Harris, Rep. William Bray (R-Ind.) is also opposed to this concept of a Presidential commission to investigate the radio spectrum. Mr. Bray is the author of HJ Res 292 which would establish a joint commission to investigate federal use of the radio spectrum. The commission would include two members appointed by the President, one each by the Speaker of the House and the Vice President (as President of the Senate) and the chairman of the FCC. Pay would be $50 per diem.

On-channel boosters responsible to FCC

The FCC has bowed to the inevitable, with an assist from constituent-minded Congressmen.

It has decided to accept jurisdiction over on-channel boosters. This decision was taken last week and the papers are being drawn up. They may be issued this week.

At the same time, the Commission has decided to reiterate the view that it does not have jurisdiction over community antenna systems. It did, however, suggest certain Congressional action. This would take the form of requiring catv operators to secure the permission of stations whose signals they pick up. Also, the Commission suggested, catv systems should be required to carry the local tv station if so requested.

In assuming responsibility for on channel boosters—predominately picking up and rebroadcasting vhf—the Commission suggests that engineering standards be established requiring among other things provisions for frequency stability, automatic shutoff, etc.

Also required, the Commission has decided, is a prohibition on the use of chs. 4 and 5 for rebroadcast purposes. This is because the harmonics of those channels (66-72 mc and 76-82 mc) have the potential of interfering with aeronautical beacons.

Legislation needed • And necessary before it can assume this responsibility, the Commission has decided, is legislation on two fronts: A revision of Sec. 319 dealing with prior construction, and Sec. 318 requiring an operator to be in attendance while a broadcast station is operating.

MACK TRIAL STARTS
But first three days needed to pick jury

The government's criminal trial against former FCC Comr. Richard A. Mack and his friend Thurman A. Whiteside—the former charged with selling his vote as an FCC member to the latter in the FCC's 1957 award of ch. 10 in Miami to a subsidiary of National Airlines—got off to a slow start in the U.S. District Court in Washington last week.

It took three full days (Tuesday through Thursday) to select a jury of 12 from a panel of 73—something of a record for the court in time used in jury selection. The jury consists of six men and six women.

Defendants Mack and Whiteside used all 12 of the challenges to which they were entitled before the jury was seated late Thursday. The Justice Dept.'s Criminal Div. challenged three prospective jurors and the court itself, under Judge Burnita S. Matthews, disqualified three under its own motion. The trial resumes today (April 13) with opening statements by counsel and testimony by the first witnesses (see this page).

The defendants are charged jointly with conspiracy to obstruct the due and proper course of the FCC's decision and with defrauding the U.S. of rights to a just decision by the FCC, free of private interests. Mr. Whiteside, a Miami attorney, is charged with *ex parte* activity by giving money to Comr. Mack. Mr. Mack is charged with allowing himself to be corrupted in his vote by accepting money from Mr. Whiteside.

(The Miami ch. 10 case currently is awaiting oral argument following a rehearing by Special FCC Hearing Examiner Horace Stern on remand from the U.S. Court of Appeals for the District of Columbia. Judge Stern found that Public Service Television Inc. [National Airlines subsidiary and winner of the FCC grant], WKAT Miami and [to a lesser degree] North Dade Video had participated in *ex parte* activities during the adjudicatory proceedings. He asked that the grant be revoked and a new comparative hearing held. The fourth applicant, L. B. Wilson Inc., was not charged. Oral argument has been postponed at the request of the Federal District Court and has been scheduled for May 21.)

Attorney Nicholas Chase asked the court to bear expenses for furnishing a transcript of proceedings to Mr. Mack (about $700-$1,000) and for subpoena services on grounds his client was unable to pay for them. Mr. Whiteside, it was revealed, ordered two sets for himself and his own counsel, Arthur Hilland, and others. Judge Matthews agreed to furnish free transcripts.

J. Frank Cunningham, heading the government prosecution counsel, objected to a request by Mr. Chase for access to FBI files. Mr. Chase explained that he wanted the FBI's report on Mr. Mack when he was nominated to the FCC by President Eisenhower.

During the jury selection, Mr. Whiteside, an attorney, was busy keeping a scorecard on prospective jurors and in frequent consultations with his counsel in contrast to Mr. Mack, who only occasionally talked to his counsel.

Prospective jurors were questioned by defense counsel on whether possible testimony by Sen. Estes Kefauver (D-Tenn.) would bias them against the defendants, but none said this would affect them.

Long witness list seen in Mack trial

The list of witnesses to be called in the Mack-Whiteside trial begins to look long and imposing. J. Frank Cunningham, Justice Dept. Criminal Division, trying the government's case, announced 37 proposed witnesses, many mentioned at and some appearing in the House Legislative Oversight Subcommittee hearings.

The Mack-Whiteside defense counsel made no announcement, but Thursday after the jury selection named several witnesses it will call and some it may call. The lists:

BEELINE®
RADIO
delivers more for the money

Long famed as the nation's leading agricultural market, the Inland Valley of California has recently grown as an industrial center. Thousands of new families, earning new millions of dollars have added to the economic strength of this already-rich market. For example, effective buying income is more than Maine, Vermont and New Hampshire*. And, all through this area, hundreds of thousands of people are buying the products they hear about on Beeline radio. Shouldn't your message be there?

As a group, the Beeline stations give you more radio homes than any combination of competitors . . . at by far the lowest cost per thousand. (Nielsen & SR&D)

AND_

IN TV AND RADIO— EVERYBODY COUNTS ON BROADCASTING YEARBOOK!

It's a logical dependence. Just as those other venerable volumes are respected as fountainheads of information in their respective fields, so too is the BROADCASTING YEARBOOK recognized as an authority without peer in the business of television and radio!

Why? First of all, there's nothing else like it. Here is the most complete compendium of accurate facts available. It's handy as well as helpful.... Furthermore, you can't beat its established reputation for reliability. For 24 years now, these information-crammed source books have held a place of importance on the desks and bookshelves of every key person in TV-and-radio advertising. Few reference volumes get dog-eared and thumb-printed so fast by so many makers of decisions as a BROADCASTING YEARBOOK.

Now . . . right around the corner . . . is the publication date of the bigger-than-ever BROADCASTING YEARBOOK *for 1959—bigger because (1) it contains more, and (2) it covers both electronic media in a single edition.*

The 1959 edition scheduled for August publication will be snapped up by 16,000 busy people with the stakes of their livelihood in television or radio . . . or in both. And because they make BROADCASTING YEARBOOK a working partner, day after day, this remarkable volume becomes a powerful, long-lasting medium for your advertising. This year, the *NEW* combined format represents a greater value than ever.

Mark these dates, large and loud, on your calendar. *Deadline for advertising if proofs are desired: July 1. If no proofs, July 15.* Regular rates and mechanical specifications apply. Write, wire or phone your reservation before another day's sun has set. The *NEW* 1959 BROADCASTING YEARBOOK is too good a bet to miss!

READ WHAT IMPORTANT AGENCY EXECUTIVES SAY ABOUT THE

BROADCASTING YEARBOOK

In an agency as deeply involved in the broadcast media as we are, the compilation of facts such as those contained in your new YEARBOOK is invaluable. Congratulations!

Ted Bergmann, President
Parkson Agency
New York, N. Y.

I always look forward to the BROADCASTING YEARBOOK. It is a contribution to the industry and contains so many valuable facts.

Arthur Pardoll, Media Group Director
Foote, Cone & Belding
New York

. . . I find the YEARBOOK a valuable reference and . . . will be referring to it constantly.

William King Jr., V.P.
Kenyon & Eckhardt

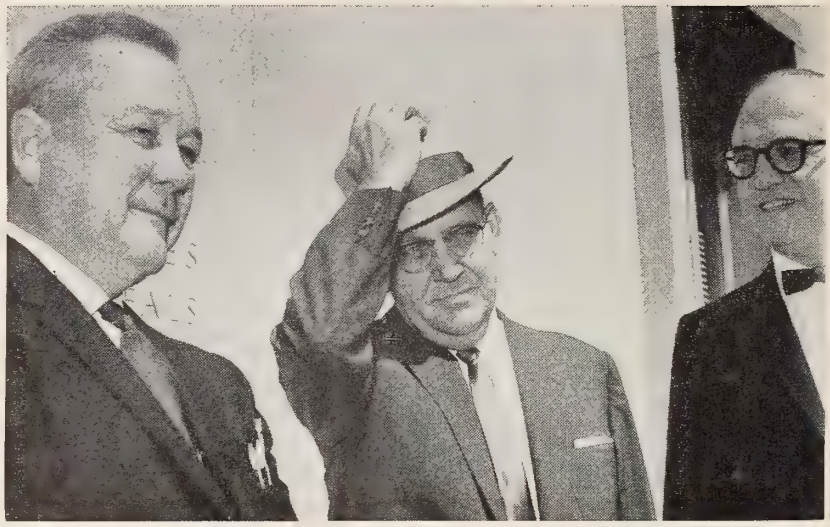
THE NEW, TWO-IN-ONE BROADCASTING YEARBOOK OFFERS FEATURES LIKE THESE:

- **Latest working information about *both* television and radio.
- **Directories restyled for faster reference—giving facilities and key personnel, of advertising agencies, networks, stations, station representatives, program suppliers, equipment sources, and many other organizations related to TV-radio business.
- **Definitive round-up introductions, reporting on progress in each major area of activity covered by a directory.
- **Special articles and reports on such important developments as—
  - . . . radio and TV audiences, their size and composition.
  - . . . radio and television time sales — by network, spot and local—nationally and by individual markets.
  - . . . market information for every U.S. county.
  - . . . trends in the use of feature and syndicated film.
  - . . . analyses of specialized radio programming—foreign language, Negro market, multiplexing, stereophonic broadcasting.
  - . . . a review of how advertising agencies have grown with radio and television.
- **PLUS — all the many other standard features which have made BROADCASTING YEARBOOK *the* most authoritative, most cosely-read reference work in radio and television for the past 24 years!



BROADCASTING

THE BUSINESSWEEKLY OF TELEVISION AND RADIO

1735 DeSales Street, N. W., Washington 6, D. C.

A member of the Audit Bureau of Circulations

Day in court • Thurman A. Whiteside (c) leaves U.S. Courthouse after the opening day of his trial in Washington on charges of conspiring with former FCC Comr. Richard A. Mack to rig the FCC award of Miami's ch. 10 tv permit. With the Miami attorney are his counsel, Richard H. Hunt (l) and Arthur J. Hilland. Photographers were not allowed in the court, where Mr. Mack appeared briefly, under the care of his physician.

Mrs. Myrtle Adams, FCC employe; George T. Baker, National Airlines president; Leland Boardman, FBI; Henry Earl Barber, Miami attorney; Paul Berger, Washington attorney and former employe of the Harris Legislative Oversight Subcommittee; James L. Bolger, Miami accountant; Jean C. Brawner, National Airlines employe at Miami and formerly of the FBI and the Civil Aeronautics Administration; John E. Doane, FCC employe; Joseph M. Fitzgerald, Miami attorney.

John E. FitzGerald, FCC general counsel; Elizabeth Grisillo, Miami; A. Frank Katzentine, WKAT Miami and applicant for ch. 10 in Miami; Mrs. Frances Kreeger, former secretary to Mr. Mack at FCC; Perrine Palmer Jr., Miami; Watson Roper, Miami; Charles Schafer, FBI; Paul R. Scott, National Airlines attorney, Miami; David D. Scharff, Miami accountant; Thompson Shea, New York insurance man; Charles F. Sheldon, Miami insurance man; Milton Singman, FBI agent; William Y. Stembler, Miami insurance man; Henry B. Taylor, National Airlines employe.

Herbert M. Wachtell, New York attorney; Elaine B. Wood, employe of Stembler-Sheldon insurance firm; Frank Colton, Coral Gables, Fla., banker; J. Charles McKee, Miami banker; Reginald D. Watkins, Munsey Trust Co., Washington; E. W. Ripple, Coral Gables, Fla., banker; John D. Evans, Ft. Lauderdale, Fla., banker; Samuel O. Porter, Miami banker; Glenn E. Baker, Miami banker; A. Harry Becker, Washington attorney; Norman Jorgenson, Washington attorney; Paul Porter, Washington attorney; Leo Resnick, Washington attorney.

BY THE DEFENSE

FCC Chairman John C. Doerfer and FCC Comrs. Rosel H. Hyde, Robert T. Bartley, Robert E. Lee, T. A. M. Craven, Frederick W. Ford and John S. Cross; former FCC members George C. McConnaughey (chairman) and Edward M. Webster; also Mrs. Ann Hutterly, FCC minutes clerk.

Subpoena of Sens. Estes Kefauver (D-Tenn.), Warren G. Magnuson (D-Wash.) and A. S. Mike Monroney (D-Okla.) will depend on the "proof of the government's (Justice's) case," Mr. Mack's attorney, Nicholas Chase, said. He added that Sens. George A. Smathers (D-Fla.) and Spessard L. Holland (D-Fla.) have "committed themselves" to appear without subpoena.

Two Senate bills to clarify equal time

Two senators last week offered separate bills with the same object: to make the "equal time" provisions of Sec. 315 inoperative when a political candidate appears on news shows on radio or tv.

S 1585, introduced by Sen. Strom Thurmond (D-S.C.), a member of the Senate Commerce Committee, would exempt from Sec. 315 provisions the appearance by a candidate on any news, news interview, news documentary, panel discussion, debate, or similar program where format and production and the participants are determined by the broadcast station or network.

S 1604, presented by Sen. Gordon Allott (R-Colo.), would provide the same exemption for appearance by a candidate on "any news program, including news reports and news commentaries," where format and production are determined by station or network and where the candidate "in no way initiated the recording or the broadcast."

News Danger • Sen. Thurmond, obviously referring to the FCC's Lar Daly decision, said recent "literal constructions" of Sec. 315 may become a substantial detriment to public interests. He said he felt many radio and tv stations and networks may eliminate legitimate news items (and thus fail to keep the public informed) to avoid the requirements of Sec. 315.

WBPD Orangeburg, S.C., had urged Sen. Thurmond, in a letter released last week, to organize a "plan of action" to air the Sec. 315 problem before the Senate Commerce Committee and expressed the opinion the section should be "repealed in its entirety." While the U.S. Supreme Court, currently considering the WDAY-TV Fargo, N.D., libel case, may declare Sec. 315 unconstitutional, this possibility "should not lull us," WBPD said.

Sen. Allott, in a statement accompanying introduction of his bill, referred to the Lar Daly decision and said the FCC interpretation "abridges radically" the usefulness of radio and tv to society and their freedom as news media.

He felt the scope of Sec. 315 has been "broadened far beyond anything that was contemplated by Congress," noting that the preamble of the Communications Act indicates "no intention thus to regulate and interfere with the programming of radio and tv stations."

What Freedom Means • Sen. Allott said the effect of the Daly decision "can only be to eliminate coverage of political campaigns by radio and tv." Freedom of the press means freedom to exercise judgment as to what is news and its reporting and the broadcaster must be given latitude to exercise judgment and discretion, he said.

If this policy were applied to all media, democracy would be made unworkable, Sen. Allott continued. It would mean "a virtual blackout of public activities, as well as political activities," he said.

FCC STANDS FIRM

Calls band deletion in 'public interest'

The FCC last week remained adamant that what it did when it revised the spectrum to delete a number of bands from civilian use was in the public interest and not a violation of the Administrative Procedure Act.

The Commission, in a brief filed with the U. S. Court of Appeals in Washington, maintained that the moves were necessary in the national defense.

It also urged the court to refuse to put into the record the secret reasons submitted to the FCC by the Office of Civilian & Defense Mobilization for making the changes.

The brief was filed in the suit brought against the FCC by Aeronautical Radio Inc., Air Transport Assn. and Bendix Aviation Corp.

They charged that the Commission April 1958 action was arbitrary.

The FCC in April 1958 without notice and hearing removed from non-government use 420-450 mc and 8750-8850 mc. The aviation interests maintain that the bands were being used for radionavigation service and that the Commission should have held a formal rule-making proceeding before removing them from non-government use. Commission's action was taken at the request of OCDM, and the new assignment establishes them for radiopositioning under government auspices.

The first revision is necessary because there are almost 1,000 boosters. Most of these, which have been operating for the last four years, are concentrated in the valleys and distances of the Northwest. They must be "grandfathered" in. The other legislative revision is necessary because the boosters are unattended.

The Commission in 1955 ordered the on-channel boosters — operating without permission of the FCC—to close down. Failing to stop the growth of this small individualistic group coverage—for most of the boosters feed only handsful of people—the FCC sued a booster station in Bridgewater, Wash. The appeals court, although upholding the FCC's right to act, remanded the matter because the Commission had not weighed all elements of this type of operation. This was in 1957.

In June of 1957 the Commission issued the first of what became obvious fruitless orders for boosters to go out of business. After the intervention of Colorado Gov. Edwin Johnson (former chairman of the Senate Commerce Committee), the FCC reconsidered. It withdrew the order and ordered a new study. In December 1958, the Commission reissued its prohibition against boosters, but in February of this year it again rescinded the order to permit further consideration.

Translators Established • Even before the court cast and the first order prohibiting the operation of on-channel boosters, the FCC established a translator service as a method for accomplishing the same end that boosters provided—the rebroadcast of big city tv programs. The translator service was established in the upper end of the uhf band.

Leading the fight to persuade the FCC to find some way of approving the operation of tv boosters were such Capitol Hill figures as Sen. Warren G. Magnuson (D-Wash.), chairman of the Senate Commerce Committee, and Congressional delegations from the states of Washington, Colorado, Idaho and others. Early this year, Kenneth Cox, special tv counsel to the Senate Commerce Committee, issued a special report on small town tv. In it he urged the FCC to find some way to approve the operation of tv boosters (BROADCASTING, Jan. 12).

Fellows asks hearing on blackout proposal

A request that a hearing be held on bills exempting professional sports from the antitrust laws was submitted last week by Harold Fellows, NAB president, to Rep. Emanuel Celler (D-N.Y.) chairman of the House Judiciary Committee.

Mr. Fellows called attention to a provision in some of the bills which would permit a tv blackout of major league telecasts from any station within 75 miles of a minor league club on the day the minor league club is playing at home.

This could affect 13 million tv homes, Mr. Fellows said, because they receive programs from stations located within 75 miles of more than one minor league team—and presumably there would be one of these minor league clubs at home at all times. Half of these 13 million homes could be blacked out at least half the time, since stations from which they receive tv programs are located within 75 miles of at least one minor league team, Mr. Fellows noted.

Idea Never Aired • The proposal for a 75-mile blackout has never been the subject of an open hearing, Mr. Fellows stated. He asked that such a hearing be scheduled before the committee takes any action on these bills, and requested that he be permitted to testify.

Last summer a Senate Judiciary antitrust subcommittee held hearings on similar bills to exempt professional sports from the antitrust laws with Mr. Fellows appearing in opposition (BROADCASTING, Aug. 4, 1958). This was tabled by the committee.

During the course of the Senate hearings various amendments were proposed, including the 75-mile blackout and a ban on pay tv (by Sen. William Langer [R-N.D.]).

A bill sponsored by Rep. Celler exempting professional sports from the antitrust laws was passed last year by the House of Representatives.

In the House are HR 2370-74 and 2266, sponsored respectively by: Reps. Francis E. Walter (D-Pa.), William E. Miller (R-N.Y.), Oren Harris (D-Ark.), John W. Byrnes (R-Wis.), William E. Cramer (R-Fla.) and Basil L. Whitener (D-N.C.).

Senate proposals include S 616, sponsored by Sens. Thomas C. Hennings Jr. (D-Mo.), Kenneth B. Keating (R-N.Y.) and Everett McK. Dirksen (R-Ill.) and S 886, sponsored by Sen. Estes Kefauver (D-Tenn.).

Civil defense guide is re-issued by FCC

A guide for broadcasting facilities in the event of national civil defense exercises or similar tests has been re-issued by the FCC.

In cooperation with the Office of Civil Defense Mobilization, FCC also outlined the extent of participation in defense drills for such non-broadcast licensees as fixed communications services, mobile systems, air patrol stations and amateur operations.

Included was a paragraph about Conelrad which stated that any operation by a standard broadcast station "should be voluntary" and approved by the FCC field supervisor in the station's region.

The guide underlined the strict procedure of such alerts, advising participants that they must perform only those duties assigned them. For example, if a mobile system is to perform the civil defense task of an ambulance corps, its radio facilities "shall be utilized only within its existing system."

It was pointed out that a valid station authorization is necessary for use of a radio transmitter and that any station having limited hours of normal service is "authorized to operate only during specified hours" no matter when the defense drill occurs.

In these tests, it was added, OCDM has requested the voluntary cooperation of all amateurs to guarantee that the "planned Radio Amateur Civil Emergency Services procedures will be effective in the portions . . . conducted by amateurs."

The notice said that a "definitive policy" regarding the availability of frequencies of non-government services under emergency conditions and areas of attack is being prepared and will be released at the "earliest possible date."

Both video, audio ID unneeded for sponsors

The FCC ruled last week that a sponsored program does not have to be identified both visually and aurally.

Its decision was in response to a question from Bert Combs, candidate for governor of Kentucky, as to whether section 3.654 of the Commission rules requires aural as well as visual sponsorship announcements in connection with political spot announcements on a television station.

Section 3.654, the FCC pointed out, provides that the station broadcasting a sponsored program shall make "an appropriate announcement" that the program is sponsored. "Responsibility," stated the FCC, "for determining whether a visual or aural announcement is appropriate lies with the licensee."

PEABODY SCORE: NBC 7, CBS 4, ABC 2

WGN-TV, WNEW, Standard Oil (Calif.) also are winners of awards

NBC was top scorer in the George Foster Peabody Awards presented last week in New York. The network took seven. Competitors CBS and ABC won four and two respectively.

One of CBS' awards (for tv public service, a special honor) sought out CBS President Frank Stanton for particular recognition. In announcing the award at a luncheon held by the Radio & Television Executives Society of New York, Bennet Cerf, board chairman of the awards committee, referred to it as "one of the most significant" Peabody Awards presented. Basis for the award was a series of special CBS news-in-depth reports. Sig Mickelson, CBS Inc. vice president and general manager of CBS News, accepted the award and took the opportunity to answer the "irresponsible reporting" charge against CBS made by White House News Secretary James Hagerty (see page 97).

NBC winning categories included tv news (Chet Huntley and Dave Brinkley); entertainment "with humor" (Steve Allen); education (*Continental Classroom);* contribution to international understanding *(M. D. International);* writing (James Costigan for his "Little Moon of Alban" on *Hall of Fame*); special awards (Fred Astaire and Orson Welles who starred on NBC).

NBC's Board Chairman Robert W. Sarnoff accepted the award for *Continental Classroom,* observing that the program has pointed the way for a new use of commercial tv by tackling a national problem of inadequate science instruction in America's schools.

Opens New Avenues • Mr. Sarnoff said the project showed that "our commercial medium, now in its second decade, has the vitality and the continuing desire to create basic new ideas and to open new avenues of public service."

Other CBS awards included one for musical entertainment (Leonard Bernstein) and another for dramatic entertainment (*Playhouse 90*). An award for radio public service went to CBS' *The Hidden Revolution* with mention made of advertiser Nationwide Insurance.

ABC's awards included *College News Conference* for youth programs and *Easy as ABC* (with UNESCO) for radio contribution to international understanding.

Other awards: two stations, WGN-TV Chicago for the outstanding children's program *The Blue Fairy* and WNEW New York for radio news (see story, page 75), and another for radio education to the Standard Oil Co. of California for its series, *Standard School Broadcast.*

Westinghouse Broadcasting Corp. President Donald H. McGannon (RTES' president) presided at the 19th year of Peabody Award giving. The Peabody honors were set up in 1940 by the U. of Georgia's board of regents to recognize the most distinguished and meritorious public service each year by radio and tv. Presentation was made by Dean John E. Drewry of the university's Henry W. Grady School of Journalism, which with the Peabody board administers the awards. (The late Mr. Peabody was a native of Columbus, Ga., a successful New York banker-philanthropist and life trustee of the university).

Citations read by Bennett Cerf in presenting the Peabody Awards follow:

TELEVISION NEWS: Chet Huntley and David Brinkley have for the past two years developed a mature and intelligent treatment of the news that has become a welcome and refreshing institution for millions of viewers. This distinguished and experienced team exemplify with force and perception a new advance in television journalism. "The Huntley-Brinkley Report" of NBC is therefore given the George Foster Peabody Television News Award for 1958, with congratulations to Mr. Huntley, Mr. Brinkley, and NBC.

Mr. Huntley

Mr. Brinkley

TELEVISION DRAMATIC ENTERTAINMENT: The Peabody Award goes to "Playhouse 90," CBS, because it stands alone among dramatic programs on television in aiming at the best and most original of tv drama. The committee especially applauds Producer Fred Coe for his championship of the highest standards in tv writing, direction and production.

Mr. Coe

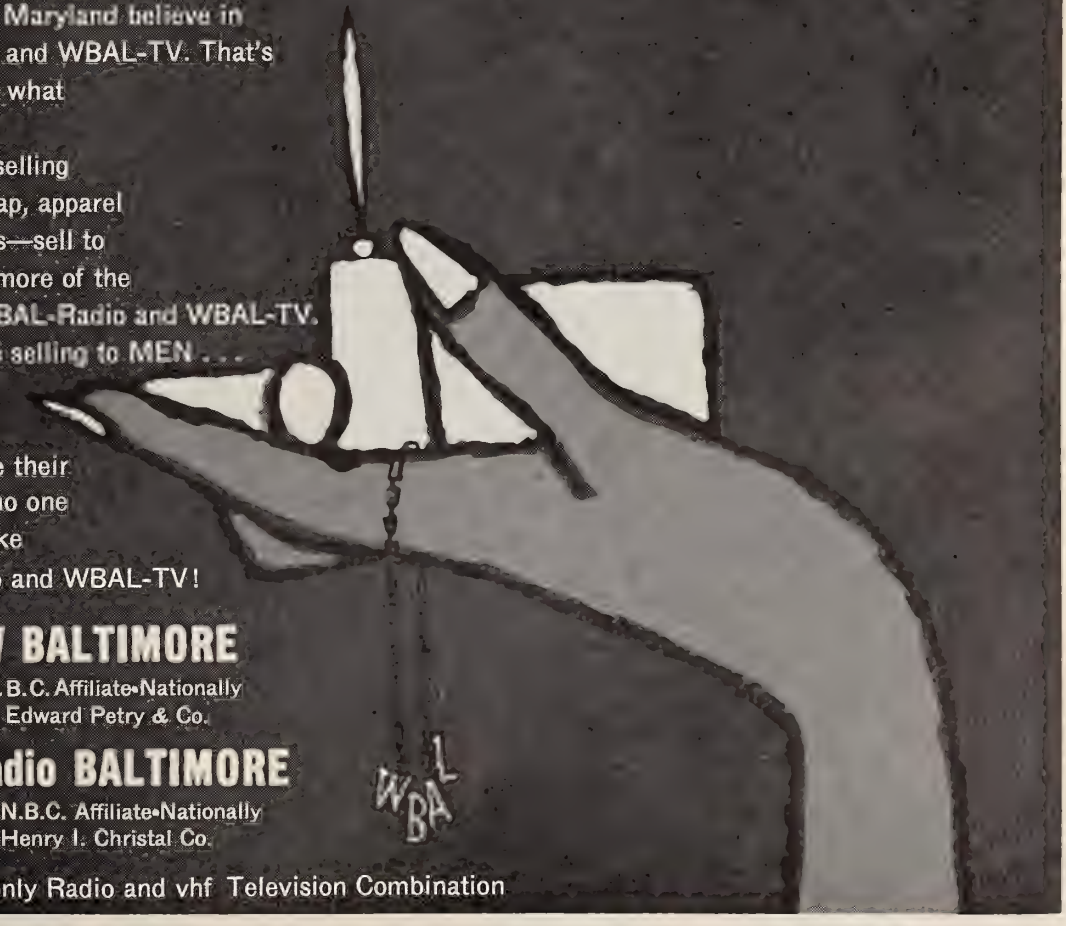
TELEVISION MUSICAL ENTERTAINMENT: By his virtuosity and genius for expression, Mr. Bernstein has inspired a resurgence of interest in symphonic music through intelligent and articulate discussions illustrated by orchestral performance of the highest quality. In recognition, the Peabody Award for Outstanding Musical Entertainment during 1958 goes to "Lincoln Presents Leonard Bernstein and the New York Philharmonic"—CBS.

Mr. Bernstein

TELEVISION ENTERTAINMENT WITH HUMOR: In a television year when genuine humor and frank experiments have been so conspicuously lacking, "The Steve Allen Show" has manfully bucked the trend. Allen and his talented associates obviously are willing to try anything on their show, and the percentage of clean hits has been amazingly high. In recognition, the Peabody Award for Television Entertainment with Humor is presented to "The Steve Allen Show," NBC.

Mr. Allen

TELEVISION EDUCATION: The Peabody Award in this category is presented to "Continental Classroom," an outstanding contribution to American education by NBC. This series has inspired the imagination of thousands of teachers and students in hundreds of colleges and universities, thus demonstrating the practical use of network television as a teaching aid.

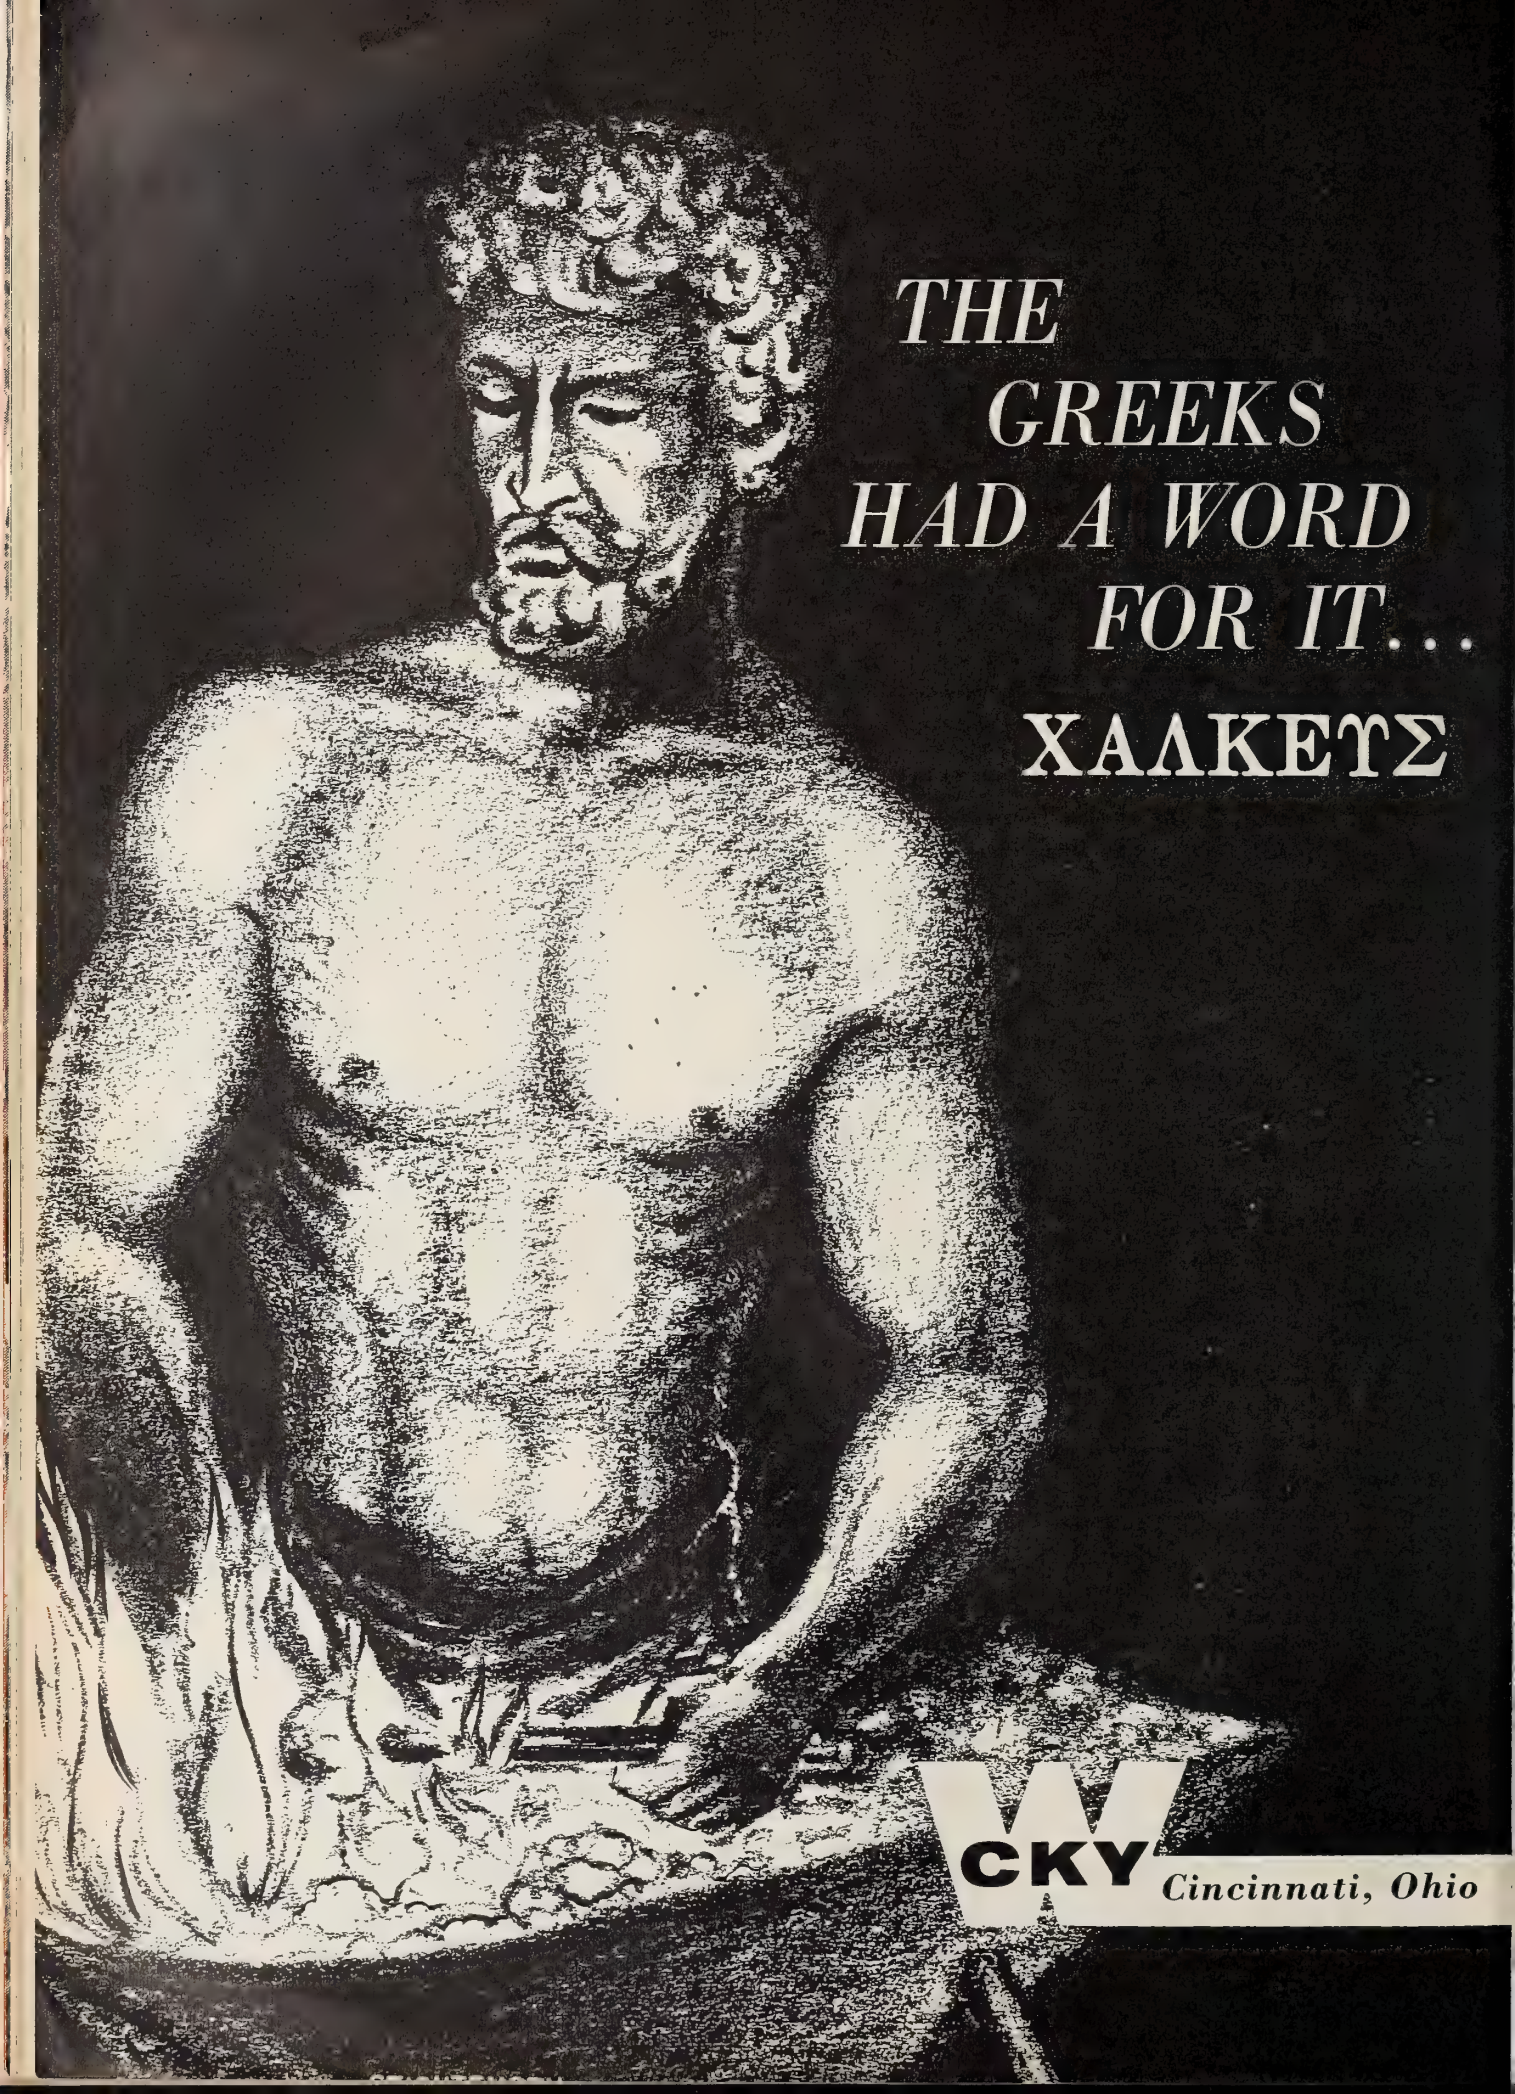


TELEVISION PROGRAMS FOR YOUTH: At a time when a small fraction of the younger generation is making bad headlines it is comforting and stimulating to have "College News Conference" give our alert and thoughtful young Americans the opportunity to speak with world leaders. It also serves the unique diplomatic function of displaying a vital young America to the representatives of foreign countries. In recognition of these facts, the Peabody Award for the Outstanding Television Program for Youth goes to "College News Conference," ABC.

TELEVISION PROGRAMS FOR CHILDREN: The Peabody Award for the best children's program goes to the imaginative and enchanting series, "The Blue Fairy," which through live acting, puppetry and narrative, brings to magic reality the most enduring of children's stories. It is noteworthy that, despite nominations of network programs, this award goes to a program series telecast live and in color by an independent station in Chicago—WGN-TV.

TELEVISION CONTRIBUTION TO INTERNATIONAL UNDERSTANDING: This Peabody Television Award goes to "M.D. International," for its inspiring study of American doctors, caring for the sick and abandoned in the far corners of the

YOUR BEST LINK WITH THE LADIES OF MARYLAND



Selling to Maryland ladies? Then, let Maryland's Number one Salesmen—WBAL-Radio and WBAL-TV— do the job for you.
The ladies of Maryland believe in WBAL-Radio and WBAL-TV. That's why they buy what WBAL sells!
So, if you're selling cosmetics, soap, apparel or baby needs—sell to more ladies, more of the time, with WBAL-Radio and WBAL-TV.
And, if you're selling to MEN . . . remember that no one sells men like their wives. And, no one sells wives like WBAL-Radio and WBAL-TV!

VULCAN
ΧΑΛΚΕΥΣ
ARMORER

VULCAN (Gr. Hephaestus) called God of Fire, was honored by the Olympian gods because he was the workman of the immortals, their armorer and smith. Even though he was ugly and lame, he had his compensations—for not only was he married to the beautiful Aphrodite, he also had the company of golden handmaidens he had made in his forge, to help him with his work for the gods. As Vulcan was armorer to the gods, so the Cincinnati area is an important armorer to the nation. It is highly industrialized—the home of giant machine tool companies, jet aircraft engine plants, automotive plants, atomic energy producing companies, and hundreds of smaller companies, supplying vital machinery and products to other parts of the country. Ranking 15th in national markets, it is important to every advertiser who wishes to reach the 468,000 homes in the Cincinnati trading area—homes of busy, thrifty, prosperous people.
And the wise advertiser and agency man knows that WCKY is the best buy to reach this prosperous market. WCKY offers the advertiser:

1. Responsive adult audience
2. 50,000 watts of SELLING POWER, covering ALL of the Cincinnati trading area
3. Refreshing, modern music and latest news 24 hours a day
4. Experienced air personalities who SELL your product
5. A prestige station with progressive management.

Call Tom Welstead at WCKY's New York office, or AM Radio Sales in Chicago for the latest facts and figures on Cincinnati and WCKY.

world, bringing comfort and the healing arts to the blind, the halt, the hungry, without hope of gain or favor. Presented on NBC's "March of Medicine," this program was an outstanding contribution to international understanding.

TELEVISION PUBLIC SERVICE: In presenting this Peabody Award to CBS-TV, special recognition goes to President Frank Stanton. Credit also goes to Producers Les Midgley and Av Westin for CBS News special-in-depth reports such as "The Ruble War;" the pioneering "Where We Stand," Parts I and II; "Arab Tide—Prologue to the Summit;"

Mr. Hewitt

Dr. Stanton

Mr. Westin

Mr. Midgley

"Face of Red China;" and a series on the Middle East, with commendation to Don Hewitt. Several of these comprehensive reports treating the news in depth were issued when the news was still white hot, and they were a significant contribution to public understanding of very important issues.

TELEVISION WRITING: To James Costigan, a special Peabody Award for the lyric beauty, the poetic insight, and the dramatic integrity of his play, "Little Moon of Alban," presented on the "Hallmark Hall of Fame" over NBC.

Mr. Costigan

TELEVISION SPECIAL AWARD: Fred Astaire is one of a handful of stars of stage, screen, and television who approaches perfection. His special 1958 television show—

Mr. Astaire

repeated by genuine acclaim—was a case in point. It set a standard for television entertainment and good taste that will remain unchallenged for a long time to come. It is, therefore, with great pleasure that this Peabody Special Award is presented to "An Evening with Fred Astaire," NBC.

RADIO PUBLIC SERVICE: This Peabody Award is given in recognition of the superb way in which CBS met the challenge in the unique request of the sponsor, Nationwide Insurance, to create a public awareness of the urgency involved in the complex problems of man in modern technological society. "The Hidden Revolution" series is the fulfillment of an obligation of public service on the part of the radio industry and the sponsor which inspired an unprecedented response from an intelligent public.

TELEVISION SPECIAL AWARD: To Orson Welles, for the wit, originality, and insouciance of "The Fountain of Youth," NBC, one of the merriest, most irreverent half hours of the year 1958, this special Peabody Award is given.

Mr. Welles

RADIO NEWS: The George Foster Peabody Award in this category recognizes WNEW New York for its fast and enterprising local coverage of news, its taped on-the-spot interviews which frequently scoop both press and radio and its policy of interrupting all programs for important news features. In recognizing WNEW this award also goes to Martin Weldon, director of news and special events for WNEW.

Mr. Weldon

RADIO EDUCATION: The choice for the Peabody Radio Education Award is "Standard School Broadcast." This is in recognition of continuous expansion and development over a 30-year period. This outstanding music appreciation series for schools combines educational value with highest musicianship, expert production, and utilization of appropriate musical groups of all types, instrumental and vocal.

RADIO CONTRIBUTION TO INTERNATIONAL UNDERSTANDING: In recognition of its outstanding contribution to public comprehension of the pioneering by UNESCO in the fields of education; for excellency of concept; and for illuminating with brilliant techniques UNESCO's work in promoting international understanding through radio, "Easy as ABC"—is the choice for the Peabody Award for Radio's Contribution to International Understanding during 1958.

How WNEW won

The story behind the Peabody Award for radio news coverage to WNEW New York has the make-believe quality of a soap opera. But it's true.

In early December 1958, WNEW had an incomplete news staff. It was being assembled for work January 1 when WNEW was to discontinue its long association with the *New York Daily News*. On December 10, New York newspapers were struck by their deliverymen, so the station moved up its time-table. WNEW hastily hired additional men, stepped up coverage.

Its staff of 12 newsmen made themselves noticed—interviewing police officers, eyewitnessing crime and disaster, talking to personalities in the news. Often in the matter of minutes tape interviews were phoned in and broadcast.

WNEW carries 48 five-minute newscasts during a 24-hour day, on the hour and half hour.

SCREEN GEMS HAS NEW IRON IN FIRE

10-year-old firm eyes station ownership, video-tape programming

Ten years ago this Wednesday (April 15) Screen Gems Inc. opened its doors for business in New York. The enterprise was a modest one. But today, the credit lines, "Produced by Screen Gems" and/or "Distributed by Screen Gems" are familiar phrases to home viewers of the company's 33 tv series and almost 1,000 feature films.

A successful business never stands still, however. And as Screen Gems marks its 10th anniversary, Ralph Cohn, president, has set his sights on another phase of the television business: station ownership. Three weeks ago, he appointed Norman Louvau, formerly general sales manager of KRON-TV San Francisco, as general manager of station operations for SG (BROADCASTING, March 23). Mr. Louvau will be responsible for negotiating for the purchase of tv stations and ultimate supervision of their operations.

"We intend to buy the maximum allowable number of stations," Mr. Cohn declared. "We are looking forward to having a station or an interest in a station by the end of the year or sooner."

The Way Ahead • As Screen Gems enters the second decade of its existence, Mr. Cohn and his associates have blueprinted the following areas of expansion for SG, and offer the following observations:

• Movement into the station ownership field. One of the mainstays of business growth is diversification and this can be accomplished by expanding into an area related to the tv film field and one with which the company has become familiar through its knowledge of programming.

• Production and distribution of video-taped programs. This would not mean the abandonment of film but would mean the use of tape when tape is advantageous.

• Co-production of programs with other nations of the world. The globe is shrinking and there is a slow but inevitable merger of cultures. SG believes that this type of co-production not only can be profitable but can contribute toward world understanding.

"There's something stimulating and challenging about contemplating the future," Mr. Cohn remarked recently, "but there's something rewarding about contemplating the accomplishments of the past."

The key to Screen Gems' success over the past 10 years (officials believe it has the largest volume in the business) is diversification, according to Mr. Cohn. SG, he said, is unique among tv film distributors-producers in that it is active in every phase of operation: creation and packaging of programs, financing and production of programs, physical production of film series, sales of series for national sponsorship, sales of programs for regional or local sponsorship, distribution of feature films and foreign distribution of tv film.

Farsighted 50 Pages • When Screen Gems was organized by Columbia Pictures in the spring of 1949, it was considered a daring move because other major film studios were shying away from the new medium. Columbia asked Ralph M. Cohn, son of the company's executive vice president, to make a study of tv's immediate and long-range potential for Columbia's facilities and resources. At the time, Mr. Cohn was part of a two-man organization, Pioneer Telefilms, which was producing tv film commercials in New York. Within a few weeks, Mr. Cohn prepared a 50-page analysis of the potentialities of television for Columbia. The result: Pioneer Telefilm was reorganized as Screen Gems, with Mr. Cohn as general manager.

Mr. Cohn's blueprint highlighted these points: the most immediate use for film in television was in commercials; a profitable market for Columbia's library of motion pictures was still several years off because of an insufficient number of stations on the air, an organization should be assembled to produce new tv film programs for both network and local telecasting.

With benefit of hindsight, Mr. Cohn can remark today that his blueprint proved "remarkably accurate." He acknowledges one error in judgment: he recommended that some of Columbia's short subjects and some features be edited, fresh material inserted, and the films released as half-hour or hour-long tv programs. Columbia experimented for several months, but the idea proved impracticable.

At the outset, Screen Gems concentrated on production of film commercials. From 1949-51, the company produced more than 200 commercials for such clients as BVD, Hamilton Watch and American Tobacco Co. Commercials continued to be SG's all-consuming pre-occupation until 1951 when the company was commissioned to produce seven half-hour films for du Pont's historical program, *Cavalcade of America*.

Tv Model T • The most noteworthy step in Screen Gems' early development was taken in the spring of 1952 when Mr. Cohn and Irving Briskin, studio manager for Columbia Pictures, sold the Ford Motor Co. and its advertising agency, J. Walter Thompson Co., on a half-hour anthology series to star top Hollywood names. The series was significant from many angles: it provided SG with training for program production because, among the 195 films in *Ford Theatre*, was every genre of dramatic tv (comedy, romance, action adventure); it established a pattern that the "nut" of an expensive series could be recouped through reruns; it placed Screen Gems in the distribution business when repeats of the series were syndicated under the title of *Your All Star Theatre*.

As more and more television stations came on the air, Screen Gems stepped up production sharply. Today, Screen Gems has 11 programs on the networks, two in national spot and 20 different programs in syndication (many of them re-runs), plus about 950 features available for sale to stations.

The company has grown to more than 250 permanent employes in the U.S. and abroad. The creative team is headed by Harry Ackerman, former west coast programming vice president

TOP COMMAND PLANNING: (l to r) Messrs. Mitchell, Hyams, Cohn and Burton Hanft, vice president in charge of business affairs

of CBS-TV, who is SG's vice president in charge of production. Irving Briskin is executive in charge of administration and operation at the west coast studio. John Mitchell is vice president in charge of sales; Jerome Hyams is vice president in charge of syndication and William H. Fineshriber Jr., former Mutual president and NBC vice president, is director of international operations.

Talent on Tap • In addition, Screen Gems has built up a stable of independent producers to supplement its staff. The company has utilized the services of such outside producers as Eugene B. Rodney *(Father Knows Best)*, Herbert B. Leonard *(Adventures of Rin Tin Tin)*, Tony Owen *(Donna Reed Show)* and William Hanna and Joseph Barbera *(Huckleberry Hound* and *Ruff & Reddy)*.

"It's been a glorious past, but I think it's going to be an even more glorious future," says Mr. Cohn.

Oscar show on NBC-TV wins 47.4 on Arbitron

Although portions of the motion picture industry's 31st annual *Oscar Awards* on NBC-TV Monday night (April 6) went higher, the two-hour show averaged out rating-wise at 47.4 on Arbitron, according to a report Thursday by ARB. The rating is good for the post-10:30 p.m. period.

The show also was carried on NBC Radio and on Canadian tv and radio stations. NBC said the Motion Picture Academy, which placed the $900,000-buy direct, has not asked for any rebate to cover the unused last quarter-hour which unexpectedly developed as the program ran some 20 minutes short. NBC-TV filled with a sports film.

This was the second year the motion picture industry sponsored the entire show itself without commercial sponsor participation. It is evident Hollywood considers the program a good investment. The box office publicity boost from the awards on tv is estimated to run into the millions of dollars, a top Oscar to any film being considered automatically "as good as a million" in added ticket sales.

But reaction to the show—its entertainment value as well as whether it is a suitable publicity vehicle for stars who are used to a meticulously controlled film environment and not live —continues to be mixed and controversial. Movieland's trade paper, *Variety*, felt "it was the same old tired format, completely lacking in ingenuity, and written, staged and performed as thought it were a benefit given by a disgruntled troupe." The reviewer felt "this newest outing was the most uneventful in memory, probably striking a new nadir in the use of the talent—plus said talent's indifference."

But despite the ragged production and other unfortunate aspects, more than one-half of the U.S. apparently were interested enough in the Oscar Award news to watch the two-hour program.

'Desilu Playhouse' goes to Fri. 9-10 p.m.

CBS-TV has slated *Desilu Playhouse*, sponsored by Westinghouse Electric (McCann-Erickson), for a Friday 9-10 p.m. position in next fall's schedule. *Playhouse* now is telecast Monday 10-11 p.m.

The network also plans to knock out *The Lineup* from its Friday 10-10:30 p.m. period, the program being expanded to an hour on Wednesday (7:30-8:30 p.m.). In its place on Friday and following *Desilu Playhouse*: *Twilight Zone* tentatively set for the 10-10:30 p.m. spot and *Person to Person* continuing in its current 10:30 p.m. period.

Affected by these changes on Friday will be Phil Silvers (now 9 p.m.) and *Lux Playhouse* (9:30 p.m.). The Silvers show is dropped. Fate of *Lux Theatre* is undecided. *Rawhide* is set for 7:30-8:30 on Friday, followed by *Dennis the Menace* at 8:30-9.

PROFITABLE

says Martin Umansky, General Manager

KAKE-TV

WICHITA, KANSAS

Every single feature in the Warner Bros. library is profitable, according to KAKE-TV's General Manager, Martin Umansky.

"The value of any library depends not on the top features alone, but on the entire list. Out of the Warner Bros. library, we've created a special afternoon theatre showing only the so-called 'lesser' features. This program alone has practically paid for the entire library of 750 features."

The Warner Bros. library has made outstanding profits for stations, large and small, in every part of the country. Join the profit parade. Get in touch with us today.

BMI STOCK STATUS
Music license group holding sold by CBS

CBS last week sold back to BMI its stock in the music licensing organization it helped to form 19 years ago.

Whether NBC and ABC would eventually follow suit was a moot question.

Network ownership in BMI is under fire in at least one pending suit and has been subjected to extensive questioning in Congressional hearings, although all three networks together held less than 20% of the outstanding stock. Richard S. Salant, CBS vice president, recognized this in his letter proposing to return the CBS-held stock to BMI.

Circumstances Change • After reviewing the origins of BMI as an organization through which the broadcasting industry undertook to protect itself against "the then monopoly position of ASCAP," Mr. Salant noted that "circumstances governing ASCAP have changed over the last 19 years" and "BMI has established itself as a valuable mature and going enterprise." He added:

"We therefore think that, although we are persuaded there is nothing wrong in our ownership of this BMI stock, the time is now ripe for us to divest ourselves of it. In all the circumstances, we think it better that CBS, as the operator of radio and television networks and stations, now place itself in the position purely of a customer of BMI with no element of ownership."

CBS recently renewed its licenses for use of BMI music by both its radio and tv networks and its owned stations (BROADCASTING, March 16). So have the other networks and their o&o's.

Stock Retired • On the heels of Mr. Salant's letter, dated March 12, BMI announced last week it had acquired CBS' 7,017 shares for $35,000, the price at which the stock originally was issued, and was retiring it as treasury stock.

Congressional records indicate that CBS was the largest network owner of BMI stock, with 8.9% held by Columbia and its owned stations. NBC and its owned stations hold 5.8%, and ABC and its owned stations hold 4.5%. The rest is held by individual stations and station owners.

NBC and ABC authorities indicated they had no immediate plans for returning the stock they hold.

In Congressional hearings, both NBC and CBS had indicated they would reconsider the question of their owning BMI stock, but the implication was that the appropriate time for this would be (1) after a $150 million suit brought by a group of ASCAP songwriters against the networks and BMI had been dismissed or withdrawn, and (2) then on condition that continued competition in the music licensing field was assured. NBC officials said flatly that they did not feel they could reconsider their BMI ownership until the lawsuit was out of the way, since a basic objective of that suit is to divorce BMI from broadcast ownership.

Congressional Hearings • In this connection, Mr. Salant said in his letter that "the identical issues raised in the lawsuit have been fully explored before the Subcommittee on Communications of the Committee on Interstate and Foreign Commerce of the U.S. Senate and the record of these hearings has just been closed. The overwhelming effect of the testimony in these hearings was to demonstrate that there is no merit to the claims of the plaintiffs in the lawsuit. In view of this, we feel that we should no longer allow the pendency of a baseless litigation to deter us from the course that we said that we would consider."

CBS dropped its representation on the BMI board of directors more than a year ago.

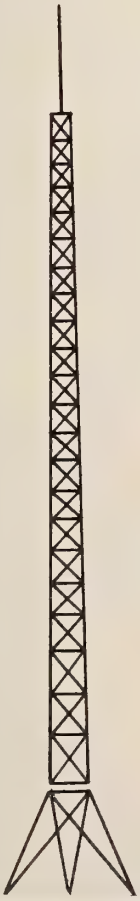
WHAS-TV forces issue of Conelrad storm use

A half-hour documentary over WHAS-TV Louisville, Ky., so aroused the city about storm warnings that Conelrad receivers have been bought for 202 schools and Louisville has been designated a test area for an expanded use of Conelrad.

The key figure in the Conelrad development, according to the station, was FCC Comr. Robert E. Lee, who talked to U.S. Weather Bureau officials in Washington to see if Conelrad, presently restricted to tornado warnings, might not be used for severe weather forecasts (when conditions are ripe for tornadoes, hurricanes, etc.).

WHAS-TV reported last week that these actions followed the showing of its documentary, *53 Miles From Death*, earlier this year. The special show, under news director Bill Small, was prepared when normal news coverage of a tornado that struck a Kentucky town 53 miles away revealed confusion and uncertainty about procedure among city officials if a similar storm were to hit Louisville.

Response to the program, the station said, was "tremendous" and dictated two re-showings the following weekend.



At a city-wide safety council meeting, Victor A. Sholis, station vice president and director, outlined the pattern of confusion revealed by the documentary, recommendations for corrections and Conelrad procedure generally. Purchase of Conelrad receivers by

every city, county and parochial school in the Louisville area followed shortly.

WHAS-TV also reports that Comr. Lee and Rep. Frank Burke (D-Ky.) have spoken to Civil Defense officials about the possibility of matching federal funds to help underwrite the Conelrad sets bought by Louisville schools.

The Lousville experiment in expanded Conelrad use, starting this month, will allow the Kentucky weather bureau to call for Conelrad to broadcast any severe weather forecast which it feels warrants special warning. O.K. Anderson, weather bureau chief in Kentucky, has said that after one year, the experiment will be evaluated for possible use across the nation.

California film men form tv association

Television Film Assoc., organized as a west coast counterpart of New York's National Television Film Council, will meet tomorrow night (April 14) at the Masquers' Club in Hollywood to sign papers to incorporate the group as a California non-profit service organization. TFA's main objectives are to maintain liaison among the producers and distributors of tv films, the tv stations and the companies providing material and services to television, and to establish and standardize better operational practices.

John P. Ballinger of Screen Gems is president of TFA. Jack M. Getz (Consolidated Film Industries) is vice-president; Frank Wolf (Gross-Krasne), secretary; Charles E. Buzzard (Buzzard Enterprises), treasurer. The organization's board also includes the following committee chairmen: Robert E. Hoffard (Eastman Kodak Co.), information and education; Harvey Gausman (General Film Lab), membership; Howard Landau (Permafilm), program; Robert C. Vinson (Armed Forces Television Service), ways and means; Edward Hunt (KTLA [TV]) tv station relations.

TFA has set four immediate major projects: To establish a telefilm leader graduated into seconds at sound speed (24 frames per second) which will remain constant when film is reduced from 35 mm to 16 mm; to establish a standard cue mark and cue mark placement; to promote general use of a standard booking request form and to educate film handlers at stations to simplify their work and prolong the life of tv film prints.

The meeting, which is open to anyone in the tv film industry, will also include a talk on "U.S. Television Around the World" by Mr. Vinson and Arnold Sheldon of AFTS.

VIDEO TAPE 'SCHOOL' SET

IATSE, Film Producers Assn. adjust tape rates

The Film Producers Assn. of New York reported last week that it is holding discussions with the International Alliance of Theatrical Stage Employes on a joint project: the establishment of a training school for producers and IATSE crews on video tape production techniques.

This project follows an understanding reached recently by FPA and IATSE on wage rates to be paid to members for work on tape. This agreement, FPA President Nat Zucker said, provides that wage rates "are to be competitive with those paid by the networks to its employes for comparable work."

Mr. Zucker explained that before the latest agreement, IATSE members were paid under the terms of its contract with FPA for film activity. They were found to be "much higher" than the rates paid to network employes, according to Mr. Zucker, and accordingly FPA persuaded IATSE to adjust its scales for tape. In some instances, the reduction in pay will amount to about 50%. Since network salaries for employes on tape run on a weekly basis, FPA agreed to revise its rates upward for IATSE members working on a daily basis.

Competitive Rates • Mr. Zucker indicated that both the union and FPA realize that rates must remain competitive if the film producers are to gain a "fair share" of tape commercial work. Similarly, he said, the proposal for a joint training school would be of mutual benefit, to IATSE and the association.

FPA, meanwhile, has not reached an agreement with United Scenic Artists Local 729 on an initial contract. In the past, the union promulgates rates to the film companies but this year FPA insisted on the negotiation of a contract. A spokesman for the union said that about 45 members work for film studios in the New York area, usually on a per diem basis, as scenic and costume designers and artists. An official of the Federal Mediation Service has been working with the union and FPA to formulate a contract establishing wages and working conditions. Local 729 members have not been employed at FPA studios since the end of March.

COLORCASTING

Here are the next 10 days of network color shows (all times are EST):

CBS-TV

April 21 (9:30-10 p.m.) **Red Skelton Show**, S.C. Johnson through Foote, Cone & Belding and Pet Milk through Gardner.

NBC-TV

April 13-17, 20-22 (2:30-3 p.m.) **Haggis Baggis**, participating sponsors.

April 13-27, 20-22 (4-4:30 p.m.) **Truth or Consequences**, participating sponsors.

April 13, 20 (10-10:30 p.m.) **Arthur Murray Party**, P. Lorillard through Lennen & Newell and Pharmaceuticals Inc. through Parkson Adv.

April 14, 21 (8:30-9 p.m.) **Jimmie Rodgers Show**, Liggett & Myers through McCann-Erickson.

April 15, 22 (8:30-9 p.m.) **The Price Is Right**, Speidel through Norman, Craig & Kummel and Lever through J. Walter Thompson.

April 16 (9:30-10 p.m.) **Ford Show**, Ford through J. Walter Thompson.

April 16 (10:30-11 p.m.) **Masquerade Party**, Lorillard through Lennen & Newell.

April 17 (7:30-8 p.m.) **Northwest Passage**, sustaining.

April 17 (8-9 p.m.) **Ellery Queen**, RCA through Kenyon & Eckhardt.

April 18 (8-9 p.m.) **Perry Como Show**, participating sponsors.

April 19 (7:30-8:30 p.m.) **Steve Allen Show**, Polaroid through Doyle Dane Bernbach and du Pont through BBDO.

April 19 (9-10 p.m.) **Dinah Shore Chevy Show**, Chevrolet through Campbell-Ewald.

April 22 (9-9:30 p.m.) **Milton Berle**, Kraft through J. Walter Thompson.

• Program notes

• Telenews, N.Y., has sold its daily news service to KTVB-TV Boise, Idaho; KHVH-TV Honolulu, and Tv Paulista, Sao Paulo, Brazil. Telenews' weekly sports review was purchased for National Assn. of Insurance Agents' sponsorship over WVET-TV Rochester, N.Y.

• WLW-WLWT (TV) Cincinnati has installed an Alden Automatic Weather Map Receiver. The unit, connected with the U.S. Weather Bureau's Master Analysis Center in Washington, D.C., presents a complete map of the weather every 20 minutes.

• NBC-TV reports that *The Californians* adventure series returns to the air after a three-week absence in a new time period April 21 (Tues., 9-9:30 p.m. EST), replacing *The George Burns Show*. Colgate-Palmolive, N.Y., through McCann-Erickson, N.Y., which sponsored the *George Burns Show* has signed as an alternate-week advertiser of *The Californians*. The other sponsor is not set.

• *Markham*, starring Ray Milland in the role of lawyer turned private detective, will premiere May 2 on CBS-TV (Sat., 10:30-11 p.m. EDT). The weekly half-hour series is being filmed on location in major world capitals. Sponsored by Schlitz Brewing Co. through J. Walter Thompson Co., *Markham* is a Marada

Blood-hurdler

Program director Roger Hough of KSUM Fairmont, Minn., has proved once again that in radio, timing is everything. When the Red Cross Bloodmobile came to town April 8, Mr. Hough decided to do a live remote broadcast with himself as the afternoon's first donor.

Flat on his back, mike in hand, he chatted with Jeff Coult Sr., county chairman of the Red Cross blood drive. As a nurse prepared to remove the plasma bottle, Mr. Hough reassured his audience: "You see, folks, there's nothing to giving blood." And then passed out.

Net result of this harrowing scene over the air: before the broadcast, an average of 125 pints donated per day; *after* the broadcast an average of *200* pints.

Production in cooperation with Revue Productions.

• United Artists Associated Inc., N.Y., report sales of its complete Warner Bros. features library to KRTV (TV) Great Falls, Mont.; KGHL-TV Billings, Mont., and KWRB Thermopolis, Wyo.

• The first of a group of special programs, featuring New York Gov. Nelson A. Rockefeller in a special report on the recently-enacted state legislative program, was carried on at least ten tv stations in the state April 8. The Governor's office and the New York State Assn. of Broadcasters jointly arranged for a series of 15-minute reports to the people. The taped programs are made available as a public service to tv stations throughout the state and it is planned to produce a program each week for several weeks on various phases of new legislation.

• WBT Charlotte, N.C., is offering its *Radio Moscow* series for syndication. The programs, broadcast Monday, Wednesday and Friday on WBT, feature taped excerpts of Radio Moscow's English language broadcasts with a commentary by WBT staffer Alan Newcomb and foreign affairs expert Rupert Gillett.

• CBS Films' first color series, *The Man From Antibes,* begins production in Nice (France) April 24 with Sam Gallu producing. The series will star Robert Alda and Melville Cooper in the story of an art expert who helps authorities to solve crimes which involve great works of art.

• *The Court of Human Relations* comes to daytime network tv (NBC-TV, Mon.-Fri. 2:30-3 p.m.) starting June 22. Life's problems will be mediated over the visual medium, as they were via radio under the same title as far back as the 1930's. A. L. Alexander, the show's creator and producer, will act as moderator. The troubled people will appear on the taped program but will not be identified. *Court* replaces *Haggis Baggis.*

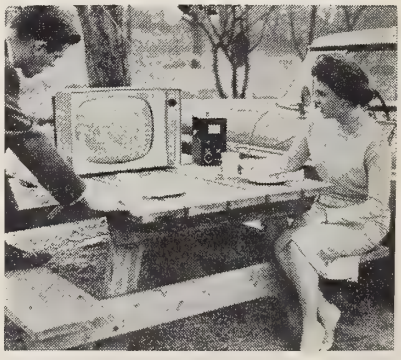
• *Wichita Town,* a half-hour western film series with Joel McCrea and his son Jody as featured players, is to be produced by Walter Mirisch for NBC and the Mirisch Co. In *Wichita Town,* being prepared for the network's fall lineup, Mr. McCrea Sr. will wear the badge of Marshal Mike Dunbar, appearing sometimes as the leading performer, other times in a supporting role or as narrator. His son is to play a cattle foreman on friendly terms with the marshal.

• The right of M&A Alexander Productions to distribute to television eight theatrical films produced by National Pictures Corp. was upheld in Los Angeles Superior Court when Judge Ellsworth Meyer issued an injunction restraining National Pictures and its president, Edward L. Alperson, from interfering with such distribution. Pictures are: "Young In Heart," "Alaska Patrol," "Black Beauty," "Tender Years," "Rose of Cimarron," "Dakota Lil," "Belle Star's Daughter," and "Sword of Monte Cristo."

• Independent Television Corp. will return *Ding Dong School* to tv in September as its first video-tape production, Walter Kingsley, ITC president, announced. Dr. Frances Horwich, as Miss Frances, will be featured in the series to go before the tape recorders in June.

• *Texas Rodeo,* to be taped at an arena in Dayton, Tex., replaces *Jefferson Drum* as NBC-TV's Thursday 7:30-8 p.m. entry starting April 30 (CLOSED CIRCUIT, March 2). Saddlerock Corp., will produce the series, using the facilities of KPRC-TV Houston. Plans call for a continuous flow of action, minus any delays for bringing on and mounting animals. L.N. Sikes veteran rodeo contestant and judge, is the producer.

• KGW Portland, Ore., originates *Truth or Consequences* in color for NBC-TV the week of April 27. The colorcasts, billed as the city's first, are in connection with the Oregon Centennial.



EQUIPMENT & ENGINEERING

Radio-tv production up, sales off, in Feb.

Factory production of both radio and television receivers increased in February over the preceding month, but retail sales were down. Electronic Industries Assn., Washington, reports television production in February totaled 459,492 compared to 437,026 in January. Retail sales dipped from 501,704 in January to 448,877. Sales outstripped production, however, as the two-month totals show 949,877 tv sets sold and 896,518 produced.

Radio receiver output, including auto radios, in February totaled 1,125,385, up slightly from January's 1,124,737. Retail sales, excluding car sets, were down in February, with 474,888 sales compared to 700,490 in January. January-February sales in 1959 total 1,175,378 compared to a two-month 1958 total of 839,942.

In January 614,181 radio and 370,650 tv sets were shipped to dealers. Tv shipments decreased from January 1958's 559,047.

Out-of-home tv • Magnetic Amplifiers Inc., New York, has developed a solid state static inverter that permits a home portable tv set to be plugged into an automobile dashboard. The inverter converts 6 or 12 volt dc battery current to 115 volt 60 cycle ac power, furnishing the equivalent of 100 or 200 w. It uses transistor circuits with magnetic components. Originally it was developed to provide a portable power source for jet engine starting and missile power supplies and for instruments used by auto manufacturers in road testing. The device is applicable, too, for portable stereophonic units.

IN SAN DIEGO KFMB-TV MAKES MORE PEOPLE LEAVE HOME (TO BUY) THAN ANYTHING

The only real way to "rate" an audience is not just by counting eyes in front of a TV set, but by counting feet at a supermarket. KFMB-TV sends more feet out to buy in the rich San Diego market because it's got more eyes glued to the screen. (29 of the top 30 television shows in San Diego are on KFMB-TV.) !

"JAXIE" says—

LESTOIL

Cleans Up With Spots

Lestoil has joined the Honor Roll of Advertisers who chose WFGA-TV to carry its sales messages to more than a quarter-million Florida-Georgia TV homes.

Heavy spot saturation is being used to introduce Lestoil in this new market and these spots—combined with WFGA-TV's top programming — will provide strong selling power for Lestoil's fine all-purpose liquid detergent.

"Jaxie" is proud to have Lestoil and the Jackson Associates, Inc. advertising agency on its growing list of prestige advertisers.

• E. ROBERT LISSIT, formerly news writer-editor of WBBM-TV Chicago, to KYW-TV Cleveland as news supervisor.

The world's 'first' • Maurie Webster (l), general manager of KCBS-AM-FM San Francisco, Jules Dundes (c), vice president of CBS Radio, and Arthur Hull Hayes, president of CBS Radio, stand before a 1909 facsimile, reconstructed from original parts, of the world's "first" broadcasting station (BROADCASTING, Feb. 16). KCBS, affiliated with CBS, claims that its predecessor is a radio school run by Charles David Herrold 50 years ago in the Garden City Bank Bldg. (now the American Trust Bldg.). On April 3, a plaque, commemorating the bank's lobby as the birthplace of radio broadcasting, was placed. Among congratulatory letters was one from the White House, signed by News Secretary James Hagerty on behalf of President Eisenhower.

• DAVE LOCKWOOD, formerly air personality of KRUX Glendale, to KOOL Phoenix, both Arizona, in similar capacity.

• DAVE SHAY, formerly of WOW-TV Omaha, Neb., to WMT-TV Cedar Rapids, Iowa, as newsman.

• JOHN MILHAUPT, formerly photographer of *Grand Rapids* (Mich.) *Herald*, to WOOD, that city, in similar capacity.

• GLENN HARDY, newscaster on Don Lee network for 22 years before retiring two years ago, to KBIF Fresno, Calif., with daily 15-minute newscast.

• ART ATHENS, formerly of WMGM New York, to KGHM Brookfield, Mo., as air personality.

• JOE VAN, formerly air personality of WDSU-AM-FM New Orleans, to CKLW Detroit-Windsor, Ont., in similar capacity.

• PHIL GAINES, formerly announcer of WMAL-TV Washington, to WWDC-AM-FM, that city, as air personality.

• FRANK H. WILSON, formerly newsman of WRVA-AM-FM Richmond, Va., to WTOP-AM-FM Washington in similar capacity.

• VAN LANE, formerly sports director of WDOK-AM-FM Cleveland, to WHK-AM-FM, that city, as sportscaster, specializing in horse racing results.

• FRANK KAHN, formerly of ABC, N.Y., to WASA Harve de Grace, Md., as staff announcer.

• ROBERT HERZOG, formerly news director of WXIX (TV) Milwaukee, to WISN-TV, that city, as newscaster.

• DUANE BRADY, account executive of WTVN-TV Columbus, Ohio, named newscaster for new weekday WTVN-TV program, *Rambler Reporter*.

• HAL MURRAY, formerly of KLIF Dallas, to KILT Houston as air personality.

• JOAN HINMAN named meteorologist of WJXT (TV) Jacksonville, Fla.

• JIM MILLS, Chicago freelance air personality, signed by WCFL, that city, for new nightly musical series.

• MAURY MAGILL, formerly air personality of WBBM-AM-FM Chicago, to WITH-AM-FM Baltimore in similar capacity.

• LEE WESTERN joins KIOA Des Moines, Iowa, as air personality.

• WALLY KING, formerly air personality of WJW-AM-FM Cleveland, to KYW-AM-FM, that city, in similar capacity, replacing JOHNNY BELL, who shifts to WINZ-AM-FM Miami.

Representatives

• JOHN G. STILLI, sales manager of KDKA-TV Pittsburgh, appointed account executive of Television Advertising Representatives Inc., N.Y.

• DONALD L. WILKS, formerly of Peter Pan Foundations, to Good Music Broadcasters, N.Y., as radio account executive.

• NINA FLINN, formerly of Webb Assoc. as tv director, named assistant to director of sales development, Bolling Co., N.Y.

Programming

Mr. Cantor

Mr. Bertero

• B. GERALD CANTOR, chairman of National Theatres Inc., L.A., and JOHN B. BERTERO, NT president, appointed to board of directors of National Telefilm Assoc., N.Y., subsidiary of NT. Also named to NT's board were CHARLES L. GLETT and JACK M. OSTROW, National Theatres directors. Mr. Cantor also is president of Cantor, Fitzgerald & Co., Los Angeles investment bankers. Mr. Bertero was named president of NT in October 1958 and has served on company's board since 1952.

• ERIC H. HAIGHT has resigned as vp and treasurer of National Telefilms Assoc., N.Y. Mr. Haight explained that he joined NTA in 1957 to help develop more adequate financial facilities for NTA and this activity was completed with National Theatres' acquisition of NTA. He will serve as consultant to NTA for next several months.

• JACK BERCH, account executive of Transfilm Inc., N.Y., appointed senior vp in tv division.

• ELLINGWOOD (BUD) KAY, story editor of Screen Gems, will join Independent Television Corp., Hollywood, April 20 as executive story editor. He also will be responsible for program development.

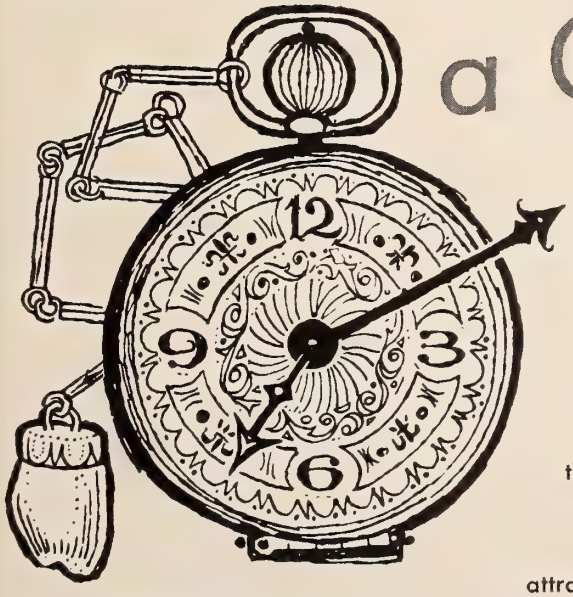
• HERB JACOBS, executive vp of Tv Stations Inc., broadcaster organization for purchasing of film programming for member stations, elected president.

• WILLIAM BEAUDINE JR., formerly production manager of MGM-TV, appointed film production manager, Independent Television Corp.; CLAUDE TRAVERSE, formerly of NBC, named tape production manager, ITC, and PHILLIPS WYLLY, previously tv producer of Compton Adv., appointed production assistant and liaison to coordinate film, tape and live activities of ITC.

• FRANK SHEEHAN, formerly of Ziv Television Sales, named western district manager of Arrow Productions, residual sales subsidiary of Independent Television Corp.

• ELLINGWOOD (BUD) KAY, formerly story editor of Screen Gems Inc., named executive story editor for Independent Television Corp., Hollywood.

• MORT STEIN, formerly of Lou Lilly Productions, L.A., appointed manager of new west coast office of Music Makers, musical commercials for radio-tv, at 128 N. Doheny Dr., L.A. Telephone: Hollywood 4-7800.



• MICKEY GROSS, formerly studio manager of California Studios, to Fanchon & Marco, booking and production agency of Scott Radio Labs, L.A.

• TOM BUCHANAN, previously of Compton Adv., to Warner Bros. Pictures, Burbank, Calif., in advertising department.

• EDWARD ADAMSON, formerly contract writer of CBS, signed as associate producer and head writer on Four Star Films' tv series, *Richard Diamond, Private Detective.*

• BURT SCHULTZ, formerly of Arthur P. Jacobs Co., to public relations department of National Telefilm Assoc., N.Y.

• ADRIAN SPIES, writer of two original dramas for this season's *Westinghouse-Desilu Playhouse,* "My Father, the Fool," and "Chez Rouge," signed to long-term staff contract to write for this series and other Desilu productions

The expected resignation of Victor R. Hansen as assistant attorney general in charge of the Justice Dept.'s Antitrust Div. (BROADCASTING, March 23) was submitted last week, effective in the next two weeks. He said he plans to set up a law partnership in Los Angeles. Robert A. Bicks, assistant antitrust chief, has been mentioned to succeed him.

John W. Gwynne has resigned as chairman of the Federal Trade Commission. It was understood he wants to leave for personal reasons, but no date has been set. His seven-year term normally would expire in September 1960. He has served on the FTC since 1953 and as chairman for 3½ years.

Mentioned as possible commissioners were Earl W. Kintner, FTC general counsel, and Harry A. Babcock, FTC executive director; or the job might go to some GOP congressman defeated in the 1958 elections. Edward T. Tait, an FTC member since 1956, is in the running for next chairman.

and to serve as consultant on new projects.

Equipment & Engineering

• ARTHUR L.B. RICHARDSON, general counsel and secretary of Sylvania Electric Products Inc., elected vp.

• RENE SNEPVANGERS, formerly chief engineer, Fairchild Recording Corp., Long Island City, N.Y., named director of engineering and GEORGE COHEN, factory sales representative, named marketing manager.

• FRED M. LINK appointed communications equipment consultant for marketing and product design at RCA, Camden, N. J. He comes from DuMont Labs where he worked on land mobile communications after selling radio company bearing his name.

• JOSEPH D. CONNORS, general foreman of Sylvania's Seneca Falls, N.Y., plant since 1954, appointed manufacturing superintendent of that tv picture tube plant.

• ALLEN B. PITTS, with Sylvania since 1949 at Seneca Falls, N.Y., plant, placed in charge of Sylvania Electronic Tubes' "bonded shield" picture tube manufacturing program.

• FREDERICK G. PLETT, supervisor of industrial engineering at Sylvania's Hillsboro, N.H., semiconductor plant, promoted to manufacturing superintendent.

• WILLIS C. BEECHER, consulting engineer, to Page, Creutz, Steel & Waldschmitt, Washington. Mr. Beecher was formerly with consulting firm of Kear & Kennedy.

• WILLIAM PAUL NOVACK named supervisor of manufacturing engineering and CARLYLE MOORE, manager of technical reproductions, technical products division, Packard Bell Electronics, L.A. Mr. Novack was formerly with Foster Transformer Co., Cincinnati, and Mr. Moore, with Stancil-Hoffman, L.A.

• ANDREAS KRAMER, with Audio Devices Inc., N.Y., since 1951, appointed chief engineer of company's subsidiaries, Audiotape Corp. and Audio Manufacturing Corp.

• EARL L. NISSEN, formerly export sales manager, Amana Refrigeration Co., Amana, Iowa, appointed consumer products sales manager of Motorola Inc's. international operations. STUART F. MALCOLM, formerly export manager, A.J. Alsdorf Corp., Chicago, named staff assistant to director of operations. HENDRIX G. BLUE promoted to local advertising manager for all consumer products, Motorola, Chicago. GEORGE MAHONEY named sales promotion manager for home and automobile radio, and GLORIA MINER, advertising production supervisor.

Allied Fields

• LEE WAGNER, first publisher of New York *Tv Guide*, to Tv Junior Publications, N.Y., as head of staff for *Junior Tv*, monthly magazine.

• PHILIP M. BOTTFELD, Benton & Bowles, N.Y., account executive and member of merchandising committee, has resigned to establish his own business as marketing and communications consultant.

• JOSEPH W. WALSH, formerly of Kenyon & Eckhardt, named director of premium sales co-ordination of Broadcast Specialty Co., N.Y., contest promotion company for radio-tv.

• WILLIAM J. HARRIS, Dallas, was elected vp of American Federation of Musicians AFL-CIO, succeeding CHARLES L. BAGLEY, L.A., retired. CHARLES L. KENNEDY, president of AFM's San Francisco local, elected to AFM board to fill vacancy created by Mr. Harris' promotion to vp.

• BILL GRIFFITHS resigns as assistant general manager of WELM Elmira, N.Y., effective April 15 to become sales manager of John D. Mavor, Horseheads, N.Y., national homes dealer.

• DR. EDWARD LESTER LLOYD, 55, until last year executive vp of A.C. Nielsen, Chicago, died March 30 in his home in Oxford, England. After leaving Nielsen, Dr. Lloyd established office in London as business consultant.

Government

• RALPH H. GARRETT, FCC engineering staff member since 1945, appointed chief of aural, new and changed facilities branch of Broadcast Bureau's broadcast facilities division.

International

• GEORGE S. BERTRAM, advertising manager of Swift Canadian Co. Ltd., Toronto, Ont., re-elected president of Bureau of Broadcast Measurement, Toronto, co-operative research organization. Directors elected were: W. H. ERSKINE, vp and managing director of J. Walter Thompson Co. Ltd., Montreal; ERNEST T. GATER, vp, Sterling Drug Mfg. Ltd., Aurora, Ont.; RALPH T. SNELGROVE, president, CKBB Barrie, Ont.; T. RALPH HART, vp and radio-tv director of Spitzer & Mills Ltd., Toronto; and W. CLIFFORD WINGROVE, assistant manager, CFPL-TV London, Ont.

MEDIA NOT COMMUNICATING?

SDX panel says public short-changed quality or quantity of information needed

The U.S. public is not receiving the information it needs from the communications media.

This was the general conclusion reached by a panel appearing on the second portion of *The Great Challenge* series dealing with the informational media over CBS-TV on April 5 (2:30-3:30 p.m.). The only dissenter was Charles A. Sprague, editor-publisher of the *Oregon Statesman*, Salem, Ore., and former governor of that state, who insisted the public is "getting it (information) more in quantity and better in quality than ever before."

Those on the panel who questioned the adequacy of information relayed to the public were Arthur Schlesinger Jr., professor of history at Harvard U.; Robert D. Swezey, executive vice president and general manager of WDSU Broadcasting Corp., New Orleans and James Reston, chief of the Washington bureau of the *New York Times*. James Hagerty, Presidential news secretary, hedged, saying he was "not sure."

The Deficiencies • Eric Sevareid, CBS commentator, who served as moderator, asked the panel to describe the kind of news the public was not receiving, both qualitatively and quantitatively. Mr. Schlesinger pinpointed these areas as communist China and nuclear tests, including fall-out.

Mr. Reston asserted there was a definite deficiency in coverage of "social and cultural news" and cited as an example of sparse coverage a speech by educator Robert Hutchins analyzing the problems of society as a whole. Mr. Swezey said the public is not "getting sufficient information on how our government is being run" and said he personally was "concerned about defense budgets." He added that as "a television man," he felt "very sensitive" that the medium was not able to cover Congress or committee hearings.

Mr. Hagerty replied to the criticism centering around Red China by saying that he personally would like to see trained American newsmen reporting from Red China. But since the decision of the U.S. Government is to ban Americans from Communist China, he would abide by it.

Mr. Sprague was asked how his readers can be helped when "conflicting statements" are issued by well-known individuals on vital subjects, such as the U.S. defense position. He replied that public opinion often was divided on significant issues but added that for the most part, most of the people "are inclined to accept the decision of those who have official responsibility, which is the President."

Mr. Reston made the point that more and more, the Washington correspondent has to rely on Congressional committees to disclose news but said he believed that as a result news "comes out now in a greater flow."

Government Suppression • The panel generally agreed there was a tendency on the part of defense units in the government to put the label of "national security" on information they wanted to withhold. Mr. Hagerty agreed, but pointed out that on occasions, when the Government is in the process of formulating a policy or decision, there is considerable study and work before the policy or decision is completed. Even though a newsman learns of a segment of this story, Mr. Hagerty reported, he will not discuss it until it is approved by the President.

Mr. Swezey reported that Mr. Hagerty was not giving radio-tv sufficient credit for the amount of news coverage and analysis of the news in depth that actually is carried on the air. He said that, compared to other news media, radio and television are doing "a very good job" but conceded that, like the newspapers, they are not doing "the full job."

RKO Teleradio earnings on the rise

The RKO Teleradio Div. of General Tire & Rubber Co. had "one of the finest quarters in its history" with a profit of about $1.7 million, William O'Neil, president of GT&R, told the Company's stockholders in Akron last week. Earnings for the parent company for the first quarter ended last Feb. 28 were reported at a record $6,034,547, equal to $1.16 per common share, compared with $1,754,124, or 30 cents a share for the comparable 1958 quarter.

No breakdown was available of income from the various stations the RKO Teleradio Division owns and operates: WOR-AM-FM-TV New York, WNAC-

IUE complains to FCC as 5 stations ax film

Five television stations last week found themselves in the middle of a dispute between the International Union of Electrical, Radio & Machine Workers (AFL-CIO) and General Electric Co.

The cause: A 30-minute IUE film on industry decentralization and resultant unemployment. This was found too controversially one-sided by WABC-TV New York (but WABC-TV ran the film at 11 p.m. Thursday night); WMAR-TV Baltimore, WTOL-TV Toledo, WLWD (TV) Dayton, Ohio, and WLWA (TV) Atlanta, Ga.

The result: IUE President James B. Carey filed with the FCC an official complaint against the stations, charging "arbitrary censorship."

Cast as Villain • The half hour film, entitled "Help Wanted," deals with unemployment resulting from decentralization policies of major electrical companies. It singles out General Electric as a prime example of this trend.

The union bought 30 minutes on 26 tv stations, but five refused to run the film.

Mr. Carey charged in his letter to FCC Chairman John C. Doerfer that the stations accepted the program but later refused to run it. He asked the FCC to "take appropriate action against these licensees to compel them to sell IUE time requested for, and to broadcast, its program."

The IUE president said that the stations' action is "a serious violation of their obligation to broadcast in the public interest."

He continued:

"To reject a program such as 'Help Wanted' on the ground that it is controversial or objectionable is unwarranted censorship, intended to effectuate some editorial prejudice of the stations, if not the commercial and industrial policies of their owners and advertisers."

A spokesman for the FCC said that the complaint had been received and that the stations identified would be asked for their version of the story. This is routine practice, he emphasized, before the Commission can decide what to do about the complaint.

Broadcasters Respond • Executives of the four stations which did not carry the program told BROADCASTING:

Robert E. Dunville, vice president and general manager of Crosley Broadcasting Corp., owner of WLWD and WLWA, said the program was turned down because it violated a Crosley policy of not accepting advertising which is disparaging or negative. Mr. Dunville said he had screened the film himself and found it slanted. He also found objectional, he said, the film's references to GE and its president, Ralph J. Cordiner.

Ewell K. Jett, director of WMAR-TV, said that the film was accepted subject to screening. It arrived Wednesday for Sunday showing, Mr. Jett said, and after screening there was not enough time for the agency to meet with its client to edit out the objectionable features.

Mr. Jett said that he could not approve showing the program because it contained "possible defamatory material."

Commission-Oriented • The Baltimore broadcaster, a former FCC commissioner, emphasized that it is the policy of WMAR-TV to make time available to carry programs of controversial nature. He said WMAR-TV carries the United Steel Workers program the first Sunday of each month. He also said that he offered IUE participation in a future discussion program on unemployment and decentralization.

Frazier Reams, president, WTOL-TV, declared that the film was reviewed by Tom Bretherton, executive vice president; Bob Krieghoff, program director, and himself, and all agreed "that we should not run this film because it was not in the public interest to do so." He added: "We believe we made the

3-Cup Champion in the MEMPHIS TV MARKET

Channel 3 is First By All Surveys

No wonder in Memphis they say "There's more to see on Channel 3." WREC-TV's combination of the finest local programming and the great shows of the CBS Television network deliver the greatest audience in the Mid-South area. See your Katz man soon.

Here are the latest Memphis Surveys showing leads in competitively-rated quarter hours, sign-on to sign-off, Sunday thru Saturday:

best decision, based on the facts and our public obligation."

Mr. Reams pointed out that the film portrayed graphically and with a strong appeal the plight of some of the people who had lost their jobs because of the closing down of plants. He also remarked that there is no GE plant in the WTOL-TV area, and that he knows of no other company operating in this area planning to "decentralize."

The following statement was issued last Thursday (April 9) by Joseph Stamler, vice president and general manager of WABC-TV New York:

"The film, 'Help Wanted,' when originally contracted for by the agency for the client, was done so on the basis that it would be of a non-controversial nature. After being screened by the station, it was found that it was of a controversial nature and judged unacceptable under the terms of the contract. The station suggested to the agency that the film be resubmitted as a 'controversial issue' program, to be reviewed and processed in this light, taking into consideration the policies of the station, as well as those of the FCC, toward a controversial program. The film was resubmitted on this basis and found acceptable for telecasting by the station."

The film was ordered through station reps by the Washington advertising agency of Maurer, Scheubel & Fleischer.

When WABC-TV ran the film last Thursday night, it carried a disclaimer to the effect that the views expressed in the film were not necessarily those of the station itself.

Cool ABC project

ABC Radio plans to give its summertime-product advertisers a boost with "Play It Cool," a 13-week promotion involving both on-air promotion and merchandising aids for marketing departments. Categories to be covered are easy-to-prepare meals, appliances, personal care and overnight trips.

Throughout the summer ABC Radio personalities will speak up for the products, often immediately before or after commercials, and the stations are to supply local-slant promotion.

Acquire Katz stock

Harry Kullen and Charles W. Shugert head a group of employes acquiring the stock of the Joseph Katz Co. of New York. Mr. Kullen has been with the agency for more than 30 years and served as president since the death of Joseph Katz last year. Mr. Shugert is a former vice president of Benton & Bowles and account supervisor on Continental Oil Co. He is executive vice president of the agency. Paul Carpenter is secretary-treasurer of the agency. He formerly was with Grant. Stock was acquired from Mrs. Katz and two sons. The Joseph Katz Co. of Baltimore is associated with the agency.

Mr. Kullen

Mr. Shugert

Streamlined 'avails'

NBC Spot Sales has devised a new form, consolidating data on radio stations it represents, in the hope of simplifying the agency timebuyer's job.

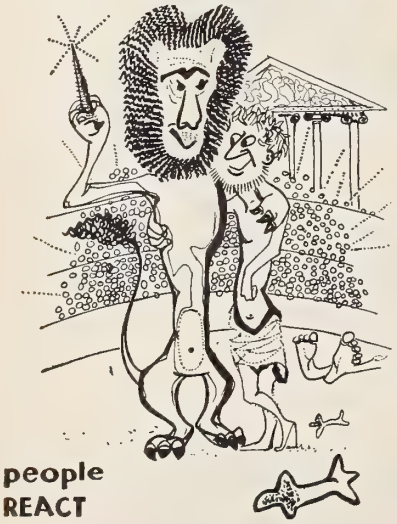
George S. Dietrich, director of NBC Radio Spot Sales, said each station is providing his organization with copies of a standard four-page folder, which contains marketing and programming data in the inside pages. The cover page is to be used as an availability sheet by NBC Spot Sales. Mr. Dietrich said the information in the single folder previously appeared on as many as four separate sheets and buyers often had to ask for more of the sheets.

NEWS COMPLEXITY
Public knowledge gap widens—Mickelson

A combined and constant effort by news makers, media and the public itself will be necessary to narrow the gap, now increasing "steeply," between "the complexity of events of our time and the public's ability to understand them."

Sig Mickelson, vice president of CBS Inc. and general manager of CBS News, called for this three-way attack on what he called the "widening comprehension gap" in a speech prepared for delivery today (April 13) at a joint luncheon of the Texas Assn. of Broadcasters and members of the Texas State Legislature. The occasion is TAB's spring meeting today and tomorrow at Austin.

Mr. Mickelson said television is doing much to "remedy its own shortcomings" in regard to the gap between information and the understanding of it, but that it is being hampered by unjustifiable restrictions—such as the FCC's Lar Daly decision holding that equal time requirements apply to newscasts as well as straight political broadcasts (BROADCASTING, Feb. 23, *et seq.*).



Daly Decision • Carrying on the attack first launched on that decision by CBS President Frank Stanton (BROADCASTING, March 16), he also said FCC's latest Daly ruling—last week, requiring that Mr. Daly as a write-in candidate must prove he was a legally qualified candidate—"Is encouraging in a small way, even though it would probably not apply to primaries." Moreover, he said, this latest ruling "does not alter the bigger picture substantially—a picture in which there are a dozen or even 18 legally qualified candidates for President in a national election."

He said "the ascendancy of television to a role equal to that of newspapers in the electoral process would explain the increasingly large voter turnout that began with the age of television," and that "a blackout of political coverage by television would be a staggering loss to the nation's voters." Just such a blackout "would inevitably occur if television were forced to grant equal time to all candidates in news broadcasts."

The information process, Mr. Mickelson said, "must work all the way up and down the scale from federal government to the smallest local political unit. . . . Concealment of news or its control at any point may give encouragement to those who may wish to control it at some other point, and any concealment of news on any level, except in the interest of national security, denies essential information to a public which, in a democracy, must be informed."

Narrowing the Gap • He outlined

JUST LIKE ANDROCLES AND THE LION

people REACT to the voice and vision of NBC in South Bend - Elkhart

call Petry today!

WNDU-TV CHANNEL 16

BERNIE BARTH & TOM HAMILTON

ways CBS is working to narrow the "comprehension gap": "expanding its reporting staff, doing more original reporting and encouraging more specialization among its reporters . . . producing more programs relating to the complex problems of our time and scheduling more of them in maximum audience periods."

But he warned that neither media nor a combination of media and news sources can do the job alone: "A third participant is necessary: the consumer of news—the listener, reader, viewer; in short, the general public. We can program until our image orthicon tubes wear out and our towers crumble; the newspapers can print until their presses disintegrate; but it won't do any good unless the public is interested and has some minimum background for information.

". . . . We must assume that it is not necessary to operate on a kindergarten level and that it is not our function to make everything so palatable and so fascinating that it can compete with westerns, variety shows or panels. There must be some give and take if we are to succeed. This simply means that the schools, the home, the churches, the clubs, the lodges and public meetings have responsibility too, a responsibility for creating a climate in which information is welcomed; indeed, demanded."

He called upon broadcasters to "look to the quality and quantity of your information programs and to the character of the people who produce them," and upon legislators to join with broadcasters in the campaign to open up the sources of news and keep them open.

CBS' Dulles report

A strong defense was voiced last week by Sig Mickelson, CBS vice president and general manager of CBS News, of a report broadcast by CBS Radio on Monday (April 6) that Secretary of State Dulles had decided to resign. Mr. Mickelson's statement was prompted by a comment from Presidential News Secretary James Hagerty that the broadcast constituted "about as irresponsible reporting as I know of. . . . This is not true."

Mr. Mickelson delivered his statement last Tuesday (April 7) during the Peabody Awards Luncheon in New York (see story, page 72). He said that Mr. Hagerty had asked CBS News to carry "a correction," but Mr. Mickelson said that "CBS News sees no reason . . . to correct the story that it obtained from a responsible source and which it broadcast in good faith."

Mr. Mickelson pointed out that CBS News did not state or imply that Secretary Dulles had resigned but that sources in Europe said that the Secretary of State has decided to resign.

• Datelines

WASHINGTON • MBS surfaced early in the race to interview crew members of the atomic submarine *U.S.S. Skate* which docked Tuesday (April 7) at Groton, Conn., after a long cruise under the north polar ice cap. While a news crowd waited for the sub to come into port, Mutual caught up with Lt. Bruce I. Meader in Washington, D.C., where he was flown April 3 by helicopter while the sub was still at sea. Lt. Meader had been dispatched to deliver pictures taken during the voyage of the *Skate*. In an exclusive interview for Mutual's *World Tonight* (8:05-8:30 p.m. EST), Lt. Meader described the trip.

SAN FRANCISCO • The report of an escaped cobra snake from a San Francisco snake dealer was revealed as a hoax by KSFO there. Acting on a tip from a listener that a similar incident had happened in Denver, KSFO newsman Aaron Edwards checked with the Denver police and the *Denver Post-Dispatch*. He told the San Francisco police what he had found out: seven years ago in Denver the same thing had happened to the same man.

A deputy located the loser of the snake and had him call Mr. Edwards. The resulting telephone conversation, which indicated a publicity hoax had been perpetrated, was taped, then given to the San Francisco police.

LOS ANGELES • Lloyd Perrin, KMPC Los Angeles newsman, was cruising in a mobile news unit within a few blocks of a gun battle that broke out on Washington Blvd. there. He sped to the scene to find that a policeman had been shot. The newsman's exclusive broadcast from the scene was recorded, repeated on newscasts and sent to other stations.

SEATTLE • KING-TV Seattle has covered a two-week session of the Washington State Legislature. For the live telecasts, said to be the first direct from Olympia, KING-TV interrupted programming and later broadcast a 15-minute summation each evening.

Changing hands

ANNOUNCED • *The following sales of station interests were announced last week, subject to FCC approval:*

• WERC-AM-FM Erie, Pa.: Sold to Cleveland Broadcasting Co. (WERE-AM-FM-TV Cleveland) by WERC Broadcasting Corp. (Joseph L. Brechner, principal owner) for $270,000. Mr. Brechner has interests in WHMS Charleston, W.Va., WLOS-AM-TV Orlando, Fla. WERC is on 1260 kc with 5 kw, directional antenna, different pattern day and night, and is affiliated with ABC. WERC-FM is on 99.9 mc with 9.7 kw.

• KDAN Eureka, Calif.: Sold to KDAN Inc., owned by James F. Hadlock and Naum Healy, owner of KBUC Corona, Calif., for $225,000 by W.H. Hansen, president and general manager. KDAN is on 790 kc with 5 kw day.

• WETO Gadsden, Ala.: Sold to Airmart Radio Stations Inc. by C.L. Graham (who will retain sole ownership of WANA Anniston and WPID Piedmont, both Alabama) for $85,000. Airmart Radio is equally owned by William R. McDaniel (onetime public relations director for WSM Nashville, Tenn.) and Melvin Lewis. The sale was handled by Paul H. Chapman Co. WETO is on 930 kc with 1 kw, day; and an application is pending before the FCC for an increase to 5 kw.

• WYNN Florence, S.C.: Sold to Joe Speidel III, who owns WOIC Columbia and WPAL Charleston, both South Carolina, by Vernon H. Baker for $50,000. The sale was handled by Blackburn & Co. WYNN is on 540 kc with 250 w, day.

APPROVED • *The following transfers of station interests were approved by the FCC last week (for other Commission activities see* FOR THE RECORD, *page 118):*

• WSOC-AM-FM-TV Charlotte, N.C.: Sold to Carolina Broadcasting Co. by WSOC Broadcasting Co. (E.E. Jones, Hunter Marshall, R.S. Morris and others) for $5.6 million. Carolina Broadcasting Co. is owned by Miami Valley Broadcasting Corp. (WHIO-AM-FM-TV Dayton, Ohio) which is principally owned by the James M. Cox family. Comr. Robert Bartley dissented on the multiple ownership issue.

Other Cox stations include WSB-AM-FM-TV Atlanta, Ga., and 42.5% of WCKT (TV) Miami, Fla. Newspapers in the Cox group are: *Atlanta Journal* and *Constitution, Miami Daily News, Dayton News and Journal Herald*

and *Springfield* (Ohio) *News and Sun.*

WSOC-TV is on ch. 9 and is affiliated primarily with NBC-TV. WSOC is on 1240 kc with 250 w and is affiliated with NBC. WSOC-FM is on 103.5 mc with 35 kw.

• WGAY, WAYL-FM Silver Spring, Md.: Sold to Connie B. Gay (interests in WTCR Ashland, Ky., WFTC Kinston, N.C., KITE San Antonio, Tex., and WYLD New Orleans, La.) by Tri-Suburban Broadcasting Corp. for $456,000. Comr. Robert Bartley dissented on the multiple ownership issue. WGAY is on 1050 kc with 1 kw, day. WAYL-FM is on 99.5 mc with 20 kw.

• KCUB Tucson, Ariz.: Sold to Boffard Broadcasting Corp. (Ralph R. Boffard) by Gordon Broadcasting of Tucson for $200,000 and agreement that assignor will not engage in radio business for 5 years within a 25-mile radius of Tucson. KCUB is on 1290 kc with 1 kw and is affiliated with NBC.

• KXII (TV) Ardmore, Okla.: Sold to Texoma Land Television Co. by estate of John F. Easley for $160,000. This grant was conditioned that Texoma may continue to operate KXII (TV) from its existing transmitter site under special temporary authorization only for the time specified in the modified construction permit for completion of construction or additional time as the FCC may allow. The Commission also granted the KXII (TV) application to move the transmitter site and make various equipment changes.

Texoma Land Television will be owned 85% by the same group that owns KADA, KTEN (TV) Ada, Okla., (Bill Hoover and family) and 15% by the selling group. Comrs. Rosel Hyde and T.A.M. Craven abstained from voting. Comr. Robert Bartley dissented on the assignment on the overlap issue.

KXII (TV) is on ch. 12 and is affiliated primarily with NBC-TV.

• KHON Honolulu, Hawaii: Sold to KHON Broadcasting Co. (H.G. Fearnhead, president) by South Pacific Broadcasting Co.. (H.G. Wells Jr., president) for $125,000. KHON is on 1380 kc with 5 kw.

KOMO-TV joins ABC

KOMO-TV Seattle joins ABC-TV as a primary affiliate on Sept. 27, it was announced jointly last week by W.W. Warren, executive vice president and general manager of KOMO-TV and Alfred R. Beckman, ABC vice president in charge of tv station relations. KOMO-TV (ch. 4) became an affiliate of ABC-TV in October 1958, at which time it was announced the station would become a primary affiliate, effective Dec. 10, 1959.

Five indies go MBS

Mutual reports affiliation applications from 17 stations in the past six weeks, five of which (all independents) have been signed. KATR Corpus Christi, Tex., joined last week along with KSIG Crowley, La., and WCBC Anderson, Ind. In March the network added KMRC Morgan City, La., and WELY Ely, Minn.

Teachers endorse etv

A survey of educational television in schools of Washington County, Md., by the local board of education shows that 83% of teachers queried prefer to teach with the aid of tv. These teachers also think the quality of instruction has improved since the advent of the county's closed-circuit etv network.

A random sampling of 2,567 pupils indicates that 58% feel they learn more in a classroom with tv than without. Sixty per cent said they study more and 68% that tv classes require closer attention. Seventy-eight per cent of 520 families in the area favor the etv experiment; 54% said it gives children a better education; 15% said results were poorer.

A warning that etv could be used "in the wrong way" was another conclusion from the survey. Television can emphasize uniformity and "bring on the age of 'Big Brother is watching you'," the report said.

Day's work

The capture of an armed robber is credited to News Director Bob Scott of KRIZ Phoenix, Ariz., by the local sheriff, according to the station.

Mr. Scott received the tip that a liquor store was being robbed. He arrived at the store as two masked men escaped in an automobile. The news director, after recording the license tags, went into the building to find a third gunman holding a deputy sheriff at gunpoint. Following a brief scuffle, the gun was knocked from the man's hand and Mr. Scott kept him covered while the deputy sheriff left to chase the fugitives. They later were apprehended.

The KRIZ staffer was presented with a plaque and transistor radio by the sheriff for "an unquestionable act of bravery."

BETTER SOUND, BIGGER REVENUE

WLW tries high quality approach to am operation, and it works

A new, big-budgeted version of "modern radio" is paying off in larger audiences and more sponsors.

The formula consists of a combination of high-fidelity, low-distortion signals plus easy-listening music.

WLW Cincinnati, a 37-year-old clear-channel station which had been plagued by rating and sponsor troubles during the television era, has discovered a special type of modern radio that is now paying its way.

The cost? Plenty—$300,000 over a two-year-plus period, more than many a tv station costs to build. But WLW is getting its money back.

In 1957 WLW set out to prove that technical improvement and adult programming could provide radio's answer to the television problem.

After sagging several years following tv's arrival, the station is happily counting (a) its growing audience and (b) its money as a result of the mechanical and program upgrading. The job was expensive in the case of a 50 kw station WLW concedes, but lower power stations could do it for less.

Oust Rock and Roll • WLW's concept differs widely from the top-40-news program format widely associated with the term "modern radio." After trying for years to out-rock, out-roll and out-news its local competitors with discouraging results, the station decided it might beef up its local popularity by taking two steps:

- Rebuilding the entire mechanical plant to produce a signal it hoped would be better than any fm station, and
- Revamping the music format from song-shop favorites to sweet-sounding standards and show tunes plus some classical.

As a result WLW claims to be the "highest-fidelity station in the world." R. J. Rockwell, veteran Crosley engineering vice president who directed the technical operation, has charts to show that the present WLW signal stays within plus or minus 1 db between 17 and 21,500 cycles—over 10 full octaves, with distortion of 0.3%.

He made the claims after Frank H. McIntosh, president of McIntosh Lab and inventor of amplifiers widely used in broadcasting and related fields, had conducted a series of measurements.

The Best Available • After testing the rebuilt equipment and the broadcast signal, Mr. McIntosh said: "WLW has really done something worthwhile in the advancement of high-fidelity for everyone. Those people fortunate enough to be within the primary range of this station can enjoy the very highest quality transmission available today to anyone.

"This is the only am station anywhere, to my knowledge, which has gone to this extent to provide listeners with high-quality transmission."

The oft-heard claim that am's 10 kc band limits the fidelity of am stations is met this way by Mr. McIntosh:

"It should be recognized that while fm is capable of this same order of fidelity, many stations have not achieved it because of limitations in microphones, preamplifiers, circuits and program sources. It is very satisfying to find a station, WLW, willing to go to the expense to make an am station at least in its primary area comparable with any other system of transmission."

Hi price fi

"What'll it cost?" That was what Robert E. Dunville, the Crosley stations' president-general manager, wanted to know when engineering vice president R.J. Rockwell suggested a hi-fi overhaul of WLW Cincinnati equipment.

"About $50,000," the innovator guessed, a figure that turned out to be slightly off.

The final bill: $300,000.

Mr. Rockwell, inventor of the patented cathanode modulation system transmitter, said the low distortion rate "makes possible the recreation of the loudest crescendo of full orchestra or the softest tone of muted strings."

Auto Radios Improve, Too • Concededly, a signal of this fidelity is most appreciated by those with high-quality receiving gear, Mr. Rockwell said. He added, however, that auto receivers and even low-cost am sets with narrow range now show improved quality in the new WLW signal. He ascribed this to the fact that both harmonic and intermodulation distortion have been reduced "to unbelievably low levels."

Harmonic distortion is not displeasing to most ears, Mr. Rockwell said. On the other hand intermodulation distortion is usually annoying. It is the result of two or more frequencies being mixed together. Two or more high-pitched instruments will cause the reproduction to be muddy and run together, Mr. Rockwell explained, and he demonstrated the effect on a series of radios ranging from a 12-speaker unit to a table radio and a little transistor portable.

"There seems to be a prevailing misconception that am stations are limited in their permissible bandwidth," Mr. Rockwell observed. "Actually this is not true. The basic allocations system for the am band was originally set up by the FCC to provide adjacent channel separation of 40 kc in the same area and sufficient geographical separation on the 10, 20 and 30 kc channels to minimize interference. As a result, high-fidelity transmission can be accomplished in the am band." For hi-fans he offered this tip, "Those with a hi-fi record player can add a good quality am tuner for less than $20." He demonstrated a low-cost tuner on a fancy speaker, with off-the-air music sounding just as good as closed-circuit when the switches were thrown back and forth.

Each unit in the station's amplifiers, lines, microwave and other portions of the mike-antenna system offered a new problem in redesign, he recalled.

Clean, faithful signals and pleasant music have their cultural rewards, but how about money? The program switchover was started more than a year ago; the mechanical changes three years ago.

"Results are showing on the business side," said Robert E. Dunville, president-general manager of the Crosley stations. "The increase in audience, especially in the metropolitan area, is most encouraging."

WLW's network business (NBC, ABC) for 1959 is down 14% over the same period last year; March is down an additional 4% from March 1958, a total loss of 18% in network business. The station expects this trend to continue through the year.

Interesting Figures • In 1958 national and regional advertising remained about the same as 1956-57, with a very slight increase.

But here's where the figures start to get interesting. Mr. Dunville said: "In our current national and regional sales as at the end of March, we are showing approximately 10% increase, and since the influx of this business started towards the end of February, it is expected this increase will continue."

Still more encouraging is the local picture. Several years ago WLW had cut its open one-minute rate from $100

to $80, following a national network and station trend. The music was mostly pop. News was strengthened by WLW's "Comex" news-weather operation.

"You could fire a shotgun at our schedule and not hit a local commercial," Mr. Dunville said. "Now we've got top metropolitan ratings and the business is coming in fast.

"And the salesmen really like the improved signal and the tuneful music," said Dick Osborne, assistant sales manager. "Prospects are more receptive."

The man at the statistical controls, K. T. Murphy, vice president-treasurer, is happy again. "Other radio station sales are going down; ours are going up," he said. "We expect to get the $300,000 equipment money back. I was impressed by the engineering and programming changes. Now that the money is coming in I'm even more impressed."

Ratings Zoom • Scott McLean, radio sales manager, said, "The February 1959 Nielsen metropolitan report again showed substantial increases in audience amounting to 146% as compared with the base of December 1957. As far as WLW's total station audience is concerned, popularity is up 98% compared to December 1957. The regional coverage, of course, has always been good.

"Our lead in the metropolitan audience is big news. The increase in metropolitan audience since December 1957 is: 6-9 a.m., December 1958 up 245%, February 1959 up 306%; 9 a.m.-noon, December 1958 up 85%, February 1959 up 153%, noon-3 p.m., December 1958 up 29%, February 1959 up 47%; 3-6 p.m., December 1958 up 172%, February 1959 up 208%."

Advertising agencies are taking note of all the doings at this pioneer station (700 kc 50 kw). Holmes Leeds, radio-tv director of Strauchen & McKim, said a client, Fifth Third Union Trust Co., has just bought a five-nightly musical program "for those who like better music and sound." He said the bank wants to reach people who are potential customers for trust service as well as local and commercial accounts. WLW's *Music for You* will reach "the executive type" with its blend of classical, semi-classical and standards, he explained.

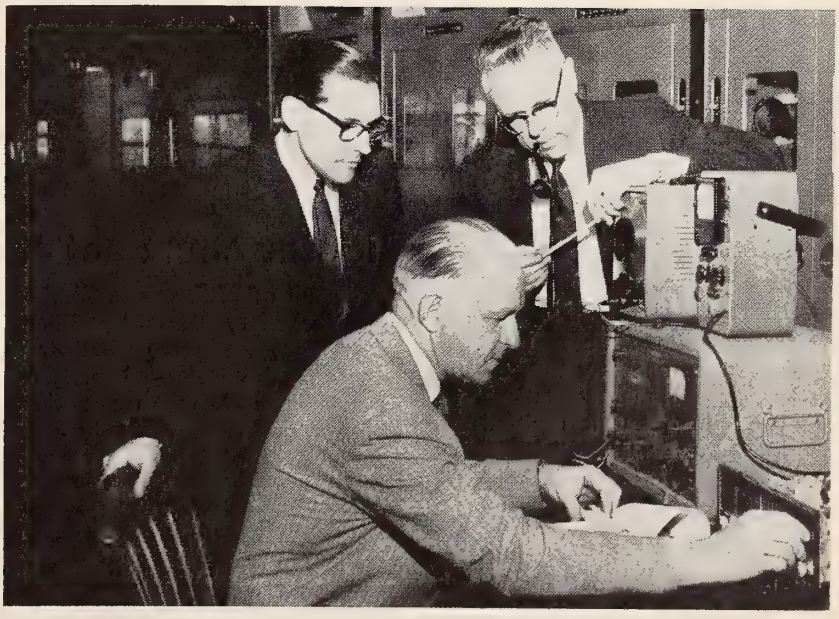
Night radio audiences are picking up in Cincinnati, Mr. Leeds said. "Radio has a definite place at night though the audience may never reach the pre-television levels," he said. "The WLW signal patterns closely to an fm signal in my home." Samuel Kendrick, the bank's advertising manager, and Edmund R. Strauchen, senior partner in the agency, like the music. "WLW is teaching the public to tune carefully now that it is broadcasting hi-fi," Mr. Leeds said.

Harold E. Peterson, of Stockton, West, Burkhart, feels the WLW signal is "much better than other am signals around here and is quite apparent on my car radio." He is account executive on the Ohio Bell Telephone-Cincinnati Suburban Bell Telephone contract on WLW (24 announcements weekly promoting use of the yellow books).

Amazing Reception • "It's amazing to me they get such fine am reproduction," he said. "The program changes also are a big factor in the increased local audience."

Ann Smith, radio-tv director of Ralph H. Jones Co., said Miami Margarine Co. is impressed with the results of its *Music for You* campaign for Nu-Maid margarine and Durkee salad products. Miss Smith said, "The mail is fantastic, with high sponsor mention. We are convinced better music can sell food, reaching an adult audience as well as college and high school students. Remember, a tremendous number of people take music lessons." The Jones and Stockton, West, Burkhart agencies are usually ranked one-two in Cincinnati billings.

Nelson Shaw, president of McAlpin Co., listed in the first three Cincinnati department store field, said its afternoon Bob Braun disc jockey program "gets tremendous listenership and brings in many requests for the merchandise advertised, particularly teenage sportswear." Mr. Shaw is vice president of the Mercantile Stores chain, of which McAlpin Co. is a unit. Braun Bros. Packing Co. (no relation to Bob Braun) and RCA Victor are among other pleased sponsors.



The WLW metamorphosis began three years ago when Mr. Rockwell said the station needed an auxiliary 50 kw transmitter. He promised Mr. Dunville a hi-fi signal on am if he built it and then rebuilt all equipment from mikes to antenna.

The decision was made and the rebuilding job got underway. It took two years, with the difference in quality starting to reach listeners' ears late last year as unsolicited letters came from the public.

WLW is just starting to promote its new sound and programming. Station breaks remind listeners of the hi-fi service.

"Everybody is enthusiastic about the quality," Mr. Dunville said. "They all are working a little harder. Mike personnel know they're sounding better. Engineers are interested. Sales people like it. We're proud of WLW again."

WLW operated with 500 kw power a score of years ago. "We have equipment to go on 500 again in a short time," Mr. Dunville commented. "And in hi-fi."

How high is hi-fi? • The quality of WLW Cincinnati transmission is tested by Frank H. McIntosh (seated), president of McIntosh Lab, after a $300,000 modernization of technical layout. Rebuilding of all equipment gives WLW the highest fidelity transmission of any am station, Mr. McIntosh said. Standing (l to r) are Clyde G. Haehnle, Crosley senior engineer, and R. J. Rockwell, Crosley engineering vice president and inventor of the Rockwell Cathanode modulation system.

Small markets urged to get rating service

A plan to attract more national business to radio stations in smaller markets by getting more complete audience measurements in those markets was proposed by Noel Rhys, executive vice president of Keystone Broadcasting System, at the annual meeting of Mississippi Broadcasters Assn. at Biloxi April 4-5.

"It is generally conceded that the small-town and rural radio outlets enjoy a higher listenership than radio stations in the larger markets," he said in a speech at the April 4 luncheon. "It is not unusual for a small-town station to enjoy a 10 or even 15 rating for its local programming, whilst the wired networks today command national ratings ranging from .9 to 3.5. The latter information is readily available to timebuyers whereas the former is not, except in scattered instances.

". . . I suggest that a national rating service be employed to serve the listenership requirements of the smaller markets. Basic station information could be obtained from a representative group of small-town and rural stations which would reflect the listening patterns of this type of radio outlet throughout the country. This could in effect serve these stations in the same manner that major markets are being measured currently. This information . . . could be invaluable to the timebuyer [in evaluating] availablities."

An Existing Service • Mr. Rhys said later he was thinking in terms of retaining some existing measurement service to do these ratings. He told the MBA that "we know that timebuyers rely on Nielsen Coverage Service to a very large extent in selecting markets" in the smaller counties, but that NCS "is a measurement of potential audience" and "certainly does not report habitual listenership or station loyalty."

While proposing more complete measurements as one way to get more business for small-market stations, he also offered some business pitfalls to avoid. He warned against "cheapening the rate structure to a point that is an actual 'giveaway.' Barter deals, whereby time segments can be sold nationally for less than peanuts, without financial return to the station involved, are not calculated to enhance the prestige or value of the radio medium. In point of fact, it is selling radio short and selling it down the river of no returns. Then there is the very doubtful procedure of donating time for premium gimmicks. Furthermore, to underwrite practices that actually deprive you of income that you had previously enjoyed is hardly a realistic way of building."

Mr. Rhys said Keystone now has 1,061 members and in 1958 enjoyed for the second year in a row the most successful year in its 18-year history.

RTES taps Pellegrin for presidential post

Frank E. Pellegrin, partner, vice president and secretary of H-R Representatives and H-R Television, has been nominated for president of the Radio & Television Executives Society, the New York organization made up of broadcast and agency executives. Nomination is tantamount to election. Donald H. McGannon, Westinghouse Broadcasting president, headed RTES in the 1958-59 season.

Other nominations included Sam J. Slate, general manager of WCBS New York, as first vice president; Ted Bergman, president of Parkson Adv., and Omar F. Elder Jr., ABC's secretary and assistant general counsel, as vice presidents; Mary McKenna, research-sales development director of Metropolitan Broadcasting Corp., as secretary, and Jay Smolin, director of advertising, United Artists Associated, as treasurer.

Board of governors: (for two years) Sam Cook Digges, CBS Films; Josef C. Dine, Dine & Kalmus; Jayne Shannon, J. Walter Thompson; P.A. Sugg, NBC's owned stations and spot sales; Robert H. Teter, Peters, Griffin, Woodward; (for one year) Robert J. Leder, WOR-AM-TV New York; Mr. McGannon, and (now serving with term ending May 1960) Ernest Lee Jahncke Jr., Edward Petry & Co.; Winfield R. Levi, BROADCASTING; Alfred L. Mendelsohn, Screen Gems, and David Channing Moore, Transcontinental Tv Corp.

All-star court action

The suit of Piedmont Publishing Co. to compel Mary Pickford and her husband Buddy Rogers to sell their stock in WSJS-TV Winston-Salem, N. C., is underway in Los Angeles Superior Court, which is concurrently considering the Pickford-Rogers countersuit for $750,000.

Piedmont, controlled by Gordon Gray, assistant to President Eisenhower, contends that in 1953 it was issued 1,000 shares of stock in Triangle Broadcasting Corp. (WSJS-TV license) and Miss Pickford 500 shares, at $100 per share, with Piedmont having an option to buy her stock within six years under a formula which would give her and her husband, to whom she assigned 225 shares, $126,812 or a profit of $76,812 on their $50,000 investment.

Rejecting the offer, Miss Pickford and Mr. Rogers filed a cross-suit alleging that she had been induced to withdraw her application for a tv station in Winston-Salem and go in with Piedmont on assurances the option would not be exercised and that the price now offered for the stock is designed to deflate its true value, which they say is at least $500,000.

AP radio-tv members number 1,879

A total of 1,879 radio and television stations held membership in the Associated Press at the end of 1958, compared with 1,702 at the close of 1957, Frank J. Starzel, general manager, announced last Friday (April 10) in his annual report to the membership.

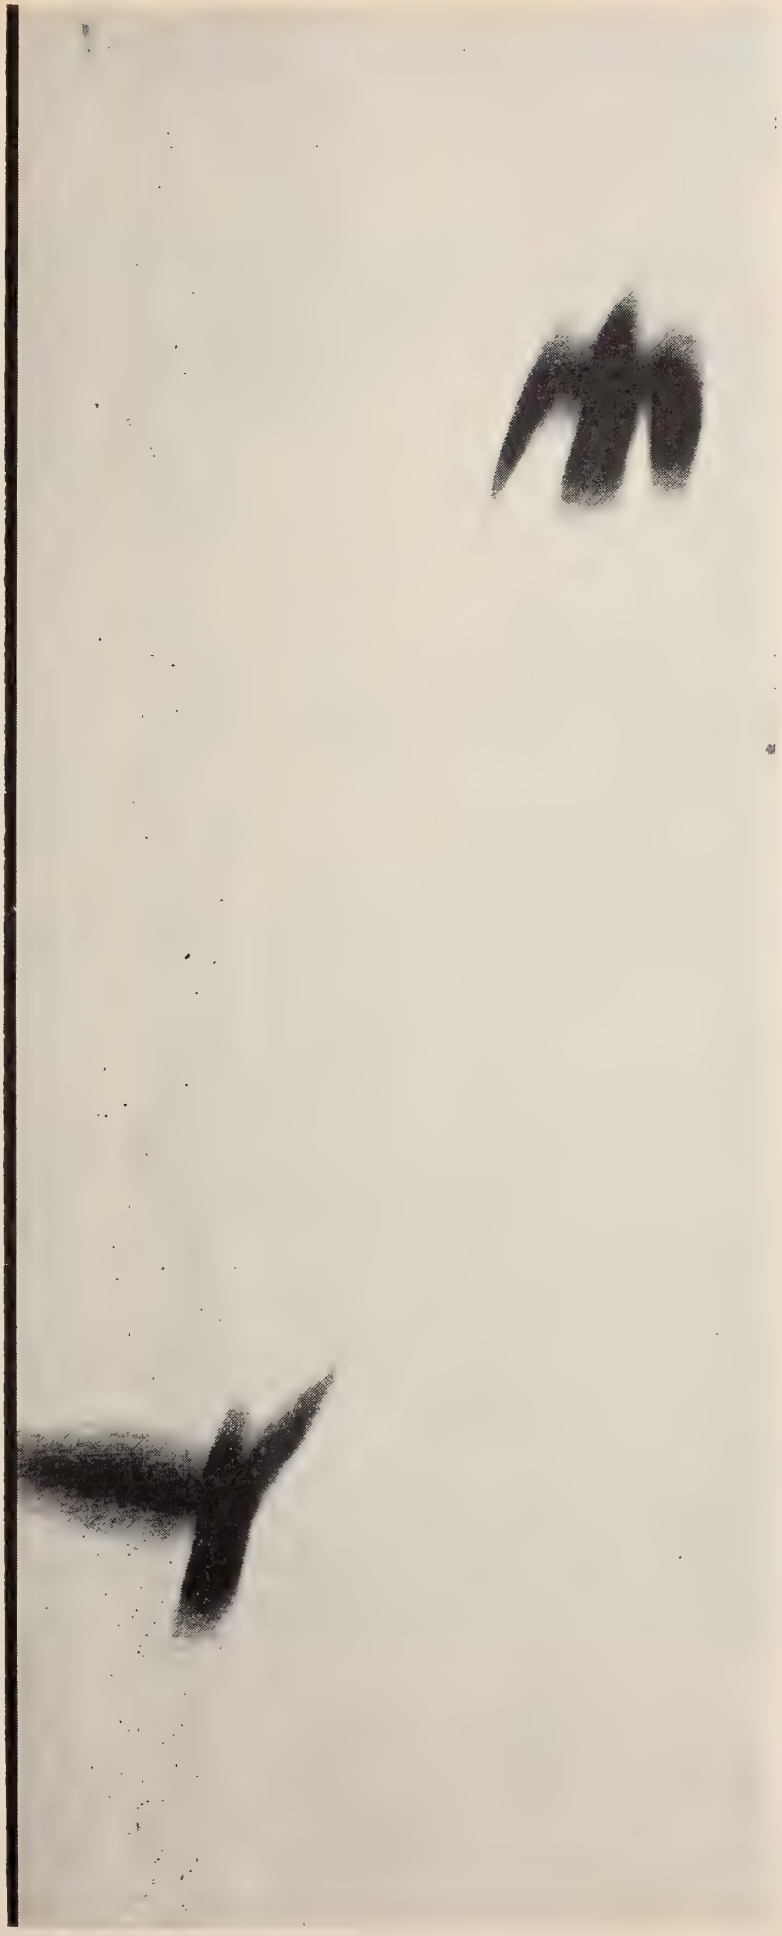
Mr. Starzel noted that the number of stations served by AP had almost tripled since associate membership first was offered in 1957. In television, he said, about 85 tv stations, previously served through common ownership with radio members, became associate members in their own right during 1958.

"As to the exchange of news by member stations," Mr. Starzel reported, "the increase in that activity is even more striking, with emphasis in 1958 on thoroughness and quality, rather than quantity. In spite of that, the quantity of news so exchanged continued to increase."

This exchange of news by member stations, he pointed out, was "especially helpful to coverage of almost 600 communities where there are radio members but no daily newspaper members."

Allen taken to court

A series of editorial attacks on the Oregon State Police administration broadcast by W. Gordon Allen, owner of KGAY Salem, Ore., has resulted in his indictment for slander.



Mr. Allen broadcast six-minute editorials five times a day for three weeks "to demonstrate . . . how tax money is being misspent." It was his March 23 editorial naming State Police Supt. H.G. Maison that resulted in the charges. The trial is set July 7.

An application from KGW-TV Portland to telecast the trial proceedings was turned down Thursday (April 9).

AP candidates named

The Associated Press Radio-Tv Assn. nominating committee has selected 12 candidates for six radio vacancies on the board of directors which are to be filled at the annual election in July.

Nominees: (Eastern district), 1-10 kw stations, Daniel W. Kops (incumbent), WAVZ New Haven, Conn.; A.E. Ferrise, WMMN Fairmont, W.Va.; sta-

The shape of flight

The shapes of things that fly have always been determined by the materials they are made of. Feathers form wings that are basically alike for all birds—and membrane forms an entirely different wing for insects. It takes thousands of years, but nature improves its materials and shapes, just as technology improves the materials and shapes of aircraft. But here, the improvements in materials are so rapid that designs become obsolete almost as soon as they are functional.

Today, our aeronautical designers and missile experts work with types of materials that didn't exist just a few short years ago. Steels are probably the most important examples: United States Steel Corporation has just developed *five* new types of steel for our missile program. They are called "exotic" steels because they have the almost unbelievable qualities necessary for unearthly flights.

The shape and the success of our space birds depend on steel.

USS is a registered trademark

USS **United States Steel**

tions with less than 1 kw, Al Larsen (incumbent), WALL Middletown, N.Y.; Joe M. Cleary, WESB Bradford, Pa.; (Southern district), less than 1 kw, Matt Bonebrake (incumbent), KOCY Oklahoma City; Charles P. Blackley, WTON Staunton, Va.; 1-10 kw, F.O. Carver, WSJS Winston-Salem, N.C.; Don Murray, WDBJ Roanoke, Va.; (Central district), less than 1 kw, John Engelbrecht (incumbent), WIKY Evansville, Ind., and Robert E. Schmidt, KAYS Hays, Kan.; (Western district), less than 1 kw, Ken Nybo (incumbent), KBMY Billings, Mont.; and Gene Shumate, KRXK Rexburg, Idaho.

Additional nominations, acceptable through April 30, may be made in the above categories upon written petition by three members of the association in the district where a vacancy exists. They should be sent to Oliver Gramling, AP, 50 Rockefeller Plaza, New York.

Judge keeps word on access in Indiana

An Indiana Criminal Court judge has made good on his promise not to restrict unduly electronic and pictorial coverage of the Connie Nicholas murder trial. He is convinced more than ever that the American Bar Assn.'s Canon 35 is "outmoded as the horse and buggy."

Judge Thomas J. Faulconer Jr. of Marion County Criminal Court promised last January that radio-tv and other newsmen could cover the court proceedings if they would stay "within the bounds of propriety" and not hamper a fair trial (BROADCASTING, Jan. 5).

There has been only one prohibition, a bar against live tv, which Judge Faulconer decided to impose because of the nature of the trial. Mrs. Nicholas is charged in connection with the death of Forrest Teel, drug firm executive. Moreover, he felt that live coverage might distract witnesses and jurors in the protracted Indianapolis trial.

Judge Faulconer described the conduct of radio-tv newsmen and photographers as "exemplary" and felt pictures of tv newsreel cameramen and still photographers have been taken "in a very unobtrusive manner that has not upset the decorum of the court."

Coverage has included tv newsreel pictures, tape-recording of testimony and periodic live radio broadcasts of the proceedings. Only twice has Judge Faulconer objected: one motion picture camera made too much noise and a tripod for tv newsreel equipment provided a visual obstruction.

No objections to coverage have been raised by either prosecuting or defense attorney or by Mrs. Nicholas herself.

SAFETY'S SAKE
Awards to stations, networks, syndicators

A total of 145 radio and 35 tv stations, two radio and two television networks, four syndicators and the owner of a station group are recipients of the National Safety Council's non-competitive public interest awards for 1958.

Announcement of the honors today (April 13) was accompanied by an encomium from Howard Pyle, NSC president, for the "tremendous contribution of mass communication media to the sharp reduction in the number of accidental deaths last year." Winners in the radio-tv-advertiser categories become eligible for the Alfred P. Sloan awards for highway safety, to be conferred later this year.

Cited for "outstanding leadership" were NBC Radio and NBC-TV; CBS and CBS-TV, and the Triangle radio and tv properties (WFIL-AM-FM-TV Philadelphia; WLBR-TV Lebanon-Lancaster, Pa.; WFBG-AM-TV Altoona-Johnstown, Pa.; WNBF-AM-FM-TV Binghamton, N.Y., and WNHC-AM-FM-TV New Haven-Hartford, Conn.)

Radio-tv syndicators honored: Dixie Productions, Lake City, Fla.; Riley Jackson Productions, Hollywood; Lutheran Church-Missouri Synod, St. Louis, and Telenews Daily-Hearst Metrotone News, New York.

And Ads • Fifty advertisers also were commended for their safety contributions, along with 39 daily and 14 weekly newspapers, 14 general and 44 specialized circulation magazines, 7 labor publications and 70 outdoor advertising organizations.

Serving as judges were Frederick H. Garrigus, NAB manager of organizational services; Robert P. Keim, account executive, the Advertising Council; William Ray, news director, NBC Central Div. (WMAQ-WNBQ [TV]); Hugh Curtis, editor, *Better Homes & Gardens:* Norman Damon, vice president, Automotive Safety Foundation; George D. French, vice president, Outdoor Advertising Inc.; Norman Shaw, associate editor, *Cleveland Press,* and Dr. Albert A. Sutton, Northwestern U. Medill School of Journalism.

Other safety winners in the radio-television field:

Radio Stations • CFJB Brampton, Ont.; CFPL London, Ont.; CHML Hamilton, Ont.; CHUM Toronto, Ont.; CJCA Edmonton, Alta.; CKOX Woodstock, Ont.; CKPC Brantford, Ont.; CKSL London, Ont.; CKSO Sudbury, Ont.; KABC Hollywood, Calif.; KABR Aberdeen, S.D.; KARM Fresno, Calif.; KCRC Enid, Okla.; KDPS-FM Des Moines, Iowa; KDTA Delta, Colo.; KDUB Lubbock, Tex.; KELO Sioux Falls, S.D.; KEX Portland, Ore.; KFAB Omaha, Neb.; KFJZ Fort Worth, Tex.; KGAY Salem, Ore.; KGGF Coffeyville, Kan.; KGW Portland, Ore.; KHAM Albuquerque, N.M.; KIOA Des Moines, Iowa; KLAC Hollywood, Calif.; KLIK Jefferson City, Mo.; KLMS Lincoln, Neb.; KLON (FM) Long Beach, Calif.; KLRS Mountain Grove, Mo.

All at once

WLIB New York reported last week that it plans to bunch its commercials—a total of two minutes to the quarter-hour. To be employed on a new, 45-minute jazz show starting yesterday (April 5), the plan called for 13 minutes of uninterrupted programming followed by 2 of commercials in tandem, another 13 of programming and 2 of commercials, etc.

ESSO RESEARCH works wonders with oil

Helps "mirror" finishes hold bright future

Even the finishes are exciting on the new cars! They have new color, new gleam. They stay new looking longer, seldom need polishing, shrug off bad weather. Esso Research helped in perfecting these fine finishes by developing fast-drying solvents derived from oil. Your car looks better, runs better – because **ESSO RESEARCH** *works wonders with oil.*

ESSO

WESTERN ELECTRIC AND

ONE OF THE principal products of Western Electric's Oneida Plant is telephone exchange cable. Production begins with copper rod and raw plastics; flows through a continuous series of highly mechanized operations, to emerge as finished cable.

OMAHA, NEBRASKA

This big cattle and grain city—the "Gateway to the West"—recently welcomed the completion of a modern new Western Electric plant. Here we're making telephone equipment for the Bell System . . . and helping Omaha build a brighter, more prosperous future.

It's just a short ride southwest from bustling downtown Omaha to the acres of buff brick buildings that house Western Electric's spanking new Omaha plant . . . now in operation.

Here some 2,800 Omaha men and women are now at work. Eventually their ranks will grow to about 4,000. The skill and talent of these men and women is devoted to making dial switching equipment and telephone exchange cable . . . our job in Omaha. It's an important part of our assignment as manufacturing and supply unit of the Bell System.

What's all this mean to Omaha? For one thing, good jobs for many people. It means contributions by W. E. folks to the city's civic and social life. And added business for some 260 local firms (part of our state-wide total of 375 suppliers).

It means something to us, too. The chance to benefit from the native talents of the men and women who are working with us . . . and the opportunity to enjoy the friendliness and hospitality of this great city of the plains.

Besides Omaha, Western Electric has plants in 25 other cities where we also make telephone equipment for the Bell System. Last year we purchased over a billion dollars worth of raw materials, products and services from over 30,000 suppliers located in every state. Of these, 90% are "small businesses." The things we make and buy are distributed to the Bell telephone companies through Western Electric distribution centers in 32 different cities.

Western Electric

MANUFACTURING AND SUPPLY UNIT OF THE BELL SYSTEM

PART-TIME STUDENTS at company expense, W. E.'s Kenneth Hooker and Mari Ann Feiler attend the University of Omaha. This year, 54 Omaha employees are enrolled in classes through W. E.'s Tuition Refund Plan.

LOU GERDES, City Editor of Omaha World-Herald, knows his town and its people. "We were glad when W. E. came to Omaha," he says. "We knew they would be good for the city and felt sure they'd find Omaha a good place to be. It's worked out just that way, too."

E. F. OWEN (right) of the Paxton & Vierling Steel Co. talks over orders with W. E. buyer Robert Groth. Most of our suppliers in Omaha—like Paxton & Vierling—are small companies with less than 500 employees. For all, business has increased since Western came to town.

COMMUNITY MINDED. W. E.'s Harlon N. Harvey (left) accepts plaque from Community Fund Chairman Leo Daly. Plaque recognizes outstanding employee participation in the Omaha Community Fund drive.

• Media reports

• Target date for KEZU Rapid City, S.D., to go on the air is mid-June. Ground-breaking for a $25,000 building was held March 20. KEZU, owned by Black Hills Radio Inc., is assigned 920 kc with 1 kw.

• KQAL-FM Omaha was due to commence operation yesterday (April 12). Jack L. Katz is owner-general manager. The station is broadcasting weekdays 6 p.m.-midnight and noon-midnight on weekends.

• WMMM Westport, Conn., has commenced operation. Norman Bernstein, general manager, says news will have programming priority. *Inside Fairfield County* (Conn.) presents news in depth about Westport, New Canaan, Fairfield, Wilton and Westport. WMMM's musical format is dinner music, operetta, musical comedy, opera, semi-classical and classical. The daytimer is on 1260 kc with 1 kw.

• WNIB (FM) Chicago has moved from 6 N. Hamlin Ave. to Chicago Federal Savings Bldg., 108 N. State St.

Themes' swan song

KDAY Santa Monica, Calif., isn't going to give television shows any free plugs if it can help it. That's why it has thrown the theme music records from *Peter Gunn, 77 Sunset Strip,* and *Maverick* out of its library.

"It's flattering that tv representatives are smart enough to gear their promotional efforts to radio," General Manager Irv Phillips says, "but frankly, at KDAY we're through supporting tv programs . . . the next thing we'd be flooded with records with themes from *Truth or Consequences, Divorce Court* or *The Wednesday Night Fights.*"

• The California Teachers Assn. (southern section) awarded its sixth annual Communications Award for 1958 to KCOP (TV) Los Angeles, the first broadcast station to claim an award that up to now has gone to newspapers, according to the station. KCOP was cited for "service to public education and for the continuous scheduling . . . of public service educational television programs such as *Assignment Education.*"

• Multiple newspaper owner Knight Publishing Co. last week purchased the evening *Charlotte* (N.C.) *News* for an unofficial price of between $1.5 and $2 million. The Knight organization owns the other Charlotte paper, the morning *Observer.* John S. Knight station properties include: WAKR-AM-FM-TV Akron, Ohio (45%) and WCKT (TV) Miami, Fla. (42.5%).

• The ABC Radio Network acquired two additional affiliates, effective April 1. The stations are KWJJ Portland, Ore., independent since its founding in 1925, and KLRA Little Rock, Ark., reaffiliating after one month's operation as an independent. KWJJ operates on 10 kw, 1080 kc. Rod F. Johnson is president and general manager. KLRA is on 10 kw, 5 kw-d, 5 kw-n, 1010 kc. Leonard Coe is president.

• A bid by Barney Young of Life Music Inc. to force CBS Inc. to let him see its stock books and to postpone the CBS April 15 annual meeting until he had studied them (BROADCASTING, March 30) has been denied by New York Supreme Court Judge Saul Streit. In his decision, Judge Streit said he was "satisfied that this application is but the latest of a series of acts on the part of petitioner which constitute a 'campaign of general harassment of respondent [CBS] and its management, in the interest of the petitioner's company'." Life Music has a $5 million suit pending against CBS, NBC and BMI, and CBS contended Mr. Young's move to see stock books was intended to promote that suit.

• Keystone Broadcasting System announces ten new affiliates: WHEP Foley, Ala.; KCUE Red Wing, Minn.; WLSM Louisville, Miss.; KRFS Superior, Neb.; WCGC Belmont, N.C.; WEZN Elizabethtown and WPTS Pittstown, both Pa.; KBFS Belle Fourche and KEZU Rapid City, both S.D., and WMSR Manchester, Tenn. KBS now claims total of 1,062 stations.

• WAOK Atlanta, Ga., has presented a $500 grant to Atlanta U. to go toward prizes for the university's 18th annual exhibition of paintings, sculpture and prints by Negro artists.

• KBIG Santa Catalina, Calif., has bought a site for its main studios and offices at 115 Whitley St., Avalon, Calif. The move from KBIG's location at transmitter-site Renton Pass is slated for early fall. When the studios are moved to the new address, the transmitter will be operated by remote control (subject to FCC approval). Programs will continue to originate from KBIG Hollywood studios. Newscasts still will come from the city room of the *Los Angeles Herald-Express.*

• Philadelphia Guild of Advertising Men presented its 12th annual award for distinguished achievement in the television field to Dick Clark, star of ABC-TV's *American Bandstand* and the *Dick Clark Show* at a dinner April 10 at the Drake Hotel in Philadelphia. Mr. Clark made his tv debut with his Philadelphia-orginated *American Bandstand* show.

• Al Schottelkotte, newscaster, WSAI Cincinnati is credited by the station with getting action on two community problems. He suggested in an editorial that a committee be formed to find a new recreation area to replace one removed for an expressway. Citizens are at work now on the recreation project.

In another editorial the newsman exposed the fact that a man was collecting $225 monthly in veteran's disability payments for a "faked" mental illness. Mr. Schottelkotte sent the man's file to the Veteran's Administration in Washington and received word that the payments would cease.

• "On-the-go radio" is the title given the completely revamped 19½-hour program schedule of WJIM Lansing, Mich. The new format calls for 42 daily newscasts; more NBC programs; and a de-emphasis of the radio disc jockey, with an announcer now bearing the title, "musical host."

• WBCM Bay City, Mich., is remodeling its studios and offices on the mezzanine of the Wenonah Hotel, its home since 1925.

• KWOW Pomona, Calif., names Enyart & Rose Adv., L.A., to handle its promotion.

• WHIL Medford, Mass., broadcast an editorial that helped a local woman visit the site where her airman son had been killed in Armenia. Previously, the mother had received no reply to her requests for permission to visit where the plane had crashed. After the editorial was sent to the acting U.S. Secretary of State, the woman was told that the government would not object to her visiting the crash site.

• Erection of the 150-foot tower of KBBI (FM) Los Angeles started March 30 atop the 13-story building at 558 S. Hope St. The new station, owned by Bible Institute of Los Angeles, expected to start test broadcasts April 12, according to Al Sanders, vice president in charge of the station's development. KBBI will broadcast from 6:30 a.m. to 10:30 p.m. daily, on 107.5 mc (ch. 298) with an ERP of 19.6 kw. Equipment is RCA, including the first 5 kw fm transmitter on the West Coast, KBBI announced.

• Rep appointments

• Clarke Brown Co., Dallas, has been appointed for southern regional business of WIBR Baton Rouge, KILE Galveston, WAME Miami, WAPX Montgomery and WJBW New Orleans. The stations have their own national representative serving other sections of the country.

• KWIZ-AM-FM Santa Ana, Calif., to The Meeker Co.

FANFARE

Missoula stations join to break sales records

"Radio history will be made on Wednesday when all three Missoula [Mont.] radio stations join forces to bring you King Dollar specials being offered by Missoula merchants. From 8:30 to 9:30 Wednesday morning, KGVO, KBTK and KXLL will broadcast the same radio program, so that no matter what station you're tuned to you hear up-to-the-minute news of bargains being offered during Missoula's Dollar Day. So, for bargain specials direct from the merchants to you, listen to KGVO, KBTK or KXLL from 8:30 to 9:30 on Wednesday morning for King Dollars!"

The radio history promised in this announcement, broadcast by the radio stations of Missoula, was made on Feb. 18. "The promotion was designed to stimulate the Chamber of Commerce's Dollar Day promotion," as described by John Graham, manager of KGVO. "Thirty-eight Missoula merchants participated in the radio promotion which was sold to the chamber for $275, prorated among the Chamber members. Each station received $75 for the one-hour broadcast. Each station collected and wrote one-third of the copy and produced its own four five-minute segments.

"George Harris, manager of Montgomery Ward and manager of the Dollar Day promotion, virtually raved about the success of the promotion," Mr. Graham reported. "Montgomery Ward here," he said, "tripled its business over the last Dollar Day (in July 1958) and, oddly, did a tremendous business in lawn furniture (this despite that the day was cold and dreary). J.C. Penny's more than doubled its business; Missoula Mercantile Co., largest independent department store here, reported business as 'excellent,' and Angelo's, a leading Missoula men's shop, sold out everything they had on sale and had in a lot of people who'd never visited the store before.

"The promotion included newspaper advertising, as it had done last year, but this was the first time for the concerted drive by the radio stations. Mr. Harris said the impact of the three radio stations was terrific and he added he believed this was the only way to do it. He had complimentary things to say about the radio spots, describing them as 'good,' even though Montgomery Ward here is not a sensational radio advertiser ordinarily."

Curbstone ratings • Jim Lange, presiding "morning mayor" over KGO San Francisco, has gone directly to the people for a vote of confidence. Here by the Golden Gate Bridge he counts votes as motorists respond to a broadcast invitation to blink their lights as they go by.

Mr. Lange and another KGO personality, Buddy Webber, cooperated on the survey, one at the microphone inside the remote unit and the other on top for the count. Results: 7:30-8:30 a.m., 127 light blinkers among 2,200 city-bound cars, figured at a 5.7 rating; 4:30-5:30 p.m., 110 cars with lights on among 2,002 outbound, for a 5.5 rating.

Franklin portrait prize

Air personalities Tim Nolan and Bob Byron at KPRC Houston conducted a "write-in-your-name-to-be-picked-out-of-a-hat" contest not long ago, offering the "seemingly unimportant prize" of a picture of Ben Franklin. The winner of the contest, which pulled more than 300 entires in four days, was not overly impressed, reports KPRC, until he received the portrait of Mr. Franklin on a $100 bill.

The "Franklin" award contest was

followed by a "nice women's scarf" prize contest. KPRC boasts that the first two days' entries in the new contest topped the entire total for the previous one.

May's top tunes

And the world shall be filled with music—jingles, that is, in behalf of National Radio Month, which begins May 1.

The jingles are part of a National Radio Month kit being sent out in mid-April to more than 1,900 radio stations by the NAB. Faillace Productions Inc., New York, created the series for NAB around the 1959 Radio Month theme, "Radio . . . Always in Tune With You." They are on a double-faced, 12-in. standard groove, 33 rpm disc and comprise two series: "You're Always in Tune," and "You *Can* Take It With You." Both series include two duplicate 60- and 30-second vocal versions and a 60-second instrumental version. The NAB jingles are cleared for 13 weeks beginning May 1, and thus may be used for an additional nine weeks after the close of Radio Month.

The promotional kit also includes 30 spot announcements, a fact sheet, sample news releases, artwork ideas, text of speech, text of proclamation (to be signed by governors and mayors) and suggestions for local promotions.

Radio Advertising Bureau also has begun arming its constituents for National Radio Month.

Promotion kits were shipped to some 900 member stations last week, featuring 17 fully orchestrated jingles ranging in length from 10 to 60 seconds. Also in the kits: 101 sales ideas, some of them bizarre (horses wired for sound, cats covered with banners, etc.), others more-down-to-earth; copy for 25 announcements and a 20-minute speech.

RAB is co-sponsor of National Radio Month with NAB, Electronic Industry Assn. and National Appliance & Radio-Tv Dealers' Assn.

Transatlantic trumpets

In its quest to give the station an "original musical personality." WICC Bridgeport, Conn., reports it has engaged the services of Austin (Ginger) Croom Johnson, a 43-piece orchestra using Ted Heath and Mantovani musicians and 18 voices of the Westminster Chorale. They will put in 12 days on the project in London.

WFBM always rings 10 times

Outdoor telephone booths in Indianapolis, Ind., are ringing dollar bills for listeners of WFBM Indianapolis, which has been conducting a "Jack-in-the-booth" promotion twice nightly on its *Road Show*.

The two daily calls are made to unnamed outdoor phone booths, where the telephone is allowed to ring ten times. Each ring is "counted-down" from the $10 mark, with the person who answers receiving $8 if the phone has rung twice. In the first week of the promotion, according to WFBM, there were six winners, one for $9 and the rest receiving between $2 and $4.

KING-TV tapes bridge tourney

With its studios converted into a bridge arena, KING-TV Seattle videotaped an hour-and-a-half of the final play for the Vanderbilt Cup bridge competition. The subsequent tournament telecast was sponsored by the American Contract Bridge League and brought together "the nation's outstanding contract bridge players." The winner of the Vanderbilt Cup, a team captained by bridge columnist B. Jay Becker, will represent the U.S. in the 1960 Bridge Olympiad in Rome, according to KING-TV.

Operation leg-pull on April 1 schedules

April 1 brought out the trickster in stations' programming departments. Among those reporting Fools' Day stunts:

WFBR Baltimore and WINS New York broadcast phonograph records backwards and invited listeners to guess what they were. WFBR gave $13 to the first person to identify each of seven discs. WINS, which received about 5,000 telegrams plus telephone calls with guesses at the backward records, presented $5 to each of seven winners.

WAVI Dayton, Ohio, and WONE there switched disc jockeys Bernie Wullkotte and Jolly Rogers. WONE's "Top 40" format went with Mr. Rogers to WAVI, while WAVI's "Big Band Sound" was broadcast by d.j. Wullkotte over WONE. WAVI says that indignant listeners called both stations wondering what had happened to programming.

WCAE Pittsburgh disc jockeys switched names and programs. To make listener confusion complete, news commentator Hal Scott did a woman's show in falsetto.

KTIX Seattle, Wash., disc jockeys also assumed each other's identities and threw in such tricks as broadcasting out-of-season weathercasts and spinning 33⅓ rpm discs at 45 rpm. Listeners who telephoned KTIX with the record's correct title and artist were given an album of their choice.

KDKA Pittsburgh disc jockeys threw April Fools' Day parties for each other with listeners who provided "wacky gifts" receiving pen and pencil sets for the best sent in. Among hundreds of presents: gunpowder, baby bottles, a toothless comb for a baldheaded man and an 1879 baby crib.

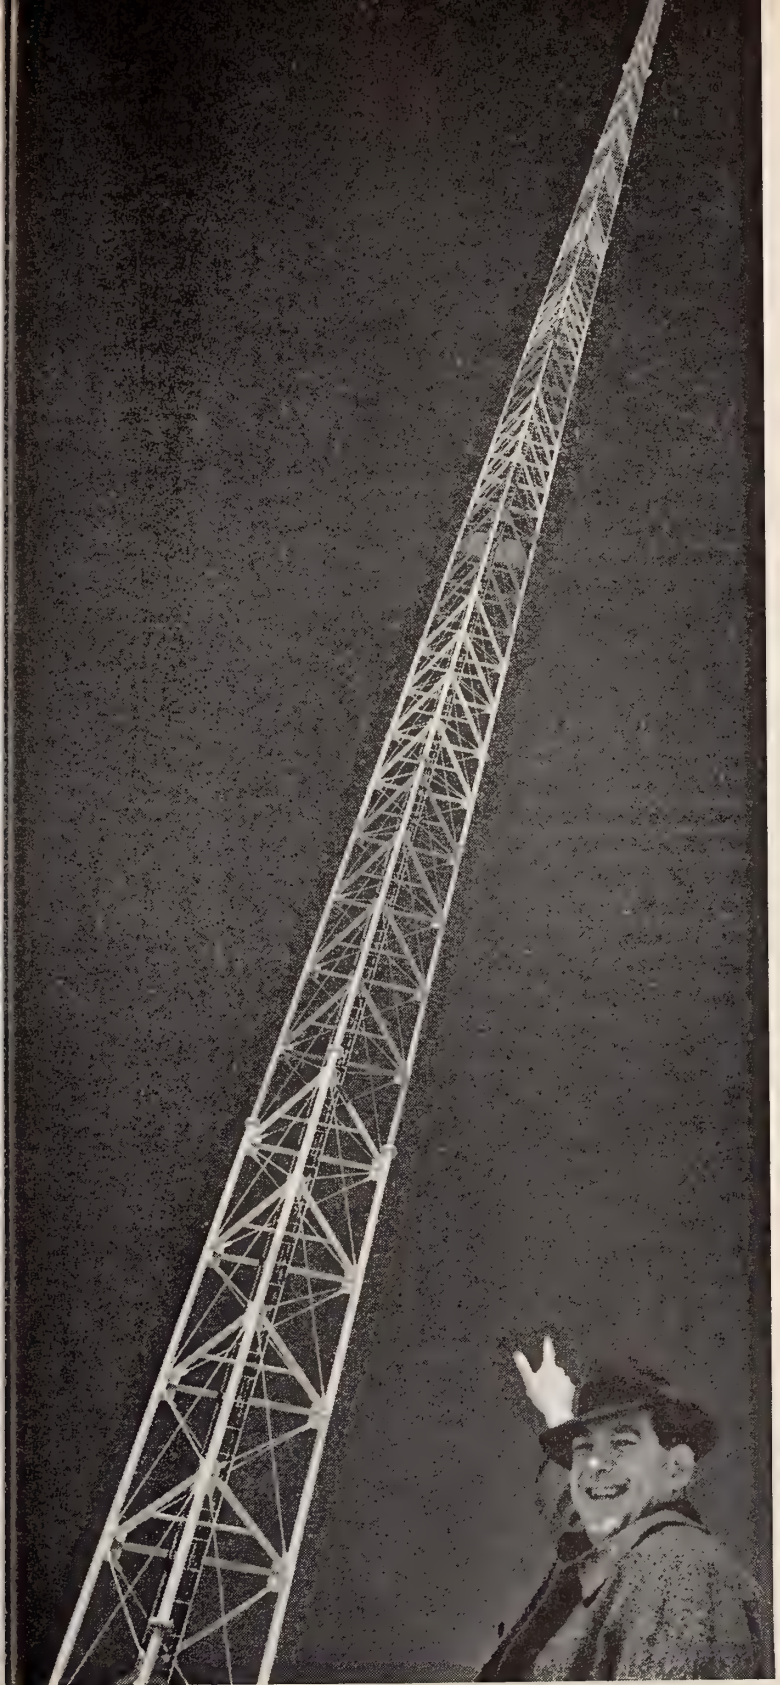
McLendon plugs rival

Gordon McLendon, president of McLendon Corp. which owns among others KLIF Dallas, was heard April 1 on KIXL Dallas broadcasting plugs for his competitor.

The announcements were to pay back a bet to KIXL President Lee Segall. Mr. McLendon wagered that a popular movie wouldn't run locally for three months. The loser was to write and broadcast eight promotional announcements for the rival outlet. So pleased was winner Segall that he asked Mr. McLendon if he may use the spots regularly.

'Newsbeat' with a heartbeat

A 3½-year-old blue-eyed blonde won the hearts of newsmen over KREM-TV Spokane, Wash. Little Reggie LaDuke needed an operation to close a hole in



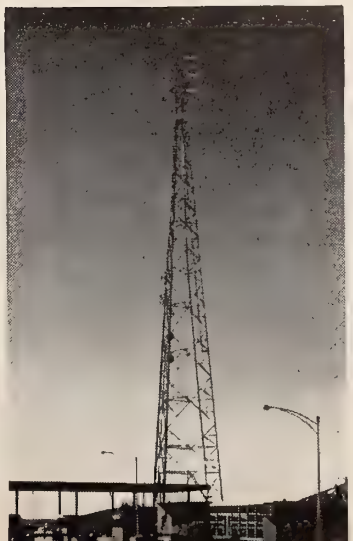
"This Dresser-Ideco tower sprouted 395′ in two years ...without growing pains."

"Now our Dresser-Ideco tall tower stretches up to 1107 feet," points out Ralph O'Connor, General Manager of WISC-TV, Madison, Wisconsin. "This final height was reached in 3 successive stages over a 2½-year period. Today we have one of the finest tower structures you'll find.

"The original 712′ tower was carefully designed and built by Dresser-Ideco to anticipate the need for future height increases. The tower went into service on June 25, 1956, just 60 days after construction started. In May, 1958, the first extension raised overall tower height to 921′, stepped up the size of WISC-TV's coverage. The final 174′ extension completed in December, 1958, again expanded coverage and improved and intensified our signal within the established coverage pattern. Each of the two extensions was completed on schedule, handled according to the original plans of Dresser-Ideco tower experts.

"From initial design to final inspection," Ralph O'Connor reports, "Dresser-Ideco gave careful and craftsmanlike attention to every phase of our 3-stage construction project. As a result everything went along smoothly."

You are assured of this same expert performance on new tower construction — or modification of existing Dresser-Ideco structures — when you specify the world's most experienced tower designer-builder. This tower modification service, available to all Dresser-Ideco tower owners, is another good reason to work with Dresser-Ideco. See your broadcast equipment representative, or contact us direct. And ask for Tower Catalog T-57.



"There's something else new up there," says Ralph O'Connor. "We're pioneering the use of Don Hoskins' strobe daytime lighting for overcast weather conditions, in cooperation with the Wisconsin State Aeronautics Commission and the Dresser-Ideco tower engineering department."

Designers and builders of
over half the 1000′-plus television towers in service today.

Dresser-Ideco Company

her heart. KREM-TV reporters told viewers of *Newsbeat,* a nightly news show, of the operation that Reggie needed and which her father couldn't afford.

In less than three weeks, viewers had contributed more than the $2,000 needed. No direct appeals were made.

• Drumbeats

• Advertisers over KROW Oakland, Calif., can make an extra impression on consumers as they make their rounds at the grocery store. In a market-basket promotion bonus, the station is offering eligible sponsors shared space with market directories attached to 124 grocery store shopping carts.

• KTVW-TV Seattle-Tacoma, Wash., made use of station talent to tell the story of a heart operation for a telecast promoting the local heart fund drive. The operation was shown on film with commentary in non-technical language by ventriloquist Rod James of the KTVW-TV staff and his dummy. The half-hour documentary was commended by heart association workers.

• WWDC Washington received 10,627 postcards within five days when listeners were asked to send in the serial number of one of their dollar bills. WWDC announces one of the serial numbers each week, awarding the owner $100-$1,000 (depending on the spin of a wheel).

• An anti-contest contest is being sponsored by Bob Gage of KBIG Santa Catalina, Calif. He has asked his listeners to complete in 25 words or less the sentence, "I hate contests because . . . ", with the winner receiving a weekend for two on the resort island of Catalina.

• The Motion Picture Assn. of America, New York, last Monday (April 6) asked local movie people to answer the telephone by saying "Good morning, this is Oscar day. Be sure to see the Academy Awards telecast at 10:30 tonight."

• KGHM Brookfield, Mo., as part of its third anniversary promotion ran a contest to turn the call letters into a slogan. The winner among 200 entries received $25 for submitting "Karrier of the Green Hills Message."

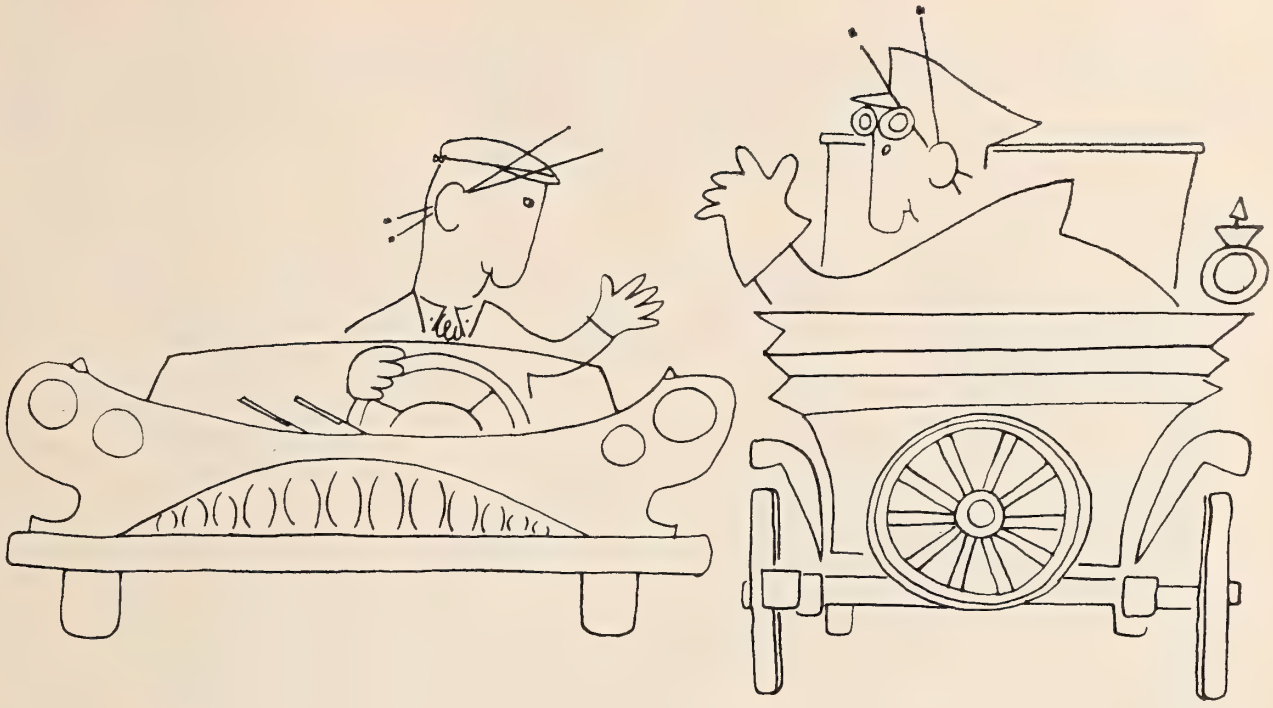
• More than 20,000 "Guarantee Labels" from Aunt Jemima self-rising flour packages were collected in the WWRL Woodside, N.Y., Gospel Singing Contest. The public attended finals in the contest free of charge, but were required to hand in two labels each to vote for their favorite singer. The project, featuring more than 1,000 entrants, marked Aunt Jemima's 10th year on the WWRL sponsor list.

• Two 1959 Ford cars were awarded the winner of the WRC Washington "Sound of Quality" contest, conducted through February with more than 7,000 entries reported. Through air, newspaper and poster promotion, listeners were asked for 25-word essays on "the sound of quality." Other prizes: a phonograph and eight transistor radios.

• KNOB (FM) Long Beach, Calif., was named in a Los Angeles City Council resolution the week before last, commending the station on its permit to boost power to 79 kw. KNOB is an all-jazz outlet.

• This is "Color Television Month in California", as proclaimed by Gov. Edmund G. (Pat) Brown in recognition of the five-year-old industry's "great achievements in this new field of communication."

• WBET Brockton, Mass., located near military air installations, has been broadcasting the sound of a plane breaking the sound barrier. The recorded sonic booms are scheduled to acquaint listeners with the sound and to allay fears of explosion.



Money through the hoop • WDGY Minneapolis staffers so far this year have raised $10,000 for charitable enterprises in their home state and Wisconsin by playing basketball with local teams. Air personalities who double on the court gather around station manager Jack Thayer (holding ball). They are (clockwise from Mr. Thayer) Bill Diehl, Don Kelly, Dan Daniel, Stanley Mack and Jim Ramsburg.

The WDGY "Radio Wonders" team also includes former college and pro stars enlisted for the benefit performances. Organized last fall, the team has played a 16-game schedule for hospital funds, school treasuries, youth groups and civic activities in area towns. The games, 12 of them WDGY victories, have attracted more than 19,000 to watch the Wonders against local teams. WDGY has offered to advise other stations interested in how to organize a basketball project.

Promotion kitty set

Representatives of 30 station representatives in New York have pledged a kitty of $2,500-3,000 to help underwrite a presentation on the farm audience to advertisers and agencies during the June 17-20 convention of the National Assn. of Radio and Telesion Farm Directors in New York. A committee of Edward P. Shurick, Blair-Tv, H. Peter Lasker, Crosley Broadcasting Co., and Ben Holmes, Edward Petry Co., was named to cooperate with the NARTFD promotion committee headed by Bob Nance, WMT Cedar Rapids.

Life insurance investments change, too... to keep pace with the times

It is quite widely understood that life insurance funds have traditionally provided a major source of capital for our burgeoning economy. But perhaps not so well known are the continuing changes in the *types* of investments life insurance companies make, and the ways these investments enhance economic development.

Early in this century, for example, railroads required exceptionally large amounts of capital. Later public utilities needed funds for expansion. During World War II the Government needed money to carry on the war effort.

And then the acceleration of oil and natural gas production and their transmission required funds, a field in which life insurance investments pioneered. Increased industrial production and the ever-increasing need for housing, highways, and consumer credit in recent years have called for many new kinds of long-term financing.

In all these areas life insurance investments have laid the foundation for the greater use of equity capital, thus releasing and multiplying the effectiveness of such capital.

The evolution of MONY's investment portfolio is indicative of the continuing efforts to make capital available where and when it is needed most . . . to put the funds of millions of individual life insurance policyholders to work for the good of the economy, as well as for the ultimate benefit of the policyholders themselves.

Shortwave KGEI wins overseas audience

A listener file of 11,000 letters attests to the growing popularity in Latin America and the Caribbean area of KGEI Belmont, Calif., an international shortwave station which has been on the air about four months and has an effective radiated power of 1,200 kw.

KGEI is a commercial outlet which beams musical, cultural, educational and informative programs in Spanish and English to Latin America. The station says several sponsors, who have goods or goodwill to sell in Latin America, have bought time on the station. Among these is Standard Oil Co. of California which airs its *Chevron School* on KGEI.

It's estimated there are about 8 million shortwave sets in Central and South America and the Caribbean. KGEI presently is on a limited schedule of four hours a day.

Radio Station KGEI Inc., a group of businessmen, bought the station from General Electric Corp. and reactivated it, receiving an FCC license last November. It is currently on 17.8 mc, but frequencies change from season to season because of atmospheric conditions.

Operating head of the station is Marvin R. Steffins Jr., vice president, who has lived a number of years in various Latin American countries. KGEI calls itself "The Voice of Friendship," claiming its commercial operation inspires confidence in listeners in contrast to the propagandistic nature of programming by many other shortwave stations. As a private enterprise, KGEI has a role in propagating the "free way" and promoting goodwill and better understanding among the peoples of the Americas, Mr. Steffins says.

KGEI programs include music, national and international news, reviews of American business, Bible readings and a program for children.

KGEI was first put into operation by GE in 1939, was taken over along with other shortwave outlets by the Office of War Information in 1942 and was leased to the U. S. Information Agency after World War II. GE took over again in 1953 and discontinued programming in 1956. WRUL Boston is the only other commercial shortwave station in the country.

New ch. 9 contestant

The Toronto board of education and other educational and cultural groups in the Toronto area have started planning to apply for the ch. 9 allocation. The Canadian government is expected soon to permit second television stations in present one-station cities. There are a number of groups known to be planning to apply for the allocation, including Toronto radio stations CFRB, CKEY and CKFH. Entry of the educational group is expected to complicate the decision by the Board of Broadcast Governors, as ch. 9 is the only vhf allocation still available for Toronto. There are also three uhf allocations for Toronto, but as yet there are only uhf satellite stations in operation in Canada.

A Mexican answer to hot competition

In Mexico City 29 am and 8 fm stations vie for listeners from among some four million inhabitants.

One organization's answer to this maze of competition is multiple ownership, a luxury unattainable in U.S. cities. Known as "Formula RM," the combine embraces five stations, each catering to a different section of the population. Their only trait in common, beyond ownership, is nearly total reliance on recorded music.

One of the RM stations programs for teenagers. The emphasis is on "top 40" American popular music. Also provided is information about school activities, sometimes delivered by students themselves.

Then there's "Radio Mil" (referring to its 1000 kc) over which popular music of all nations is played, interspersed with recorded comedy segments. E. G. Salas, general director and owner of Formula RM, said that American recording companies use this station as a testing ground for a record's potential popularity in the area.

"Radio Feminina," operated entirely for and by women, plays "romantic music all day." It features a "Stork Club" for expectant mothers to whom it makes available low-cost medical attention through a clinic which co-operates in return for air time.

The "masses" are reached through "Radio Sinfonola," which means jukebox. Here telephone requests are played and the announcers speak in "slang."

The group's other station is on the fm band and offers mostly classical music for "cultured, professional, influential people." (The number of receivers is estimated at 100,000.) This station presents fewer commercials, usually for more expensive products.

Mr. Salas said that television had thus far failed to challenge radio's supremacy in Mexico because of the expense of tv sets.

Canadian tv count

The Canadian Bureau of Statistics said Monday (April 6) that nearly 70% of the country's 4.2 million households had tv sets at the end of last year. In 1957 the figure was about 63%. Nearly all (96%) households had at least one radio set.

Canadian radios up

Radio receiver sales in Canada are booming. The report for the first two months of this year issued by the Electronics Industries Assn. of Canada, Toronto, shows 79,213 radio were sold, compared with 61,442 in the same January-February period last year. Sales for February were 42,226 units as against 31,284 in February 1958. Major increases were in portables and automobile sets, the latter almost double the number sold in February 1958. Ontario bought most receivers in the first two months, 34,291, with Quebec province accounting for 19,914 sets.

Television receiver sales were down in the first two months of this year to 63,442 sets as against 67,068 sets in the 1958 period. Bulk of the sets sold were in Ontario 25,245, and Quebec 11,719 units.

Canadian tv stations agree on option time

A television network option time agreement has been reached between the Canadian Broadcasting Corp., and independently-owned Canadian stations at meetings in Toronto. On the basis of 103 hours of network broadcasting time each week, it was decided that 54 hours would be option network time, the balance station time. Both station and network option time were divided into three time classifications, with class A time from 7:30-11 p.m. Monday through Saturday, 5-11 p.m. Sunday. Football telecasts and spectaculars would fall outside network option time and would be considered as specials. The plan would not restrict either the network or the individual stations from contracting for additional network service.

Attending the network option time committee were George Cromwell, CHSJ-TV St. John, N.B.; Jean Pouiliot, CFCM-TV and CKMI-TV Quebec; Bob Reinhart, CFPL-TV London, Ont.; Hal Crittenden, CKCK-TV Regina, Sask., and from the CBC Peter Mc-

NEW GATES LEVEL DEVIL

A NEW CONCEPT IN LEVELING AMPLIFIERS

The marked engineering advancement in the exclusive new Gates "Level Devil" is best illustrated by contrasting the old with the new. In former leveling amplifiers, the lower signal level, referred to as noise, was expanded during a point of program silence. A baseball or football game is an excellent example. When the sports announcer was silent for a moment, the crowd noise expanded considerably. And, when the announcer spoke, the crowd noise immediately decreased. With Level Devil, this difficulty is greatly overcome. In the absence of signal, the noise level does not rise above the regular level established by the average signal. With older level amplifiers, the noise would rise 10 to 15 db. under equivalent conditions.

Leveling amplifiers have, until "Level Devil," seen only limited use in television. A film with a signal to noise ratio of 30 db. (average value) could not tolerate background noise increased during a period of silence on the film. By overcoming this background noise, which would be very noticeable to the listener, Level Devil becomes ideal for television broadcasting. This new leveling amplifier also offers many other outstanding advantages in services such as film, tape, and disc recording, and becomes another progressive step in AM and FM broadcasting.

For complete technical information, write today for Bulletin 107-A. Yours for the asking.

HARRIS INTERTYPE CORPORATION

GATES RADIO COMPANY — QUINCY, ILLINOIS

Subsidiary of Harris-Intertype Corporation

OFFICES — NEW YORK - WASHINGTON, D. C. - HOUSTON - ATLANTA
INTERNATIONAL DIV., 13 East 40th St., New York City — In Canada, CANADIAN MARCONI COMPANY

Donald, director of the English tv network, Toronto; Jean St. George, Montreal; Ian Ritchie, Toronto and Dan Cameron, Winnipeg.

• Abroad in brief

• Granada Tv Network, London, plans to sell, distribute and exchange its programs with other countries. Stuart Griffiths, with Granada 18 months, has been named to head the newly-formed Overseas Dept. Mr. Griffiths formerly was program director with CBC, Canada. His headquarters: Overseas Dept., Granada Tv, 36 Golden Sq., London W. 1.

• France had 1,023,808 registered tv sets at the end of last year, an increase of a half-million over 1957. Radio sets numbered 10,694,792. The country's tv audience is estimated at about 3.5 million.

• Canadian Marconi Co., Montreal, owner of CFCF Montreal and electronics manufacturer, reported a net deficit for the fiscal year 1958 of $386,844, down from the 1957 deficit of $1,479,547. The report showed an operating profit for the year of $512,000 but depreciation, officers' salaries, fees and legal expenses totalled $899,000 to bring about a net loss. The deficit was attributed mainly to changing government defense requirements which resulted in cancellation of some major defense contracts. Working capital at year's end stood at $4,147,479, compared with $3,832,298 at the end of 1957.

• CFRA-FM Ottawa names Radio & Television Sales Inc., Toronto and Montreal.

• An international microwave tube meeting is planned for Nachrichtentechnische Gesellschaft (West German equipment association) June 7-11. Details are available from Tagungs-Buero Mikrowellen-Roehren, Brienner Str. 40, Munich, West Germany.

• The Vatican City, Rome, plans to install a tv station. The Vatican transmitter will concentrate on tying its studios in with the Eurovision network.

• Switzerland had 56,481 television receivers registered on March 1. This is an increase of 3,486 units over February's figure.

• An East German Russian-owned television receiver manufacturing organization exhibited the country's first 110-degree picture tube at the International Trade Fair, Leipzig. The set is a prototype; no plans to produce it in quantity were announced. West German observers state that their 110-degree tube will be on the market in three months.

• VOWR St. John's, Nfld., lost its 210-ft. tower in a March storm. Five years ago VOWR had lost its antenna tower and had to replace it at a cost of $5,500. This year the new tower is expected to cost $6,500 and will be replaced in May. Meanwhile the station is broadcasting with a temporary antenna.

VOCM St. John's, also lost its tower in the same storm, the second to go down for this station within six months.

• The third annual Canadian Radio Week is to be May 3-9 and its slogan "Be in the know—Buy a Canadian radio." The Broadcast Advertising Bureau of the Canadian Assn. of Broadcasters is working with receiver manufacturers in the promotion. CAB member stations and stations of the Canadian Broadcasting Corp. are co-operating with special programs, air promotion and numerous merchandising displays.

IRE Salutes Government Research

Again government projects make the news as space satellites relay world weather data and rockets orbit the sun. The *Institute of Radio Engineers* salutes government contributions to progress in radio-electronics in the *Special May Issue* of **PROCEEDINGS OF THE IRE.**

The big May **PROCEEDINGS OF THE IRE** gives deserved recognition to the government laboratories and bureaus engaged in electronics research and development, and brings to its readers information about the invaluable work being done by engineers and technicians in federal employ. Included are 40 technical papers dealing with the most important aspects of current projects.

Radio-Electronics Behind the Headlines

This Special Issue reveals how the government is meeting the challenge of creating new and better electronic devices for peaceful and utilitarian purposes, as well as how it is meeting the pressing need for advanced national defense systems. Also discussed are future safeguards for the security of the free world.

Presentation of this special issue on *Government Research* is in keeping with the IRE's policy of bringing to the world of radio-electronics the latest news of subjects of special interest and significance. Such a practical policy enables the IRE to provide a valuable service to the industry by making technical material and pertinent information available not only to its 72,000 members, but to informed non-members as well.

Read this informative report on *Government Research* in the publication that records progress. If you are not a member of the IRE, be sure to reserve a copy of the May **PROCEEDINGS,** now.

PARTIAL CONTENTS OF THIS GOVERNMENT RESEARCH ISSUE:

"The Basis of Our Measuring System" by A. G. McNish, National Bureau of Standards

"The DOFL Microelectronics Program" by T. A. Pruge, J. R. Nall & N. J. Doctor, Diamond Ordinance Fuze Labs.

"VFL Propagation Measurements for the Radux-Omega Navigation System" by C J. Casselman, D. P. Heritage & M. L. Tibbals, U. S. Naval Electronics Lab.

"Submarine Communication Antenna Systems" by R. W. Turner, U. S. Naval Underwater Sound Lab.

"Some Characteristics of Persistent VHF Radio Wave Field Strengths Far Beyond the Radio Horizon" by L. A. Ames, E. J. Martin & T. F. Rogers, Air Force Cambridge Research Center

"Phenomena of Scintillation Noise in Radar Tracking Systems" by J. H. Dunn, D. D. Howard & A. M. King, U. S. Naval Research Lab.

"On Models of the Atmospheric Radio Refractive Index" by B. R. Bean & G. D. Thayer, National Bureau of Standards

"Image Intensifiers and Image Converters for Military and Scientific Use" by M. W. Klein, Engineering Res. & Dev. Labs.

"A Light-Weight and Self-Contained Airborne Navigational System" by Staff, Defense Research Board, Canada

"The CAA Doopler Omnirange" by S. R. Anderson & R. B. Flint, U. S. Dept. of Commerce

"Pulsed Analog Computer for Simulation of Aircraft" by P. N. Herzog, U. S. Naval Training Device Center

"Progress and Problems in Army Communications" by R. E. Lacy, U. S. Army Signal Res. & Dev. Labs.

"The Engineering of Communication Systems for Low Radio Frequencies" by J. S. Belrose, W. A. Hatton, C. A. McKerrow & R. S. Thain, Defense Research Board, Canada

"Numerical Approach to Electronic Reliability" by J. J. Naresky, Rome Air Development Center

APPLICATIONS

Prestonburg, Ky.—Gordon Collins 95.5 mc, 5 kw. P.O. address Lackey, Ky. Estimated construction cost $16,321, first year operating cost $5,000, revenue $10,000. Mr. Collins owns WDOC Prestonburg. Ann. April 6.

Baltimore, Md.—John B. Reynolds 95.1 kc, 20 kw. P.O. address 902 Marsh Rd., Wilmington, Del. Estimated construction cost $35,700, first year operating cost $25,000, revenue $30,000. Mr. Reynolds owns WJBR (FM) Wilmington. Ann. April 8.

Omaha, Neb., Council Bluffs, Iowa—Nonpareil Bcstg. Co. 98.7 kc, 3.075 kw. P.O. address 120 S. Main St., Council Bluffs, Iowa. Estimated construction cost $6,356, first year operating cost $1,200, revenue $2,500. Applicant owns KSWI Council Bluffs. Ann. April 2.

Dallas, Tex.—E. F. Weerts 107.9 mc, 7.6 kw. P.O. address 318 Orpheum Bldg., San Diego, Calif. Estimated construction cost $18,079, first year operating cost $33,600, revenue $42,000. Mr. Weerts owns San Diego dining room and is applicant for fm permits in San Diego and Houston. Ann. April 2.

Ownership Changes

ACTIONS BY FCC

WGAY, WAYL-FM Silver Spring, Md.—Granted assignment of license and cp to **Connie B. Gay** (interests in WTCR Ashland, Ky.; WFTC Kinston, N.C.; KITE San Antonio, Tex., and WYLD New Orleans, La.); consideration $456,000. Comr. Bartley dissented. Ann. April 8.

WSOC - AM - FM - TV Charlotte, N.C.—Granted transfer of control from **E. E. Jones,** et al., to **Carolina Bcstg. Co.**; consideration $5,600,000. Comr. Bartley dissented. Transferee is owned by **Miami Valley Bcstg. Corp.** (WHIO-AM-FM-TV Dayton, Ohio) which, in turn, is principally owned by Cox family. Ann. April 8.

KXII (TV) Ardmore, Okla.—Granted (1) assignment of cp from estate of **John F. Easley,** deceased, to **Texoma Land Television Inc.** (majority stockholder of KTEN-TV, ch. 10, Ada); consideration $160,000; conditioned that Texoma may, after consummation, continue to operate KXII from its existing trans. location under STA only for that length of time specified in mod. cp for completion of construction, or such additional time as Commission may allow; and (2) application to move trans. site, reduce vis. ERP, increase ant., and make equipment changes. By letter, denied petition by **Texas State Network Inc.** (KFJZ-TV, ch. 11), Fort Worth, to defer action on KXII (TV) applications until action on KFJZ-TV rulemaking petition to shift ch. *2, now educational in Denton, to Fort Worth for commercial use, assign ch. 11 to Denton for educational use, and modify KFJZ-TV's license accordingly, or consolidate in hearing KXII (TV) applications with rulemaking proceeding. Comrs. Hyde and Craven abstained from voting; Comr. Bartley dissented to assignment of cps. Ann. April 8.

APPLICATIONS

WETO Gadsden, Ala.—Seeks assignment of license from **Gadsden Radio Co.** to **Airmart Radio Stations Inc.** for $71,000. Airmart is owned by **Melvin Lewis** and **William R. McDaniel** (49.6% each) and others. Mr. Lewis owns magazine distribution agency and Mr. McDaniel has interest in WHLP Centerville, Tenn. Ann. April 7.

KFIV Modesto, Calif.—Seeks assignment of license from **Modesto Bcstg. Co.** to **K-fiv Inc.** for $50,886. Applicants are **Theodore J. Wolf** (40%), **A. J.** and **Rebecca B. Krisik** (30% each). Mr. Wolf is present 10% owner of licensee of KFIV. Mr. Krisik has interests in KGYW Vallejo and KNGS Hanford, both California. Ann. April 8.

KAFE (FM) Oakland, Calif.—Seeks assignment of license from **Daniel Xavier Solo** to **Joseph H. Cox** for approximately $57,000. Mr. Cox is proprietor San Francisco high-fidelity music business. Ann. April 8.

KROW Oakland, Calif.—Seeks assignment of license from **KROW Inc.** to **The McLendon Pacific Corp.** for $800,000. Stockholders of McLendon Pacific are also stockholders of McLendon Corp. which is licensee of KLIF Dallas, KILT Houston, WAKY Louisville, and through subsidiary companies KTSA San Antonio and KEEL Shreveport, La. Ann. April 3.

KTUR Turlock, Calif.—Seeks assignment of license from **Turlock Bcstg. Corp.** to **KTUR Inc.** for $115,000. Purchasers are **Danny Landau** (25%), **Harrison M. Fuerst** (12%), **Milton Fromson** (17½%), **Richard S. Cole** (14%), **Richard H. Gries** (7%) and others. Mr. Landau owns Cleveland ad agency, Messrs. Fuerst and Gries have interests in KVOR Colorado Springs, Colo., and KPAS Banning, Calif. Mr. Fromson owns insurance agency and Mr. Cole has interest in KVOR. Ann. April 3.

KWBY Colorado Springs, Colo.—Seeks assignment of cp from **Music Broadcasting Corp.** to **Hill-Smith Bcstg. Inc.** for $120,000. Applicants include **John D. Hill** and **Frank A. Smith.** Hill-Smith Bcstg. Inc. is owned by **KWHK Inc.,** licensee KWHK Hutchinson, Kan. Ann. April 8.

WPCT Putnam, Conn.—Seeks transfer of control of **Israel Putnam Bcstg. Co.** through transfer of 10% of stock from **Albert Lanthier** to **Rene Cote,** present 43% owner. Mr. Cote has 50% interest in WILI Willimantic, Conn. Ann. April 8.

KLIK Jefferson City, Mo.—Seeks assignment of license from **Empire Bcstg. Co.** to **KLIK Bcstg. Inc.** for $170,000 plus $5,000 for agreement to not compete. Purchasers are **Isadore J. Fine** (15%), **Oscar K. Fine** (30%), **Jesse D. Fine** (30%), **Eugene P. Fine** (15%) and **T. M. Nelson** (10%). Fines have interests in KFEQ-AM-TV St. Joseph, Mo., and Mr. Nelson has interests in KFEQ-AM-TV, WILO Frankfort, Ind., and WOHP Bellefontaine, Ohio. Ann. April 6.

KNIM Maryville, Mo.—Seeks assignment of license from **KNIM Inc.** to **Clark Bcstg. Co.** for $47,250. Purchasers are **Roger Moyer** (60%) and **Zoe Moyer.** Roger Moyer owns interest in WTIM Taylorville, Ill. Zoe Moyer is housewife. Ann. April 7.

KHOB Hobbs, N.M.—Seeks transfer of control of **Permian Basin Radio Corp.** through sale of interest owned (38.3%) by **Helen F. Orr, Charlie D.** and **Billie O. Shaw** to **Quenton K. Crandall** and **Charles R. Scott,** who each presently own approximately 30% interests, for $30,633. Ann. April 8.

Hearing Cases

ACTIONS BY FCC

By memorandum opinion and order, commission denied petition by Texas State Network Inc. (KFJZ-TV, ch. 11), Fort Worth, Texas, for rule making to reallocate ch. *2 now reserved for educational use in Denton, Tex., to Fort Worth for commercial use, assign ch. 11 to Denton for educational use, and modify KFJZ-TV's license accordingly. Commissioners Hyde and Craven abstained from voting. Ann. April 8.

MIAMI TV CH. 7 PROCEEDING REOPENED

By Order, on April 3 Commission, on its own motion, reopened record in comparative proceeding on applications of Biscayne Television Corp. (WCKT), East Coast Television Corp., South Florida Television Corp., and Sunbeam Television Corp. for new tv stations to operate on ch. 7 in Miami, Fla. for further hearing in Washington, D.C., before an Examiner and on date to be determined later, on following issues:

1. To determine whether any of members of Commission who participated should have disqualified himself from voting in proceedings before Commission which resulted in award of cp for television station on ch. 7 in Miami.
2. To determine whether any person or persons influenced or attempted to influence any member of Commission with respect to proceedings resulting in award of cp for ch. 7, Miami, in any manner whatsoever except by recognized and public processes of adjudication.
3. To determine whether any party to proceedings before Commission which resulted in award of the cp for ch. 7 in Miami directly or indirectly secured, aided, confirmed, ratified, or knew of any misconduct or improprieties in connection with proceedings.
4. To determine, in light of facts adduced upon foregoing issues, whether grant heretofore made of cp for ch. 7, Miami, was void *ab initio* and if not, whether such grant is voidable and action should be taken to set it aside; whether any of applicants in this proceeding was and is disqualified to receive grant of its application; and whether conduct of any applicant, if not of disqualifying character, has been such as to reflect adversely upon such applicant from comparative standpoint.

Upon petition therefor filed with Commission, consideration will be given to holding of hearing sessions at locations other than Washington. All parties to these cases before Commission may participate if they make timely request, with opportunity for cross-examination and rebuttal testimony. Commission further ordered that presiding officer shall permit Attorney General of the United States or his designated representative, upon request made, to participate in hearing as *amicus curiae*.

Further hearing was ordered in light of record of hearings before Subcommittee on Legislative Oversight of House of Representatives Committee on Interstate and Foreign Commerce which made reference to possible *ex parte* representations made during course of Miami ch. 7 proceeding.

Routine Roundup

BROADCAST ACTIONS

by Broadcast Bureau

Actions of April 3

Equipping a Radio Station?

Get More Coverage With The New RCA

500- and 1000-Watt

AM Transmitters

The ability of these new 500- and 1000-watt AM transmitters to achieve and maintain a higher average level of modulation assures more program coverage. Simplified tuning, ease of installation, built-in provisions for remote control, and low operating cost make the RCA Type BTA-500/1R your best transmitter buy. Color styling adds harmony to station decor—a choice of red, green, blue, or grey doors. Whatever your equipment needs—SEE RCA FIRST!

Or write for descriptive literature to RCA, Dept. SB-22, Building 15-1, Camden, New Jersey.

RADIO CORPORATION of AMERICA

RCA Tmk(s) ®

assignment of licenses to **Radio Claremont Inc.**

WTSL Hanover, N.H.—Granted assignment of license to **Radio Hanover Inc.**

KLEA Lovington, N.M.—Granted license covering installation new type trans. as aux. trans. at present main trans. location.

AD WRITER'S VACUUM

There is certainly no dearth of good copywriters from the South but imaginative people from Dixie seem hypnotized by the attractions of Madison Avenue and Michigan Boulevard. Perhaps they are unaware of the transformation in their native land, that life here now can be both delightful and rewarding, that a new prosperity is burgeoning and they can share in it, that there is stimulation aplenty in advertising here, and that their words can be eligible for nation-wide readership.

Our type of advertising calls for clever, creative people who can telegraph ideas in brief heads, subheads and captions, who can put one colorful word with five ordinary ones and make six sing.

If you're an experienced writer with a knack for color and brevity (not a distance runner), this could be the all-important turning point in your life. We're not setting any other specifications except that you have to be happy to live within an hour and a half of New York or Chicago—by jet!

Let's reopen this window—now!

During World War II a *temporary* Federal tax was imposed on all passenger fares paid by everybody who used trains, planes, buses and other for-hire carriers. One big reason for this was to discourage nonessential use of these vitally needed transportation facilities during the wartime emergency.

Today, 14 years after the end of the war, this tax is *still* in effect. *Still* adding 10% to the cost of the ticket. *Still* discouraging travel—at a time when railroad passenger service is burdened with operating deficits of more than $700 million a year.

The travel tax weakens the whole transportation industry. It threatens the ability of the railroads and other public carriers to keep pace with the growing needs of our economy and national defense. IT SHOULD BE REPEALED—NOW!

ASSOCIATION OF AMERICAN RAILROADS • *Washington, D. C.*

OUR RESPECTS TO . . .

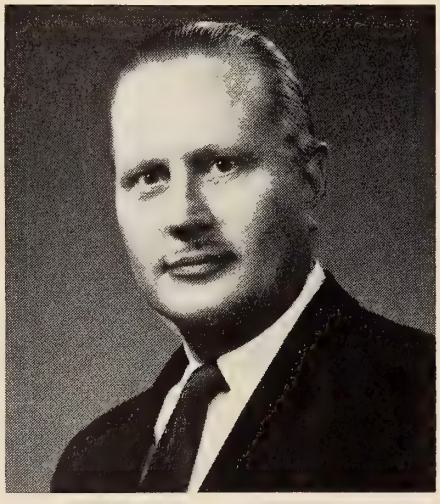
Soren Harold Munkhof

As new tv construction nears relative stability, Soren Munkhof can look back over a career as empire-builder and trail-blazer. His work literally has taken him from swamps to cornfields, complete with bulldozers and hastily-erected tar-paper shacks.

An erect figure of Danish extraction, Mr. Munkhof is credited with helping to design, plan, supervise and build such midwestern stations as WOW-TV Omaha, WTVW-TV and WITI-TV Milwaukee, WREX-TV Rockford, Ill., and more recently, the rebuilding of WFRV-TV Green Bay, Wis., now an NBC-TV primary affiliate on ch. 5.

Today, he is turning his talents to managerial and sales pursuits at WFRV-TV, of which he is executive vice president, general manager, film buyer and national sales manager.

Mr. Munkhof's proclivity for pioneering new stations, from the ground up, constitutes somewhat of an enigma to many who have not labored with him through various construction and consultant cycles. This employe loyalty prompted one colleague to observe: "Actually, he's as modest as a mother with 10 children and as untalkative as a person with a new set of store-bought teeth."



Actions, Not Words • Soren Harold Munkhof apparently has let actions instead of words do most of the talking since he left newspapers for broadcasting 25 years ago in Omaha (where he was born Dec. 19, 1910). He first got the construction bug from his father on a $211 bid for a theatre lobby job and served as a foreman at the age of 14.

He spent seven months studying in Denmark before majoring in English, journalism and education (and minoring in economics and accounting) at Creighton U. in Omaha. After graduation in 1934, he worked as night assignment and police reporter for Hearst's *Omaha Bee-News*, then joined United Press as political reporter and "telephone news report editor" in Lincoln. A year later, he headed the journalism department of Omaha Benson High School while working for his master's degree at Creighton.

Young "Munk" joined WOW Omaha in 1937, becoming one of the first radio station news reporters in the country. He gradually built up the department to 17 people, rising to assistant news manager in 1939 and director of news, special events, farm and sports programming in 1942. When WOW started experimental tv work in 1946, Mr. Munkhof and his associates put into use one of the first electronic view finders and field zoom lenses, handling closed circuit tv pickups. WOW, under the late John Gillin, sent him to New York for a six-week training period at NBC-TV studios (he worked on the *Milton Berle* and *Howdy Doody* shows).

Mr. Munkhof next helped plan and construct WOW-TV and became field director and news and special events director. The station went on the air Aug. 29, 1949, and he directed all news, locally filmed, remote and sports shows. Prior to WOW-TV's hookup with the NBC network in September 1950, he was named production manager. In this post he coordinated engineering, sales and business administration, as well as production and film lab activities. He was promoted to program director in 1952 and then tv coordinator (station manager).

Broadcast Consultant • Mr. Munkhof left WOW-TV in 1953, branched out into consultant work—for Milwaukee Area Telecasting Corp., Greater

Mr. Munkhof: station builder

Rockford Television Inc., and other companies which had obtained construction permits. Hired as general manager of Greater Rockford in May 1953, he set out to supervise construction, equipping, staffing and operation of WREX-TV. By Sept. 30, nine weeks after moving bulldozers into a cornfield, it went on the air without a building as a CBS-TV affiliate. Mr. Munkhof accomplished this trick by building a tar-paper shack on a foundation to house the transmitter and control room while the building was constructed around and over it. When this was completed, he simply tore down the unneeded shack.

Serving as station manager until June 1954, Mr. Munkhof resigned to become general manager of WTVW (Milwaukee Area Telecasting Corp's. ch. 12) and once again directed building, tower construction and installation of equipment—this time in a swamp. By October 1954, within seven weeks, WTVW was on the air as Milwaukee's second vhf. Mr. Munkhof and his associates had built half a mile of road, drained the swamp, constructed the building (under a circus tent because of heavy rains), installed equipment and set up a temporary 300-ft. tower. Together with Elden Anspach (formerly his program director at WOW-TV, then WREX-TV and now WFRV-TV), they hired a staff and set programming plans, with Mr. Munkhof supervising and directing sales and promotion and also serving as manager and member of the board of directors as well. (WTVW was sold to the Hearst Corp. in March 1955, from which emerged WISN-TV).

Mr. Munkhof continued his career next as vice president and general manager of Independent Television Inc's. WITI-TV Whitefish Bay (Milwaukee), permittee for ch. 6. He effected an agreement to continue his consulting activities and leave Independent once he finished supervising design, construction and installation of equipment for the station (now owned by Storer Broadcasting Co.).

Rebuilds WFRV-TV • In June 1956 Clayton Ewing, president of WFRV-TV (owned 100% by Valley Communications Inc.), called in Mr. Munkhof to undertake a rebuilding and reorganization job on his station and appointed him executive vice president and general manager. WFRV-TV completed a new 1,000-ft. tower and building in January 1957 and, under Mr. Munkhof, reconstituted its entire staff, programming and sales-promotion activities. (It previously had its studios in Neenah, Wis.)

Mr. Munkhof believes strongly in news ("everything you do should be clear, concise and brief"), applicable to the whole market area, and editorializing (WFRV-TV maintains an editorial board). It has a full complement of still, live and motion picture cameras.

Mr. Munkhof was a founder, director (for three terms) and executive secretary (for five years) of the Radio-Tv News Directors Assn. He's a member of Broadcast Pioneers and the Green Bay Chamber of Commerce. During World War II he served in the Civil Air Patrol and also was Nebraska Wing staff public information officer, still holding the rank of lieutenant-colonel. Mr. Munkhof is single.

FCC's A-day

BARRING the unforeseen the FCC within the next fortnight will decide what course it proposes to follow in its last ditch effort to break the television allocations impasse. Its conclusions necessarily will be a compromise. It cannot satisfy all of the contending aspirants within and outside television.

What will emerge will be a proposed national policy, to implement, supplement or modify the one enunciated seven years ago in the "Sixth and Final" report which established the 12 vhf-70 uhf channel economy and which anchored assignments to specified locations based on arbitrary mileage separations.

The FCC has been pondering a dozen different plans, ranging from a visionary full-scale move to the uhf band to a stifling 12-channel vhf domain. The all-uhf proposal is licked before it starts, what with an overwhelming preponderance of vhf-only tuners in the 50 million tv receivers in use. A 12-channel system could not get off the ground if it entailed degradation of service to millions of existing set owners.

Somewhere in between the FCC plaintively hopes to find a minimal short-range answer. A majority now is pondering modifications to "shoe-horn" new stations in a number of markets to effect three-station (actually three-network) competition. This, proponents contend, could be accomplished through reduced mileage separations, perhaps on a temporary basis, or through regional junior reallocations by ordering existing stations to move to provide needed mileage separations.

Whatever the majority may propose, nothing will happen automatically. Even before it arrives at the point of instituting tedious rule-making procedures, the FCC plan must pass Congressional muster.

No government agency has ever been confronted with a more bewildering or thankless problem. Really, it is a multiplicity of problems because there are other services, besides television, clamoring for spectrum space. These are after the uhf band, the fm band, and in one instance, the lower end of the vhf tv band. Besides, the government services are yet to be heard from.

The ideal answer would be for one adequate contiguous vhf band for tv. This may come eventually, but it isn't in the cards for perhaps 10 years. So the FCC feels it must have a short-range solution.

It would be foolhardy to sacrifice a single uhf channel until it is known whether an exchange for comparable vhf space is possible. This would take time and possibly legislation.

Any effort inordinately to reduce vhf separations to accommodate more stations obviously will be resisted by existing stations, not because of fear of economic loss, but because of loss of service to established audiences. The FCC knows this through harsh recent experience. When it proposed to outlaw on-channel booster service in the mountain areas of the West, the wrath of the governors of the states plus their Congressional delegations descended upon it. Only thousands of viewers were involved. Uncounted millions would be affected through a breakdown of existing separations, as the FCC was pointedly told two weeks ago by the Assn. of Maximum Service Telecasters.

The FCC had the authority to effectuate the existing dual allocations in 1952. It has the unquestioned authority to revise them, but it must have plausible explanations for Congress and through the judicial processes open to licensees, for the courts.

The physical limitations of the vhf spectrum cannot be changed. So far no way has been found to induce manufacturers to produce all-channel receivers. No attempt yet has been made to license manufacturers in the same manner that transmitter types must be approved by the FCC. This could be a legislative approach Congress might want to consider.

So far the FCC has been showered with advice from self-serving groups. We do not profess to know the answers.

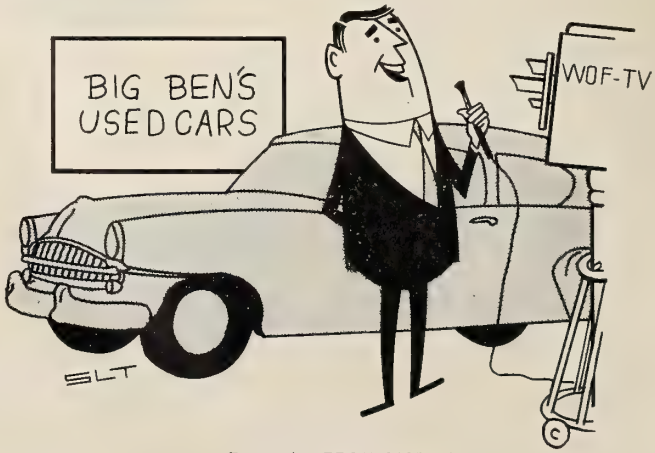
The most we can do is to extend our sympathy in the realization that whatever the FCC does it will be damned by certain elements in Congress and by groups with their individual axes to grind. It must do the best it can with what it has, under its sworn duty of providing equitable allocations. It should provide additional service where it is needed most, but without unduly molesting existing service.

Whatever the FCC concludes to be the short-range panacea, it is to be fervently hoped that there will emerge from the genius of science an electronic miracle that will multiply the spectrum so that all can be accommodated in a free competitive economy.

Dear sir, you cur

A POWERFUL union leader last week asked the FCC to compel four television stations to broadcast a union program.

The FCC should have told him to jump in the lake, or even in the Potomac which is polluted.



But it didn't.

Instead it prepared letters advising the stations that James Carey, president of the United Electrical, Radio and Machine Workers, had protested their rejection of his program and asking them for an explanation.

Mind you, no matter what answers the FCC receives, it must eventually tell Mr. Carey it cannot honor his request. The law prevents the government from forcing stations to broadcast any program. So why the letters?

They were instruments of the insidious technique of regulation by suggestion that has developed into an art at the FCC. Is the technique effective?

Well, one of the four stations changed its mind after Mr. Carey hollered copper.

CLOSED CIRCUIT

P. R. plan • Tv Information Committee, appointed last month at NAB convention, has reached preliminary agreement on three-year public relations project, with estimated budget of $1,140,000 per year, to be carried on under NAB "umbrella." Proposal, to be presented to NAB Tv Board at meeting in New York April 30, would provide for opening of New York public relations office with headquarters there or in Washington but to function as entity, separately staffed. Name tentatively discussed is Television Information Bureau (TIB) or Office (TIO).

Money for three-year project to affirmatively sell tv against print media and other critics would be raised principally from stations and networks. Highest one-hour rate of tv stations would be sought on quarterly basis. Networks would be asked to contribute perhaps $100,000 each with their owned and operated stations to subscribe on regular basis. Retaining NAB "umbrella" is premised on notion that its main functions are in public relations and government relations and that it has faltered badly in former. To withdraw project from NAB fold could precipitate schism with disastrous results, committee feels.

Squeeze play • One of biggest advertising agencies is practicing tie-in pressures reminiscent of war days when customers had to buy two bottles of bad rye to get one bottle of Scotch. Agency controls multi-million dollar account which is heavy user of spot tv. But for station to be ordered on this, agency "suggests" acceptance of another account, not so desirable. Issue has been joined and major battle impends with outcome a toss-up at moment.

Birthday ball • Gala commemoration of 25th anniversary of federal communications regulation is being planned by entities identified with overall communications field. Tribute would be paid to all living members of FCC, to legislators who sat on committees that wrote Communications Act of 1934 and to others in public life identified with early days of communications regulation.

Sparked by Federal Communications Bar Assn., project would include trade associations identified with communications (NAB, Electronic Industries Assn., Assn. of Maximum Service Telecasters, Clear Channel Broadcasting Service, telephone and telegraph entities, etc.). Event would be observed at dinner July 11, precise 25th anniversary of Communications Act, at Statler-Hilton in Washington.

Day and date • Chicago office of J. Walter Thompson Co. expected to release in next fortnight results of survey described as highly favorable to daytime radio. Agency's Family Advisory Service made study on behalf of JWT clients, showing influence of radio on American housewives during daytime hours.

Fast Nielsens • Second instant-ratings service is scheduled to be operating commercially in New York within weeks—A.C. Nielsen Co.'s Instantaneous Audimeter which has been in installation there for several months. Original target date of "spring" for commercial operation, authorities confide, will be met. Rates not yet set. American Research Bureau's Arbitron instant-ratings service has been in operation in New York since Sept. 1, 1958, on commercial basis.

Oversight revisited • New staff of House Legislative Oversight Subcommittee has been swamped last two weeks trying to provide information subpoenaed and volunteered in trials of Richard Mack, Thurman Whiteside and Bernard Goldfine, all indicted as result of subcommittee disclosures. Committee has taken extra precautions to acquire best staff available to avoid repetition of past strife. All applicants were given stiff tests, "even if recommended by the Speaker." Some job-seekers objected and left in "huff" when asked to take exam.

Committee now has 12 staffers at work, including Chief Counsel Robert Lishman, and plans to hire 3-4 more. No attorney has yet been assigned to FCC, which informed sources report, will be left alone for several months as far as alleged improper activities are concerned. First study on agenda will be one of "practicability, necessity and advisability" of placing some limitations upon ex parte recommendations made to commissioners in rulemaking proceedings. Problem will be explored in depth during hearings on HR 4800, designed to carry out subcommittee recommendations.

Against stream • Contrary to trend, WGN Chicago reports radio billings for first quarter 50% ahead of year ago. Tv, according to Ward Quaal, vice president-general manager of WGN stations, is up 39% as against 1958 first quarter, while on March-to-March basis, it's up 41.8%. He attributes increases to "uplifted operations, more aggressive selling by more salesmen."

Advance notice • Marking departure from procedure during incumbency of Sherman Adams as assistant to President, White House notified Senate Commerce Committee Chairman Warren Magnuson (D-Wash.) of decision to renominate Comr. Rosel H. Hyde for new seven-year term week before name was transmitted to Senate last Friday. White House said nomination would be coming up "within few days". Brief confirmation hearing is planned prior to June 30 expiration of present Hyde term. While quick confirmation is expected, committee may jog Comr. Hyde on Commission's delays in processing of cases and on lethargy in handling allocations and other matters.

The bounce • Firestone, in negotiations with ABC-TV after five years at 9-9:30 p.m. Mondays (story page 48), may go video-tape over independent stations if it does not find suitable major network time. This possibility, it's learned, has been discussed with Raymond Firestone, president. Five years ago, great furore running from White House to Capitol was precipitated when Firestone was dropped by NBC and moved to ABC. Then, as now, problem centered around inability to get competitive ratings for show.

Cure proposed • Legislation to eliminate Sec. 309(c) of Communications Act (which permits automatic protests on ground of economic injury) and to provide other remedies relating to pregrant protests, has been drafted by Federal Communications Bar Assn. and shortly will be introduced in Senate by Chairman Magnuson (D-Wash.) of Commerce Committee. FCBA President Leonard H. Marks has been authorized by executive committee to testify in support of remedial legislation at expected hearings.

Antitrust boss • Successor to Victor R. Hansen as assistant attorney general in charge of Antitrust Division, Dept. of Justice, in all probability will be Assistant Attorney General George C. Doub, chief of Civil Division. Judge Hansen's chief assistant, 31-year-old Robert A. Bicks, becomes acting chief, but Mr. Doub's final selection is expected because of age factor.

WEEK IN BRIEF

MR. DANFORTH

Agencies can improve their image • The way to win business' absolute confidence, says J. Davis Danforth, executive vice president, BBDO, and chairman, AAAA, is simple: be businesslike. Many advertisers, he adds, have a misconception about Madison Avenue because the avenue has not earned for itself the kind of business reputation it deserves. It is up to the agencies, argues Mr. Danforth, to improve its image in a society which is becoming increasingly more intelligent and more critical. For the how-to-do-it, read MONDAY MEMO. Page **26.**

Network tv sales boom • Hesitation of year ago is gone as advertisers sign up at a clip that pushes network fall-season nighttime sales three months ahead of 1958 selling season. Rundown of program lineups, production costs, sponsors, producers, and unsold or unassigned periods as they currently stand. Page **31.**

Timebuyers evaluate local tv • Programming at local level and some of the factors influencing their purchase of it are examined by 271 panelists in new NBC Spot Sales Timebuyer Opinion Panel. Page **34.**

AAAA Convention this week • Government relations, creativity, "rising expectations" to highlight annual meeting starting Thursday. Record 700 members and guests expected. Page **42.**

Do they get the message? • A research study by Norman, Craig & Kummel indicates that highly-rated westerns and other "violent" tv programs fall down in sponsor identity while "warm, friendly" programs, often with lower ratings, score higher in communicating the sponsor's message. Page **46.**

New chapter, same verse • Mack-Whiteside criminal trial marks third phase of Miami ch. 10 award aftermath. Page **78.**

CBS gains again • Stanton tells stockholders meeting that first-quarter sales and earnings were best ever; sees 1959 results ahead of record set last year. Page **64.**

CBS Radio signs six • WKMH Dearborn to replace WJR Detroit in affiliate lineup; five other Michigan stations in Knorr, Booth and Stevens-Wismer groups also sign up. Page **72.**

Tv allocations report • FCC has statement for Congress: Long range answer is 50-channel vhf band; short range moves include shoehorning extra vhf channels in problem areas. Page **75.**

Boosters made legal • FCC agrees it will license these tv auxiliaries. Commission, however, reaffirms previous decisions it cannot touch community antenna systems. It recommends congressional action to require catv systems to get permission from stations from which it picks up programs, and also carry local tv stations if requested. Page **76.**

Brewers boost broadcast buying • TvB releases figures showing their 1958 investment in spot and network tv up 6% over 1957. Report also reveals print media ads by brewers down 21%. Page **50.**

ANOTHER FCC TERM FOR HYDE

President Eisenhower on Friday nominated FCC Comr. Rosel H. Hyde for third seven-year term as FCC commissioner. Announcement was made from Augusta, Ga., where President was vacationing. Nomination requires Senate approval. Mr. Hyde's present term expires June 30.

Idaho-born 59-year-old Republican is true government careerist. He entered government in 1924 as clerk with Civil Service Commission, was accountant at Office of Public Buildings & Parks, and joined Federal Radio Commission in 1928. He received law degree from George Washington U., Washington, in 1929, and in 1942 was appointed assistant general counsel of FCC. In 1945 he was named general counsel, and in 1946 appointed commissioner to fill unexpired term of William H. Wills. In 1952 he was reappointed.

Mr. Hyde was chairman of FCC from April 1953 to October 1954, being succeeded by George C. McConnaughey.

During his tenure as chairman, Mr. Hyde put into practice revised tv processing procedure which saw hundreds of tv grants made—first after tv freeze, which began in September 1948 and ended in April 1952. He also has been active in international conferences, most recent being the 1950 North American Regional Broadcast Agreement and 1957 radio agreement with Mexico. Both are still awaiting Senate ratification.

ASCAP and radio: where matters stand

Details of both agreement and disagreement in current negotiations between ASCAP and All-Industry Radio Music License Committee were out in open Friday after report by Bill Morgan, KLIF Dallas, member of all-industry group.

Robert T. Mason, WMRN Marion, Ohio, committee chairman, had told broadcasters at NAB convention that broad agreement had been reached that would reduce radio stations' ASCAP music license fees by total 9% (BROADCASTING, March 23). Mr. Morgan gave other details in report to Texas Assn. of Broadcasters last week. Here, as confirmed by still other sources, is gist of situation:

There's agreement that commercial fee will be reduced from 2.25% of net time sales to 2.125%, and that sustaining fees for stations grossing more than $50,000 per year will be cut by total of $350,000, which is 35% of all sustaining fees paid by radio stations to ASCAP in 1957. (Reason there's no reduction in sustaining fee for stations grossing under $50,000 is that they pay only nominal sustaining rate of $1 per month.) It has been estimated that new agreement, when final, would mean total saving to radio of more than $750,000 a year.

Where there's disagreement between ASCAP and all-industry committee is in finding formula for distributing that $350,000 reduction in sustaining fees. Under old licenses, sustaining fees were based on stations' half-hour and quarter-hour rates. But ASCAP wants new rates based on multiples of one-minute rates. It's on this point, and on amount of reductions for stations in different size groups, that differences continue—and currently appear far from settled.

When agreement is finally reached, all-industry group will make recommendations but it will be for each station individually to decide whether to accept or reject.

Alert test success although bugs appear

For 30 minutes Friday—between 11:30 a.m. and noon, EST— more than 3,000 radio and television stations were mute while 1,200 other am radio stations pooled forces to bring U. S. listeners taste of wartime alert. Cost to broadcasters in loss of half-hour revenues: estimated $250,000.

First reports, countrywide, hailed efficiency of operation. Scattered reports indicated interference problems in some areas; poor reception of either 640 kc or 1240 kc (Conelrad frequencies) in some areas, unintelligible messages from civilian defense authorities in others.

National program, live from unidentified "secret" civil defense headquarters, fed voices of four recognizable network announcers to all Conelrad stations. They were Charles Ashley, ABC; Lewis Shollengberger, CBS; Steve McCormick, MBS and Robert McCormick, NBC.

Material from national headquarters was under production supervision of professional broadcasters—Don Coe, ABC; Dave Driscoll, CBS; Joseph Keating, MBS and Sam Sharkey, NBC. Also assigned to production planning was Vincent Wasilewski, NAB government relations executive.

National program was highlighted by live message delivered by Civil & Defense Mobilization Director Leo A. Hoegh. Messages mainly were explanation of Conelrad operation and description of construction and equipping of emergency shelters.

In Washington, D.C., area, Conelrad stations made switches to 640 kc and 1240 kc in 30-60 seconds after "alert" sounded. Program material furnished by local civil defense to 1240 kc clusters proved of such low quality, civil defense officers ordered switch to national program. Some fading discernible on 640 kc, but not of major significance. Reception on 1240 kc in downtown Washington proved poor.

All radio and tv stations in Washington area ran explanations of upcoming Conelrad drill every 30 minutes all morning up to 11:30 practice alert. Telephone calls inquiring about silence were at minimum (WTOP-AM-TV, CBS affiliate in capital city, received 23 calls; WARL Arlington, Va., received only four calls).

Bad Time in L.A. • Conelrad exercise put Southern California stations off

CONTINUES *on page 10*

No Merger

Merger talk between Fletcher D. Richards Inc., and Cohen & Aleshire, both New York, which had been proceeding for some time is now reported definitely off. C&A Chairman Harry B. Cohen was quoted as saying there was no anticipation of resumption of negotiations. Meanwhile, remaining formalities in merger of Richards organization with Calkins & Holden were expected to be cleared up in near future.

AT DEADLINE

CONTINUED *from page 9*

air at 8:30-9 a.m., peak morning traffic time and heaviest shopping day of week. Morning motorists were deprived of bulletins on which they normally depend to warn them of traffic conditions.

Western station operators resentfully charged committee of eastern broadcasters picked relatively quiet 11:30-Noon EST for test, with westerners having no voice in matter.

Minimum calls to Southern California stations resulted from widespread publicity over air, but stations adjacent on radio dials to Mexican border outlets—which continued broadcasting—received calls accusing them of ignoring Conelrad-imposed silence.

In Marlboro, Mass., WSRO there reported so many alerts filled air that warnings could not be understood.

Conelrad drill throughout country was checked by FCC field engineers, with reports due this week. In some areas variations of Conelrad were ordered—including use of stations on regular frequencies and with full power for 2-3 minute bursts.

Only two dissents made on Friday: One was from Savannah civil defense director who claimed Conelrad system was "obsolete" and would only lead to general panic. He referred to test several years ago which showed, he said, 90% of people in Savannah and Chatham County could not receive intelligible signal.

Other was Ben Strouse, WWDC Washington, who in on-air editorial lambasted quality of civil defense program material furnished 1240 kc clusters in Washington area. For first 15-minutes, Mr. Strouse said, program was "absolutely unintelligible."

Wire Alert Plan • Muzak Corp., New York, music programmer, has arranged with civil defense for number of its franchise holders to feed alert in time of national emergency or disaster condition. Warning signal system, used by 177 of Muzak's franchisers, will be sent over leased phone wire (costs to be shared with state civil defense offices), according to details to be revealed today (April 20) in New York when several hundred Muzak franchisers will assemble for three-day meeting.

KPEL to ABC

KPEL Lafayette, La., affiliates with ABC Radio network effective April 27. Its owner is Pelican Broadcasting Co., of which John Paul Goodwin is president, William A. Patton vice president and general manager. KPEL operates on 1420 kc with 1 kw daytime and 500 w night.

WEEK'S HEADLINERS

MR. RICH

• LEE RICH, vp in charge of media for Benton & Bowles, N.Y., elected member of agency's board of directors (CLOSED CIRCUIT, April 6). Mr. Rich joined B&B in 1952 as associate media director; was elected vp in 1955, and named director of media in 1957. Earlier, he had been media director of Wm. H. Weintraub agency in New York (now Norman, Craig & Kummel) for three years and media director for Albert Frank-Guenther Law, N.Y.

MR. MARTIN

• DONALD N. MARTIN will resign as public relations director of NAB, effective June 19, to establish his own public relations firm with offices in New York and California. Firm will result from merger of two existing companies, it is understood. Harold E. Fellows, NAB president, is considering successor to Mr. Martin but has not yet made his decision. Mr. Martin joined NAB in November 1956.

MR. TREVARTHEN

• WILLIAM H. TREVARTHEN, vp of production services, ABC, since February of this year, named director of network operations, NBC-TV, effective April 27. He will be in charge of NBC-TV studio and theatre operations, maintenance and plant facilities, administration and scheduling of all engineering personnel and special and sound effects. Other NBC appointments: JAMES G. HERGEN, director of participating program sales, NBC-TV, appointed director of NBC Telesales, N.Y., and WILLIAM F. STORKE, administrator of participating program sales, appointed director, succeeding Mr. Hergen.

MR. SHELTON

• WILSON A. SHELTON, vp and creative director of Compton Adv., N.Y., appointed senior vp and creative director of agency. Mr. Shelton replaces ALFRED J. SEAMAN, who has resigned, and will announce his future plans shortly. Mr. Shelton also was named to Compton's board of directors. Previously, he had been with Biow Co., N.Y., as senior vp and creative director and had held similar posts with Dancer-Fitzgerald-Sample, and Wm. Esty Co., both New York.

MR. KRUGMAN

MR. GOULD

MR. MELAMED

MR. MAY

LESTER KRUGMAN, executive director of advertising, promotion and merchandising of National Telefilm Assoc., N.Y., named vp in charge of advertising and public relations. Other NTA appointments: GEORGE K. GOULD, president of NTA's Telestudios Inc., appointed to additional post of vp in charge of broadcast facilities; DAVID J. MELAMED, vp in charge of business affairs, named vp in charge of administration; ALAN MAY, vp-treasurer of National Theatres Inc., L.A., assumes added duties of vp-treasurer of NTA, controlled by National Theatres; SAMUEL P. NORTON, formerly partner in Rosenthal & Norton, Los Angeles law firm, elected vp in charge of legal and business affairs, and BURTON LIPPMAN, controller of NTA, adds duties of assistant treasurer and assistant secretary.

FOR OTHER NEWS OF PEOPLE SEE FATES & FORTUNES

DISTINGUISHED AWARD TO KLZ-TV DENVER

THE ALFRED I. DUPONT TELEVISION AWARD FOR 1958 has been presented to KLZ-TV Denver, Colorado, . . . the only station to be so honored.

The citation to KLZ-TV reads: "Cited for the clear evidence in its programming policies of a sense of obligation to participate intimately in community life, for its furtherance of cultural traditions and identity in the region it serves, for its willingness to devote some of its best hours and talent to program in the public interest, and for its record of giving substantial time to balanced and fair discussion of controversial issues. Specifically cited are the presentation of such basic problems of community concern as the problem of water, the direction of attention to the history, traditions and legends of Colorado, the extensive coverage of local and national news, and a Panorama program which mirrors the community to itself. It is also notable as the first radio or television station to win an Award of the Alfred I. duPont Awards Foundation for the second time."

KLZ Radio received the Alfred I. duPont Award in 1948. This latest honor to KLZ-TV reflects a continuing philosophy of excellence in over-all programming, a principle of leadership to which this company remains dedicated.

A CALENDAR OF MEETINGS AND EVENTS IN BROADCASTING AND RELATED FIELDS

(*Indicates first or revised listing)

April 20—Radio Advertising Bureau sales clinics at Tulsa, Okla., and Minneapolis, starting nationwide series that ends May 22. RAB will present 30 how-we-sold-it stories and exhibits.

***April 20—Hollywood Ad Club's** Broadcast Advertising Day. NAB President Harold E. Fellows will address luncheon at Hollywood Roosevelt Hotel, co-sponsored by Hollywood Chamber of Commerce.

April 20-23—American Newspaper Publishers Assn., 73rd annual convention, Hotel Waldorf-Astoria, New York. Agenda includes discussions on radio-tv competition for national ad dollar; working relationships between newspapers and broadcast stations; the problem of agencies who, for retail accounts for commission reasons, favor radio-tv and the effect of competitive media in the decline of newspapers' national advertising.

April 21—"Genii" awards banquet of **Radio & Television Women of Southern California,** Beverly Hills Hotel, Los Angeles.

April 23—Georgia Assn. of Broadcasters, management conference, Dinkler Plaza Hotel, Atlanta.

***April 23—Chicago Broadcast Adv. Club** monthly luncheon meeting, Sheraton Towers, Chicago. Oliver A. Unger, president of National Telefilm Assoc., is featured speaker.

April 23-24—Assn. of National Advertisers two-day workshop on advertising expenditures, Westchester-Biltmore, Rye, N.Y.

April 23-24—Ohio Assn. of Broadcasters, Sheraton Gibson Hotel, Cincinnati. Speakers: Jerome H. Feniger, Cunningham & Walsh; Sol Taishoff, editor and publisher of BROADCASTING, "Editorializing in Radio"; Ed Broman, Ziv Productions, "Syndicated Tv Film"; Adam Young, and others to be announced. Entertainment Friday evening includes buffet dinner at Wiedemann Brewing Co. and Cincinnati Reds-Milwaukee Braves baseball game.

***April 23-25—Western States Advertising Agencies Assn.,** ninth annual conference, Oasis Hotel, Palm Springs, Calif. Stan Spero, vice president, KMPC Los Angeles, will represent radio; Selig Seligman, vice president and manager, KABC-TV Los Angeles and Harry Floyd, manager of tv sales, NBC Western Div., will speak for television Friday morning during a panel on "How Media Is Meeting the New Concepts in Advertising."

April 23-25—American Assn. of Advertising Agencies, annual meeting at The Greenbrier, White Sulphur Springs, W. Va. Annual elections, other business in closed sessions April 23. April 24, presentation on "The Revolution in Rising Expectations" by correspondents, editors and publishers of Time Inc. magazines. Award-winning tv commercials, chosen by Art Directors Club of New York, and advertising films from Venice film festival will be shown both April 24 and 25. Creative session April 25 on safeguarding creativity in today's advertising agency, with discussions by Anthony C. Chevins, Cunningham & Walsh; John A. Sidebotham, Young & Rubicam, and David Ogilvy, Ogilvy, Benson & Mather, all New York. Rep. Bob Wilson (R-Calif.) to discuss legislative threats to advertising and what advertising needs to do. Other speakers to be announced. Annual banquet April 24.

April 24—New Mexico AP Broadcasters Assn., Bishop's Lodge, Santa Fe.

April 24—Oregon AP Radio Assn., Multnomah Hotel, Portland.

April 24-25—South Dakota Broadcasters Assn., Sheraton-Cataract Hotel, Sioux Falls. A sales clinic is planned. Non-members invited.

April 24-25—New Mexico Broadcasters Assn., Bishop's Lodge, Sante Fe.

April 24-25—Arizona Broadcasters Assn., spring meeting, Ramada Inn, Phoenix. Speakers include Walter Lucking, president, Arizona Public Service Co.; Maj. Allan Deming, public information officer, Fort Huachuca, Ariz.; Stary Gange, vice president, Pacific Olive Growers Assn.; FCC Comr. Robert E. Lee and Howard Bell, NAB vice president. Phoenix mayor Jack Williams will be toastmaster at Friday banquet.

April 25—Spring meeting of **Associated Press Broadcasters of Idaho and Utah,** Hotel Boise, Boise.

April 25—United Press International Broadcasters of Connecticut, Waverly Inn, Cheshire.

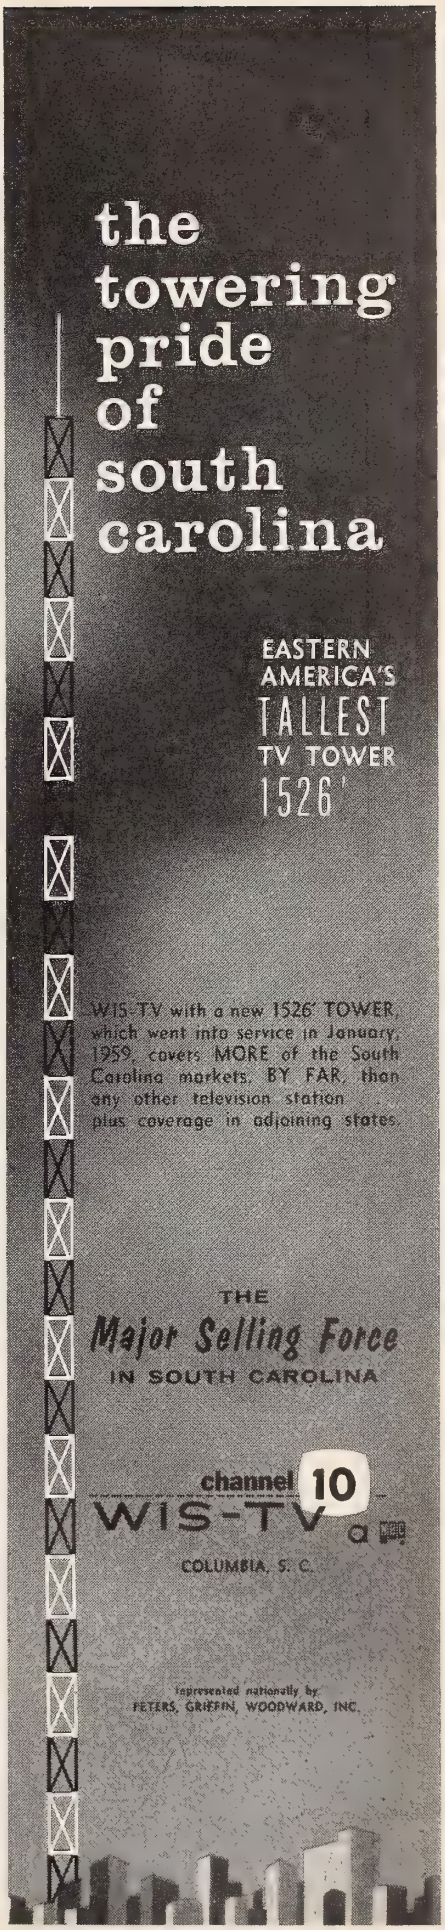
April 25—United Press International Broadcasters of Indiana, Sheraton-Lincoln Hotel, Indianapolis. Agenda commences at noon and includes discussion on libel laws with report by President Bill Donnella.

April 25—Idaho-Utah AP Broadcasters Assn., Boise Hotel, Boise.

April 26—Colorado-Wyoming AP Broadcasters Assn., Albany Hotel, Denver.

April 26-29—National Assn. of Transportation Advertising convention, The Greenbrier, White Sulphur Springs, W. Va.

April 26-29—U.S. Chamber of Commerce annual meeting, chamber hdqrs., Washington.



April 27-28—Potts-Woodbury Adv. Agency Radio-Tv Farm Clinic, Bellerive Hotel, Kansas City. Invited radio and tv farm directors and farm products manufacturers will be guests.

April 27-May 2—Journalism & Broadcasters Week, School of Journalism & Communications, U. of Florida, Gainesville. (April 27 is Broadcasters Day. Key speakers include FCC Comr. Robert E. Lee; Matthew J. Culligan, NBC-Radio vice president; John F. Day, CBS tv news director, and Harold Krelstein, president of Plough stations).

April 29—Comments due on FCC proposal to prohibit networks from representing tv stations other than their own in spot representation field. Docket No. 12,746.

April 29-30—International Advertising Assn. convention, Hotel Roosevelt, New York.

***April 29-May 2—American Women in Radio & Television,** annual convention, Waldorf-Astoria, New York. **April 29:** Welcome party, 10:30 p.m. **April 30:** Tours and reception; banquet at 7 p.m., Sen. John F. Kennedy (D-Mass.) speaker; general session, 10 p.m., "Brainstorming for a Better AWRT". **May 1:** Fannie Hurst, commentator-author, keynote speaker at 9:45 a.m. opening session; NAB's Harold Fellows to moderate 10:30 a.m. panel on communications; Jayne M. Shannon, J. Walter Thompson Co. broadcast media supervisor, to moderate 2:30 p.m. panel on "Selling Techniques in a Changing Society." **May 2:** John Day, CBS-TV director of news, to moderate 10:30 a.m. panel on "Technical Progress—How to Make the Most of It"; also at 10:30 a.m., panel on

WSBT-TV ...SOUTH BEND, INDIANA'S DOMINANT STATION

HAZEL BURNETT... Captures the Eyes and Ears of Housewives in 15 Counties

Housework in 15 counties stops when Hazel Burnett's "Homemakers Time" comes on the air—5 days a week from 9 to 9:30 a.m. That's because Hazel, WSBT-TV's Home Economist discusses subjects dear to the housewife's heart. The ladies respond with enthusiasm to the tune of about 1400 letters and post cards monthly.

"Homemakers Time" is the only program of its type in the South Bend area. It is typical of the many highly-rated local personality shows on WSBT-TV.

WSBT-TV dominates the prosperous South Bend market. The Nov. A.R.B. shows this station carrying 9 of the 10 top rated programs, 18 of the top 25; 33 of the top 50! Total Effective Buying Income in the station's 15-county coverage area is $1,594,029,000!

See your Raymer man or write WSBT-TV about availabilities on "Homemakers Time" and other popular local shows.

Station managers may compete for promotion prizes and for all expense-paid trips to Nashville.

June 19-20—Colorado Broadcasters & Telecasters Assn., Glenwood Springs.

June 21-26—American Institute of Electrical Engineers, summer and Pacific general meeting, Olympia Hotel, Seattle.

June 22-Aug. 15—Summer Radio-Tv Institute, Stanford U., Stanford, Calif. George A. Willey, director.

June 28-July 2—Advertising Assn. of the West, annual convention, Tahoe Tavern, Tahoe City, Calif.

HOW TO GET RID OF RED ANTS

You can trap them, stomp on them, drown them with bug bombs, but if they keep coming back for more, what do you do? One WJR listener wrote to Bud Guest for help (Bud has a breezy program "The Sunny Side of the Street" daily from 8:15 to 8:30 a.m. on WJR).

The problem was aired and, within a few days, produced a deluge of letters from experts on how to get rid of red ants. Audience response like this is not unusual as Bud Guest is a favorite correspondent of listeners in Michigan, Ohio, Indiana and Southwestern Ontario.

Imaginative programming like "The Sunny Side of the Street" and many other live shows carry out WJR's philosophy—live radio with adult appeal. And since adults are the people with money, where can you find a better pipeline to their pockets and purses than on a station which talks their language?

Whether your problem is red ants or a sales campaign, ask your Henry I. Christal representative for all the facts on WJR, the "buying power" station in the Detroit-Great Lakes area.

WJR's primary coverage area—over 17,000,000 people.

Support appreciated

EDITOR:

John M. Patterson, our president, has brought to my attention the very excellent editorial support in several issues of BROADCASTING weekly on the Truth Broadcaster Program and its NAB-sponsored radio and tv participation program, and I want you to know how much we appreciate it.

Gwilym A. Price
Chairman of the Board
Crusade for Freedom Inc.
New York

Underscore plea for vigilance

EDITOR:

I am grateful and in complete accord with your splendid editorial, "Television and Politics" (BROADCASTING, April 6).

As a station executive, I echo your advice of the essentiality of the nation's stations exercising the most extreme vigilance in the handling of political broadcasting. When we stray from the fair play reputation which has become our hallmark, we certainly will be inviting drastic repercussions from any offended political party or individual.

As executive director of the 1960 Democratic National Convention, I welcome your early and strong warnings along these lines well in advance of a political contest of national importance.

J. Leonard Reinsch
Executive Director
1960 Democratic Natl. Conv.
Washington, D.C.

EDITOR:

Congratulations on "Television and Politics." Leadership by publications such as yours in calling for continued and constant objectivity in the presentation on television and radio of the candidates and the views of all parties will insure a fairer presentation to our citizens of political ideas. It will help also to cement even firmer a continued pleasant professional relationship between the nation's broadcasters and those of us in the field of politics.

Paul M. Butler, Chairman
Democratic National Committee
Washington, D.C.

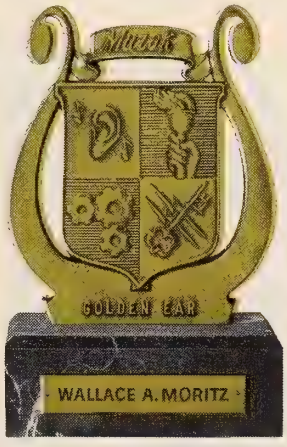
MUZAK CORPORATION



take great pride in announcing

the 1958 winner of the

FIRST ANNUAL GOLDEN EAR AWARD

Mr. Wallace A. Moritz

IN RECOGNITION of his outstanding achievements, Mr. Wallace A. Moritz of San Angelo, Texas, is awarded the MUZAK Golden Ear Award for 1958. For his Chairmanship of the First National Miss Wool Fiesta, and his production of the film, "The San Angelo Story," plus the official part he played in the activities of the March of Dimes, the Community Chest, the Memorial Hospital, Children's Treatment Center, Mr. Moritz was named the San Angelo "Citizen of the Year." He is Vice President of the Board of City Development and was also named "Boss of the Year–1958" by the National Secretaries Association.

JUDGES: **IVY BAKER PRIEST,** Treasurer of the United States
JACK WRATHER, Chairman of the Board of Muzak Corporation
CHARLES COWLEY, President of Muzak Corporation

THE GOLDEN EAR AWARD is an annual award established by the MUZAK Corporation to honor the franchiser whose achievements in National, State, or Community affairs mark him as the outstanding citizen of the year in the MUZAK family. In making this award, MUZAK Corporation seeks to encourage and honor individual excellence, pre-eminence and leadership in church, fraternal or social work; philanthropy; government; business; or other meritorious human endeavor.

MONDAY MEMO

from **J. DAVIS DANFORTH,** *executive vice president, BBDO, and chairman, AAAA*

If you want the respect of businessmen, you have to be businesslike

The business world has changed dramatically in the last few years, particularly the management of the large corporations which are today America's biggest advertisers. Today there are professionals in most key jobs. The "egg-head" in America is no longer solely a scientist. Business men are being trained up. American universities and business schools are supplying many more and an even higher level of well-trained young men to move up through the ranks in large corporations.

Many business men today have a misconception about the advertising business because advertising, particularly the agency business, has not earned for itself the kind of business reputation it deserves.

There is nothing wrong with advertising agencies that a businesslike approach can't correct. If we run our individual agencies in a businesslike way—which means being efficient in the use of our human machinery—we will improve our image and we will continue to grow and to prosper.

The major asset of any advertising agency is its people. Unlike most of our clients, we have no tremendous investment in plant, or machinery, or inventory of manufactured goods or any raw materials like steel, or oil, or wheat, or any other commodity. All we have is our *people*. Our single biggest expense, as a personal service business, is our payroll and the space to house our people. In fact, in the AAAA agency, payroll alone averages just over 60% of total operating expense.

How we behave in our day-to-day relationship with our clients determines what kind of a business image we create. If we, in our client relations, become more dedicated, more thorough, more constructive and more creative than any other outside professional vendor he employs, we could not help but bring stability to the agency field. Just as the advertiser organization is acquiring more highly trained and skilled people in its marketing organization, so should the advertising agencies of this country be recruiting and training able, young men and women.

The need for better recruiting

Business schools are today turning out more and more graduates to administer the marketing investments of which we are an integral part. We must do a better job of attracting them to our business. By this I don't mean that we must, in any way, change our way of doing business as agencies, or change the atmosphere of our agency life. What is important is that we must sell ourselves to the next generation of top management as being as businesslike as they feel they, themselves, are.

We will all agree, I am sure, that it would be ridiculous to try to persuade financial, manufacturing, legal and accounting oriented men to be agency-like in their thinking. It would be equally unrealistic to attempt to suggest that marketing and advertising managers become more agency-like in their jobs. The agency world is primarily a creative adjunct *to* business. But it must be managed and presented to business in *business* terms.

All too frequently advertisers, including the board of directors, think of agencies as a peculiar brand of irresponsible individuals who can't understand a profit and loss statement, are not vitally concerned with retail sales, are sadly lacking in a basic understanding of modern marketing techniques and have no real interest in merchandising, sales promotion or the overall relationship of advertising percentage to sales.

Another thing which business men think about agency people is that they move from one job to another much too frequently. It is certainly true that job changing, reported so fully by the advertising columnists every day, year in and year out, certainly doesn't *improve* our image in the minds of business.

No wonder many of them think we must over-pay, have no real stability and that every young man on Madison Avenue is open to a higher bidder. Perhaps if legal offices, banks, stock exchange firms, had news columnists eagerly reporting their industry, they would reveal almost as many moves. But, in any case, I am sure all too frequently we hear friends say, "Why do advertising agency people move around so much?" The answer to that is we *don't*; we just get more publicity.

The need to destroy myths

The figures to prove that personnel turnover in agencies is lower than in many other businesses were presented four years ago at the 37th annual meeting of the AAAA by Lawrence Valenstein, president of Grey Advertising Agency. Some of those figures are worth quoting again.

Mr. Valenstein used U.S. Dept. of Labor statistics to show that monthly turnover of personnel in 26 basic industries was 57% higher than it was in AAAA agencies. So you see the facts about job stability in agencies are more reassuring than the public's fancies. Somehow we must make the public aware of those facts.

During the past year, as chairman of the American Assn. of Advertising Agencies, I have had occasion to travel several thousand miles around the country and I have met hundreds of agency people. They represent small, medium and large-size agencies. As a matter of fact, the more than 300 AAAA agencies are today placing 75% of total national advertising.

The early part of last year they saw advertising appropriations cut as the country went through a very difficult first quarter. They were even more concerned about the drop in their client's sales than they were about the loss of their own billing. Retrenchments were made, agencies "tightened their own belts" to try to maintain service and to protect their own profits. Speaking of profits, here again advertising agencies must be more businesslike.

For almost 30 years, members have furnished the AAAA headquarters office balance sheets and profit and loss statements. The last 18-year trend from 1940 to 1958 has shown a steadily diminishing return. This, in spite of the fact that total national advertising has shown a tremendous increase.

Agency net profits, after taxes, in 1957 averaged just a little over six-tenths of one percent of gross billing! Not many of our clients could stay in business with this very narrow margin of profit. Even comparing agency profits

Dave Danforth is one agency executive who has stayed put. He's never worked for any other outfit. Born in Kane, Pa., April 22, 1903, he attended prep school at Phillips Exeter Academy, went three years to Princeton (where he was active in the Triangle Club), quit in 1925 to become a messenger boy with Barton, Durstine & Osborn. Three years later that agency merged with George Batten Co. to become BBDO.

A client contact specialist, Mr. Danforth has been executive on some of BBDO's major accounts, including General Electric, B. F. Goodrich, du Pont, U.S. Steel and Philco. He was elected to the BBDO board in 1939, became a member of the executive committee in 1946 and executive vice president in 1949. He was elected chairman of the American Assn. of Advertising Agencies last year.

Mr. Danforth married Ethel Reasoner Dec. 6, 1926. They have two sons, John Loring Danforth, now with Curtis Publishing Co., and Peter Davis Danforth, an Air Force lieutenant.

•

as a percent of gross income, we are still lower than the top 500 industrial corporations. Our average was only 4.1% as a percentage of gross income.

It is obvious that with decreased net earnings and consistently expanding service facilities, the management of advertising agencies must make a very real effort to be good enough business men to produce and maintain agency profits at a reasonable level.

In this age of expanded services, agencies cannot live on commissions from media alone. In fact, on the average, media commissions account for only about two-thirds of agency gross income. Agencies have found that they must collect for many research and public relations jobs, for special marketing studies and sales analyses, for production costs, both print and tv, for sales promotion and research and for many, many other collateral jobs requested by the advertiser.

Our clients want us to make reasonable profits, because they know that if their account is making money for the agency, they will get that much better service. They have greater respect for agency management when they know we are good managers of our *own* business.

The effects of television

While we are on the subject of acting like business men, it is a good opportunity to mention broadcasting. It was only 10 years ago that commercial television really had its start. And what a start! Today, with American homes now owning 44,000,000 tv sets, a whole new dimension has been added to agency service. It is certainly true that the addition of television into the commercial advertising arena has required a host of new, highly specialized people to plan, to produce programs and commercials.

Naturally, there have been many criticisms about "too many commercials," "too many westerns," "too many quiz shows," etc., etc. But can you picture America *without* television?

Many people have good reason to compain about *some* programming and *some* commercials, but considering that this 10-year-old baby has grown into a multi-million dollar giant in this short decade, there can be no discounting the entertainment, information and the pleasure it has brought into millions of homes. Nobody has to pay a penny to look at television and if the viewer doesn't like what he sees, he may switch to another station or he can turn the set *off*. Latest "use" figures indicate the average set is tuned in to some program more than 5½ hours every day.

There is a tremendous amount of good business thinking going into the planning of these programs by the advertiser, by the agency and by the network. Agencies are constantly striving to improve programming and to buy both time and talent on a more efficient basis.

The importance of attitudes

Perhaps the most important "A" in the AAAA is *attitude*. The attitude of the agency men and women about their individual job and the manner in which this is manifested in their individual actions, behavior, speech, demeanor. It is our attitude more than anything else—attitude toward our own associates, our clients, our suppliers and media representatives—that can help us become business-like.

The AAAA has continuously promoted the basic practice of serving advertisers by creating advertising which has the best possible chance to succeed, by serving media in turn, by making successful use of the space and time which media have to sell, and by serving the economy by helping to bring more goods and services to more people.

We are consistently trying to attract, select, train and handle more high caliber people. Agencies are developing new types of research, both in quality and in quantity in an effort to make advertising more efficient. As the economists and business leaders are shifting emphasis from production to marketing and consumption, there is a growing awareness that advertising can and should play an even larger role in finding customers and educating them to the enjoyment of even higher standards of living. Doing this, we cannot fail to gain public *understanding* of advertising, and its key role in our economy.

There is no question that we have our own public relations job to do. We have done a much better job for our clients than we have done for ourselves. In the next decade, total advertising will grow and grow, and it will become even more important that leaders in business, in government and education learn to respect us and our work.

in Shorthand...

it's Gregg

in TV and Radio...

IT'S BROADCASTING YEARBOOK!

To the uninitiated, a page of Gregg is so much Greek. But a secretary trained in the symbology of shorthand's foremost authority can translate it into a meaningful communication. To a bus-driver, a page from the 1959 **BROADCASTING YEARBOOK** won't be very lucid either. But the men and women who make important decisions in broadcast advertising look upon this comprehensive volume as **THE** authority for a multitude of facts about television and radio... **dependable** facts they can translate into more profitable advertising plans. Nowhere is so much useful TV-radio information assembled within a single set of covers, or consulted so often day-after-day throughout the year. The 1959 **BROADCASTING YEARBOOK,** packed with more data about the broadcast media than ever before, will be delivered to 16,000 **paid** subscribers in August. Your message gets a big bonus of attention and long life at regular **BROADCASTING** rates. Today's **the** day to reserve a good spot for it.

Deadlines? July 1 if proofs are needed; July 15, no proofs.

Captive or Captivated Audience?

There's all the difference in the world between a "captive audience" and a "captivated audience."
This goes for the commercials as well as the show.

Vol. 56 No. 16

THE FALL TV NETWORK LINEUP

- **It's shaping up earlier by far than it did last year**
- **More than $5.5 million a week in programming is now set**
- **Some 30 new programs will be introduced—plus specials**

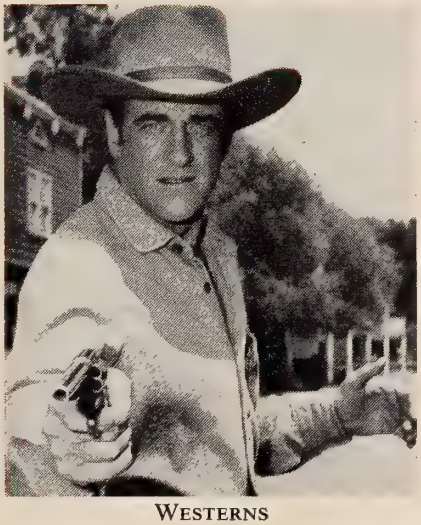
Brisk sales are booming tv network fall-season lineups toward completion at a pace a good three months ahead of last year's.

Advertisers who hedged and hesitated in the recessive economy of early 1958 are showing relatively little inclination to dawdle in 1959. The nighttime schedules of the three networks are at least as nearly sold out in April 1959 as they were in late July a year ago—and maybe more so.

An estimated $5.5 million a week in regularly scheduled nighttime network programming is already on the books of ABC-TV, CBS-TV and NBC-TV, according to the best available accounts. This compares with something over $5 million last July (BROADCASTING, July 28, 1958). These figures do not include time charges—or the production and time costs of scores of big-budgeted specials. Nor do they count daytime programming.

ABC-TV, off to the best start in its history, is less than six hours short of sell-out of its evening schedule for the 1959-60 season—about one hour better than last July in selling its 1959-60 lineup. CBS-TV is about four hours short of wrap-up, approximately its position last July. NBC-TV officials will not disclose precisely which hours are unsold but say they've sold close to 90% of their nighttime schedule, which would put them ahead of July.

Reshuffling Ahead • None of this is to say that any network's 1959-60 lineup is locked up—far from it. All three networks, in reporting program schedules, stressed that they were tentative and that a number of changes—probably many—can be expected before the new season gets under way. Some reshuffling may still be going on in September or even October.

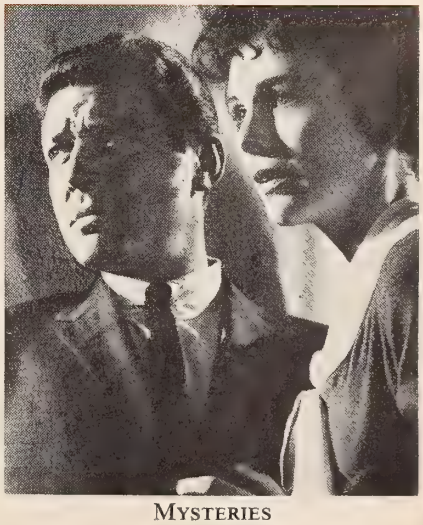


The NBC-TV lineup of sponsors and their programs appeared even more tentative than the others. This stemmed in large part from NBC's refusal—for competitive reasons, officials said—to specify in a number of cases what advertiser planned to sponsor which program. This in turn was attributed partially to negotiations still going on between sponsors and network over specific programs and time periods.

New Shows • The overall schedules, as tentatively drawn, show that the independent packagers continue, along with the networks, as prime sources of program material. Five independents alone are producing 31 series—Warner Bros. ten, Revue eight (not counting two by MCA, Revue's parent), Four Star Productions five, and Goodson-Todman and Screen Gems four each.

The lineups as projected at this point anticipate more than 30 new shows—approximately equally divided among the three networks.

Westerns and mysteries again take top honors, with about 13 hours of westerns and 12 of mysteries each week. Variety shows occupy about nine hours, situation comedies about seven and a half, dramatic programs six and a half, adventures four and comedy, quiz and panel shows all down to three and a half hours each.



FOR NIGHTTIME SCHEDULES TURN PAGE

WESTERNS

VARIETY

MYSTERIES

There'll be more of these shows than any others on network tv next fall.

FALL SCHEDULES FOR TV NETWORKS

What the television networks' 1959-60 nighttime schedule will offer, what it will cost in production, who the independent packagers are and what selling still remains to be done are all reflected in the accompanying table. Periods unsold to date carry the notation "available." Programs listed as "unassigned" indicate sponsors have been signed, but specific shows or times have not yet been decided upon. Program times and sales information were supplied by the respective networks. Production costs, although not official, were estimated by BROADCASTING on the basis of the best information available from a number of sources. Program times are in terms of current New York time on date of broadcast. Agencies handling accounts are listed in parentheses ( ); production firms are in brackets [ ]; starting dates indicate commencement date of fall cycle for new series. Where no date is shown, starting date is currently undetermined.

SUNDAY

	ABC-TV	CBS-TV	NBC-TV
7:30	*Maverick* $95,000 Kaiser Drackett (Y&R) [Warner Bros.] Continuing	*Little Julius* $37,000 Available [CBS]	*Riverboat* (7-8 p.m.) $80,000 [Revue]

10:00	*Sports* $50,000 Hamms (C-M) National Bohemian (Doner) Gen. Mills (D-F-S)	*Gunsmoke* $50,000 L&M (D-F-S) Remington (Y&R) [CBS] Continuing	
10:30		*Markham* $37,500 Schlitz (JWT) [Marada Prod. with Revue] Continuing	*DA's Man* $37,500 Unassigned [Mark VII]

WHAT BUYERS WANT IN LOCAL SHOWS

Tv station originations analyzed in national agency survey

Local television programming, its sales appeal and many of the factors influencing its purchase are evaluated by some of the country's leading agency buyers in the fourth NBC Spot Sales Timebuyer Opinion Panel report, being released today (April 20).

Here are highlight findings based on returns from 271 panelists representing 170 different advertising agencies or agency offices (also see accompanying tables and comments of individual buyers):

• There is almost as much sponsor demand for local tv programs appealing primarily to men as for those directed primarily to women.

• Almost three-fourths of the panel members said that the type of programming—having it compatible with the sponsor's product—is a major consideration in deciding what to buy.

• Two-thirds felt that the live element in local programming offsets a higher rating of a film show, at least to some degree.

• To sell a family product, an overwhelming number would prefer an early-evening adult show (74%) over an early-evening children's show (9%)—even if the audience composition were exactly the same for both programs.

• The most "acceptable" cost-per-thousand per commercial minute in a half-hour program purchase was in the $2-$2.99 range (named by 43%). Next came $1-$1.99 (33%), followed by $3-$3.99 (19%) and $4 and up (5%).

• In buying a feature film show, the panel ranked primary considerations in this order: ratings history (46%), strength of the station's film library (38%) and the current rating (30%).

• In buying a local news show, these are the three top considerations, in order: rating, newscaster's style and delivery, and national and local news content.

• On editorializing by stations the pros (30%) and cons (27%) were fairly evenly matched. But 39% held no strong opinion either way.

• Almost one-third of the panel

TEXT CONTINUED page 39

PROGRAM SHOULD SUIT THE PRODUCT: Most timebuyers say "compatibility" of programming and sponsored brand is a major factor in deciding what to buy.

Aside from an obvious incongruity like a baby food sponsoring the fights, is compatibility of program to your client's product a *major* factor in the buying decision?

	Total Panel		Broadcast Billings: Over $5 Mill.		Under $5 Mill.	
	#	%	#	%	#	%
Yes	195	72	88	73	107	71
No	18	7	6	5	12	8
Sometimes	57	21	26	21	31	21
No answer	1	0	1	1	0	0
Total respondents	271	(100)	121	(100)	150	(100)

LOCAL PERSONALITY'S OOMPH IS IMPORTANT: Personal salesmanship is almost universally considered valuable. Panelists from smaller agencies appreciate its "great importance" more than others.

How important a factor is the personal salesmanship of a local tv personality in the sales effectiveness of a commercial?

	#	%	#	%	#	%
Of great importance	182	67	74	61	108	72
Of some importance	80	29	46	38	34	23
Of minor or no importance	7	3	1	1	6	4
No answer	2	1	0	0	2	1
Total respondents	271	(100)	121	(100)	150	(100)

PUBLIC SERVICE: TO BUY OR NOT TO BUY? Over half say they would, and another 25 percent have no strong prejudice either way. Smaller agencies somewhat more receptive to the idea.

Would you consider buying a local "public service" program for one of your clients?

	#	%	#	%	#	%
Yes	140	52	58	48	82	55
No	59	22	28	23	31	20
No strong opinion	67	25	31	26	36	24
No answer	5	1	4	3	1	1
Total respondents	271	(100)	121	(100)	150	(100)

WHO ARE BUYERS' LOCAL TARGETS? Women are first, men a close second; then children, sports fans, teenagers and farm families, in that order.

How often do you have occasion to buy into local shows with a primary appeal to . . . men—women—children—teenagers—sports enthusiasts—farm families?

	Total Panel		Broadcast Billings: Over $5 Mill.		Under $5 Mill.

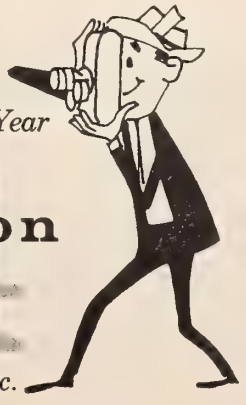
TABLES CONTINUED page 36

Now Everyone Knows!



For nearly 10 years the folks in WCCO Television's 68-county coverage area have known first-hand the outstanding newscasts presented 57 times each week by the Northwest's most popular television station.

Now, *everybody* knows of WCCO Television's top news coverage. For WCCO Television has been named "Newsfilm Station of the Year" in the world's largest competition for photo-journalism—sponsored jointly by the National Press Photographers' Association, Encyclopedia Britannica, and the University of Missouri.

This beautiful plaque will be placed proudly next to the award WCCO Television received in 1955 as the "Outstanding Television News Operation of the United States and Canada" from the National Association of Radio and Television News Directors.

There's another award we treasure, too. It's the one WCCO Television wins from the 734,800 Minnesota-Wisconsin viewing families every month. ARB, for example, has reported WCCO Television with the lion's share of sets-in-use, sign-on to sign-off every day, for 41 of the past 45 months.

It is for honors such as these that WCCO Television is known throughout the Northwest as the champion station for viewing, and the champion station for selling. And now, everybody knows.

Newsfilm Station of the Year

WCCO Television

CHANNEL 4

MINNEAPOLIS • ST. PAUL

Represented by Peters, Griffin, Woodward, Inc.

CHILDREN'S PROGRAM OR ADULT SHOW? Even if the audience composition of both shows is the same, buyers overwhelmingly prefer early-evening adult program to sell a family product.

For a family product, would you buy an early evening children's show with 50% adult composition or an adult's show with 50% children's composition?

	Total Panel		Broadcast Billings: Over $5 Mill.		Broadcast Billings: Under $5 Mill.	
	#	%	#	%	#	%
Children's show	24	9	8	7	16	11
Adults' show	201	74	91	75	110	73
No difference	31	11	15	12	16	11
No answer	15	6	7	6	8	5
Total respondents	271	(100)	121	(100)	150	(100)

HOST PERSONALITIES: ARE THEY EXPENDABLE? Not on a children's cartoon show, say panelists. Virtually all consider them of "great" or "some" importance there—much more so than on feature film shows, where 34% think they have "minor or no importance."

How important, do you feel, is a host personality in . . . a feature film program? . . . a children's cartoon show?

	Total Panel		Broadcast Billings: Over $5 Mill.		Broadcast Billings: Under $5 Mill.	
	#	%	#	%	#	%
A feature film program:						
Of great importance	50	18	13	10	37	25
Of some importance	129	48	54	45	75	50
Of minor or no importance	92	34	54	45	38	25
No answer	0	0	0	0	0	0
Total respondents	271	(100)	121	(100)	150	(100)
A children's cartoon show:						
Of great importance	195	72	93	77	102	68
Of some importance	67	25	25	20	42	28
Of minor or no importance	7	2	1	1	6	4
No answer	2	1	2	2	0	0
Total respondents	271	(100)	121	(100)	150	(100)

LIVE FACTOR CAN OFFSET A FILM'S RATING ADVANTAGE: Three out of ten disagree but two-thirds feel that being live can help a local show compensate for a lower rating to some extent at least.

As between a live participation show and a feature film show, to what degree does the live factor compensate for a rating superiority of the film show?

	Total Panel		Broadcast Billings: Over $5 Mill.		Broadcast Billings: Under $5 Mill.	
	#	%	#	%	#	%
To a large degree	30	11	13	11	17	11
To some degree	152	56	70	58	82	55
To no degree	79	29	31	26	48	32
No answer	10	4	7	5	3	2
Total respondents	271	(100)	121	(100)	150	(100)

BUYING FEATURE FILMS: It's not the current rating but the rating history that ranks first in most buyers' minds, especially in bigger agencies. Next comes strength of station library, then current ratings.

When you buy feature film programs, do you generally place *greatest* consideration on rating history, the current rating or the strength of the station's film library?

	#	%	#	%	#	%
Rating history	125	46	69	57	56	37
Current rating	80	30	30	25	50	33
Film library	104	38	44	36	60	40
No answer	16	6	5	4	11	7
Total respondents	271	(100)*	121	(100)*	150	(100)*

*Percents add to more than 100 due to multiple mentions.

SYNDICATED FILM VS. LOCAL LIVE: It's a dead heat. Assuming costs are the same, buyers in both large and small agencies are split evenly on this issue.

Would you prefer to buy a half-hour syndicated film program or a local live program built with your product in mind, assuming costs to be equal?

	Total Panel		Broadcast Billings: Over $5 Mill.		Broadcast Billings: Under $5 Mill.

What buyers want in local tv TEXT CONTINUED FROM PAGE 34

(31%) felt that program information sheets provided by station reps are a "great" help in acquainting them with local formats and personalities, and another 56% considered these sheets of "some" help. But 63% thought they could make better buys if they had time to check kinescopes or video tapes of the local personalities, and another 30% thought they "sometimes" could do better by checking kines and tapes.

• Panelists are inclined to wait for two or three rating reports before deciding on the merits of a new local program. Those with agencies billing more than $5 million in radio-tv are more disposed to wait for three or more reports (56% as against 33% of those with agencies under $5 million).

• A total of 17% of the panel reported client interest in local color programming. The NBC report considered this "surprisingly high" since "there is relatively little local color programming being offered today." Panelists knowing of client interest in local color represented some 45 agencies, including BBDO; Fitzgerald; Foote, Cone & Belding; Kenyon & Eckhardt; North; J. Walter Thompson and Young & Rubicam.

• Panelists were asked whether they had seen recently any local programming they considered outstanding; 32% said they had. Programs they mentioned fell into three major categories: news shows, children's shows, and one-time specials.

• The majority felt a host personality was of much greater importance to a children's cartoon show than to a feature film program (72% vs. 18%).

• Slightly more than half would consider buying a public service program for a client and one-fourth have no strong opinion pro or con; one-fifth would not.

• The panel was split evenly in preference as between feature films and a specially tailored local live show as a vehicle for the sponsor's product.

• The personal salesmanship of a local tv personality is of "great importance" to the commercial's effectiveness in the opinion of two-thirds of the panel and of "some importance" to almost all the rest.

The fourth NBC Spot Sales Timebuyer Opinion Panel covered "virtually all the major agencies as well as a great many smaller ones in every section of the country." Of the 271 panelists who returned questionnaires, NBC Spot Sales said, 45% are employed by agencies whose radio-tv billings exceed $5 million and 55% are at agencies billing less than $5 million in the broadcast media. The questionnaires were tabulated by Barnard Inc., an independent firm.

In releasing the report, NBC Spot Sales emphasized that "the results are not meant to be projected to the total universe of several thousand persons engaged, directly or indirectly, in the purchase of broadcast time. They do, however, represent an interesting reflection of current opinions and practices among a very important segment of the timebuying fraternity."

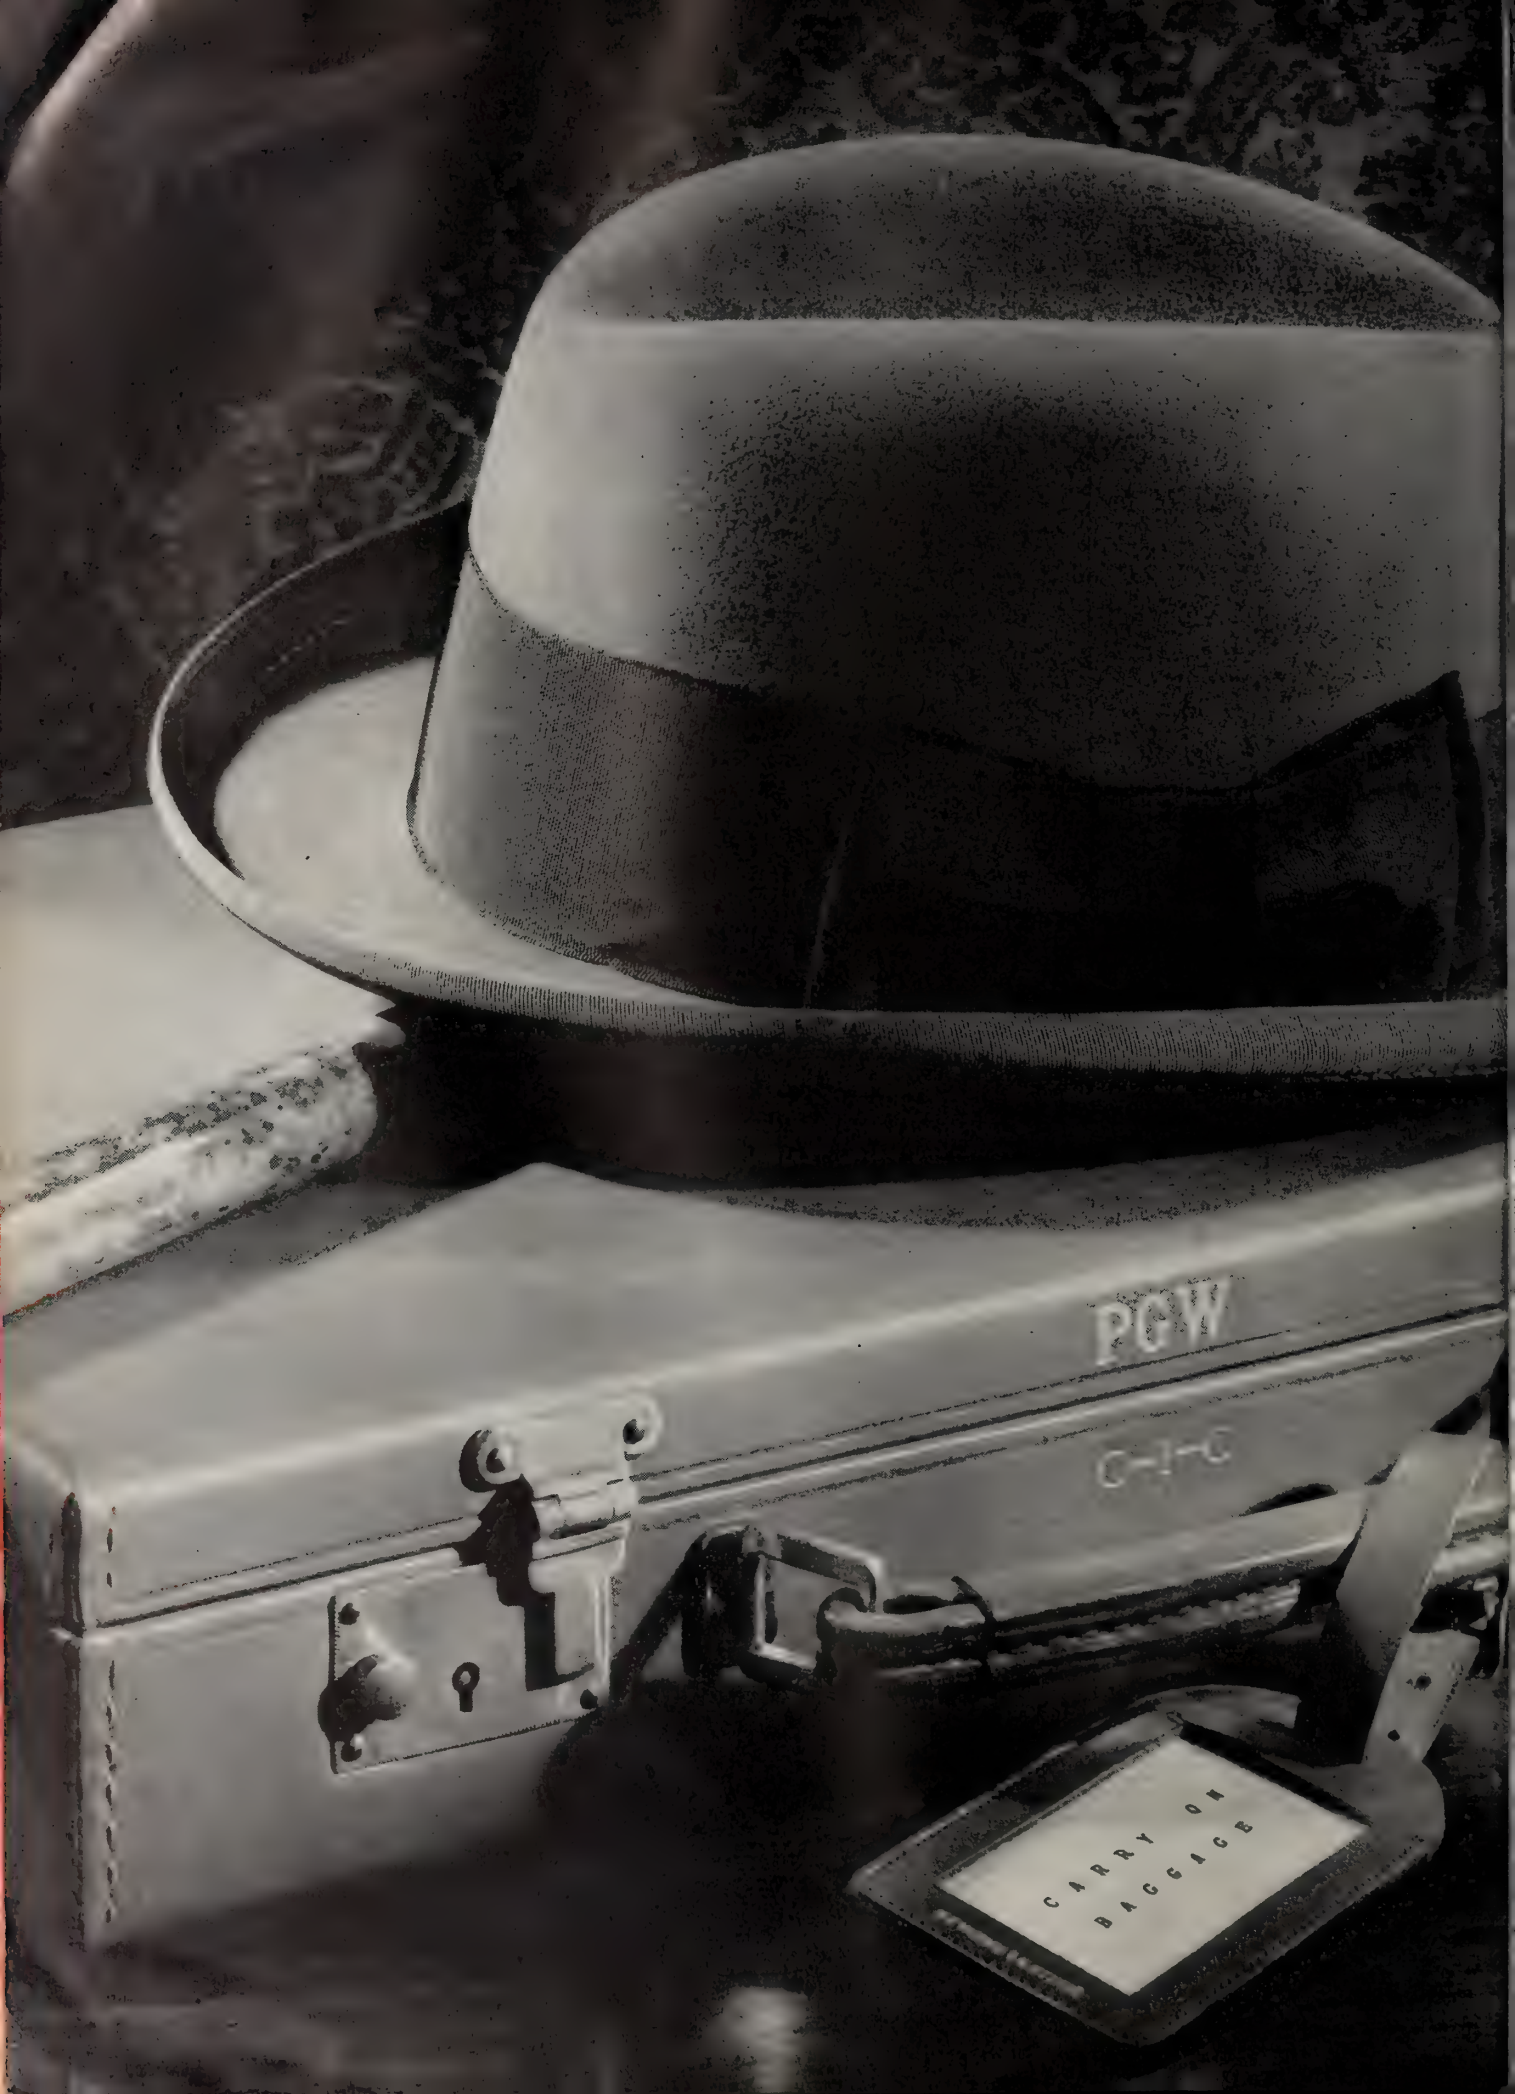
Earlier surveys conducted among members of the NBC Spot Sales Timebuyer Opinion Panel covered use of ratings, local radio programming, and agency attitudes on visits by station management.

In the NBC Spot Sales survey, timebuyers were invited to make comments beyond their answers to the questions. Here are some:

Sam B. Vitt, media supervisor, **Doherty, Clifford, Steers & Shenfield,** New York: "In my opinion the current opportunities for local tv programming, whether through syndicated film or local production, are greater than ever. It seems to me this is true principally for two reasons: (1) Many advertisers, an increasing number, are scrutinizing their sales more closely region by region, and this combined with a growing knowledge that the effectiveness of their national media may vary widely from one market to another is bringing many of them to utilize local tv programming as a way to fill the valleys in their national advertising effort. (2) With increased advertiser and agency attention being paid to "editorial compatibility" of programming surrounding their commercial announcements, plus the need of many products for a full minute in which to present their story, local tv programming is increasingly attractive as a solution to a number of problems."

Ben Leighton, timebuyer, **Campbell-Mithun,** Minneapolis: "Since viewers don't usually discern between local and national programming, and since most local programs are produced under handicap of limited facilities, local tv programming suffers. Most local personalities are not strong enough to carry a program successfully without extraordinary ability to entertain or without unusual use of facilities and production personnel. Alert management, with use of video tape, can exploit local special events to make tv fill a gap which now exists in local programming. The best local programs are in the field of service and information, rather than entertainment."

E. Manning Rubin, radio and television director, **Cargill, Wilson & Acree,** Richmond, Va.: "Local tv programming invariably reflects directly the enthusiasm, ability and interest of station management. In far too many instances, station management puts all its eggs into buying and selling hot film properties, into selling time without regard to the professional ability of its production and program people and the sales ability of its air personalities. Find a station and sales manager who realizes that what goes out over the air is show business and what sells products is pleasing, professional sight and sound and you find, invariably, a station with strong local tv programming and personalities."



Frederick S. Yaffe, president, **F. Yaffe & Co.,** Detroit: "I think the creation of 'strong selling' local personalities can go a long way in a market. There definitely seems to be room for the creation of a number of strong selling personalities rather than the one or two usually found. The creation of live shows per se will not affect the rating, but with the right personality it will certainly affect a station's 'selling rating.' "

Alice J. Wolf, timebuyer, **N.W. Ayer & Son.,** Philadelphia: "Clients need and should be educated to know that published ratings do not necessarily indicate the popularity of a program and/or personality. Some of the lowest rated shows have produced the best results for clients who have looked beyond a Pulse, Nielsen, ARB."

Max Tendrich, vice president, **Weiss & Geller,** New York: "Unfortunately, 'live' local tv programming has disappeared because of filmed programs, even though rating-wise live programs may rank lower and cost-wise, cost more. I believe it is essential in order to maintain a 'character' or 'image' that a station devote time to 'live' local programming. Many advertisers want to use established local personalities for commercials and for merchandising."

H. D. Walsh, vice president, **Hixson & Jorgenson,** Los Angeles: "Still believe that personalities are most important day or evening unless you just want spots with good adjacencies with which you have no audience loyalty."

Richard S. Jackson, radio-tv director, **J.M. Mathes Inc.,** New York: "It is difficult to select a good buy because of lack of first-hand information. Too much emphasis must be placed on rating information which is generally too sketchy. Personal contact is missing on local buys. Some local programming is excellent, but national buyers find it hard to be sure without actually 'knowing' the show."

RECORD AD RALLY SET BY 4A

Some 700 expected at White Sulphur, with government relations high on agenda

Some 700 agency executives and invited media and advertiser guests are expected to set a new attendance record for the annual meeting of the American Assn. of Advertising Agencies this week at the Greenbrier, White Sulphur Springs, W.Va.

Improving the understanding of advertising's role as it is perceived in governmental and other influential circles is scheduled to be a prime subject at Thursday's (April 23) opening-day sessions, which are for AAAA members only. Agency-advertiser relationships also are slated for discussion. Other Thursday business will include election of officers and directors, four concurrent sessions to discuss agency management problems, and an organization meeting of the new board.

Friday's sessions, open to media and advertiser guests as well as members, will center on "The Revolution in Rising Expectations," with reports by correspondents, editors and publishers of the Time Inc. magazines.

Creative Work • Creativity will be the theme of Saturday's opening session. Anthony C. Chevins, Cunningham & Walsh, New York, will speak on "How to be Creative in Spite of It All"; John A. Sidebotham, Young & Rubicam, New York, will discuss "Why Pay Money to Talk to Yourself?" and David Ogilvy, Ogilvy, Benson & Mather, New York, will deal with "Brains, Guts and Discipline."

The creativity session will be followed by presentation of the first annual Arthur Kudner Award, established by the Kudner Foundation in memory of the late founder of Kudner Adv. to honor outstanding writing of institutional advertising copy.

The final session on Saturday will present William B. Renchard of Chemical Corn Exchange Bank of New York in an evaluation of "Advertising—the Hidden Asset" and Rep. Bob Wilson (R-Calif.), former agency executive (Champ, Wilson & Slocum, San Diego), in a report bearing on advertising's government relations problems. In "An Inside View of Advertising Legislation" Rep. Wilson will discuss legislative threats to advertising, the influences to which legislators are subject and the needed remedies.

Danforth Presides • J. Davis Danforth of BBDO, AAAA chairman this year, will preside at the business meetings and other sessions, along with other AAAA officials. The annual banquet Friday evening will feature entertainment by comedian Alan King, courtesy of CBS, and an address by Arthur H. Motley, publisher of *Parade*. George H. Frey of Sullivan, Stauffer, Colwell & Bayles is sports chairman.

A collection of award-winning television commercials, selected for the Art Directors Club of New York's 38th annual Exhibition of Art & Design (BROADCASTING, April 6), will be shown.

The 10th annual region and council governors meeting, with some 50 governors of the four AAAA regions and 20 local councils expected to be on hand, will be held Wednesday preceding the convention opening.

AAAA members will be guests of TvB at a cocktail party Saturday evening. The TvB board will hold its semi-annual meeting at the Greenbrier Wednesday and Thursday, during the "closed" portion of the AAAA meeting, and then will attend the open sessions Friday and Saturday. (CLOSED CIRCUIT, April 13).

Half-century memento • John Lamb (c), BBDO Minneapolis account supervisor, is presented a "Golden Ruler" in commemoration of the 50th anniversary of the Des Moines Advertising Club by Edward LaGrave Jr. of Truppe (l.), LaGrave & Reynolds, and C.A. Larson, Meredith Publishing Co. Mr. Lamb, in an address before the Des Moines club, described "The Day Advertising Stopped." He looked ahead to an April day in 1961 when the advertising business came to a complete standstill: radio-tv networks ceased operations, newspapers sold for 25-50 cents, the days of the supermarkets and mass produced automobiles were numbered, and countless numbers were unemployed as business declined. He called advertising a "great industry which governs communications and the United States."

HOW THEY RATE

Coast ATAS panel looks into ratings

Ratings for radio and tv program audiences are not something dreamed up as a money-making device by the rating services but were created at the demand of advertisers and advertising agencies, William Shafer, manager of the Hollywood office of American Research Bureau, reminded the West Coast Chapter of the Academy of Television Arts & Sciences at its April 14 meeting.

The advertiser and his agency are interested in using broadcast media to reach people with their sales messages, Mr. Shafer explained. Therefore, they need to know what kind of programs people want to watch on tv and listen to on radio. To get this information, they call on the rating services.

Mr. Shafer and Joseph R. Matthews, west coast representative of A.C. Nielsen Co., depicted the information they provide about broadcast program audiences as a guide to advertisers and agencies to be considered with other factors, primarily sales success, in a decision to renew or cancel a program. The continuing trend shown by the ratings over a period of months is the important thing, they maintained, insisting that only on rare occasions does an advertiser base his decision on a single rating.

on management decisions, Mr. Matthews said that 42% of decisions made without research turned out to be correct, but pointed out that the 58% that were wrong was too large a proportion for most businesses to afford. He showed how, by analyzing the programs preceding and following time periods under consideration for a program series, and the programs on other networks at the same time, the audience measurement services are able to offer valuable aid to an agency in deciding which time would be best for its client's show.

Gale Smith, former head of Procter & Gamble productions, moderated the panel discussion of ratings. Panelists Robert L. Redd, vice president in charge of west coast radio and television for Erwin Wasey, Ruthrauff and Ryan, and Jack Newell, west coast media director of BBDO, agreed that ratings are used as aids in making decisions and not as absolute answers. The last panel member John Guedel, head of John Guedel Productions, complained that when one of his shows was dropped after declining ratings, the answer seemed pretty final to him and no one was talking about ratings being merely an aid then.

The size of the sample used by the rating services to measure the behavior of the whole broadcast audience is generally adequate, the panel agreed. Mr. Matthews pointed out that in today's measurements a rating of 20 indicates that the program has an audience of between 19% and 21% of the total. To cut the range in half, so that a 20 rating would indicate an audience between 19.5% and 20.5% would require a four-fold increase in sample size and a proportionate increase in cost, he said. Mr. Matthews also reminded the audience that the sample must be truly representative of the entire national population in such significant factors as family size, education and income. The accuracy with which the data is collected from the homes and the accuracy with which it is tabulated and reported are other factors which are just as important as sample size, he stated.

Mr. Matthews also stressed that ratings are quantitative measurements reporting the number of people or families who watched or listened to a program, but not covering such qualitative matters as what they thought of the entertainment or how they were affected by the sponsor's commercials.

Betty Emery, show supervisor for Benton & Bowles, Hollywood, was coordinator of the ATAS session on ratings.

NC&K ADDS DIMENSION TO RATINGS

Formula ties in viewer recall of commercials with popularity

The results of a nine month special study of television network programming by Norman, Craig & Kummel, New York, indicates that "live, creative, non-violent" television is "the best buy for most sponsors."

Norman B. Norman, president of NC&K, said that the study points up this crucial factor: the type of program a viewer is watching has a marked influence on his ability to recall and identify its sponsor or products (CLOSED CIRCUIT, March 30). The study analyzes the kinds of programs which stimulate recall and the types which tend to retard it.

The agency's findings are based on an analysis of 103 evening network programs during the last six months of 1958. The agency made use of total audience figures compiled by Nielsen during that period and Trendex figures, which provide information on the product being advertised (sponsor identification). NC&K, using figures from these two services, has devised a new rating which it calls "sponsor rating"—the result of applying the sponsor identification percentage from Trendex to the total audience rating from Nielsen.

Specifically, average sponsor rating is achieved by multiplying the average sponsor identification by the average Nielsen rating. Mr. Norman stressed that the "sponsor rating" is a key factor in the study, stating "it is a measure of the crucial sponsor 'audience, rather than the program' audience."

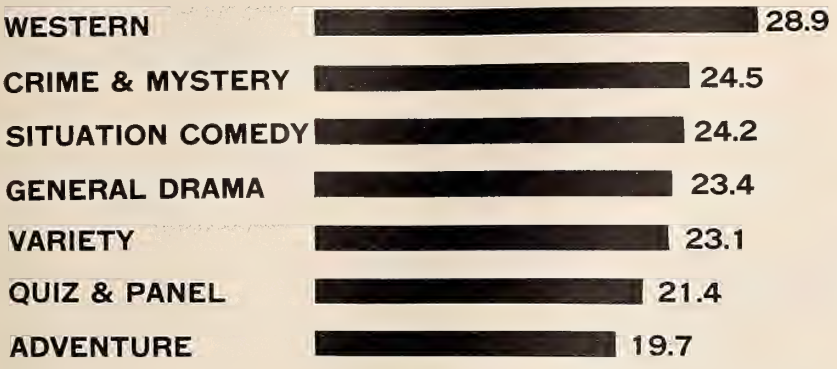
Top "Sponsor-rated" Shows • Using the "sponsor rating" as the yardstick, the reports list the following as the top ten programs: *Lawrence Welk Dancing Party* (26.2), *Ed Sullivan Show* (26.0); *I've Got a Secret* (25.1), *Dinah Shore Chevy Show* (22.8), *Jack Benny Program* (21.8), *Ernie Ford Show* (21.5), *General Electric Theatre* (20.6), *Lassie* (19.5), *The Price Is Right* (18.1) and *Perry Como Show* (18.0).

The report highlights these observations: eight of the ten leaders in "sponsor ratings" are live shows (only *Lassie* and *General Electric Theatre* are on film); not a single western was able to make the top ten list (*Maverick* rates highest in this category in 16th place); there is not a single "gun-shooting" show of any kind (western, crime, mystery or adventure) in the top ten.

LAWRENCE WELK
No. 1 by new measurement

Mr. Norman commented: "All of the winners—as a general type—are in the warm, friendly category; most of them aspire to a conscious empathy between audience and performers."

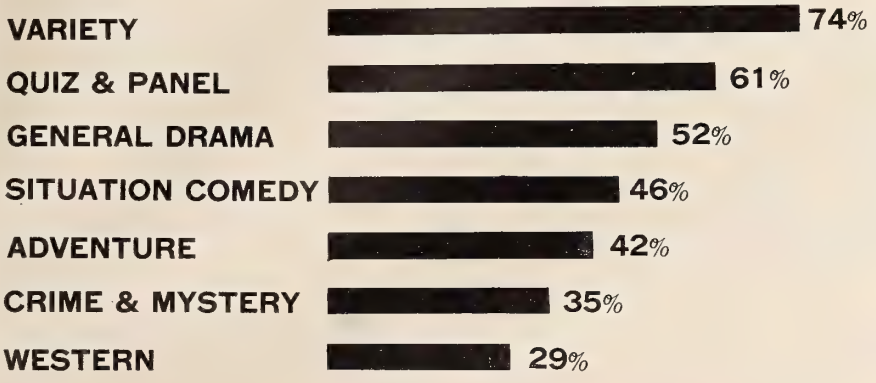
The presentation has been shown to 35 of the top 50 advertisers in the country, according to Mr. Norman, with the "following summary admonitions":



- The mere size of the program audience is no indication of sales responsiveness.
- The program itself has a vital influence on the selling impact of the sponsor message.
- Filmed violence actually *interferes* with the reception of your sales message.
- Warm, friendly entertainment is the most effective vehicle for your commercial.
- Live programming creates the best atmosphere for sponsor identification.
- Within the above limits, present the type of entertainment that is most compatible with your company profile.

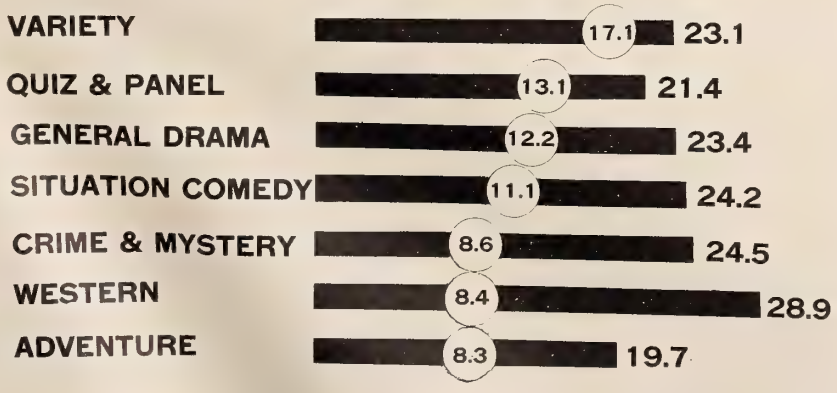
Related elements of the report brought out the following supplemental conclusions on tv programming for sponsors: every-week sponsorship is more effective—even proportionately—than alternate-week rotation; an hour show is proportionately more effective than a half hour show; evening is generally a better "buy" than daytime; length of time on air is a progressively increasing advantage to a sponsor; an

ACCORDING TO NC&K:



Action shows draw biggest audiences . . .

(Chart below shows average Nielsen ratings for each main type of program, based on 103 evening network tv shows. Source: Nielsen Television Index, first November report, 1958.)



. . . but their sponsors tend to be obscured

(Chart below shows average sponsor indentification for same program types. Source: Trendex Television Advertisers' Report June-September-November, 1958.)

Best buys are live programs with empathy

(Circled figures in chart below are "sponsor ratings," obtained by multiplying Nielsen ratings (top chart above) by Trendex TAR averages (chart immediately above). "Sponsor rating," according to agency, is a "measure of the sponsor audience rather than the program audience." Figures at far right are average Nielsen ratings as in top chart above.)

entertainer as "image" of the sponsor is a plus.

Mr. Norman maintained, however, that the programming itself overshadowed all these related elements and, moreover, "was more powerful than all of them combined." The "environment" of a program, he said, was found to exert the strongest effect on commercial recall.

The special report was a combined operation of the television department of NC&K and was prepared under the supervision of Mr. Norman and Walter Craig, vice president in charge of broadcasting. Mr. Craig pointed out that the study dealt with network programming only but stressed "that nothing in this report should be construed as an attack on spot tv or for that matter on other uses of network television." On certain occasions, Mr. Craig added, spot tv is a major media buy and in most cases is a supplementary media purchase.

D-F-S adds cereals

Dancer-Fitzgerald-Sample Inc., New York, was on the gaining and losing end of business last week, acquiring from General Mills Inc., Minneapolis, three breakfast food products (Corn Trix, Kix and Jets) and relinquishing the Decaf instant coffee and Nestea accounts of the Nestle Co., White Plains, N.Y.

The cereal accounts bill about $2 million and are substantial users of radio-tv. The change-over which takes effect Sept. 1, is said to be a move by General Mills to consolidate its ready-to-eat cereals in one agency. Dancer already handles the company's Cheerios, Hi-Pro and Cocoa Puffs cereals, as well as other General Mills products. The account has been at Tatham-Laird, Chicago, which will continue to represent the company's pet food products and Betty Crocker muffin mixes.

Nestle has assigned its Decaf and Nestea business, amounting to more than $2 million, to McCann-Erickson, New York. It was reported that D-F-S was dropped because certain new product plans of Nestle would conflict with current clients of Dancer. The switch will take place Sept. 1. The accounts are active spot radio-tv users.

Plymouth takes Allen

Plymouth Div. of the Chrysler Corp. has its new network show for next fall: full sponsorship of the hour-long *Steve Allen* show that will be in the Monday 10-11 p.m. position on NBC-TV. The auto advertiser a few weeks ago dropped its ABC-TV entry, the *Lawrence Welk* show. Comedian Allen reportedly journeyed to Detroit and convincingly personalized negotiations resulting in the Plymouth buy. Agency is N.W. Ayer.

A new and self-appointed "agency" "Cone, Cunningham, Lewis & Repplier" is conducting an appeal, limited to advertising agency people, for funds for The Menninger Foundation, Topeka. A memo (see cut) was issued by the heads of four advertising agencies: John P. Cunningham, board chairman of Cunningham & Walsh; Fairfax M. Cone, chairman of the executive committee, Foote, Cone & Belding; William B. Lewis, president, Kenyon & Eckhardt, and Theodore S. Repplier, president of The Advertising Council.

The idea was started when Dr. William Menninger, of the foundation, contacted Mr. Cunningham at the suggestion of Mr. Repplier. The solicitation memo was written by Mr. Cunningham, whose agency is providing postage and clerical help. The Menninger Foundation is a non-profit center for treatment, prevention, research and professional education in psychiatry.

'Voice of Firestone' continuance doubtful

If ABC-TV's last-ditch attempt to save the *Voice of Firestone* fails, a show that has been standard broadcast fare for some 30 years will become a casualty in next fall's network schedule.

The Firestone Tire & Rubber Co., Akron, Ohio, unable to find a prime nighttime slot for its musical program, appeared reconciled last week to let the whole matter—and the program—drop.

The program is now in the Monday 9-9:30 p.m. slot on ABC-TV, its contract running out June 1. The advertiser formally stated last week that it would discontinue the show with "regret," that viewers had appreciated the "quality" of the program but "apparently ABC, which has carried it for the past five years, does not agree with our opinion."

But it was reported Thursday (April 16) that the network still considered *Voice* a possibility for the fall schedule. Latest was that ABC-TV officials had offered to alternate *Voice* with Lawrence Welk (Thurs., 10-11 p.m.), thus giving Firestone an hour every two weeks instead of a half-hour each week.

How Troubles Began • What started this fracas with a network was ABC-TV's decision to program a new Warner Bros. filmed hour, *Bourbon Street Beat*, Monday, 8:30-9:30 p.m. next season.

CBS-TV and NBC-TV reportedly offered Firestone a Sunday slot while ABC-TV's initial offer was a 10:30-11 p.m. period on Monday. These Firestone rejected.

Voice • This is not the first time *Voice* has had such network trouble. At one time on NBC-TV, that network at the end of the 1954-55 season wanted to shift the show from Monday night to Sunday afternoon. Firestone declined and moved to ABC-TV.

(Firestone's agency is Sweeney & James, Cleveland.)

The program started on radio (NBC) in 1928, continuing in the same period (8:30-9 p.m.) until 1954, and in the meantime had become a simulcast (both radio and tv).

Chicagoans merge

Roche, Rickerd & Cleary and Proebsting, August & Harpman, both Chicago, merge May 1. They had 1958 billings of about $6 million and $1.4 million, respectively. The consolidated agency will operate in RR&C's expanded quarters at 135 S. LaSalle St. Neither agency has been especially active in broadcast media. Chairman John P. Roche, President C.E. Rickerd and First Vice President James M. Cleary continue in their former positions. New officers are James L. Proebsting, chairman of executive committee; K.C. August, vice president, and John W. Harpman, creative director. The new agency will retain the name of Roche, Rickerd & Cleary.

On again, off again, in again, out again

There were many examples of hectic antics by advertisers and their agencies and the tv networks in the frantic game of musical chairs on next season's programming. Procter & Gamble on behalf of its *Loretta Young Show*, *Bat Masterson* and *Biography* are only a few typical cases.

The hustling about was symptomatic of an advanced sales season of unprecedented speed and juggling.

Last winter it was reported *The Loretta Young Show*—an NBC-TV showcase on Sunday nights for several seasons—might be dropped because Miss Young was not going to continue the series. Benton & Bowles, P&G's agency on the show, scotched that talk. The show would return, it was said.

A few weeks ago, the program again was in doubt. It was then reported that Benton & Bowles had sought a new time period for the show on behalf of P&G and if it did not obtain it, the show would be dropped. Last week, B&B reported the program probably would be sponsored by P&G and slotted "tentatively" in the Wednesday 10:30-11 p.m. period on NBC-TV.

Bat Masterson, a half-hour program on Wednesday nights on NBC-TV, was slotted for a full-hour exposure on the network on Monday nights, 7:30-8:30 p.m., with Kraft Foods and Sealtest continuing with the show. As of Thursday (April 16), signals were off, or seemed to be, with Sealtest reportedly desiring *Masterson* as a half-hour not a full hour. At press time, NBC-TV was sticking to the hour-long version. J. Walter Thompson represented Kraft and N.W. Ayer negotiated for Sealtest.

Biography had appeared set to share Thursday honors during the next season with *Playhouse 90* on CBS-TV. Sponsor had been set: Equitable Life Assurance, through Foote, Cone & Belding. Latest word from CBS-TV: *Biography* would not be in the Thursday night spot. And so the play and counterplay continued.

"It just hit me! -- WCIA is the 46th* tv market!"

A true AREA market located with transmitter approximately 129 miles from Chicago, St. Louis, and Indianapolis.

NCS #3 again proves WCIA's predominant audience in 54 wealthy, industrial, and rich black-soil counties.

Five metropolitan markets (BLOOMINGTON, CHAMPAIGN-URBANA, DECATUR, DANVILLE, and SPRINGFIELD) plus 1,912 cities and villages create a larger market than offered by twenty-one states and territories such as Arizona, Arkansas, Colorado, or Oregon.

BREWERS' TV TAB UP 6% IN '58

Totals $46 million as print suffers drop; Schaefer use of ID's noted in TvB report

U.S. brewers swelled their investment in spot and network television to $46.1 million, an increase of 6% over 1957, and at the same time, decreased their expenditures in the print media.

This was the gist of report on tv advertising activities of the nation's top brewers made public last week by the Television Bureau of Advertising. TvB will publish on May 1 a complete record of brewery firms, which spent $20,000 or more in tv during 1958, but last week issued a preliminary report on tv investment of the leading 20 brewers.

As television billing increased, TvB stated, investments in other media decreased in 1958 from 1957 with newspaper lineage dipping 21% to $5.3 million, and outdoor dropping by 2% to $25.2 million.

TvB's figures for network billing, amounting to $5.9 million, were provided by Leading National Advertisers-Broadcast Advertisers Reports (gross time charges only), and spot billing, totalling $40.2 million, was supplied by TvB-Rorabaugh (gross time charges only).

The brewers' spot budget of $40.2 million, TvB reported, was broken down as follows: $4.4 million, daytime; $31.7 million, nighttime and $4.1 million, late night. Station ID sales, part of the spot investment, were said to total more than $7 million. TvB took special note of F&M Schaefer's widespread use of ID's as an advertising formula in 1958, after the baseball Dodgers moved to Los Angeles (Schaefer had spent a large portion of its budget in previous years for tv sponsorship of the Dodgers). This brewer decided to place more than one-half of its 1958 tv budget of $1,285,780 in a station identification campaign, using tv time checks. Schaefer averaged 40 spots a week on three stations in New York and, TvB said, discovered this technique "brought its mesages into more homes, more often than any other advertising they have ever used."

The top 20 brewers in the U.S., according to TvB spent $29,446,856 in tv in 1958, said to be a 10% boost over 1957.

KTTV (TV) offers ANA all-commercial show

An offer to give the Assn. of National Advertisers a half-hour a week for 13 weeks to broadcast nothing but tv commercials was made Wednesday by Richard A. Moore, president of KTTV (TV) Los Angeles.

Addressing the ANA western meeting in Santa Barbara, Calif., Mr. Moore decried the kind of "anti-advertising mind" which thinks that advertising "somehow taints a medium." A most recent example of this type of thinking, Mr. Moore said, was the Oscar telecast of the Academy of Motion Picture Arts and Sciences, a program that reached 29 million homes and more than 70 million people but that "carried no advertising, not even for motion pictures."

"As far as I'm concerned," Mr. Moore declared, "the sustaining look of the Academy broadcast was a setback for commercial television and for the cause of marketing. It was also a sad economic waste. Think of the news and information that could have been given to 29 million homes about American goods and services."

The acceptability of a newspaper or magazine page, a radio or tv time segment "is not determined by whether or not it contains advertising but by whether it is entertaining or informative or both," Mr. Moore noted. "The fact is that some of the most creative, entertaining, beguiling material on television is within the commercials which you and your agencies create," he told his audience of advertising executives.

"I do not believe the public objects to advertising, as such," the KTTV president stated. "I think it's time we prove this point. Therefore, let me close with this positive suggestion on behalf of KTTV.

"We hereby offer to your association free of charge a good half-hour of time for a program to consist of nothing but commercials—good commercials—the best we can find from anywhere in the country. We'll put that program on for 13 weeks and I predict that the public, young and old, will find it highly pleasing. Moreover, I predict that it will draw a bigger audience than many programs that carry little or no commercial content and I suspect that after 13 weeks we shall offer you a renewal on the same terms, except in the second cycle we would like the right to sell the program for outright sponorship."

RAB polishes plans for 60-city swing

Top officials of the Radio Advertising Bureau last week mapped plans for the bureau's 1959 areas sales clinics, which begin today (April 20) and continue for a month. Forty-six separate clinics will be held in about 30 cities, starting in Minneapolis and Tulsa today. (April 20).

An all-day planning session was held by RAB executives in Suffern, N.Y., last Thursday (April 16), covering discussion on 60 radio sales case histories, new facts about the medium and tips on selling practices, including "do's" and "don'ts." In attendance were Kevin B. Sweeney, RAB president; John F. Hardesty, vice president and general manager; Miles David, director of promotion; Warren Boorom, director of member service; Arnold Katinsky, assistant director of member service, and Pat Rheaume and Bob Nietman, member service department division managers.

Premium field growth outlined in Chicago

Advertisers who promote premium offers are finding that consumer response is better than ever, Gordon C. Bowen, chairman of the Premium Advertising Assn. of America, told a conference at the National Premium Buyers Exposition, held at Chicago's Navy Pier April 6-9.

Mr. Bowen also told a new conference that the premium industry became a $2 billion business last year and he expects it to hit $2.25 billion in 1959. The "stigma" of premium advertising, he said, has largely been removed and enjoys the support of such

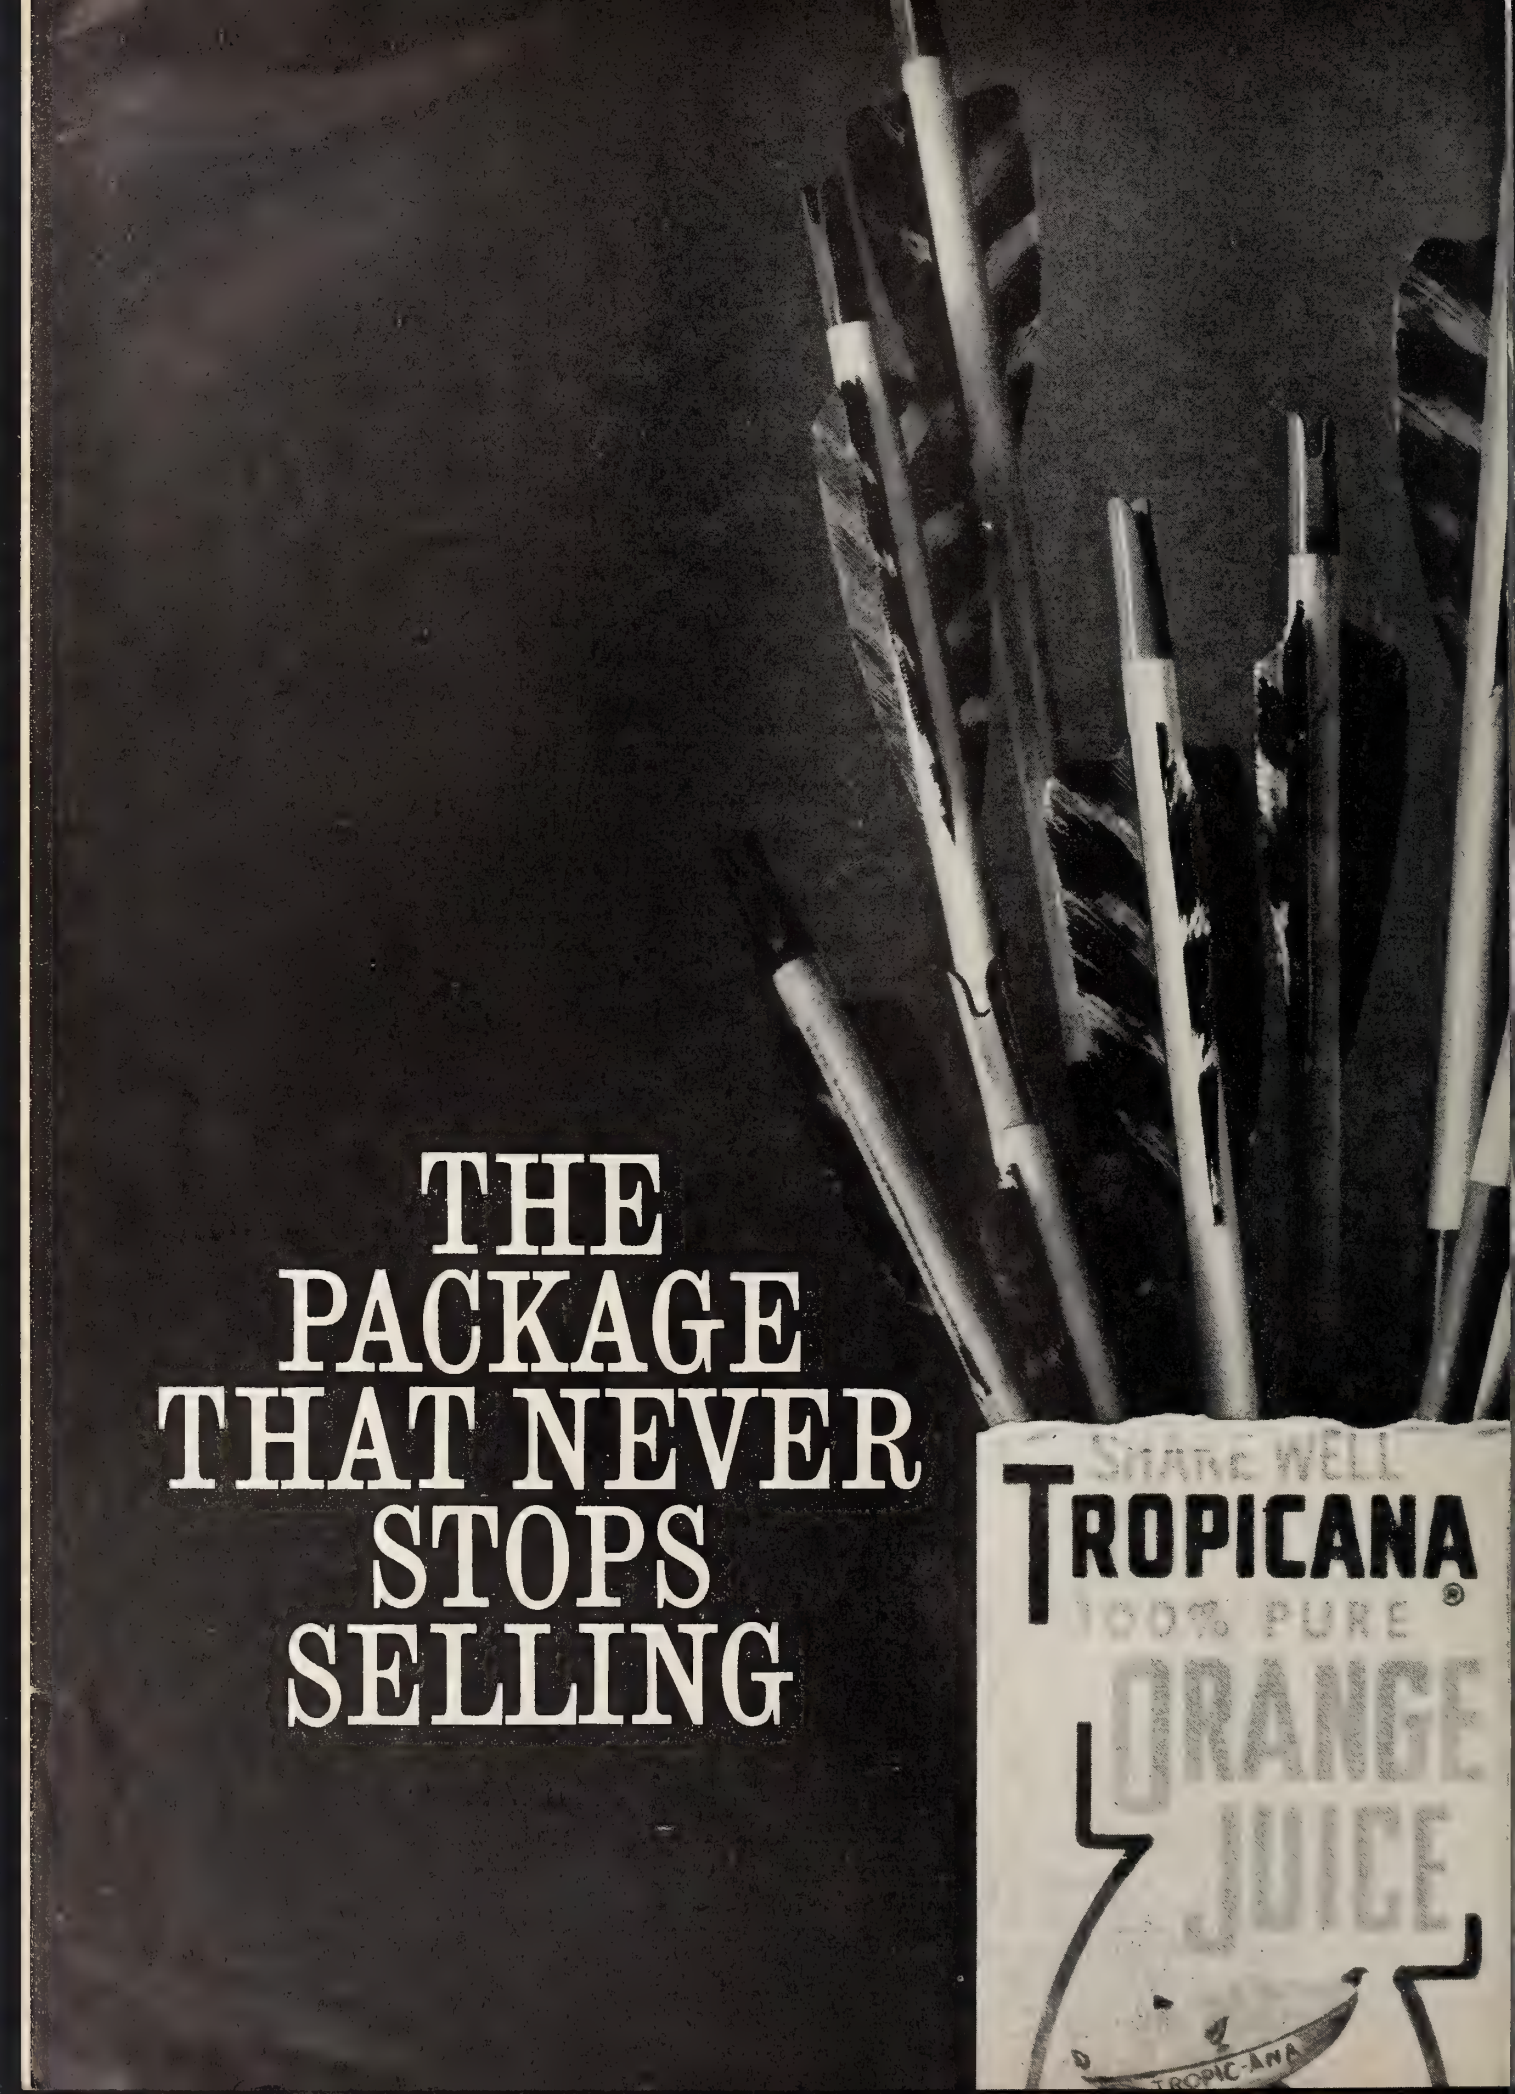
How to buy half a state... and more

In Oklahoma it's a cinch! Virtually half of the state is the Tulsa television market. It includes: *47% of the population; 45% of the retail sales; 45% of the food sales; 44% of the drug sales; 46% of the effective buying income* . . . of the entire state of Oklahoma. In addition, the Tulsa television market also includes 13 counties in Arkansas, Kansas and Missouri . . . a whopping 330,780 television homes!



The only way to reach the rich, dynamic eastern half of Oklahoma (and more) is via Tulsa television. In Tulsa, KOTV has been the *first* station in *every* rating report for the past 10 years. Represented by Petry.

WFAA
radio & television
dallas

Here is where "quality" enters the product picture. It is here the trained eye can detect and formulate that which makes one product stand head and shoulders above the rest.

There is no laboratory for measuring the "quality touch" of today's better radio and television station operations. And yet, it does exist . . . . to be sensed, sought after, and valued by those who know its importance to any successful campaign.

BROADCAST SERVICES OF THE DALLAS MORNING NEWS ■ EDWARD PETRY & COMPANY, NATIONAL REPRESENTATIVES

companies as RCA Victor, Columbia Records and Westinghouse Electric Corp.

Premiums represent a good potential for personality radio-tv programs at the local station level, particularly in the toy field, he added. He claimed that about 74 of the top 100 national advertisers (in terms of actual advertising expenditures) make use of premiums.

Daniel D. Kinley, vice president and chairman of McCann-Erickson's marketing plans board, cited the need for pre-testing advertising campaigns featuring premiums as well as the premium itself.

More emphasis on ideas rather than gadgets among food and other premium users was suggested by Dean F. Thomas, national sales manager for Pillsbury Co.'s grocery products division. "You must change from peddlers of gadgets to creators and sellers of ideas," he said.

Advertising experts • Agency executives prepare for a "creative conference" for students co-sponsored by the U. of Missouri school of journalism and the Advertising Federation of America. Left to right: Bryan Houston, chairman, Bryan Houston, New York; C. James Proud, president and general manager, AFA, and David Bascom, chairman, Guild, Bascom & Bonfigli, San Francisco. The one-day program was AFA's tip of the hat to the school's 50th anniversary.

50TH ANNIVERSARY
Missouri journalism saluted by agency men

Television "stimulates greater creative effort," an advertising executive told a creative conference for students co-sponsored by the Advertising Federation of America and the U. of Missouri School of Journalism as AFA's salute to that school's 50th anniversary.

Kenneth C. T. Snyder, vice president and tv-radio creative director of Needham, Louis & Brorby, Los Angeles, said that the "new look in audio-visual communication is the result of meeting the challenges . . . of tv." He emphasized the importance of the "economical statement" of the creative idea which by its very difficulty results in "more effective commercials."

Co-chairmen of the creative conference were C. James Proud, president of AFA, and Prof. Milton Gross of the school of journalism.

On the Bill • Speakers besides Mr. Snyder were David Bascom, chairman of Guild, Bascom & Bonfigli, San Francisco; Bryan Houston, chairman of Bryan Houston, New York; Olive M. Plunkett, vice president and copy supervisor, BBDO, New York, and Ted Lord, of Daniel Starch & Staff, New York research firm.

The secret of successful creativity, according to Mr. Bascom, is twofold: to believe in "different" advertising with the "fervor of an evangelist," and to have clients with a "great deal of courage and money." Rich rewards often await those, Mr. Bascom said, who have the courage and tenacity to be different.

A note of warning was sounded by Mr. Houston for students who may develop the idea that "creativity" is an end rather than a means. He counseled the audience never to forget that the "advertisement must sell something."

The agency chairman pointed to advertising, for all its "shortcomings," as the "most reliable and the most believed type of communication."

Miss Plunkett delivered the following advice to Missouri journalism and advertising students:

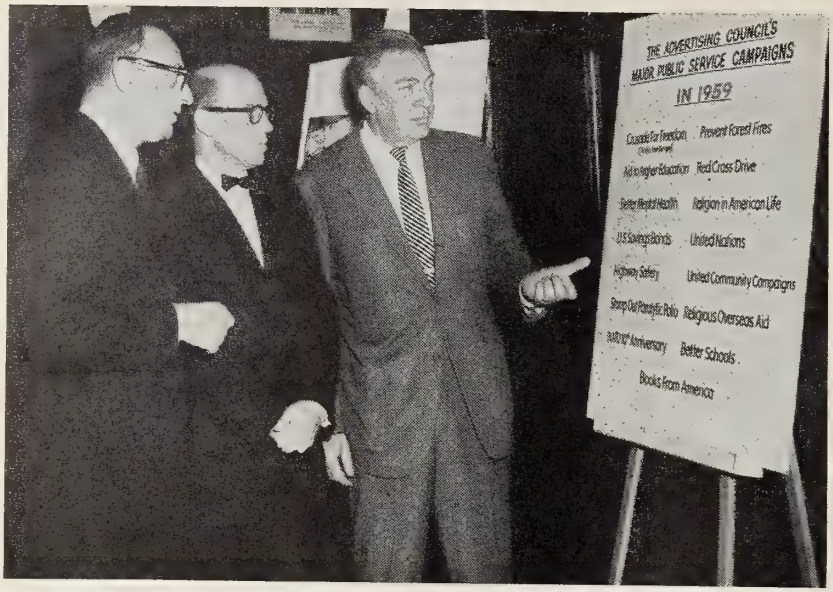
- Never underestimate the quality of the unexpected.
- Remember that advertising should be in the singular rather than the plural.
- Talk to readers as though you liked them.
- Break the rules.
- The easiest kind of client to work with, said Mr. Lord, is the man who calls you in and asks, "Am I right or am I wrong?" It is difficult, he added, to go in and tell someone who is paying you that he is not doing a good job.

"Continuing research," Mr. Lord concluded, "is necessary to improving creativity because no one knows all the answers . . . and the only way to keep up with them is through research."

Agency group switches to new meeting plan

Mergers, creative research and other topics in the overall marketing picture commanded the attention of members of the Mutual Adv. Agency Network at a Chicago workshop-business meeting April 9-11.

About 30 representatives of 19 member agencies attended the sessions at the Bismarck Hotel. MAAN approved a recommendation to reduce its annual meetings from four to three and to expand the length from two to three days. Next meeting under the new workshop format was set for the same site Sept. 17-19.



Key speakers were Herschell Williams, Robert C. Durham Co., consulting firm specializing in handling arrangements for agency mergers; LeRoy Staunton, Wolf Engraving Co., who discussed "How to Tell a Client When He Needs More Than Selling Help," and Perham C. Nahl, creative research director, Needham, Louis & Brorby, on "Pre-Testing Ads on a Limited Budget." Fran Faber, president of the Minneapolis agency bearing his name and the MAAN, presided over the talks.

MAAN members also exchanged information, ideas and views on common problems and discussed interagency "branch office" services. Mr. Faber said the new three-day format, an alternative to quarterly meetings, had proved a successful experiment.

Ike urges advertisers to bolster confidence

President Eisenhower last week called on American advertisers to maintain a "Continuing Confidence Campaign" to combat inflation and the Communist threat. The President made his comments in a talk to the Advertising Council's 15th Annual Washington conference April 13-14.

More than 300 top-flight advertisers attended the two-day meeting. They heard also Vice President Richard M. Nixon; cabinet officers Christian A. Herter, State; Robert B. Anderson, Treasury; Lewis L. Strauss, Commerce; James P. Mitchell, Labor; Neil H. Mc-

Missions for 1959 • Broadcast network executives met with the board of directors of The Advertising Council in New York April 9 to map plans for support of 1959-60 campaigns. Explaining the agenda to James M. Lambie Jr. (c), special assistant to President Eisenhower, are Louis G. Cowan, CBS Television president (l), and Edwin W. Ebel, General Foods vice president and chairman, radio-tv committee, The Advertising Council.

Elroy, Defense; Arthur S. Flemming, Health, Education & Welfare.

Also, Allen W. Dulles, Central Intelligence Agency; Thomas C. Mann, State Dept. economic expert; Alan T. Waterman, National Science Foundation; T. Keith Glennan, National Aeronautics & Space Administration; and Harold C. McClellan, general manager, American Exhibit in Moscow. Also presidential aides James R. Killian Jr., science and technology, and Don Paarlberg, special assistant.

All the discussions were off-the-record.

On Monday night members heard a special foreign affairs panel conducted by Philip L. Graham, publisher, *Washington Post & Times Herald*. Panel members were Mahomed Ali Currim Chagla, Ambassador of India; Count Adalbert de Segonzac, *Paris Soir*, and Max Freedman, *Manchester Guardian*.

Presiding at Monday's meeting was Gordon Gray, special assistant to the President and director, National Security Council. Monday night and Tuesday at luncheon, John C. Sterling, chairman, The Advertising Council, presided.

Weiss adds L.A. arm, more lines from Purex

Edward H. Weiss & Co., Chicago-based agency in the $10 million bracket, has added a new account and a branch servicing office.

Notwithstanding plans to open a Hollywood office, however, the Weiss agency is still contemplating further expansion by merger or absorption, in a bid to enlarge its client services. Mr. Weiss, head of the agency bearing his name, told BROADCASTING last week that "if another agency were found on the West Coast to have compatible interests, Weiss would entertain proposals for negotiation."

The new Weiss office, at 6399 Wilshire Blvd., will be headed by Robert N. Harris, vice president, and staffed according to client servicing needs. The agency has added Purex Corp.'s Beads O'Bleach account, worth an estimated $1 million in billings, plus Allen B. Wrisley Co.'s bath soap, acquired this year by Purex. It already handles Sweetheart soap, Dutch Cleanser, Protex soap and Blu-White for Purex, an overall $3 million client.

Weiss' Hollywood office will service, besides Purex, the accounts of Mogen David, Helene Curtis, James B. Beam Distilling Co. and others on the West Coast, though the creative work will continue to be handled in its Chicago headquarters. According to Mr. Weiss, about 50% of Beads O'Bleach billings are in broadcast media.

Weiss ranked 47th in radio-tv billings among U.S agencies last year, with an estimated $5.7 million or 43% of all billings. Until recently, Mr. Weiss engaged the services of Robert Durham & Assoc., agency consultant firm, looking toward consolidation with another agency.

Holes in methods of measuring audience

Research must shed light on areas in which intuitive judgments are now being made. This point was made by Willard R. Simmons, president of W.R. Simmons & Assoc. Research Inc., New York, who discussed media audiences before the media research discussion group of the American Marketing Assn. in New York Thursday (April 16).

In pointing out inadequacies of traditional methods of media audience description, Mr. Simmons suggested more meaningful ways of looking at the kinds of people reached by broadcast and print media. "What is clearly needed," he said, "is the development of new and more relevant measures that are more directly related to the reasons why a person chooses a given magazine, newspaper or program in the first place. Greater emphasis must be placed upon psychological and sociological variables in addition to purely demographic characteristics. . . ."

Areas in which Mr. Simmons said that socio-psychological measurements are both "practicable and badly needed" are: social class affiliation ("social class and income level are two different factors"); verbal comprehension ("understanding of advertiser's message"); status sensitivity ("determinant of brand choice and media selection"), and receptivity ("acceptance or rejection of communication directed to people").

Ford takes Tues. slot

Ford Motor Co. last week arranged for NBC-TV's Tuesday, 9:30-10:30 p.m. period for the fall season. The program format, however, has not yet been worked out.

Initial plan, as worked out by Dan Seymour, vice president and director of tv-radio, J. Walter Thompson, Ford agency, and MCA calls for expansion in some weeks for a 90-minute or two-hour presentation (AT DEADLINE, April 13). Earlier this spring, Ford sought a similar pact on CBS-TV, eyeing a projected *Fabulous Forty* series. That project fell through.

It was learned last week that Ford expects to retain its half-sponsorship of the hour-long *Wagon Train* and full sponsorship of the half-hour weekly *Tennessee Ernie Ford* both on NBC-TV, thus forecasting additional Ford money to network tv.

SYNDICATION

WBT offers, at cost, its highly successful and timely "Radio Moscow" series to one public spirited radio station in each market.

You get three 15-minute programs per week, formatted for commercial sponsorship, featuring recorded excerpts from Radio Moscow's English language propaganda plus commentary by WBT's Alan Newcomb and foreign affairs expert Rupert Gillett.

Write Wade St. Clair today.

The Jefferson Standard Broadcasting Company

10 p.m.). The series, based on Raymond Chandler's private detective creation, has its premiere Sept. 29. Agency for both advertisers: Ted Bates, N.Y.

• General Foods Corp., White Plains, N.Y., in behalf of its Kool-Aid, is sponsoring segments of ABC-TV's *Mickey Mouse Club* (Mon.-Wed.-Fri., 5:30-6 p.m.) and *Walt Disney's Adventure Time*, aired at the same time period on Tuesdays and Thursdays. The orders, placed through Foote, Cone & Belding, N.Y., were effective April 13.

Agency appointments

• Structo Mfg. Co. (toy manufacturer), Freeport, Ill., appoints Erwin Wasey, Ruthrauff & Ryan, Chicago, to handle its account. Estimated total billing for 1959 exceeds $250,000. Broadcast media may be used. New account is the 16th added by EWR&R in 1959.

• Purex Corp. (soaps, detergents, etc.), South Gate, Calif., announces a realignment of its products. Beads-O-Bleach, formerly with Foote, Cone & Belding, L.A., and Wrisley bag soap, formerly with Fulton-Morrissey, Chicago, both to Edward H. Weiss, Chicago. All products manufactured by John Puhl Products Co. (Purex subsidiary) go from Roche, Rickerd & Cleary, Chicago, to Foote, Cone & Belding, L.A. These include Fleecy White liquid bleach, Bo-Peep ammonia, Little Boy Blue bluing and Miss Bo-Peep brightener. All appointments are effective July 1.

• Blaupunkt Car Radio Div. (am-fm receivers), a subsidiary of Robert Bosch, Germany, appoints Dunay, Hirsch & Lewis Inc., N.Y.

• H-R Representatives and H-R Television, N.Y., appoint Art Gelb Adv., N.Y., replacing Caples Co., Chicago.

• Tidy House Products Corp., Shenandoah, Iowa, appoints Guild, Bascom & Bonfigli, San Francisco, and Buchanan-Thomas Adv. Co., Omaha, to handle creative and contact work, respectively, for its $1 million account, resigned by Earle Ludgin & Co., Chicago.

• Also in advertising

• Chicago Federated Adv. Club has launched its 17th annual advertising awards competition for clients, agencies, media and suppliers, with April 24 as the deadline for entries.

The winners will be announced at an awards dinner May 27, according to Thomas G. Johnston, creative director of McCann-Erickson and CFAC awards committee chairman. Some 12,000 entry blanks have been mailed out to 4,000 prospective contestants.

• Gordon & Hempstead, Chicago-based agency, announces the opening of an office in Los Angeles with James Patte as vice president in charge of west coast operations. Other members of the Los Angeles branch are J. Edward Carraher, formerly head of the Gower Adv. Agency, L.A.; Patti Brainard, previously in media and publicity with Walter McCrerry agency, L.A., and Sandra Schiffman, previously with Stiller-Hunt agency, Beverly Hills. Office address is 3460 Wilshire Blvd. in the Tishman Bldg.

• Walker Saussy Adv. Inc., New Orleans, has opened a Los Angeles office with the purchase of Robert F. Anderson Adv. Co. there. Mr. Anderson becomes vice president in charge of the office. Address: 6363 Wilshire Blvd. Telephone: Olive 3-8120.

• Advertising Managers Organization (membership limited to ad managers and executives in firms buying advertising), Los Angeles, wishes to exchange information and correlate organizational experiences with similar clubs. Address for response and inquiries: Les Worden, The Knox Co., 1400 Cahuenga Blvd., Los Angeles 28.

ACTIVITY

HOW PEOPLE SPEND THEIR TIME

There were 126,564,000 people in the U.S. over 12 years of age during the week March 20-26.* They spent:

2,074.0 million hours	Watching Television
1,190.4 million hours	Listening to Radio
486.4 million hours	Reading Newspapers
213.5 million hours	Reading Magazines
404.9 million hours	Watching Movies on Tv
132.2 million hours	Attending Movies

These totals compiled by Sindlinger & Co., Ridley Park, Pa., and published exclusively by BROADCASTING each week, are based on a 48-state, random dispersion sample of 7,000 interviews (1,000 each day). Sindlinger's weekly "Activity" report, from which these figures are drawn, furnishes comprehensive breakdowns of these and numerous other categories, and shows the duplicated and unduplicated audiences between each specific medium. Tabulations are available from Sindlinger & Co. within two to seven days of the interviewing week.

SINDLINGER'S SET COUNT: As of March 1, Sindlinger data shows: (1) 114,011,000 people over 12 years of age have access to tv (90.1% of the people in that age group); (2) 44,558,000 households with tv; (3) 49,201,000 tv sets in use in the U.S.

* Figures published last week. New data was unavailable because of clerical difficulties.

Nothing else like it in Greater New York

IN PROGRAMMING: The voice of WVNJ is unique. It's the only radio station in the entire Metropolitan New York area that plays just Great Albums of Music from sign on to sign off — 365 days a year.

IN AUDIENCE: So different, too. So largely adult — so able to buy — so able to persuade others to buy. And in Essex County alone (pop. 983,000) WVNJ dominates in audience — in quality of audience — and in prestige.

IN VALUE: It delivers the greater New York audience for less than 31c per thousand homes — by far the lowest cost of any radio station in the market.

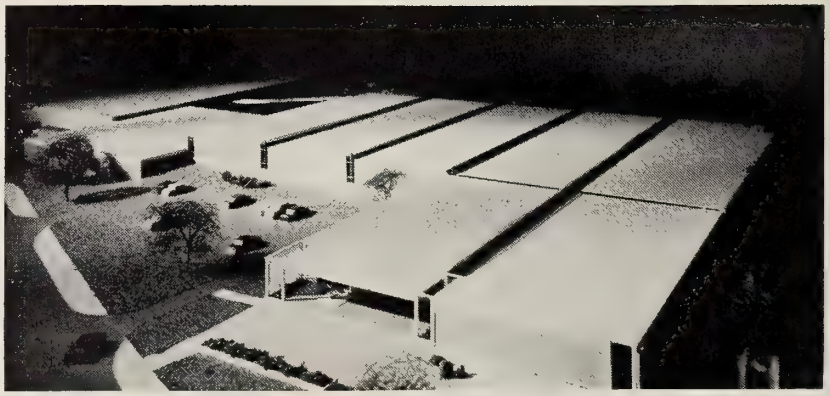
CBS STOCKHOLDERS' MEETING

Stanton offers first-quarter figures confirming prediction of record year

CBS Inc.'s first quarter of 1959 was the best in its 31-year history in terms of both sales and earnings and the company expects this year to be even better than 1958, when CBS reached record highs despite the recession, President Frank Stanton reported last week.

Speaking at the annual meeting of CBS stockholders last Wednesday (April 15), Dr. Stanton said he thought it "proper to say to you that the affairs of your company are in good order at this time; the corporation is doing very well. We see a promising 1959—and most of our earlier estimates are being supported by the evidence of the first quarter."

His report was similar to the one he presented to the New York Society of Security Analysts last month, treating the position of each operating division individually (BROADCASTING, April 6), but updated by first-quarter figures.



Tv Network Up • He said the CBS-TV Network Division, biggest in sales and earnings, had higher earnings in the first quarter this year than last and that advertisers are showing "an earlier and more active interest than usual." The CBS-TV Stations Div. "is doing very well; it had an excellent 1958 and should have an even better 1959." The CBS Radio Div. was "profitable in 1958 and will be so again in 1959"; while the radio network lost money in 1958. He said the new Program Consolidation Plan already has boosted audience by 29%. Columbia Records Div. "is doing very well indeed," with first-quarter sales and earnings "substantially ahead" of the same 1958 period.

Dr. Stanton revealed that the CBS-Hytron Div., CBS Inc.'s manufacturing arm, will get a new name on July 1—CBS Electronics—and a new home for its semiconductor operations next spring. He said a $5 million expansion of these operations had been authorized, including a new plant to be built in Lowell, Mass., which is slated for occupancy next April (see sketch below). CBS-Hytron's first quarter sales this year were ahead of those last year, he reported.

The CBS Labs Div. made "a modest profit" last year and is expected to be profitable again in 1959, while the CBS International Div. "continues to be a steady money-maker if not a big one," and may do "a little better" this year than last.

Through the CBS News Div., he said, "as responsible broadcasters we are continually expanding our journalistic efforts to increase public understanding."

Interruptions • The stockholders' meeting was interrupted frequently, lengthily and often noisily by the charges and claims of Barney Young and Gloria Parker, who between them are plaintiffs in suits for some $9.6 million pending against CBS and others, and the questions of Wilma Soss—all of which have come to be standard at

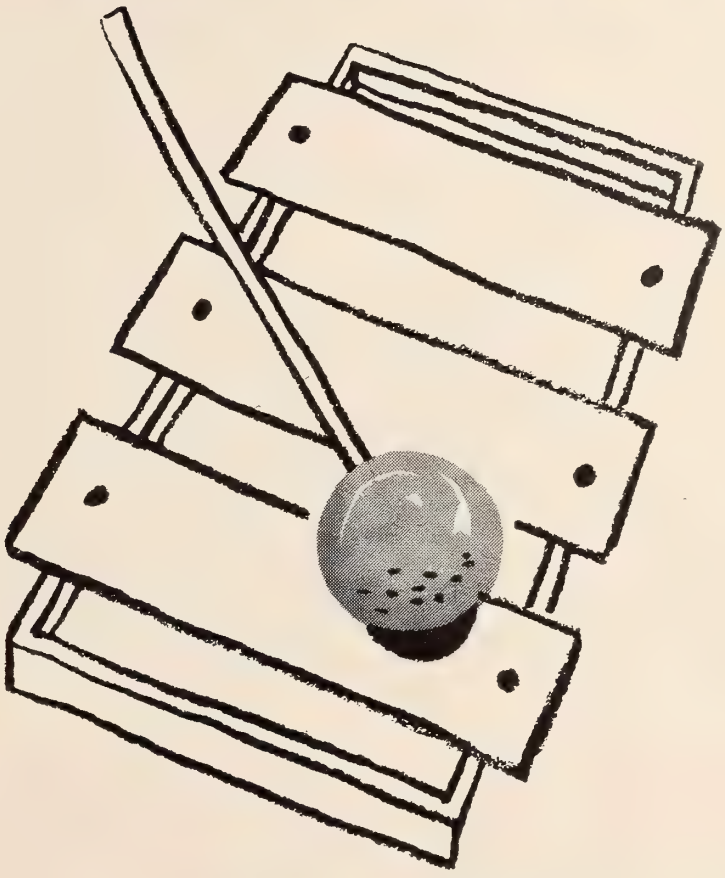
Expansion • CBS-Hytron's $5 million semiconductor plant (model above) at Lowell, Mass., will be ready for action next April according to Dr. Stanton's report to stockholders. The new plant will increase semiconductor production five-fold and triple the number of CBS-Hytron employes.

CBS' assets

The question of companies insuring the lives of executives came up at the CBS stockholders' meeting last week. Mrs. Wilma Soss who frequents such meetings, wanted to know whether CBS carried insurance on Dr. Frank Stanton, CBS president. Chairman William S. Paley didn't think so, although he agreed with Mrs. Soss that Dr. Stanton "is one of our assets." Ralph Colin, a board member, joined the colloquy to observe that "I don't think there is any amount of insurance we could buy that would insure us against the loss of Dr. Stanton." A stockholder brought the discussion to a close by standing up and offering the services of his office. "I'm in the insurance business," he said.

such stockholders' meetings.

The Young-Parker fireworks were directed, as usual, primarily against CBS' relationship with BMI and included at one point an "offer" of $3 million by Mr. Young for CBS' BMI stock—which CBS had already sold back to BMI for $35,000 (BROADCASTING, April 13).



Over Mr. Young's vocal objections, CBS Chairman William S. Paley presented "some background" which contended Mr. Young and Miss Parker were present to promote their $9.6 million litigation and as part of a "program of harassment." Some years ago, he recalled, Life Music Inc., partly owned by Mr. Young, had tried to sell licenses to its music to CBS, and the network had refused because it considered the terms "exhorbitant."

"Call Girl" Broadcast • When Mrs. Soss, who is board chairman and president of the Federation of Women Shareholders in American Business and a familiar voice in meetings of stockholders of many corporations, asked about CBS Radio's famed "call girl" broadcast, narrated by Edward R. Murrow, Chairman Paley reiterated that it was responsibly researched by CBS News and was not an attack on big business but on an evil which CBS thought should be exposed.

Mrs. Soss also questioned CBS' payment of $200,000 to J.A.W. Iglehart, a CBS director, and his firm (W.E. Hutton & Co.) for Mr. Iglehart's services in negotiating the purchase of WCAU-AM-FM-TV by CBS Inc. The Hutton firm got $100,000 and Mr. Iglehart gets $100,000 over a 10-year period. Chairman Paley explained that customarily 2% of the sale price is paid

in such cases but that Mr. Iglehart and the Hutton Company agreed to take only 1% (sale price was $20 million). "We think we made a good deal with him," Mr. Paley asserted.

In response to another question, President Stanton said CBS made about $33 million on capital expenditures ($24 million for stations, $9 million for expansion of plant and equipment) in 1958, aside from expenditures for films and film rights. He estimated capital expenditures in 1959 would be $15 million.

Actions Taken • In between the commotions created by Young, Parker, Soss & Co., the stockholders re-elected the the management's nominees to the board of directors, amended the by-laws regarding indemnification of directors and officers, defeated a proposal for cumulative voting, and made and passed a motion congratulating Messrs. Paley and Stanton and the CBS staff members.

Directors re-elected were Messrs. Paley, Stanton and Iglehart, Henry C. Bonfig, Arthur L. Chapman, Ralph F. Colin, Louis G. Cowan, Arthur Hull Hayes, Merle S. Jones, Leon Levy, Goddard Lieberson, Robert A. Lovett, Millicent C. McIntosh and Samuel Paley.

High income families prefer fm, WQXR finds

New research on fm, picturing the fm listener in an upper-income bracket who spends less time watching television or listening to am radio, was released last week by the WQXR Network.

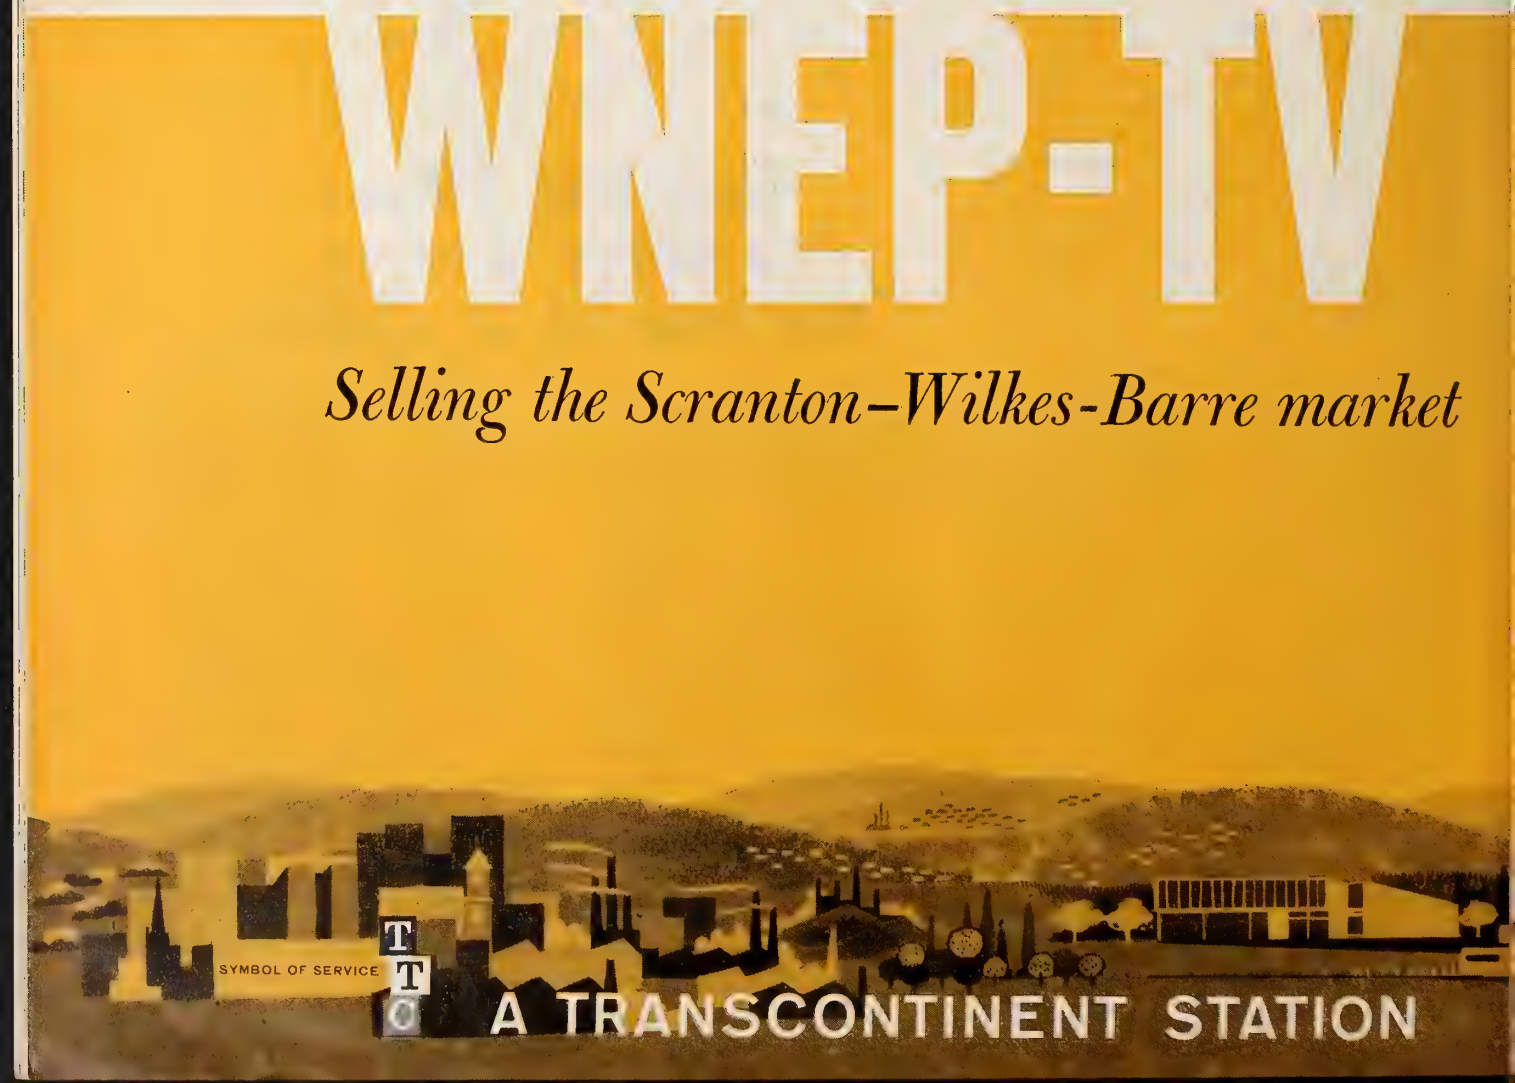
The network, a lineup of 13 fm stations in major markets of upstate New York fed by microwave relay from WQXR-FM New York, also reported that a special study indicated that approximately 500,000 or 33.7% of all families in the upstate area served by the network have fm sets. These figures represent projection based on findings of The Pulse Inc. in 1,000 in-home interviews in Albany-Troy-Schenectady, Buffalo, Rochester and Syracuse.

Other research, based on returns from a questionnaire survey of 1,683 upstate subscribers to the "WQXR Monthly Program Guide," turned up these highlights, according to the network's announcement:

• Average income of adult members of these families is $8,998 a year, as against the national average of $4,800. More than 15% reported incomes above $15,000; 58.1% are in the over-$7,500 bracket.

• The bulk of fm listeners—69.5% of the 1,174 who responded—are in professional, managerial or technical occupations.

• The average respondent tuned in the WQXR Network during 5.5 "hour periods" each day, Monday through Friday, as compared with 1.3 "hour periods" of am radio listening and 1.7 "hour periods" of tv viewing.



The WQXR Network claims to be the largest in commercial fm. Except for certain locally originated programs, it carries the entire concert schedule of WQXR as well as its hourly news broadcasts from *The New York Times*, owner of WQXR-AM-FM.

RAB summer push

"Radio will without question deliver the biggest summer audiences in its history . . . and could well best tv in number of people reached and total time spent with the medium."

This prediction comes from Albert Sindlinger, president of the all-media research firm bearing his name. It appears, with other encouraging statistics and quotes, in a "Summergram" circulated by the Radio Advertising Bureau in its summer promotion drive.

Also upcoming in RAB's hot-weather

push: "A new way advertisers can merchandise their summer radio buys to their sales forces; a presentation that spells out which media lose audiences in summer, and proves that radio does not, and a multi-city series of presentations to key summer radio prospects."

Hemorrhoid product forces Tv Code issue

A nationally advertised personal medical product has put 15-20 television stations in dutch with the NAB's Television Code Board.

In the most drastic move of its eight-year-old life, the broadcasters' code group has formally cited the stations to the full Tv Board of the NAB.

The violation involves an advertising campaign for a hemorrhoid preparation.

Warning • Ten days ago the Code Board wrote each of the stations involved stating that it was ready to certify them to the Tv Board for violation of the code. The stations all subscribe to the industry code.

Replies are due today (April 20). In several instances, alleged violators have already indicated they are either giving up the advertising or are resigning voluntarily from Code membership.

Others, who maintain that the Code Board is in error about this product, have the right of full hearing before the full Tv Board.

The Tv Board has the right to withdraw a station's membership in the Code and to forbid use of the Code Seal.

On Notice • Early this year, it was learned, all 300-odd tv stations subscribing to the Code were advised that this particular preparation was considered offensive and in violation of the provision prohibiting tv advertising of intimate personal hygiene products. Most stations which had been carrying the commercial copy dropped the account, but a hard core resisted.

The 15-20 stations in this category are scattered throughout the U.S.

Code Board members are seriously concerned with this case.

First, they have never had so many resisting their recommendations. In previous situations, where a station or two differed with the board, a resignation from the Code was voluntarily offered and accepted.

Moral Obligation • Second, the Code members feel they must see this thing through in order to keep faith with Code stations which voluntarily gave up this advertising account after being informed that it violated the Television Code.

What has heightened the delicacy of the situation, in the eyes of some who are familiar with the problem, is the fact that for the first time it looks as if a large number of stations may actually demand a hearing before the full Tv Board. This has not happened before.

The Tv Board is scheduled to meet April 30 in New York's Waldorf Astoria Hotel, under the chairmanship of G. Richard Shafto, executive vice president of WIS-TV Columbia, S.C. Mr. Shafto was chairman of the Code Board in 1957. The Code Board chairman is now Donald McGannon, Westinghouse Broadcasting Co.

KCOP (TV) labor case

A petition by KCOP (TV) Los Angeles to prevent IBEW Local 45 from holding a union trial of members who crossed picket lines during the union's strike at the station last winter will be heard May 1 in Los Angeles Superior Court. Meanwhile, a temporary restraining order issued by Superior Court Judge Ellsworth Meyer remains in effect. The hearing, originally set for April 10 was postponed at request of IBEW. KCOP's complaint notes that

PRIME SALES TARGETS are formed by people with dollars to spend. Covering 16 counties in Northeastern Pennsylvania, WNEP-TV blankets an area populated by 1.4 million people who control $2.1 billion of effective buying income... spend $1.3 billion in retail sales.

Further, the combined metropolitan market of Scranton and Wilkes-Barre ranks as the third most important metro area in Pennsylvania. It's third in population. Third in effective buying income. Third in retail sales. And the combined Scranton-Wilkes-Barre market has a higher effective buying income *per household* than many other U. S. metropolitan areas of comparable or larger size.

Transmitting at 1 million watts... from the tallest tower... on the lowest channel... WNEP-TV now provides better service to its viewers than any other station in the market. With a 70% power boost scheduled for Spring of 1959 and new studios in the Fall, WNEP-TV becomes the most powerful station with the most modern facilities in Northeastern Pennsylvania.

For details on the best TV availabilities in this prime all-UHF market, call Avery-Knodel.

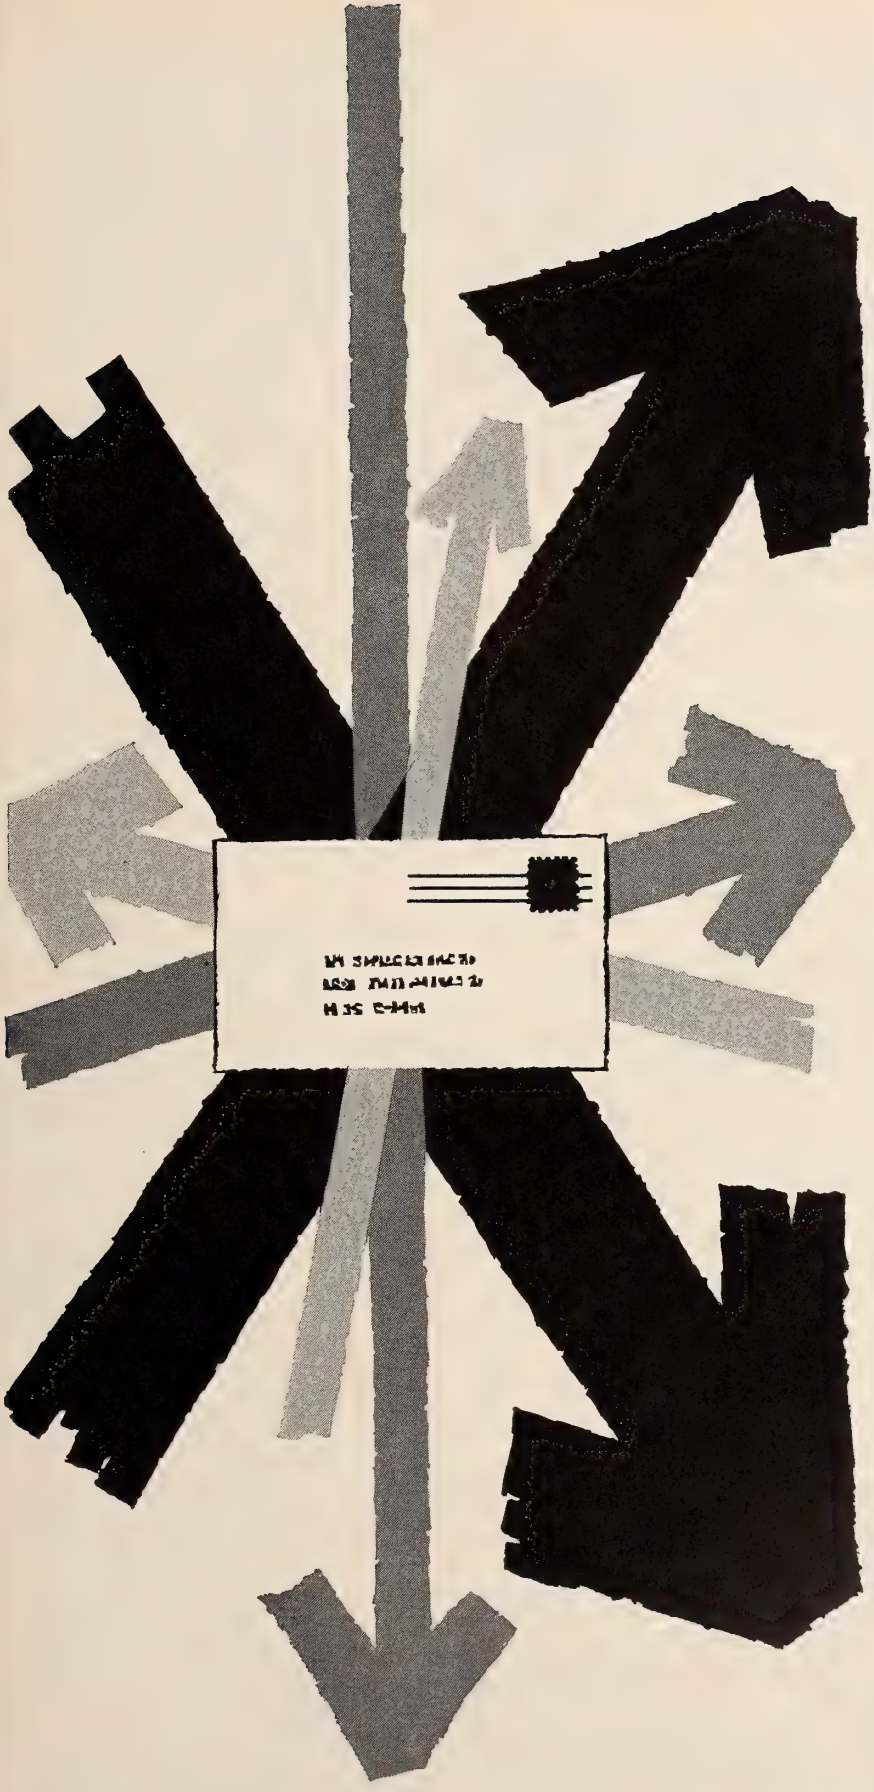
Changing hands

ANNOUNCED • *The following sales of station interests were announced last week, subject to FCC approval:*

• KSON San Diego, Calif.: Sold to Kenyon Brown by Broadmoor Broadcasting Corp. for $675,000. Mr. Brown, who is buying KSON as an individual, owns 25% of KCOP (TV) Los Angeles.



KSON is on 1240 kc, with 250 watts, has a permit for an fm station on 103.7 mc with 11.5 kw.

• KMOP Tucson, Ariz.: Sold to L.B. Clayton, former Oklahoma City real estate agent, and sons Robert and Joseph Clayton, by Bambay Corp. for $140,000. Joseph Clayton was formerly with KXLJ Helena, Mont. Jack L. Stoll and Assoc. handled the sale. KMOP is on 1330 kc with 500 w, day.

• KAFY Bakersfield, KFXM San Bernardino, KWIZ Santa Ana, all California: The interests of L. Benton Pascall in KAFY and KFXM have been

Now installed • Frank Smith (seated), president of Captial Cities Television Corp., formally completes the acquisition of WPRO-AM-FM-TV Providence, R.I., by his firm. Walter Gibbons of Armstrong, Gibbons & Lodge, attorney for Cherry & Webb Broadcasting Co. officiated for the seller at last week's transaction. The $6.5 million sale was approved last month by the FCC (BROADCASTING, March 16). Capital Cities also owns WROW-AM-FM-WTEN (TV) Albany and WCDB (TV) Hagaman, both New York; WCDC (TV) Adams, Mass., and WDNC-AM-FM-WTVD (TV) Durham, N.C.

COMING— THE FIRST AUTOMATIC U.S. POST OFFICE

The Post Office is out to win a race with time. They're going to keep first class mail as fresh as your morning paper.

Next-day delivery is the way they'll do it. Nationwide automated mail-handling is the method.

The strikingly modern post office recently announced for Providence, Rhode Island, will be a major step. An ITT subsidiary, Intelex Systems Incorporated, has been appointed to do the job.

Push-Button Operation

This will be a fully-integrated automatic post office, the nation's first. Intelex will design, construct, equip and maintain it.

Machines will perform many tedious, time-consuming tasks, enabling career employees to apply their skills to more productive functions where machines cannot replace human judgment.

In minutes, Providence mail will be ready to move. Other automatic post offices are being planned to speed this mail at the end of the line. The vastly accelerated rate of mail movement will keep pace with our surging economy.

You don't just sit down and conceive an operation of this magnitude overnight. Years of experience and months of planning are required.

This is one reason why an ITT subsidiary won the assignment. ITT has been in the creative forefront of automatic processing equipment for many years.

Experience Where It Counts

The ITT System has developed electronic computing equipment for banks, insurance companies and mail-order houses. It has created many types of document and material conveying systems for hospitals, brokerage houses, factories, government agencies.

Intelex Systems Incorporated will have full responsibility for the job. Other ITT divisions—other companies—will contribute.

When it's finished, Uncle Sam's first automatic post office will join the hundreds of ITT projects all over the world which help others to get big jobs done.

Planning for the d.j.'s • Shirt sleeves marked a planning committee meeting for the Storz Stations' second annual International Radio Programming Seminar and Pop Music Disc Jockey Convention in Miami Beach May 29-31. Attending the session at Chicago's Palmer House April 12 were (l to r): Bill Stewart, Storz programming director, as convention coordinator, and the disc jockeys serving on the convention planning committee: Bob Larsen, WRIT Milwaukee; Paul Berlin, KNUZ Houston; Joe Smith, WILD Boston; Paul Cowley, WKLO Louisville; Ira Cook, KMPC Hollywood; Robin Seymour, WKMH Detroit, and Tom Edwards, WERE Cleveland. Convention agenda includes sessions on "What Next, Mr. Music Man (The Great Abdication)"; "Are Live Commercials Dead?"; "From D.J. to Management, It Is Happening"; "Too Many Releases"; "Formula Radio: Pro & Con"; "Ratings: Do We Live By Them?"; "What Is a Personality Today?"; "Station Promotion: An Evaluation"; "Big Things Happening in Smaller Markets"; "Wedding of Music & News". Other details in DATEBOOK, page 20.

exchanged with Howard L. Tullis and John P. Hearne for their interests in KWIZ, of which Mr. Pascall is executive vice president. KAFY and KFXM will belong to Messrs. Tullis (agency head) and Hearne (attorney). Mr. Pascall, who purchased the KWIZ stock of Hal Davis when he joined the outlet in February (BROADCASTING, Feb. 23) and Ernest L. Spencer, KWIZ president, will own KWIZ. KAFY is on 550 kc with 1 kw, directional. KFXM is on 590 kc with 1 kw, directional. KWIZ is on 1480 kc with 1 kw, directional.

APPROVED • *The following transfer of station interests was approved by the FCC last week (for other Commission activities see* FOR THE RECORD, *page 101):*

• KVAN Vancouver, Wash.: Sold to Star Broadcasting Inc. by KVAN Inc. (Sheldon F. Sackett) for $580,000. Don W. Burden, president of Star Broadcasting, and other stockholders have interests in KOIL Omaha, Neb., KMYR Denver, Colo., and KWIK Pocatello, Idaho. KVAN is on 910 kc with 1 kw, directional.

Tv cameraman fined

Tom Mayhew, news photographer for WATE-TV Knoxville, Tenn., was found in contempt of court for taking pictures in a courtroom Thursday (April 16) during a recess. Judge J. Fred Bibb, upon returning to the courtroom following the recess, saw Mr. Mayhew operating his camera and immediately fined the photographer $50 and sentenced him to 10 days in jail. Mr. Mayhew pleaded that he did not know the Knox County court had a rule prohibiting the pictures.

TvB schedules annual tv clinics

Television Bureau of Advertising last week released the schedule of its second annual series of tv clinics, which opens in Winston-Salem, N.C., on May 5 and ends in Salt Lake City on June 11. The clinics will be held in 16 cities, with meetings scheduled simultaneously in many localities.

Each session will be a full day in length and will cover new research material, sales techniques and promotional data. In addition, there will be three special meetings for representative salesmen only (Chicago, May 13, New York, May 26, and Los Angeles, June 3).

The schedule: Winston-Salem, N. C., May 5; Jacksonville, Fla., May 7; Dallas, May 12; Chicago, May 12; Chattanooga, May 14; Minneapolis, May 14; Syracuse, May 19; St. Louis, May 19; Cleveland, May 21; Omaha, May 21; Los Angeles, June 2; Philadelphia, June 2; San Francisco, June 4; Portland, Ore., June 9 and Salt Lake City, June 11.

Five in broadcasting win SDX citations

CBS and its Rome correspondent, Winston Burdett, captured radio public service and reporting honors in Sigma Delta Chi's 27th annual distinguished journalism awards announced Friday (April 17).

Tv awards went to WBBM-TV Chicago for "television reporting," KNXT (TV) Los Angeles for "public service in television journalism" and to Harold R. Meier, assistant news director, KSTP-TV Minneapolis-St. Paul for television newswriting.

These were among the encomiums passed out for outstanding contributions in 15 categories of radio, tv, press and journalistic research during 1958. They were announced by Victor E. Bluedorn, national director of the journalistic awards, on the golden anniversary of the national journalistic fraternity. Plaques and medallions will be presented at the annual awards banquet in Chicago's Ambassador West Hotel May 14 by James A. Byron of WBAP-AM-FM Fort Worth, Tex., SDX national president.

Judges • A panel of 63 judged the nominations submitted by radio-tv stations and networks, newspapers, magazines, journalism schools, individuals, civic groups and SDX members.

Mr. Meier of KSTP-TV was cited for his tv script of Dec. 7, 1958, about the

plight of the Standing Rock Indians—a documentary type news story adjudged to be "accurate, clear, complete" and one designed to maintain audience interest. The citation lauded his "enterprise" in traveling 700 miles in four days and overcoming "many obstacles."

The citation for CBS' Mr. Burdett alluded to his description of the election of Pope John XXIII and the "consistently high quality of his other reports," embodying "the finest qualities in the unique art of radio reporting."

CBS was honored for the Unit One Project of its public affairs department, particularly its probe into juvenile delinquency (*Who Killed Michael Farmer?*). The judges' conclusion: this should prove that "responsible journalism is not 'medieval' in 'modern' radio."

Fire Coverage • WBBM-TV was cited for "brilliant" coverage of the Chicago school fire that killed 90 children Dec. 1, "a classic example of swift, dramatic and tasteful handling of a disaster story." The use of "resourceful and imaginative reporting techniques," according to the citation, was in "keeping with the highest professional standards of television journalism."

KNXT won its citation for a "penetrating reportorial analysis of a controversial issue," capital punishment as shown in *Thou Shalt Not Kill*. The station was praised for "unselfish and public spirited motives," for objectivity in presenting both sides and for a "commendable experiment in television editorializing."

Inter-American Bar hears Canon 35 attack

Broadcasting and photographing court proceedings would improve the judicial process, a Texas Bar Assn. official said last week in an attack on the American Bar Assn.'s Canon 35.

Addressing the 11th conference of the Inter-American Bar Assn. in Miami, Homa S. Hill stated that improved equipment has eliminated all valid supports for the courtroom ban. The canon, he said, has been condemned repeatedly by courts as discriminatory and more harmful than beneficial to the public interest.

Mr. Hill, chairman of the TBA information committee, asked that radio-tv coverage of trials be left up to individual judges. "The courts do not belong to the lawyers but are institutions of, by and for the people," he said. ". . . Photographing and broadcasting of court proceedings would improve the testimony of witnesses and aid in the arrival at justice and truth; educate the public, and reveal to the public those who are good trial judges while bad judges would be exposed. . . ."

He cited Oregon and Oklahoma su-

ASNE retreats; lifts ban on Castro speech

An old champion of freedom-of-access to news events was momentarily caught with its pants down last week—but recovered in time to make a full and hasty retreat.

The American Society of Newspaper Editors originally ruled that radio-tv coverage of Cuban Prime Minister Fidel Castro's speech Friday (April 17) before ASNE in Washington would not be permitted. There followed immediate cries of anguish from the electronics media, including NAB President Harold Fellows and NBC Newsman Julian Goodman, president of the Radio-Tv Correspondents Assn.

Following the outcry, ASNE Thursday announced that pooled radio-tv coverage would be permitted. A few hours later, all restrictions were removed for film coverage with all tv networks allowed to bring their own equipment. Live broadcasts remained taboo.

13% decline for WJR

Radio broadcasting revenues declined 13% in 1958, John F. Patt, president of WJR The Goodwill Station Inc., has reported in the annual report for WJR Detroit and WJRT (TV) Flint, Mich.

Mr. Patt also said that WJRT took in $170,000 in 2½ months of operation (it went on the air Oct. 12, 1958), although it was carried as a $325,189.88 loss on the company's books. The sag in radio revenues was attributed to business recession and work stoppages in the area.

Total operating revenues for the company in 1958 were $3,275,315.49, compared with 1957's $3,573,037.81. Net profit after taxes was $271,983.83 (45 cents per share on 600,614 shares outstanding), compared with 1957's $495,681 (82 cents per share).

The company reported total assets of $3,811,852.27, with total current liabilities of $397,434.26 and retained earnings (less amount transferred to capital incident to the stock dividend) of $1,671,485.14.

CBS Radio fills out its Michigan coverage

CBS Radio scored last week by signing six new affiliates in Michigan, including one to replace its loss in Detroit and numbering among the total four former independents in the Knorr and Stevens-Wismer ownership groups.

Knorr's WKMH Dearborn, 5 kw independent (1310 kc) with studios in Detroit as well as Dearborn, will become the Detroit outlet on May 24. It will replace 50 kw WJR Detroit, which gave notice last winter that it would leave CBS Radio because of dissatisfaction with the network's new Program Consolidation Plan (PCP) (BROADCASTING, Nov. 24, 1958).

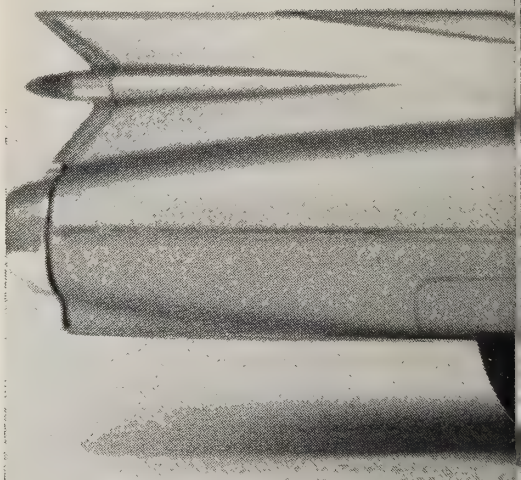
Arthur Hull Hayes, president of CBS Radio, announced the six signings. In addition to WKMH, whose managing

Tv trims newspapers' auto lead

The three largest national advertisers in newspapers in 1958—General Motors Corp., The Ford Motor Co. and The Chrysler Corp.—cut their budgets by an average 36% in that medium in 1958, according to a report issued last week by Media Records and the Bureau of Advertising, American Newspaper Publishers Assn.

By comparison, the "big three" of the automotive industry increased their investment in network and spot tv by an average 8%, according to figures supplied by the Television Bureau of Advertising. It was pointed out that the average total showed an increase because General Motors upped its tv investment by about 60% (from $14.3 million in 1957 to $22.1 million in 1958), while Chrysler cut back by about 20% (from $19.5 million to $14.7 million) and Ford reduced its tv allocation by about 17% ($16.4 million to $13.6 million). These figures are gross time charges only and do not reflect production costs, which raise the investment in tv by at least 50%, while newspaper production costs are estimated to raise expenditures less than 10%.

General Motors' newspaper outlay in 1958 dipped to $34,603,336 from $52,390,306; Ford slipped to $20,000,024 from $31,533,144 and Chrysler Corp. declined to $16,049,691 from $26,144,287. Automotive advertising as a whole, the bureau noted, dropped by 20.2% to $159,227,000 from $199,578,000.



National advertising in newspapers generally was reported to have declined by 5.1% in 1958 from 1957—from $757,401,000 to $719,049,000.

What if you're out to reach the cotton pickin' set?

Is your market regional? Coverage is easier when your show is on film. Every station in the land is equipped to handle it . . . and you know your message comes through the way you want it to!

Actually, film does three things for you . . . 3 big important things:

1. Gives you the high-polish commercials you've come to expect . . . fluff-free . . . sure
2. Gives you coverage with full pre-test opportunities
3. Retains residual values

CBS Radio in Michigan • Five of the six new affiliates which signed with CBS Radio last week (see accompanying story) are represented here. Seated is Fred A. Knorr (WKMH Dearborn, WKMF Flint, WKHM Jackson). Standing (l to r): John Wismer (WHLS Port Huron and WLEW Bad Axe); John Carroll, managing director of WKMH; John Sitta, vice president of Knorr Broadcasting Co., and William A. Schudt Jr., CBS Radio vice president in charge of affiliate relations.

director is John J. Carroll, Mr. Hayes said the five others also will join CBS Radio on May 24:

WKMF Flint, also a Knorr station and currently independent, on 1470 kc with 5 kw day and 1 kw night, with Fred A. Knorr as president and W. Eldon Garner as managing director;

WKHM Jackson, Knorr station currently with Mutual, on 970 kc with 1 kw, with Mr. Knorr as president and Walter Patterson as general manager;

WSGW Saginaw, one of the J.L. Booth stations, now a Mutual affiliate, on 790 kc with 1 kw and headed by John L. Booth as president and Robert W. Phillips as vice president and general manager;

WHLS Port Huron, independent station and in the Stevens-Wismer group, on 1450 kc with 250 w, with John F. Wismer as general manager;

WLEW Bad Axe, another Stevens-Wismer independent, on 1340 kc with 250 w, also with John F. Wismer as general manager.

CBS Radio authorities said there was no overlapping service among the six stations, but that "they fit together like a glove."

• Media reports

• KGON Portland, Ore., affiliated with MBS, last Wednesday (April 15). KGON, which operates with 10 kw on 1520 kc, is owned by Clackamas Broadcasters Inc., of which R.J. Hartke is president.

Charles W. Godwin, Mutual vice president for stations, reported that KGON was part of a group of 17 stations which have been seeking MBS affiliation over the past seven weeks.

• KATR Corpus Christi, Tex., joined Mutual April 9. KATR, formerly an independent station, is owned by Broadcasters Inc., of which Glenn Alexander is president and William L. Lightfoot is general manager.

• KCBQ San Diego, 5 kw-D, 1 kw-N, has increased power to 50 kw-D, 5 kw-N on 1170 kc.

• Both CBC radio and CBC-TV, Toronto, Ont., shared network honors with NBC and NBC-TV for "outstanding leadership" in the National Safety Council's 1958 public interest safety awards announced April 13. They were cited along with 145 radio and 35 tv stations, plus four syndicators and the Triangle radio-tv properties as a group, becoming eligible for the Alfred P. Sloan highway safety awards later this year. The April 13 BROADCASTING inadvertently named CBS radio and CBS-TV as network winners.

• WRNL-AM-FM Richmond, Va., started using their new transmitting facilities April 12. WRNL is on 910 kc with 5 kw. WRNL duplicates its programs on 102.1 mc with 50 kw.

• KOBY San Francisco has signed a 2½-year contract (retroactive to Jan. 1) with the National Assn. of Broadcast Engineers & Technicians.

KOBY, which operates its transmitter by remote control, guarantees jobs to the eight engineers it now employs, but gives them a maximum 2½-hour shift on the air; a 14-hour turn-around; five-day work week; four weeks' vacation after three years' seniority; seven days' sick leave, and a starting salary of $147.50 weekly. The salary is raised to $177.50 after one-year seniority. A 2½% union pension starts July 1, going up to 5% on Jan. 1, 1960.

Announcers, also with NABET, are on the same salary and conditions except the 2½-hour work shift limit.

• American Broadcasting - Paramount Theatres' board of directors announced a second quarterly dividend of 25 cents per share on outstanding common stock and 25 cents per share on outstanding preferred stock of the corporation, payable June 15, 1959, to holders of record on May 22, 1959.

• Rep appointments

• WHKK Akron, Ohio, announces appointment of Forjoe & Co., effective May 1.

• KYES Roseburg, Ore., names John E. Pearson Co. as representative. KYES also is represented by H.S. Jacobsen, Portland, and William Wagner & Assoc., Seattle.

• WKBZ Muskegon, Mich., appoints Daren F. McGavren Co., N.Y.

• WFEA Manchester, N.H., names Foster & Creed, Boston, as Boston representative.

• WMEX Boston and WPGC-AM-FM Washington both name Adam Young, N.Y.

• WRVA Richmond, Va., appoints Peters, Griffin, Woodward Inc., effective July 1.

• KWOW Pomona, Calif., appoints B-N-B as West Coast representative.

• WBOF Norfolk and WQIK Jacksonville have appointed Forjoe & Co., N.Y.

• Seattle, Portland & Spokane Radio Group (KJR, KXL and KNEW respectively) has appointed Robert E. Eastman & Co. as its representative effective May 1. Lester M. Smith, general manager of the group, said emphasis will be on presenting the three stations as a group-buy known as "The Northwest Nugget."

FCC READIES TV ALLOCATIONS PLAN

Asks Congress to delay action until military reveals its mind

The FCC has agreed on a statement on television allocations which, its members feel, may be good enough to submit to Congress.

The document is in the form of a 1½-2 hour presentation, complete with slides and charts, and is a review of the allocations problem and various alternatives.

Its basic position is that no definitive action can be taken until the outcome of present consultations with the military services is known.

Target Date • This, it is hoped, will be evident in two or three months.

If successful in swapping frequencies with government agencies and thus securing additional vhf space for tv, the FCC feels ideal solution will obviously be an all-vhf allocation.

Thinking seems to have jelled on a 50-channel vhf tv service as the most desirable alternative. This would provide five channels to the top 100 markets accommodating the present three networks, an educational station and an independent or fourth network (CLOSED CIRCUIT, April 13).

There is agreement that a 12-vhf channel system under present standards cannot be maintained to meet the obligation for a nationwide, competitive tv service.

The position of a majority also is that an all uhf service would require a deprivation of service to rural and exurban viewers which is too high a price to pay.

Status Quo Out • There is also agreement, it is understood, that the present intermixed service cannot be justified —although some commissioners see uhf being used for ancillary services to extend and fill in vhf service (BROADCASTING, April 6).

There is an indication also that legislation is required to authorize the FCC to set standards for tv receivers. This would enable the Commission to require that all tv sets can receive all channels.

As an interim measure there appears to be strong sentiment to resolve problem areas by adding additional vhf channels where possible, even though some derogation of mileage separation may be involved.

It was emphasized that this compromise with separation standards would be temporary.

Such moves would be permitted only on a case-by-case basis, it was stressed.

Uncertain Calendar • Exactly when this document is to be presented to the Senate Commerce Committee is not yet decided. There had been a tentative date of April 19 for this report, but this was dropped. There is hope both at the FCC and on Capitol Hill that a meeting before the end of April may be arranged.

Some doubts were expressed, however, whether this schedule can be met. The Senate committee is already committed to April 28-29 hearings on international telecommunications carrier merger legislation and has the politically delicate job of holding hearings on President Eisenhower's nomination of Rear Admiral Lewis L. Strauss as Secretary of Commerce. This date has not yet been set.

It was also pointed out that FCC Chairman John C. Doerfer is tentatively scheduled to lead a U.S. delegation to Tokyo to confer on a possible cable between Japan and the U.S. This is due to commence May 4 (CLOSED CIRCUIT, April 6).

Lodge raps Norton shoehorn plan

A television network engineering executive has told Dr. Kenneth A. Norton, Bureau of Standards radio propagation scientist, that he doesn't know what he's talking about.

The blunt charge came from William B. Lodge, CBS Television affiliate relations and engineering vice president. It was in response to Dr. Norton's March 27 letter to FCC Chairman John C. Doerfer recommending that mileage separations for tv stations be reduced to 100 miles or less (BROADCASTING, April 6).

Writing April 13, Mr. Lodge insisted that Dr. Norton's suggestions for a tv allocation are oversimplified since they take into account only technical considerations, whereas many other principles also must be weighed, including economic, social and political factors.

The allocation philosophy proposed is "impractical, unwise and contrary to the public interest," Mr. Lodge wrote.

"Inadequate" knowledge of economics and programming as well as some "unanticipated" practical problems in uhf reception is the cause of the present intermixed vhf-uhf situation, Mr. Lodge pointed out.

Mr. Lodge expressed serious disagreement with Dr. Norton's recommendation that loss of service to rural areas would have to be borne because most people are in metropolitan cities.

This attitude not only discriminates against the rural population, Mr. Lodge contended, but it "indicates ignorance as to the extent of television viewing at 50-to-100 mile distances from the nearest station."

The Norton suggestion for reducing mileage separations would mean cutting the service area per station to less than half, Mr. Lodge said.

A station's very survival would be at stake, Mr. Lodge stated. He questioned the extent to which advertisers would place programs on reduced-coverage stations. He also maintained that distant viewers would suffer loss of multiple services —which they now receive—and in some cases might lose all such big city service.

Mr. Lodge also questioned the correctness of Dr. Norton's complaints regarding the report of the Television Allocations Study Organization and particularly his attack on the integrity of industry engineers. Mr. Lodge concluded:

"I believe that your disagreement on three details in the TASO report, regardless of how resolved, raises no question as to the value of the report in the FCC's allocation studies. I regret that you felt justified in criticizing the objectivity of industry engineers when their judgment did not coincide with yours. And, most of all, I question your wisdom in proposing a general allocation philosophy because of the many non-technical matters involved, which are beyond your field of expertness."

FCC REVERSES BOOSTER FIELD

Small-town tv made legit as legislation requested; catv rules also proposed

The FCC last week officially legitimized on-channel boosters—a natural offspring of television paternity.

It also maintained a long-standing determination that community antenna systems do not fall under its aegis. It recommended, however, two congressional actions to make catv operations more palatable to broadcasters.

One would require antenna systems to secure permission from a station to pick up and relay its signals to catv subscribers.

The other would require a catv system to carry the local station if so requested by the station.

In the special report and order issued last Tuesday, the FCC completely reversed a five year determination that on-channel, vhf boosters were illegal and in violation of the Communications Act. It agreed to accept responsibility for licensing these auxiliary tv services.

Legislation Asked • The Commission asked for legislation on two amendments to the Communications Act to permit it to assume this jurisdiction:

• Revision of Sec. 318 which requires an operator to be in attendance at a broadcast station (boosters are unattended).

• Revision of Sec. 319 which forbids the issuance of a license to anyone who has built a broadcast station before the granting of a permit (boosters—and there are an estimated 1,000 of them —began operating as far back as 1954).

This necessary legislation was introduced last Thursday by Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee.

The FCC also made it plain that repeaters must be prohibited from broadcasting on chs. 4 or 5, since these frequencies are too near the wavelengths used by aviation beacons.

It also suggested other standards to require frequency stability and some sort of cutoff device, as well as requiring transmission on a channel other than that received, maximum power of one watt, and the consent of the station whose signals are being rebroadcast.

Pending Action • Pending congressional action which will give it authority to assert jurisdiction, the Commission told the unlicensed boosters that they have until Sept. 30 to conform to any regulations propounded. Previously there was a June 30 cutoff on booster operation.

The Commission's reversal was attributed to heavy pressures from Congress—particularly from congressmen and senators representing Northwest states. Most of the estimated 1,000 boosters are in the Northwest.

On-channel boosters came into operation in 1954. They were ordered to cease and desist by the FCC, but the small, individualistic, group-owned repeaters refused to bow to the Washington authorities. In 1956 the FCC instituted a court suit to force a Bridgewater, Wash., booster to close. The court in 1957 upheld the FCC's right to act, but remanded the matter because the Commission had not weighed all elements of this type of operation.

Fruitless Order • In June 1957, the Commission issued the first of what became obviously fruitless orders for boosters to go out of business. After Colorado Gov. Edwin Johnson (former chairman of the Senate Commerce Committee) intervened, the Commission reconsidered and ordered a new study.

In December 1958, the FCC again issued a ban on boosters, but in February of this year, following outcries by repeater operators and their state and federal representatives, it again rescinded the order to permit further consideration.

Last week's order was the outcome.

Even before the Bridgewater, Wash., court test, the FCC established a translator service as a method of accomplishing what the boosters provided—the rebroadcast of big city tv station programs. Translators pick up big city tv signals and rebroadcast them in the upper end of the uhf band.

Under FCC's wing

Chairman Warren Magnuson (D-Wash.) of the Senate Commerce Committee announced last week that he would "immediately introduce" amendments to the Communications Act placing boosters under the FCC's jurisdiction, as recommended by the Commission (BROADCASTING, April 13).

The senator plans to introduce at the same time FCC recommendations placing CATV systems under its jurisdiction. He said hearings will be held on the measures by the Communications Subcommittee, headed by Sen. John Pastore (D-R.I.).

The pressures on the FCC to authorize the booster service also came from the Senate Commerce Committee. Earlier this year, Kenneth Cox, special tv counsel to the committee, issued a special report on small town tv. In it he urged the FCC to find some way of approving the operation of tv repeater-boosters (BROADCASTING, Jan. 12).

Added Data • In its report, the Commission said that it has received additional field data recently which indicate that under certain conditions vhf repeaters may be operated with less actual interference to broadcast stations and other services than had been previously calculated.

In its discussion of the community antenna problem, the FCC maintained its position that it does not have jurisdiction over this type of auxiliary service.

Besides announcing that it would recommend congressional legislation to force catv systems to secure permission before picking up and relaying (via cable) a station's signals, and to force these wire systems to carry a local station when requested without degrading its signal, the Commission said it would resume processing applications for private common carriers seeking to carry big city tv to distant catv operators. It was this last practice which led in 1958 to a complaint by a group of broadcasters.

Broadcasters contended that catv systems were abrogating the table of assignments by bringing in distant tv stations far from their natural coverage area. This, they claimed, was compounded when the Commission permitted microwave relays to be established to feed catv operators with even more distant tv programs—in some cases over 300 miles away.

The Commission denied that petition last year, and again last week affirmed this view. The FCC's position is that catv systems are private wire lines and thus it has no jurisdiction over such operations. It also held that applications for private microwave relays cannot be denied because they bring tv signals to catv systems, since they are technically available for use by any customer.

The FCC expressed the view that the requirement that permission be gained from stations whose signals are being picked up will take care of the property rights question. Some broadcasters have argued that antenna systems were violating broadcaster's property rights in program material broadcast by the "home" station.

The order was adopted by all commissioners except Comrs. Rosel H. Hyde and Robert E. Lee, who were

absent. Comr. Robert T. Bartley concurred in the order, except for those portions which agreed to permit boosters to operate in the vhf portion of the spectrum. He said he felt the Commission should force repeaters to use uhf wavelengths, over a "reasonable" transition period.

Senate again passes etv subsidy measure

For the second time within a year, the Senate has approved and sent to the House a bill authorizing a federal grant of $1 million to each state for educational tv. The same measure, which was introduced early in 1957, died in the House last summer during the last-minute rush for congressional adjournment.

The new measure, S 12, was passed by the Senate last Monday (April 13) over the objections of the Senate minority leader, Budget Bureau and the Department of Health, Education & Welfare, which will have the responsibility of administering the funds. S 12 was introduced by Sens. Warren Magnuson (D-Wash.) and Andrew Schoeppel (R-Kan.), chairman and ranking minority member, respectively, of the Senate Commerce Committee.

Commerce Committee hearings were held on the measure in January (BROADCASTING, Feb. 2) and both arms of Congress held etv hearings a year ago. In speaking for the bill last week, Sen. Magnuson said the legislation is intended to expedite and accelerate the use of tv in schools. "S 12 is a modest and somewhat simple proposal with a tremendous impact on the general public," he said.

Maximum Cost • The bill could cost the government a maximum of $51 million with the District of Columbia also eligible for aid. The money would be earmarked for "acquisition and improvement" of transmitting and studio equipment with its use for building construction and programming prohibited.

In addition to Sen. Magnuson, Sens. Schoeppel, Ralph Yarborough (D-Tex.) and Norris Cotton (R-N.H.) urged the passage of the bill during Senate debate. Speaking against the bill were Sens. Everett Dirksen (R-Ill.) and John J. Williams (R-Del.). Their opposition was based on budgetary reasons and the HE&W objection. HE&W maintained the legislation is not needed because etv is progressing satisfactorily without federal help.

S 12 passed by a voice vote. It went to the House where it was referred to the Commerce Committee, which has several similar bills pending.

CH. 10; A THRICE-TOLD TALE

Mack trial rehashes Miami story, as same witnesses play back testimony

The government's criminal conspiracy trial against former FCC Comr. Richard A. Mack and his longtime friend Thurman A. Whiteside last week proved to be just another version of earlier sessions on the Miami ch. 10 case by the House Legislative Oversight Subcommittee and an FCC examiner's later rehearing of the court-remanded case. The cast of witnesses was almost the same.

On the Stand • Last week's witnesses included George Baker, National Airlines president; Circuit Judge Robert H. Anderson of Miami, former partner in the law firm serving as general counsel for National Airlines, which through a subsidiary was awarded ch. 10 in 1957; Paul R. Scott, a member of the successor law firm and who has handled the airline's legal affairs 16-17 years; John L. Fitzgerald, FCC general counsel; Leland Boardman, special FBI agent; and Frances Kreeger, former secretary to Mr. Mack during his tenure at the FCC from 1955 to 1958.

Mr. Baker gave essentially the same testimony as at the House and FCC hearings. So did Judge Anderson and Mr. Scott. Mr. Fitzgerald interpreted documents showing various FCC actions in the original ch. 10 case. Mrs. Kreeger talked about phone calls and visits to Mr. Mack's office at the FCC. Mr. Boardman described the history of a surreptitious wire recording made by two House Oversight investigators in an interview with Mr. Mack in January 1958.

Testimony was interrupted by numerous objections by defense counsel, mostly overruled, and often by government counsel, usually sustained.

The defense held the 4-1-1 FCC vote in February 1957 for National Airlines' Public Service Tv Inc. indicated Mr. Mack's vote was not needed. Arthur Hilland in his opening statement to the jury depicted Mr. Whiteside as a "kind and generous" man and Mr. Mack as an honest one and said none of the government charges will be proved. Mr. Cunningham, in his opening talk, said he will prove Messrs. Mack and Whiteside conspired to obtain the award for PST, with Mr. Whiteside making personal and financial inducements and Mr. Mack accepting them.

Official Lineup • The defense last week submitted subpoenas for all FCC members except Comr. John S. Cross. Others: former Comr. Edward M. Webster; Warren E. Baker, former FCC general counsel; John Harrington, FCC attorney; Scott Peek, aide to Sen. George A. Smathers (D-Fla.), and Ralph R. Roberts, clerk of the House of Representatives. (The House last week passed a resolution to allow Mr. Roberts to appear, but without House documents unless their relevancy is indicated by the judges.)

The government has said it will call a total of 37 witnesses (BROADCASTING, April 13). The case is being heard in Washington by Federal District Judge Burnita S. Matthews.

FCC people lauded

Two employe groups and 33 individuals received superior accomplishment recognition, 41 persons got citations for adopted suggestions and nearly 1,000 people received length of service pins at the seventh annual FCC incentive awards ceremony held April 9.

Six of the seven Commissioners received length of service awards, T. A. M. Craven and Rosel H. Hyde each having 30 years of federal service to their credit. The length of service pins were given to 26 employes for 35 years service, 54 for 30 years, 249 for 20 years and 622 for 10 years.

FAA set to take over airspace jurisdiction

Broadcasters can look for a new boss in the airspace field "within a matter of weeks," according to one source. The cat was let out of the bag last week in Las Vegas, Nev., when Lt. Gen. E. R. Quesada (USAF, ret.) administrator of the Federal Aviation Agency, announced that the FAA was drawing up papers to give it control over tall structures including radio and tv towers.

The announcement was made in a speech by Gen. Quesada at the Conference on Flight taking place at the Nevada resort.

FCC officials disclaimed any knowledge of the action—although it was learned some informal conversations had taken place between Commission and FAA officials on the subject.

The Law • It was stressed by an FCC spokesman that the Communications Act gives the FCC primary jurisdiction on radio and tv grants, including the site and height of antenna towers.

Under present practices, it was pointed out, broadcast applicants apply to regional airspace panels for approval of antenna sites and heights. Disapproval by a regional panel is reviewed by a Washington airspace group. If the disapproval is upheld in Washington, the applicant may still press his application through the FCC, with objecting organizations privileged to plead their case before the Commission also.

Because of the desirability of tall tv antennas, there have evolved over the last five years standards for such towers which permit advance knowledge of approval or disapproval. In many instances where members of airspace panels have objected, a compromise has been reached. In several instances the FCC has overruled these objections and granted an application.

The airspace panels—on which sit representatives of civil and military aviation interests—are a division of the Air Coordinating Committee. This is a Presidential advisory group which recommends air policy to the White House.

Air Law • The FAA was established in 1958. It has control over both civil and military aviation. The Federal Avi-

Postponement

A stop order went up on all aspects of the Boston ch. 5 case last week when Special Examiner Horace Stern continued the date for filing proposed findings to a later time in order that nothing interfere with the criminal trial of former FCC Comr. Richard A. Mack and Miami attorney Thurman A. Whiteside. The proposed findings in the reopened Boston tv case, involving allegations of behind-the-scenes influences, were due April 20. Two weeks ago Judge Stern postponed the May 1 date which had been scheduled for final argument on the Boston case.

Meanwhile, the Commission last week designated Judge Stern to act as presiding officer in the reopened Miami ch. 7 case. This also involves charges of off-the-record wire pulling and was designated for rehearing by the FCC earlier this month (BROADCASTING, April 6). Judge Stern, retired chief justice of the Pennsylvania Supreme Court, presided also at the reopened Miami ch. 10 case.

AUTOMATIC "PUSH-BUTTON" CUEING

COLLINS AUTOMATIC TAPE CONTROL

The touch of your finger . . . you're safely on the air in an instant. Right on cue with tape-recorded spots, announcements or programs.

Collins Automatic Tape Control features instantaneous, no-wow starting; automatic cueing; automatic stopping; simplified handling and tape storage. Units adaptable to remote control operation.

The Collins Automatic Tape Control eliminates the complicated mechanical process of threading and cueing magnetic tapes. You're always assured of automatic continuous programming with professional production made easy.

Miscues become part of the past. Get automatic push button cueing with Collins Automatic Tape Control. For complete information, call your nearest Collins broadcast representative, or write for literature.

Playback and playback/record units are available in rack mount (above) or console models. Cartridges available with tape capacities from 40 seconds to 45 minutes.

COLLINS

COLLINS RADIO COMPANY • CEDAR RAPIDS, IOWA • DALLAS, TEXAS • BURBANK, CALIFORNIA

ation Act also gives the agency control over airspace.

When the necessary legal documents are signed by Gen. Quesada, the functions now performed by the airspace panels will be transferred to the FAA's Airspace Utilization Div. This is headed by Charles Carmody. It is part of the Bureau of Air Traffic Management, which is headed by David D. Thomas.

Just how the functions of the present airspace panels will be performed is not known. There were, last week, some reports that the general procedures in effect now will be continued under FAA auspices. There were other reports that the FAA intended to radically revise the procedures, by eliminating the regional and Washington panels and setting up an internal office to process applications for tall towers—including the right of full-scale hearings under the Administrative Procedures Act.

There was also a report that the FAA intended to draw up standards which would also apply to receiving antennas.

Because the official orders have not been signed, no one at the FAA was willing to talk.

Wrather-Marietta file for $30 million union

An application seeking FCC approval to the merger of Transcontinent Television Corp. and Marietta Broadcasting Inc.—which will result in an estimated $30 million corporation (BROADCASTING, March 23, Feb. 16)—was filed with the FCC last Thursday (April 16).

The gist of the document is the transfer of the total 110 shares of Marietta stock for Transcontinent stock —with Marietta owners Jack Wrather and Edward Petry Co. becoming Class A stockholders to the extent of 800 shares and 450 shares respectively, in addition to Class B common holdings in Transcontinent.

Class A stockholders elect one more than the majority of the Transcontinent board of directors. The board at present comprises nine members, but after the merger transaction is approved, the board will be increased to 13, with Class A shareholders electing eight members.

Block of 35% • Following approval and consummation of the merger, Mr. Wrather will become a 22.15% Transcontinent stockholder; Petry company, 12.66%. Mr. Wrather presently owns 63.64% of Marietta; Petry 36.36%.

Transcontinent, whose president is David C. Moore, is largely owned by J. Fred Schoellkopf IV, Seymour H. Knox III, David Forman, George F. Goodyear and Paul A. Schoellkopf Jr. These are all present Class A. stockholders. Other major shareholders are General Railway Signal Co., 9.2%; and Virginia Deuel and Norma Deuel Lutz, 6.16% each.

The balanace sheet for TTC, as of Feb. 28, showed total assets of $11,371,854, of which $2,263,791 were current assets and $2,555,536 were carried as fixed assets for the tv and radio properties and administrative offices less depreciation allowances. Current liabilities were listed at $1,336,822, with a long term note due 1962 to the Bank of New York shown as $2,250,000; debentures maturing in 1963-66, $2,771,800; capital stock, $1,893,360; capital surplus, $2,840,040, and earned surplus, $576,282.

Marietta balance sheet as of Feb. 28 showed total assets of $5,304,697; with current assets of $901,296 and fixed assets (the San Diego and Bakersfield properties) at $833,715 and $576,149 respectively. Total liabilities were listed at $4,226,348, with current notes payable, $773,500; accounts payable, $238,276, and long term notes $2,922,000. The balance sheet showed an earned surplus of $362,232 and a net profit, year to date, of $21,784.

Price Tag • Estimated replacement costs for Marietta stations were given as follows: KFMB San Diego, $240,515; KFMB-TV, $2,537,266, and KERO-TV Bakersfield, $1,586,419.

The merger will bring these three stations into the TTC stable, which now includes WGR-AM-TV Buffalo, N.Y.; WROC-TV Rochester, N.Y.; 60% of WNEP-TV Wilkes-Barre-Scranton, Pa., and 50% of WSVA-AM-TV Harrisonburg, Va.

The merger contract carries a Dec. 31 deadline for consummation.

Program probe

Chief FCC Hearing Examiner James D. Cunningham announced last week that the television network program inquiry will begin May 4 in Washington. The order requires ABC, CBS and NBC to give evidence and supply information on programs and alleged program tie-ins, including identification, authentication and explanation of certain exhibits, documents and other papers. This procedure was decided two weeks ago, when Broadcast Bureau officials and network lawyers huddled in Washington (BROADCASTING, April 13).

In his report to stockholders (see page 64), CBS President Frank Stanton took note of the FCC's action. "On the Washington front," he said, "there is an addition to those problems noted in the annual report. The FCC announced last week that commencing May 4 it will hold hearings on 'network television.' The direction and the purpose of these hearings are unclear. The danger, it seems to me, is that it will bring the government into programming. This, in our judgment, is not a proper function of the government."

Court affirms FCC's Shreveport tv grant

The U.S. Court of Appeals in Washington last week upheld the FCC's July 1957 grant of ch. 12 in Shreveport, La., to Shreveport Tv Co. (KSLA-TV). The grant had been appealed by losing applicant Southland Tv Co.

The FCC first granted ch. 12 to Shreveport Tv in May 1955 with "greatest weight" given to the fact that Don George, 43% stockholder, would manage the station. Southland appealed this decision to the court and while said appeal was pending Mr. George died. Thereupon, the court remanded the case to the FCC to take into account Mr. George's death and the following July the Commission reaffirmed the grant without further hearings. The second Southland appeal then followed.

In its decision last week, the court stated: "We are unable to say that there was no substantial basis for the Commission's findings. . . . In seeking a further evidentiary hearing, [Southland] made no proffer of evidence to be evoked which would have impaired the validity of the Commission's determination."

Circuit Judges Henry Edgerton, David Bazelon and Walter Bastian handed down the unanimous decision, written by Judge Bastian.

Also last week, the Appeals Court upheld a March 1957 am grant in Cedar Falls, Iowa, to Jane A. Roberts (KCFI). The appeal was filed by Mass Communicators Inc., which attempted to file for the same facility (1250 kc) when Mrs. Roberts had not completed construction of the station in the time allowed under her permit.

The FCC refused to accept Mass Communicators application and the court appeal following. "It is clear that an expiration of a permit was by no means to be considered an automatic forfeiture of the permit," as claimed by the appellant, the court ruled. Circuit Judge George T. Washington wrote the majority opinion for himself and Judge John A. Danaher. Judge Wilbur K. Miller dissented.

NAB urges action opposing blackouts

NAB last Thursday (April 16) urged all its tv members to write to members of Congress opposing pending sports anti-trust bills which would sanction a blackout of major league baseball in minor league territory (EDITORIAL, page 114).

"Our position is that arrangements for the broadcasting of sports should remain subject to the normal operations of the antitrust laws," Vincent Wasilewski, NAB manager of government relations, told the tv stations. He pointed out that NAB President Harold Fellows already had asked for a hearing on the bills (BROADCASTING, April 13).

Five bills are pending in the House and one in the Senate (with three co-sponsors) which would permit a 75-mile blackout of baseball telecasts from minor league cities. In addition, a sixth House bill has been introduced which would give a blanket exemption. The bills are resting in the respective Judiciary Committees.

Mr. Wasilewski said that NAB takes no position on the question of exempting professional sports generally from the antitrust laws, "but we do believe that it is essential that you register your objection to the tv blackout proposal with your representatives and senators."

WVEC-TV merger valid

The complex Norfolk-Hampton, Va., ch. 13 case moved nearer solution last week as FCC Hearing Examiner J.D. Bond issued an initial decision which would grant the modification of WVEC-TV Norfolk's construction permit to enable the station to operate on ch. 13 rather than ch. 15.

At the same time Examiner Bond recognized the validity of merger agreements dating back to last summer (BROADCASTING, August 4, 1958) and dismissed the case's two current competing applications. WTOV-TV Norfolk had desired to operate on ch. 13 in lieu of ch. 27 and Virginian Television Corp. had applied for a new tv outlet on ch. 13. Ch. 10 WAVY-TV Norfolk was an intervenor in the case. Issues involved in the hearing included the amounts of money used to bring about the merger agreements and the question of overlapping ownership interests.

Under the merger agreements, WVEC-TV (Thomas P. Chisman and associates) will be owned 10% each by Virginian Television Corp. and Louis H. Peterson, (WNOR Norfolk) who owned 50% of WTOV-TV prior to the merger. WVEC-TV is to pay out a total of $255,497 as part of the agree-

Just to prove Cadillac's Importance —

WWTV REACHES MORE TV HOMES THAN THERE ARE IN WYOMING!

NCS No. 3 shows that WWTV has daily circulation, both daytime and nighttime, in 36 Michigan counties.

WWTV (Cadillac and Northern Lower Michigan) delivers to you more actual *viewers* than the entire TV-home-count in Wyoming!*

And to prove that the vast Cadillac market really belongs to WWTV, Pulse rates the WWTV audience an astounding *14% greater than that of the next two stations combined* (Mon.-Fri., 12 noon-12 midnight)!

Add WWTV to your WKZO-TV (Kalamazoo-Grand Rapids) schedule and get all the rest of outstate Michigan worth having. *If you want it all, give us a call!*

**There are 54,400 television homes in Wyoming. WWTV's NCS No. 3 nighttime daily circulation is 72,870.*

FCC hears argument of Bakersfield uhfs

KBAK-TV Bakersfield, Calif., waged an important battle last week in its two-front war to keep two new uhf grants out of town, at least until the FCC settles the San Joaquin Valley allocation problem.

In an oral argument before the Commission (Comrs. Rosel Hyde and Robert Lee were not present), counsel for ch. 29 KBAK-TV, Pacific Broadcasters Corp. (ch. 39) and Kern County Broadcasting Co. (ch. 17) presented their views. Both Pacific and Kern County defended their grants and Kern County pointed out that it is anxious to build. Both uhf grants, made late last year, were stayed by the Commission pending the oral argument.

KBAK-TV maintained that the other Bakersfield outlet, ch. 10 KERO-TV, is in possession of "70% of the market" with the remaining 30% having to be divided between three stations if the two uhf grants hold. Although the courts have ruled that economic issues are pertinent to this type of case, Kern County argued, the only real issue is that of its qualifications, about which, it stated, there is no question. Pacific Broadcasters stated that the FCC could not accept KBAK-TV's proposal without jeopardizing the future status of rulemaking proceedings as permanent actions.

On the other front in its war of the channels in Bakersfield, KBAK-TV appeared in the U.S. Court of Appeals in Washington week before last protesting the allocating of chs. 17 and 39. The two uhf channels were assigned to Bakersfield upon the request of ch. 12 KFRE-TV Fresno and KXOA Sacramento, both California (BROADCASTING, July 7, 1958).

Ch. 47 KJEO (TV) Fresno has asked the Commission to make both Fresno and Bakersfield all vhf communities, pending a nationwide allocation revision.

Let FCC staff help

The FCC last week recommended to Congress that Sec. 5(c) of the Communications Act be amended to give commissioners "greater discretion in utilization" of the review staff. Such a change would expedite disposition of adjudicatory cases by permitting the staff to assist the Commission more fully, the FCC said.

Comr. Frederick Ford said the section is "unduly restrictive, unnecessary and should be repealed." Comr. Robert T. Bartley disagreed with the proposed amendment in that it still would prohibit the review staff from advising commissioners. He termed this prohibition "both wasteful and inefficient."

Small market stations get break from FTC

Good news is coming to radio and tv stations. From the Federal Trade Commission, no less.

Soon to be announced will be the FTC's new policy of requiring commercial continuity from most broadcast stations only once a year—instead of four times a year required now.

The new procedure will work like this: The federal agency will advise small market stations that a complete file of all locally originated copy for one 24-hour day is requested.

Six-Month Size • Medium-size stations in medium-size markets will be asked to supply the information twice a year.

The FTC will specify the day for which the report is required.

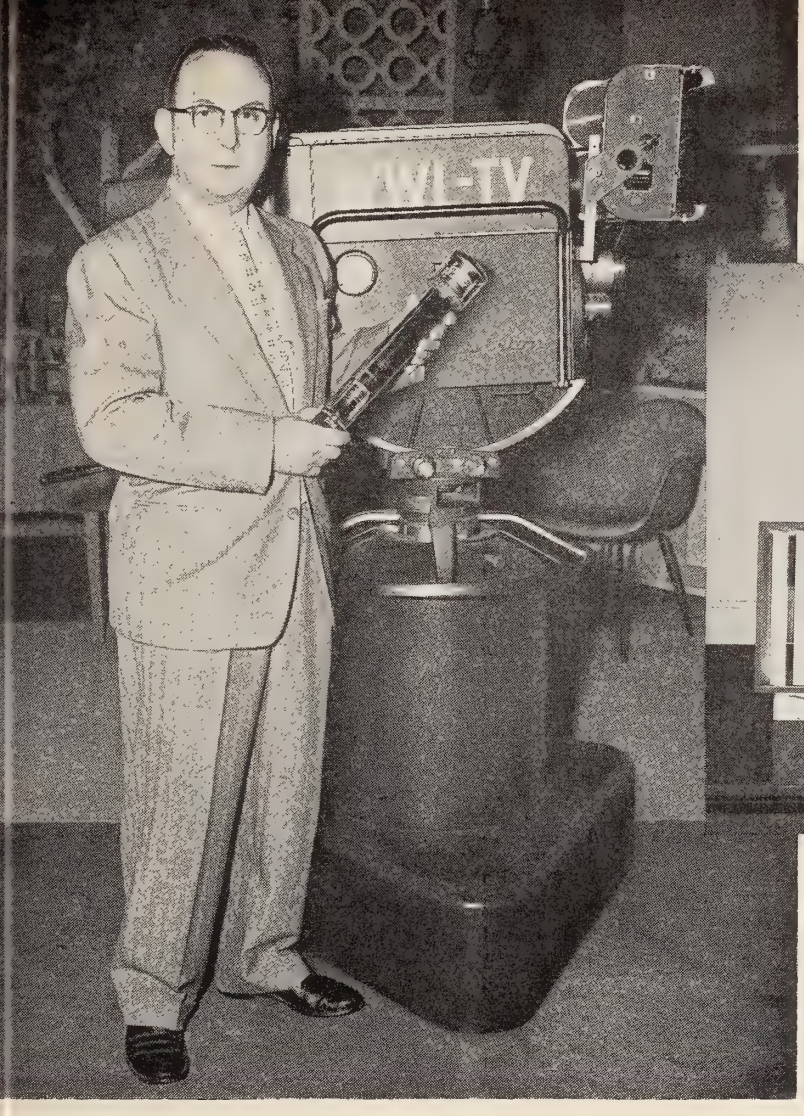
Unchanged will be the policy of submitting such information four times a year on the part of networks and major market stations.

The information is screened by the FTC's Radio & Tv Monitoring Unit. This is a special group in the agency's Bureau of Investigation headed by Charles A. Sweeney (BROADCASTING, Dec. 8, 1958). The FTC is the federal agency charged with guarding the public against false and misleading advertising.

• Government notes

• The Internal Revenue Service has announced that the retailers' excise tax is applicable on taxable articles which are leased for specific time periods to be used as television "props." The IRS stated that for the purposes of the retailers excise taxes, "the lease of an article shall be considered the sale of such article." The length of time of the lease is "immaterial," according to IRS.

• After granting three extensions of time to Rollins Broadcasting Inc.'s KATZ St. Louis, Mo., to construct its changed nighttime facilities, the FCC has set the station's fourth request for a time extension for hearing. KATZ operates on 1600 kc with 5 kw, day, 1 kw, night, directional antenna. The nighttime power increase would be to 5 kw with a modification of the station's existing directional array. KATZ had told the Commission that it was reluctant to proceed with its authorized construction because of a possible highway rerouting in the vicinity of the outlet's transmitter site.



• Communists have infiltrated U.S. radio, television and the motion picture industries, Sen Karl Mundt (R-S.D.) charged last week in introducing a bill, (S 1689) to establish a Freedom Commission. Under the bill, an academy would be established to train Americans to better understand the nature of communism and to develop effective methods of combatting it. Sen. Paul Douglas (D-Ill.) is a co-sponsor of the measure.

• Multiple station owner Sherrill C. Corwin received the FCC go-ahead April 8 for a new tv station on ch. 34 in Los Angeles. The Commission granted the motion of its broadcast bureau and struck the appeal of the firm K-UHF (TV) for a review of an initial decision of last summer and made that decision effective immediately, namely the grant of the Los Angeles facility to Mr. Corwin. K-UHF (TV) had been a competing applicant for the channel.

• As of April 9, nearly two score daytimers had filed comments with the FCC supporting the proposed rulemaking which would permit daytime stations to operate from 6 a.m. or local sunrise (whichever is earlier) to 6 p.m. or local sunset (whichever is later). A smaller number of filings opposed the proposed rulemaking, with clear channel stations prominent among these. The Commission extended the deadline for comments in this proceeding at the beginning of the month on a petition by NBC (AT DEADLINE, April 6). Deadline for comments is May 8.

• The Weston, W.Va., ch. 5 case has moved closer to resolution with the disclosure by FCC Hearing Examiner Jay A. Kyle that two of the three competing applicants are planning a merger. It was also made known that the third applicant in the proceeding is considering withdrawal, with reimbursement for out-of-pocket expenses. The two firms working on a merger are WJPB-TV Fairmont, W.Va. (J. Patrick Beacom) and Telecasting Inc. Examiner Kyle gave the two firms until April 23 to reach agreement on their consolidation. The remaining applicant for Weston ch. 5 is West Virginia Radio Corp.

• Ch. 11 KFJZ-TV Fort Worth, Tex., was turned down April 8 by the FCC on its petition to reallocate educational ch. 2 Denton, Tex., to Fort Worth for commercial use. Comrs. Rosel Hyde and T.A.M. Craven abstained from voting in this decision.

RWW'S STATUS
Founding group holds N. Y. closed session

The "paying members" of Radio World Wide last week started the wheels turning toward incorporation of their new cooperative network program venture.

They met Wednesday in New York, but nobody would say who or how many they were. The committee is headed by Herbert Krueger, WTAG Worcester, and his fellow committeemen in getting the movement going have been John Patt of WJR Detroit and Paul W. Morency of WTIC Hartford. At last week's session, it was understood, all who attended—the meeting was limited to stations which had deposited earnest money toward incorporation—became committeemen pending election of a board of directors.

The directors cannot be named until incorporation has been completed and in the normal course of events this probably would take about 30 days.

Still Short of Goal? • Failure of the group to disclose details of their meeting led observers to conclude that the minimum goal of 25 station subscribers had not yet been reached. But there were no indications that the earlier, unofficial "guess" about an autumn target date for RWW should be amended.

The group is expected to incorporate in the name of Radio World Wide, although it is known that many of the stations which have been close to the project in the past have not been particulary wedded to that name. Presumably it can be changed with little trouble after incorporation if a more appropriate corporate title is decided upon.

RWW's objective would be to develop programming which member stations could use or not use as they see fit. It would be concerned with programming exclusively and would have nothing to do with sales, which would be handled by the member stations individually.

Indie co-production in ABC Films planning

ABC Films Inc. is blueprinting a product expansion program that will make available to the organization "a steady flow of quality tv series" through co-production ventures with independent producers, Henry Plitt, recently-elected president of ABC Films, reported in an interview last week.

Mr. Plitt, who assumed his new duties about two months ago, said that first order of business has been to add to ABC Films' product list. Procurement of "quality programming," he said, will be a continuous project for the next two years or more, but for the immediate future, ABC Films is "firm" on plans for two new series, while three others are in the developmental stage.

For this fall, ABC Films will offer for network presentation a half-hour series titled *The Racer,* an adventure program in an auto racing environment. It will be produced by World Wide Television, Hollywood, which is controlled jointly by ABC Films and Joseph Schenck. A pilot, Mr. Plitt said, will be shown in New York in about six weeks.

The other property to be made available for fall showing on a syndication basis is *Simon Lash,* a half-hour series on the exploits of an attorney-investigator. This serial will be a co-production venture by ABC Films in association with independent producer Sidney Salkow.

ABC Films Inc. has reported that gross billings for the first quarter increased 52% over those of the same 1959 period. Main contributors to the increase were said to be second year of *26 Men, The People's Choice* and *The Adventures of Jim Bowie.*

Film-tape facility • Filmways Inc. will move into its new film and videotape center (sketched here) this summer. The Manhattan facilities now under construction, will accommodate production of tv commercials and shows, either filmed or taped, plus feature films. Claimed the largest in town, the center will cost about $400,000.

The 100 by 230-ft. one-story building is to house two studios for simultaneous staging of separate projects. The arrangement will allow for setting up film or tape facilities within hours of each other.

The new facilities, to be used in addition to Filmways' present New York location, will be available to Warner Bros. under an agreement whereby the companies share facilities.

WGA council meets

Forthcoming negotiations of Writers Guild of America for new contracts with major motion picture companies, independent tv film producers and radio and tv networks were to form a major topic of discussion at the meeting of the WGA national council meeting in Hollywood last weekend (April 18-19). The WGA major studio agreement expires May 15 and is more pressing than that with the tv film producers, which runs until Jan. 15, 1960, or the radio-tv network agreement, which does not expire until March 31, 1960.

First order of business of the weekend meeting was to choose a new national chairman to succeed Erick Barnouw of New York. Meeting was also to take up the planned WGA tv anthology show and the proposed affiliation with the British Screen and Tv Writers Association.

Dickens' tales for tv

A half-hour film series based on the works of Charles Dickens will be offered in the United States by Towers of London for fall showing, it has been announced by Harry Alan Towers, president.

Mr. Towers reported that eight episodes of *Tales From Dickens* already have been produced. He hopes to make the new series available in June for national spot sale in the U.S., he said, adding that it already has been sold in Britain and Australia. Frederic March will appear as host-story-teller and stars scheduled to perform in *Tales From Dickens* include Robert Morley, Basil Rathbone and Florence Eldridge.

'Sat. Review' cites 13 network programs

The network "score" in *The Saturday Review* public interest programming awards announced last week: CBS 6, NBC 6, ABC 1. A national panel of educators, editors, publishers, public opinion analysts, scholars and advertising and public relations executives made the selections for the weekly artistic criticism journal.

Tv series cited: *NBC News—The Huntley-Brinkley Report* for "independence of editorial opinion;" *Playhouse 90* (CBS), "a serious dramatic show;" *Small World* (CBS), "best new program of the year;" *Disneyland* (ABC), "consistently skillful, impressive and imaginative;" *Bell Telephone Hour* (NBC), "an interesting variety of music," and *The U.N. in Action* (CBS), "for illuminating great issues."

Single tv shows winning laurels were "The Moiseyev Dancers" (CBS), and four from NBC: "An Evening with Fred Astaire;" "Our Children and their Schools;" "Bob Hope in Moscow," and a trio of *Omnibus* presentations: "Opera with Leonard Bernstein;" "Bach With Bernstein." and "La Perichole." Radio awards went to *Leonard Bernstein and the New York Philharmonic Orchestra* and *The Metropolitan Opera*, both on CBS.

MGM name for Loew's

The board of directors of Loew's Inc. (MGM) plans to recommend to stockholders a change in the company's name to Metro-Goldwyn-Mayer Corp., Joseph R. Vogel, president, reported last week.

Mr. Vogel announced that for the first 28-week period of the current fiscal year, during which time Loew's Inc. was a combined enterprise including Loew's Theatres and WMGM New York, consolidated net income amounted to $5,749,000, or $1.08 per share, as compared with $509,000, or 10 cents a share, in the corresponding period of 1958. The 1959 period covers the 28 weeks up to March 12, at which time Loew's Theatres and WMGM were separated from Loew's Inc.

Mr. Vogel noted that during the 28-week period of 1958, the divisions which now make up Loew's Inc., incurred a loss of $483,000, while for the same period this year, the same units show a profit of $10,792,000. He attributed the difference to "a sharply improved performance in film production-distribution. which showed a loss of more than $5 million in the 1958 period, compared to a profit of almost

These are some that won't be back

A look at the networks' tentative nighttime schedule for next fall shows (see page 32-33) the casualty rate to be in the neighborhood of 40%. That is, some 40% of the nighttime schedule as constructed on Oct. 2 of last year appears headed for oblivion or at least a temporary siesta.

Though the jockeying on schedules continued up to the wire last week, the trend already had been set. Perhaps as many as 15 shows on ABC-TV will bite the dust, another 12 on CBS-TV and 18 on NBC-TV, for a total of 45 shows (and this figure probably will be higher by Oct. 2, 1959). A quick estimate reveals more than 60 programs, which were on the air last October, will continue next season (though some of them will be lengthened or otherwise changed).

Many familiar network show titles will go by the board. Such programs as the veteran *Voice of Firestone* (ABC-TV) appears destined to fade from the scene. Others: *The Bob Cummings Show* (NBC-TV), *Phil Silvers Show* (CBS-TV), and Eddie Fisher's vehicle (NBC-TV), (though George Gobel will be around again.)

Also absent from network lineups: Milton Berle, whose comeback on NBC-TV this past season was short-lived, *The Californians* (NBC-TV), *Dragnet* (ABC-TV), *Naked City* (CBS-TV), *Zorro* (ABC-TV), *Ed Wynn Show* (NBC-TV), *Hit Parade* (CBS-TV), Jackie Gleason, who also had a "short" season, *Thin Man* (NBC-TV), *The $64,000 Question* (CBS-TV) and the *Schlitz-Lux Playhouse* period on CBS-TV.

There is a chance that a few of the 45 (or more) casualties will be patched up and brought back to the networks' prime time showcase. On the other hand, there's the possibility that by next October many of the programs now considered "safe" will meet with the sponsor or network ax.

Censorship of tv makes little headway

A 1917 Kansas law requiring that all motion pictures shown in the state receive prior approval probably will not be applied to television programs, it was reported last week. Earlier this month, the Kansas attorney general had ruled that the law did apply.

State broadcasters called to his attention a 1950 Pennsylvania Supreme Court decision that broadcasting is interstate commerce and therefore state censorship laws are invalid. The Kansas attorney general reportedly has unofficially reversed his ruling upon hearing of the Pennsylvania decision.

In Minnesota last week, a state Senate committee reported out a censorship bill which included tv. However, observers give little support to the bill's chances for passage.

COLORCASTING

Here are the next 10 days of network color shows (all times are EST):

CBS-TV

April 21 (9:30-10 p.m.) **Red Skelton Show**, Pet Milk through Gardner Adv. and S.C. Johnson through Foote, Cone & Belding.

April 24 (9:30-10 p.m.) **Gene Kelly**, Pontiac through MacManus, John & Adams.

NBC-TV

April 20-24, 27-29 (2:30-3 p.m.) **Haggis Baggis**, participating sponsors.

April 20-24, 27-29 (4-4:30 p.m.) **Truth or Consequences**, participating sponsors.

April 24 (7:30-8 p.m.) **Northwest Passage**, sustaining.

April 24 **Ellery Queen Show**, sponsored by Gulf, through Young & Rubicam.

April 25 (8-9 p.m.) **Perry Como Show**, participating sponsors.

April 26 (7:30-8:30 p.m.) **Steve Allen Show**, RCA through Kenyon & Eckhardt.

April 26 (9-10 p.m.) **Dinah Shore Chevy Show**, Chevrolet through Campbell-Ewald.

April 28 (9:30-11 p.m.) **Hallmark Hall of Fame**, Hallmark through Foote, Cone & Belding.

CBS tv tape exchange

There is to be a public affairs program video-tape exchange among three CBS-owned tv stations. Plans call for 13 half-hour programs from each.

WCBS-TV New York will contribute *Young Audiences*, a concert program for young people hosted by David Randolph, music commentator and conductor. From WBBM-TV Chicago will come discusion of outer space, moderated by Dr. Daniel Q. Posin of de Paul U., entitled *Out of This World. Books Alive*, featuring dramatic excerpts from the books under study, is to emanate from KNXT (TV) Los Angeles, with author Turnley Walker moderating.

The plan, which starts May 30 in New York, June 6 in Chicago and June 13 in Los Angeles, calls for 13 half-hour programs from each station.

UAA expected to get RKO residual rights

United Artists Associated, New York, was reported last week to have acquired the residual tv rights in the U.S. of the RKO feature film library from Television Industries Inc., New York, for approximately $6 million. A contract formalizing a working agreement is expected to be signed shortly.

The features have been sold in about 115 markets and UAA will obtain rights in other markets and in the markets sold when these contracts expire. The library, consisting of 740 features, was bought by Television Industries Inc. (C. & C. Television Corp.) from RKO in December 1955 for $15 million. Television industries, headed by Matthew Fox, is reported to be "way ahead" on the transaction since the library has brought in many millions of dollars in sales and still retains all rights but those in the U.S.

'Newsbeat' inserts set

Starting April 26, a minimum of 34 "Newsbeat" program inserts will be carried on MBS news broadcasts during a single day. Robert F. Hurleigh, vice president in charge of news and special services departments, said that since Mutual presents 34 newscasts per day, there will be a minimum of 34 "newsbeats" (actuality or on-the-scene repertorial inserts) per day. Mr. Hurleigh said that since the "Newsbeat" pattern was instituted in October 1957, the network has carried an average of 15.4 such inserts per day from its 28 overseas correspondents and more than 800 authorized "stringers" throughout the U.S.

White House 'special'

NBC-TV won't be caught short for next election year special programming. A major dramatic production, *The White House Saga*, written by magazine writer Nanette Kutner, will be presented sometime during the 1960-61 season. Exact date and time are to be announced. Miss Kutner's history of the White House, which also will reflect America's growth, will be an "ideal subject for a tv special during a presidential election year," said Robert F. Lewine, vice president, NBC-TV programs. The program will feature leading performers, live or on tape, with episodes connected by poetic narration.

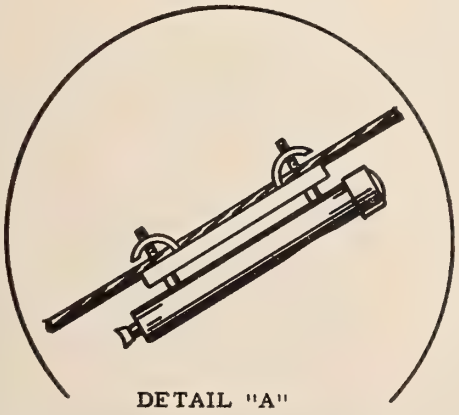
TOWER TIPS

Checking Guy Tensions by Guy Sag Method

On relatively short towers with small size guys, use of a Mechanical Tensiometer is probably the most practical method to measure guy tensions. On tall towers, with large guys, the sag of the guys becomes appreciable and can be used as a measure of guy tension. The guy sag method is a relatively simple and very practical way to check the guy tension.

Guy sag can be checked with a transit or with a sight bar. We will briefly describe the sight bar method. A straight bar made of steel or wood with two hooks is used to make the line of sight parallel to the guy. If the unaided eye cannot see clearly to set the intercept, a telescope may be used as shown in the accompanying sketch. It is important in making up this sight bar that the line of sight of the bar be parallel to the guy at its point of attachment. This method is quite accurate in setting initial tension when the guys and intercepts are large. For example a 100′-0″ intercept read within 2′-0″ has an approximate error of two per cent.

Tension is given by the following formula:



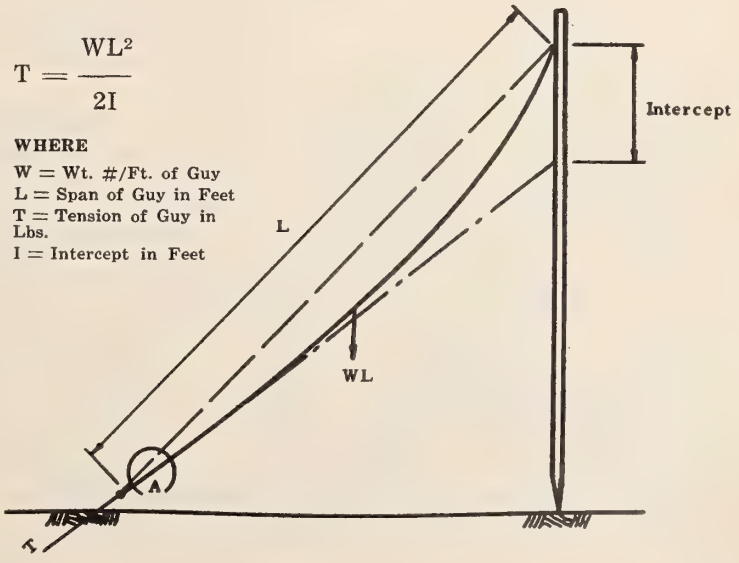
$$T = \frac{WL^2}{2I} \quad \text{(see illustration)}$$

The values of the weight of the guy per feet, the span of the guy, and the recommended tension of the guy should be readily available from the tower manufacturer.

Example: 1000′-0″ Tower with 1″ Guy Strand

$$L = 1220 \text{ Ft.}$$
$$W = 2.14\#/\text{Ft.}$$
$$I = 160 \text{ Ft.}$$
$$T = \frac{(2.14)(1220)^2}{(2)(160)} = 9{,}950\#$$

Walter L. Guzewicz



DETAIL "A"

Showing Installation of Sighting Telescope on Guy Wire

$$T = \frac{WL^2}{2I}$$

WHERE

W = Wt. #/Ft. of Guy
L = Span of Guy in Feet
T = Tension of Guy in Lbs.
I = Intercept in Feet

NORTH WALES • PENNSYLVANIA

'Golden bow' Benny • Radio-tv personality Jack Benny (l) and Herman D. Kenin, president of the American Federation of Musicians, inspect a "golden bow" presented to Mr. Benny by the federation in New York. Mr. Benny was honored for the many concerts in which the entertainer has appeared for the benefit of musicians' pension funds.

AFL Film Council says label all foreign films

The Hollywood (Calif.) AFL Film Council has adopted a resolution to ask Congress to "require that all motion pictures and television films made in foreign countries and exhibited in the U.S. be plainly labeled in the main screen title with the country of origin, in order that the American public no longer be hoodwinked by American 'runaway' producers."

The union film council's resolution also suggests that "the national AFL-CIO convention be asked to implement its action taken in previous years, condemning 'runaway' foreign production of pictures by American producers, and specifically to support a consumer boycott of such pictures."

News spots increased

International Transmissions Inc., New York, which provides voiced news from abroad now offers five one-minute news spots per day on a Monday-through-Friday basis. In the past, the same number of spots were provided three times a week. Sumner Glimcher, president, also reported that the company has entered into an arrangement with WTOP Washington to supply Washington news to International Transmission clients (five one-minute news inserts five times a week). The company now has 12 station clients, Mr. Glimcher said.

• Program notes

• Next fall NBC-TV will initiate a half-hour situation comedy series with a Tin Pan Alley focal point. The cast of the show is headed by William Demarest, who plays a widowed veteran music publisher perplexed by rock-and-roll. Musical comedy star Stubby Kaye and tv-radio singer Kay Armen are among the supporting cast. The first 13 episodes were directed by Bob Sweeney. P.J. Wolfson is the producer. The series packager is Louis F. Edelman.

• ABC Films, N.Y., has sold *The Adventures of Jim Bowie* to WAVY-TV Norfolk, WBNS-TV Columbus, WESH-TV Daytona Beach, WKJG-TV Fort Wayne, KLIX-TV Twin Falls, WPSD-TV Paducah, Ky., and WLOS-TV Asheville, N.C. The company also reports the sale of *One Step Beyond* half-hour series in Australia to TCN Sydney.

• The 90-minute closed-circuit telecast in honor of former President Harry Truman's 75th birthday May 8 will be narrated by actor Melvyn Douglas. Originating at a $100-a-plate Democratic dinner at New York's Waldorf-Astoria Hotel, the program is to be produced by the Group Communications Div., TelePrompTer Corp. Those attending locally-arranged simultaneous dinners throughout the country will make up the audience. Among other show business people expected to appear are comedian Jack Benny and composer-conductor Leonard Bernstein.

• WGN-TV will carry a series of 26 weekly telecasts of Chicago Symphony Orchestra starting Oct. 18. Concerts will be slotted in a Sunday evening one-hour period. The symphony first appeared on tv in 1951 and ran through 1958, with a series of seven monthly musical spectaculars highlighting the 1957-58 season.

• As preparation for National Mental Health Week (April 26-May 2), Westinghouse Broadcasting Co. has reissued a series of songs it commissioned and produced for the occasion four years ago. Written by Hy Zarat and Lou Singer, the songs won the National Assn. for Mental Health Bell Award in 1956. WBC plans to run the songs over its radio-tv stations and will make them available to stations everywhere.

• KNXT (TV) Los Angeles newsman Ed Fleming and cameraman Fred Dieterich are in the Orient making a three-week study of events there. They are visiting Tokyo, Hong Kong, Seoul, Panmunjon and Honolulu. Material obtained will be made into three half-hour news presentations.

• The first major Paramount Television Productions Inc., Hollywood, pilot went before the video-tapers of KTLA (TV) Los Angeles Monday (April 13). The taped program heralds *The Happy Time*, a half-hour series featuring Claude Dauphin in the role he played on Broadway. June Vincent and Mischa Auer also are in the cast. KTLA has bought its third video recorder for the series.

• Walt Disney Productions has bought Golden Oak Rancho, Calif., said to be the site of the first recorded gold strike in 1843. The 315-acre property cost Disney $300,000. It will be used for movie locations and as a horse ranch.

• Ziv Television Programs, N.Y., reports that its *Sea Hunt* series has been renewed in 167 out of 186 markets which have been carrying the initial year of the programming. Second year sponsors include the Kroger stores for Cincinnati and Memphis; Savannah Sugar Refining in Atlanta; Sun Oil in Albany and New York City and Standard Oil of California in a multi-market spread in seven western states.

• KPIX (TV) San Francisco will telecast Friday (April 24) *Lung Cancer: Surgery & Radiation* (10 p.m. EST), a 90-minute live program that will include a surgical operation on lung cancer and a discussion by specialists on the causes and treatment of the malignancy. The program will be presented in cooperation with the San Francisco Medical Society. Surgery is from the Stanford Lane Hospital. KPIX Program Manager, Ray Hubbard, is executive producer; Fred Joslyn, public affairs-education director is director-co-producer; Larry Williams, KPIX writer-producer is writing and co-producing, and Al Keys is engineering supervisor.

• WMAL-TV has been given an "extraordinary citation of merit" by the National Religious Publicity Council. It is the first NRPC award to a tv station. It cited *The Life and Teaching of Jesus*, series for college credit, presented in cooperation with American U. and the local Council of Churches.

• The Florida Educational Television Commission has voted to ask the legislature for $375,000 to produce and video-tape 12 junior college and university-level courses for use in Florida institutions during the 1959-60 and 1960-61 school years. Production of the courses, including instructors' salaries, will cost about $100,000, the etv commission said. Two video-tape machines and tape will cost $275,000.

• WEMP and WISN-TV, both Milwaukee, were awarded the Pabst and Blatz news coverage awards, respec-

tively, at the April 9 Milwaukee Press Club's Gridiron Dinner at the Schroeder Hotel. WEMP's award is for "distinguished service in radio news." WISN-TV was cited for its coverage of the June 1958 tornado that swept upstate Wisconsin.

• WLWT (TV) Cincinnati is giving educational - noncommercial WCET (TV) there its series of 26 *Dateline UN* programs. The series, now on WLWT alternate Sundays (12:45 p.m.) will be shown by WCET on Thursdays (7:15 p.m.).

• WPST-TV and WCKT (TV), both Miami, Fla., cooperated to telecast an Easter play in three parts. WPST-TV carried the first part at 10:30-11:30 a.m. on Good Friday and the second part the next day at 10-10:30 p.m. WCKT telecast the final part Easter Sunday 1-1:30 p.m.

• NTA International Inc., N.Y., which distributes the feature films of National Telefilm Assoc., reports it is offering tv stations a group of 64 motion pictures, titled *NTA's International Package*. It contains 51 post-1948 features from such studios as 20th Century-Fox, David O. Selznick, RKO, Warner Bros. and others and includes six Shirley Temple features. Personalities featured in the films are Alec Guiness, Audrey Hepburn, Maria Schell, Jayne Mansfield and James Stewart, among others.

• Among the government officials making presentations in the news and public service categories on the 11th annual Emmy Awards telecast (NBC-TV Wed. May 6, 10-11:30 p.m.) will be Vice President Richard M. Nixon. This segment of the festivities will emanate from a dinner in Washington, D.C., under auspices of newly-formed Washington chapter of the Academy of Television Arts & Sciences. Awards in other categories will originate at ceremonies in New York and Hollywood.

• Screen Gems Inc., N.Y., reports that *The Peacemaker*, a new western series, will be produced by SG. William Sackheim, Screen Gems' executive producer, will develop the series with a writer to be assigned shortly.

• WCAU-TV Philadelphia telecast *Crime & Apprehension*, a documentary about the local police force, yesterday (April 19). Written and produced by the station's news and public affairs departments, the 45-minute program showed how each police division helped solve a crime. Police Comr. Thomas Gibbons has requested the film for use at the police training academy. The program was the last in the 1958-59 *Face of Philadelphia* series.

• Mrs. Glenn Mann announces organization of a new program package firm, Glenn Mann Productions, to handle radio, tv and films. Mrs. Mann is producer of *The Frankie Avalon Show*, which began on ABC Radio April 11 (Sat. 7-7:30 p.m.). The office is at 70 W. 55th St., N.Y. Phone Circle 7-0290.

• The Ziv Television Programs Inc., N.Y., *Bold Venture* series has invaded three foreign markets. A Spanish-dubbed version was bought by Mexico Telesistima for showing in Toreon, Chihuahua, Mexico City, Guadalajara and Monterey. Australia's G-TV network acquired the series for Sydney and Melbourne exposure. England's Associated Rediffusion Ltd. will syndicate *Bold Venture* in London and the south of England.

• United Artists Corp., N.Y., reports that for the eighth consecutive year it increased its annual gross revenues and net earnings in 1958; establishing a new record high in each category. Net earnings for 1958 (after taxes) were said to total more than $3.7 million and gross revenues were $85 million, as compared with a net of $3.26 million and gross of $70 million in 1957.

• Universal Pictures Corp., N.Y., reports its board of directors has declared a quarterly dividend of $1.06 per share on the 4¼% cumulative preferred stock of the company, payable on June 1 to stockholders of record at the close of business on May 15.

• Walt Framer Productions, N.Y., has contracted to have access to the newsreel library of Pathe News Inc. for use in filmed tv shows. The Pathe backlog is said to consist of 25 million square ft. of film dating back to 1897.

• Permafilm Inc., originator of Perma film protection and Perma new scratch removal systems, has granted franchises to Knoll K.G., Vienna, and Geva Films, Tel-Aviv, raising to 26 the number of installations abroad.

• The stock in Official Films, New York, acquired by Dick Powell, David Niven and Charles Boyer in 1956, is back home. Approximately 400,000 Official shares had gone to the actors in return for the complete film library of their Four Star Productions. Official has now purchased the shares (currently selling at around 1¾) to be held as treasury stock. The company is taking advantage of its "present strong financial position" to retire the only major block of stock held by a small group.

Turning back the clock • NBC Radio, bucking the trend toward network radio concentration on service shows, starts next Monday (April 27) a radio spectacular, *It's Network Time*. The show will feature live music, interviews with name talent, comedy and variety bits for two hours (minus five minutes) every weekday at 12:05 p.m.-2 p.m. First week's guests will include Bob Hope, Pat Suzuki, June Valli, Tommy Leonetti and Pat Carroll.

In picture above at planning conference are (seated, l-r) Frank Blair and Don Russell, co-hosts of the show and owners of On Air Inc. which co-produces the show with NBC, and (standing l-r) Al Captstaff, NBC Radio vice president of programs, and Skitch Henderson, musical director of the show.

Advertisers

• H. GORDON SCOWCRAFT, formerly marketing development director, Campbell Soup Co., Camden, N.J., to United Fruit Co., N.Y., as vp, marketing.

• ROBERT BRUNTON, formerly director of production facilities, NBC, named director of operations WNTA-TV New-

VULCAN
ΧΑΛΚΕΥΣ
ARMORER

VULCAN (Gr. Hephaestus) called God of Fire, was honored by the Olympian gods because he was the workman of the immortals, their armorer and smith. Even though he was ugly and lame, he had his compensations—for not only was he married to the beautiful Aphrodite, he also had the company of golden handmaidens he had made in his forge, to help him with his work for the gods. As Vulcan was armorer to the gods, so the Cincinnati area is an important armorer to the nation. It is highly industrialized—the home of giant machine tool companies, jet aircraft engine plants, automotive plants, atomic energy producing companies, and hundreds of smaller companies, supplying vital machinery and products to other parts of the country. Ranking 15th in national markets, it is important to every advertiser who wishes to reach the 468,000 homes in the Cincinnati trading area—homes of busy, thrifty, prosperous people.

And the wise advertiser and agency man knows that WCKY is the best buy to reach this prosperous market. WCKY offers the advertiser:

1. Responsive adult audience
2. 50,000 watts of SELLING POWER, covering ALL of the Cincinnati trading area
3. Refreshing, modern music and latest news 24 hours a day
4. Experienced air personalities who SELL your product
5. A prestige station with progressive management.

Call Tom Welstead at WCKY's New York office, or AM Radio Sales in Chicago for the latest facts and figures on Cincinnati and WCKY.

WCKY
50,000 WATTS
OF SELLING POWER

MR. CRANE

• FRANK W. CRANE, general manager of Imperial Broadcasting System (KPRO Riverside, KROP Brawley-El Centro, KREO Indio-Palm Springs and KYOR Blythe, all California), elected vp. Mr. Crane, who joined Imperial in 1958, was previously executive vp of KDAY Santa Monica, Calif.

• RALPH W. SMITH, formerly vp of McCann-Erickson, appointed general assistant to president of RPC Radio Network of Panama, S.A.

• ED DAVIS, formerly production manager and air personality of KPRO Riverside, to KYOR Blythe, both California, as station manager, effective May 1.

• LUTHER G. BASSETT, formerly general manager of KBUZ Phoenix, Ariz., to WSAI-AM-FM Cincinnati as national sales manager.

• STANLEY A. BECK, 50, chief engineer and vp in charge of engineering of WONE Dayton, Ohio, died following heart attack April 6 in Dayton.

• PHILIP MAYER named continuity director of WGN-TV Chicago, replacing DON CARRELL, resigned to join Hicks & Greist, N.Y. DAVID ANDRE, on leave of absence with U.S. Army in Chicago, returns to WGN-TV as assistant to program manager, succeeding Mr. Mayer.

• E. LEO DERRICK JR., formerly director of publicity-public relations for "Horn in the West," outdoor drama presented in Boone, N.C., named promotion manager of WFMY-TV Greensboro, N.C.

• DON HARDING, formerly of CBS Radio Network Sales, Chicago, to KIST Santa Barbara, Calif., as general manager.

• HOWARD C. CALDWELL, news director of WTHI-AM-FM-TV Terre Haute, Ind., since 1955, and in that station's news department since 1952, joins WFBM-TV Indianapolis May 4 as news director.

• HENRY V. GREENE JR., assistant sales manager of WBZ-TV Boston, appointed sales manager of KDKA-TV Pittsburgh, effective today (April 20).

• MISS LOUIS LANG, director of public service, WIS-TV Columbia, S.C., appointed director of public affairs programming.

• TED SCHNEIDER WMGM New York director of news and special events and with station since 1936, appointed sales service manager.

• CARL U. TINNON, sales service director of KTVI (TV) St. Louis, named operations manager.

• ROBERT CIASCA, WRCA-AM-TV New York cost and budget accountant, appointed chief accountant for both stations.

• WILLIAM F. BUDDE, formerly comptroller and business manager of KWK and KWK-TV (now KMOX-TV) St. Louis, to KPLR-TV, that city, in similar capacity.

• GEORGE H. WILSON, production supervisor and sales service director of WSTV-TV Steubenville, Ohio, named merchandising-promotion director. ROY LANCASTER, formerly salesman of WSTV-AM-FM, named local sales manager of WSTV-TV. GORDON BISHOP, chief announcer, named program director of WSTV-AM-FM. WALTER MCCROBA to sales staff of WSTV-AM-FM.

• BOB GUY, formerly general manager of KTNT-TV Seattle-Tacoma, Wash., to WWL-TV New Orleans as program director.

• CHUCK EDWARDS, production director and air personality of KELP El Paso, Tex., to KRAK-AM-FM Stockton-Sacramento, Calif., as program director.

• WILLIAM A. HOWARD, manager of technical operations, WRCV-AM-TV Philadelphia, elected chairman of Philadelphia chapter of Institute of Radio Engineers.

• ARTHUR SELIKOFF, news director of KVOX Moorhead, Minn., awarded Eric Sevareid $1,000 Scholarship for graduate study in broadcast journalism at U. of Minnesota School of Journalism. Mr. Selikoff will begin studies in fall and will also hold parttime teaching assistantship.

• BOB LAWRENSON, senior account executive of WINX Rockville, Md., promoted to commercial manager.

• WILLIAM N. ROCK, formerly production manager of WBAL Baltimore, to WWIN, that city, as program director.

• DON MCCARTY, formerly program director of WSAI-AM-FM Cincinnati, to WZIP, that city, as program director and air personality.

• ALBERT BECKER, formerly producer-director of WXEX-TV Petersburg, Va., to WNBF-TV Binghamton, N.Y., in similar capacity.

• JERRY NORMAN, formerly technical director of WIIN Atlanta, Ga., to WMFJ Daytona Beach, Fla., in similar capacity.

• AL HALLAMAN, news editor of WCAE Pittsburgh, to KDKA-AM-FM, that city, in similar capacity.

• WALLY BISHOP, formerly news director of WOI-AM-TV Ames, to KXEL Waterloo, both Iowa, in similar capacity.

• WILLIAM L. FREUDENSTEIN, formerly of Anheuser-Busch, St. Louis, named account executive of KOA Denver.

• J. NEWTON YATES, formerly account executive of KWKW Pasadena, to KALI, that city, in similar capacity. MARTIN BECERRA, formerly announcer of KWKW, to KALI in similar capacity.

• WILLIAM WEIL to WCCC Hartford, Conn., as account executive.

• JAMES W. INGRAHAM, account executive of KHJ Los Angeles, joins KNX Los Angeles-Columbia Pacific Radio Network sales staff.

• LEE SMALLWOOD joins national sales department of WALA-AM-TV Mobile, Ala. Other WALA-TV appointments: MERLE BARACKMAN and BILL O'BRIEN to sales department.

• HOWARD H. KELLER, formerly general manager of WYSR Franklin, Va., to sales department of WBCB Levittown, Pa.

• ROBERT ROBIN LOUIS, formerly of WDMJ-TV Marquette, Mich., to WAVI Dayton, Ohio, as newscaster.

• WEBB RUSSELL, formerly air personality of KUGN-AM-FM Eugene, to KBZY Salem, both Oregon, in similar capacity.

• CHARLIE TROTTA, formerly of WPDQ Jacksonville, Fla., to WMBR-AM-FM, that city, as air personality.

• GEORGE R. PRENTICE, formerly of Associated Press, Little Rock, Ark., and *Birmingham* (Ala.) *News*, to WTVT (TV) Tampa, Fla., as editorial researcher and reporter. Other WTVT appointments: EDWARD E. HERBERT, formerly of CBS, Washington, to newscaster, and JERRY PETERSON, formerly of WKY-TV Oklahoma City, to weathercaster.

• BOB ANCELL, air personality of WERE-AM-FM Cleveland, to WGBS-AM-FM Miami in similar capacity.

• TOM CAMERON, formerly of WKZO-TV Kalamazoo, to WKBZ Muskegon, both Michigan, as air personality.

• ROGER GRIMSBY, formerly news di-

rector of WXIX (TV) Milwaukee, to KMOX-TV St. Louis as news specialist.

• MICHAEL BOYD, formerly announcer of WGAY-AM-FM Silver Spring, Md., to WGMS-AM-FM Washington in similar capacity.

• ART KEVIN, formerly of KBMS (FM) Los Angeles, to KEZY Anaheim, Calif., as announcer. Other KEZY announcers: GLENN E. EDWARDS, formerly sports announcer of KSBW-TV Salinas, and JACK BELL, formerly of KACE Riverside, both California.

Representatives

• ESSE W. LJUNGH, national drama supervisor of CBC, Toronto, Ont., loaned for one month to Jamaican government to help in its expansion of broadcasting services.

TAPING THE GLOBE
World tv standards accommodated:Ampex

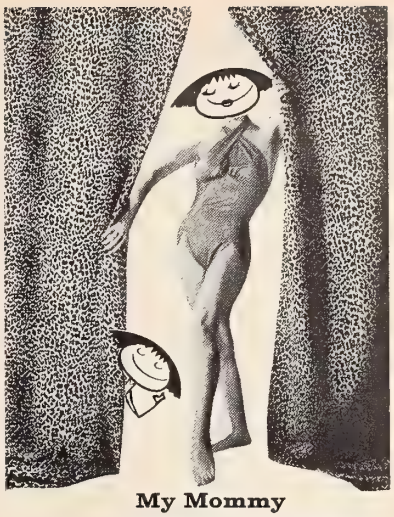
International exchange of tv-tape programs will be greatly simplified by an engineering modification of the standard Ampex VTR machines which, by a simple flip of a switch, change the recording from the U.S. standard to that of any other country, Phillip L. Gundy, Ampex vice president and head of Ampex International, said Wednesday (April 15).

In Los Angeles, where the new operation was demonstrated to delegates from foreign nations to the month-long International Radio Consultative Committee (CCIR) conference (BROADCASTING, April 6), Mr. Gundy noted that up to this time "live television programming could not be exchanged electronically between Europe and North America, for example, or between England, France and the rest of the European continent." (The American tv standard is for a picture of 525 lines, 60 fields per second; the general European standard is 625 lines, 50 fields; England has a 405-line, 50-field standard and France's standard is 819 lines, 50 fields.)

"With the Ampex 'Inter-Switch' modification," Mr. Gundy stated, "a Videotape recorder in Hollywood can record a television program for American television and then switch to the 405-line system to record the same program with 405-line cameras for British television viewers. By the same token, British and continental tv program producers can use 'Inter-Switch' Videotape units to record programming for American audiences as well as for home audiences."

Multi-standard taping, in essence, the Inter-Switch modification permits an Ampex VTR machine to operate on two or more tv standards by appropriate switch settings. A tape made in New York on U.S. standards could be shipped to Rome, say, and played back at U.S. standards on a recorder modified to operate on U.S. as well as European standards. The playback would then be retaped on European standards for use throughout most of the continent. In the demonstration, tapes recorded to both 525-line and 625-line standards were made, using a Marconi Mark III camera chain, also switchable between the two standards, and both Rank Cintel and Marconi 625-line monitors as well as Conrac 525-line monitors.

Ralph E. Endersby, Ampex International marketing manager, said that the Inter-Switch modification will be sold in combinations of two, three or all four tv standards. All Ampex machines presently in use can be modified, he said. In the future, Ampex Videotape recorders made for use abroad (to date about 25% of all sales have been to foreign markets) may have Inter-Switch built in at the factory. No price has been set for the modification, but Mr. Gundy said that it can be expected that the total cost involved will be "far less than the cost of a second recorder."



Ampex executives anticipate that a major use of the Inter-Switch operation will be by producers of taped tv programs which they want to distribute in foreign markets, particularly British and European producers seeking distribution in the U.S. They noted that the interchangeability factor which permits programs taped on one Ampex recorder

Atomic sign-on

The first U.S. atomic-powered radio station went on the air in Cleveland at the Fifth Nuclear Congress. Operating in the amateur 29.06 mc band, the transmitter-receiver installation was powered by an improved model of the Snap III nuclear conversion generator shown for the first time by President Eisenhower last January. The unit uses about one-third of a gram of Polonium 210. Heat produced by the decay of the isotope is converted directly into electricity through a series of thermoelectric couplings.

The new unit is 4½-lbs., 4¾-in. in diameter, with an efficiency of 6½%. The converter shown by President Eisenhower earlier this year was the same size, but was one pound heavier and operated at an efficiency of 5%.

The station, licensed to Richard Berg, an Atomic Energy Commission employe, operated with 3.3 w radiated power. The operator reported contact with other "ham" operators as far away as Albuquerque, N.M., and Burley, Idaho, with reception having been reported from operators in Mexico, France and England. Both the transmitter and receiver use transistors instead of tubes. The transmissions took place April 6-10.

to be played on any other built to the same standard holds good for Inter-Switch tape recordings too.

Asked about color programs, Mr. Gundy said that the U.S. is the only country so far to have established color standards and "we can't build machines without specifications."

• Technical topics

• Dage Television Div., Thompson Ramo Wooldridge Inc., Michigan City, Ind., has developed a four-pound transistorized tv camera and a 12 lbs. battery powered "backpack" tv transmitter, both of which may be applied for use by tv stations to cover remote news and sports events. Designated the "Tele-Tran" systems, the equipment will provide portable, completely automatic tv transmission gear. Controlled by a single off-on switch on the camera, Tele-Tran can send live pictures one-half mile to a receiver for distribution to monitors at various locations.

• Reeves Soundcraft Corp., Danbury, Conn., announces design revision of its 5" and 7" Soundcraft reels which provide greater strength and permit "professional type reel threading." The reels now have enough space between the spokes to permit the finger to easily hold the tape directly against the hub of the reel, the way found by professionals to be the quickest to load a reel. Added strength comes from thicker flanges, according to Frank B. Rogers Jr., executive vice president of Soundcraft.

• The Turner Co., Cedar Rapids, Iowa, announces the availability of its new catalog on microphones, stands and accessories. Handbook includes illustrations, specifications and descriptions of each product. For a copy, write The Turner Co., 909 17th St., N.E., Cedar Rapids, Iowa.

• Amplifier Corp. of America, N.Y., announces the availability of a new brochure describing its new TransMagnemites, transistorized, battery-operated, spring-motor portable tape recorders. Single and multi-speed models with or without VU meters are listed with their recording characteristics. Brochure may be obtained from Amplifier Corp. of America, TransMagnemite Div., 398 Broadway, New York 13, N.Y.

• Blonder-Tongue Labs, Newark, N.J., releases its newest broadband fm amplifier, B-T model AB-FM, which may be mounted up to 600 feet from the remote control unit near the receiver. The amplifier weighs less than 5 lbs., the remote unit, only 2½ lbs. Price of the AB-FM is $53.95, the same as that of the companion model AB-2, used for boosting signals on the tv band. For descriptive bulletin, write Blonder-Tongue Labs, 9 Alling St., Newark 2, N.J.

• Space Communications Corp., New York has acquired the distribution franchise of closed-circuit television equipment and amateur tv stations, manufactured by Electron Corp., Dallas, Tex., a wholly-owned subsidiary of Ling Electronics, Dallas. Space Communications will distribute the Ling Spectator closed circuit tv equipment and the Ling-Mitter amateur tv stations throughout New England, New York, Pennsylvania, New Jersey, Maryland and Delaware.

• RCA has developed a new material called cathode nickel N132 which will improve the reliability and performance of more than 50 of the company's entertainment type electron tubes, according to John B. Farese, manager, entertainment tube products, RCA Electron Tube Div., Harrison, N.J. Produced by a special vacuum-melting process, the N132 nickel composition will be applied to an extensive line of cathodes which will be made available to other tube manufacturers, RCA reported.

• RCA has shipped a 2-kw transmitter to WGAN-TV Portland, Me. (ch. 15).

INTERNATIONAL

1,000 admen to attend ATV seminar in London

Associated Television Ltd. (tv program contractor), London, will sponsor an all-day seminar at the Royal Festival Hall this June 3. Officials of the Schwerin Research Corp. will offer suggestions to advertisers and agencies, aimed at improving the effectiveness of commercials.

ATV has invited more than 1,000 executives from the United Kingdom and the Continent for the event. Schwerin executives who will speak are Horace Schwerin, president; Anthony J. Hemming, head of the London office and Eric Boden, director of European operations. The seminar will cover such topics as national differences and similarities, pre-testing to find the best sales ideas, economics of product development and ways of communicating.

• Abroad in brief

• The Canadian government allocated $62.1 million to the government-owned Canadian Broadcasting Corp. for the fiscal year ending March 31, 1959, as against $43 million the previous year. The government also reported an allocation of $100,000 in the 1958-59 fiscal year for the recently-appointed Board of Broadcast Governors, the independent regulatory body which rules over both the CBC and the privately-owned stations.

• Finland joins Eurovision (European-wide tv hookup) May 1.

Tallest story

Following last month's announcement that WGAN-TV Portland, Me., had chosen a constructor for its 1,619-ft. tower (BROADCASTING, March 30), comes a report that Russia will build a 1,625-ft. tv tower this year. It is said to be the world's highest structure. The new tower will go up at the Dzershinsky Park of Culture & Rest, Ostankino.

• Over-optimistic estimates of the West German radio-tv market by manufacturers is said to be the cause of a mounting surplus of receivers in the country's manufacturing plants. Overall production increase for 1958 is given at a rate of 14% (about 4.7 million units in 1957 to about 5.3 million units last year). German sources say that nearly 1.6 million television receivers and 3.8 million radios were produced in 1958. In 1957, 810,000 tv sets and nearly 3.9 million radios were manufactured.

• The Ottawa Parliamentary Press Gallery admitted its first radio-tv member Tuesday (April 14) when Sam G. Ross, Ottawa representative for 10 western radio stations, was granted membership.

• CFAX Victoria, B.C. (Saanich Broadcasting Co.), is slated to commence operations next July 1. Address: 1205 Quadra St., Victoria; telephone: EV 4-8198; president: Ellison Queale; vice president: Jack Allison; manager: Roy V. Parrett. CFAX is on 810 kc with 1 kw.

Chicago trade groups load promotion guns

Various Chicago trade organizations are involved in the promotion of three major projects this year: the International Trade Fair, a system of local tv "Emmy" awards and a gridiron dinner and talent showcase.

The organizations: Chicago Unlimited, devoted to the promotion of that city's talent, civic, cultural and other pursuits; Chicago Federated Adv. Club; Broadcast Advertising Club; Academy of Tv Arts & Sciences local chapter, and the Chicago Assn. of Commerce & Industry.

Their respective projects were crystallized at last week's meeting of CU officers and board of directors, which gave a green light for each of the campaigns. Henry Ushijima, John Colburn Assoc. film studios and CU president, presided over the meeting.

Details of the promotions:

(1) CFAC will sponsor the gridiron dinner-show at the Morrison Hotel April 27, with CU providing the talent review. (2) CU will organize a sales presentation of local talent, facilities and services in broadcasting, film and recording fields for exhibit at the trade fair next July, in cooperation with the Chicago Assn. of Commerce and Industry. (3) CU will solicit an affiliation with BAC for sponsoring a system of local industry awards not covered by the National Academy of Tv Arts & Sciences and CFAC, to be presented at a joint CU-BAC luncheon next December. The local ATAS chapter will hold its own tv awards dinner in connection with the national Emmys telecast May 6, presenting honors to local performers. Task forces have been set up for all three projects.

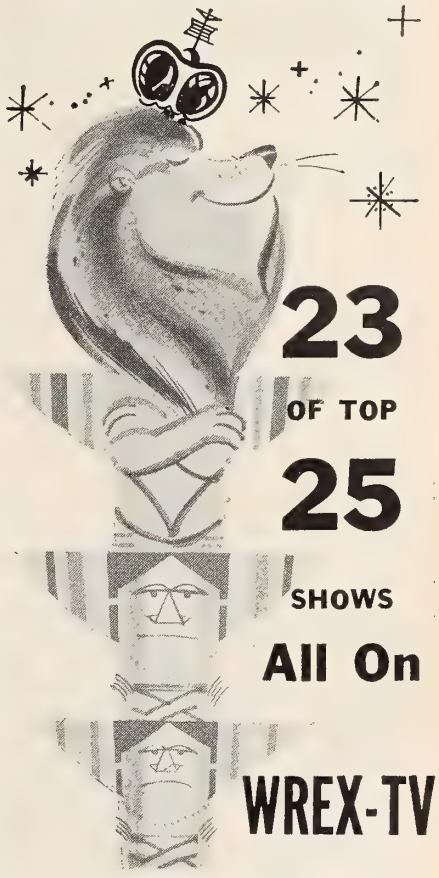
Ad grill • Getting ready for the Chicago advertising lampoon April 27: Frank M. Baker (l), partner in Grant, Schwenck & Baker and president of Chicago Federated Advertising Club, and James G. Hanlon, public relations manager of WGN-AM-TV Chicago.

Saturation send-off snags WILX-TV viewers

An all-media promotional blast heralded the birth of ch. 10 WILX-TV Onondaga, Mich., a commercial-educational, share-time operation with Michigan State U.'s WMSB (TV) (BROADCASTING, March 16).

The debut was noticed. WILX-TV is getting a stream of voluntary mail, running to 450 pieces per day, to prove that people are tuning the new channel. Also, the NBC-TV affiliated station reports it has just about sold out all availabilities in the "better time periods." WILX-TV is owned by its president and general manager, John C. Pomeroy, and Edward E. Wilson, vice president. The station is represented by Venard, Rintoul & McConnell.

WILX-TV sendoff promotion included saturation schedules of radio jingles and production spots on WILS Lansing, WIBM Jackson, WBCK Battle Creek and WABJ Adrian, all Michigan. Sunday, March 15, was "Channel 10 Day," by proclamation of Gov. G. Mennen (Soapy) Williams. There was editorial coverage in 54 newspapers, states WILX-TV, totaling 370 columns of space, including a 24-page tv tabloid section in the *Lansing State Journal*. The station advertised in 11 dailies and 33 weeklies throughout its target week. There was also a direct mail campaign and various promotional stunts. Liaison promotion was secured with 450 tv dealers in the area. Network support for the new station came in the form of network air salutes and voices of NBC-TV stars in an automatic telephone message gimmick.



WILX-TV later will sponsor a "Miss Lansing of 1959" contest and a series of open-house parties in its studios in Lansing, Jackson and Battle Creek. A "Popeye" picnic is also planned.

Six-year batting averages

Ten Wisconsin stations and one Minnesota outlet in the Milwaukee Braves regional radio network have been honored with plaques for six years of promoting baseball.

The presentations were made at a

Circus on a street of showmen • Roanoke, Va., shoppers scramble for gift certificate balloons at the climax of a cooperative sales effort. It was the triumphant end of what might have been a month of depression.

Merchants on Roanoke's Church Ave. looked for the worst when their busy street was closed for repairs. Assessing the situation, businessmen and WSLS-AM-TV Roanoke turned the upheaval into a show, "Operation Big Shovel."

They ordered 50 tv announcements and 100 on radio, inviting people to "come see the biggest show in Roanoke; watch the street being dug up." "Sidewalk superintendents" were made comfortable in chairs and benches.

During the first and third weeks of Big Shovel month, a WSLS disc jockey originated his weekday afternoon show from Church Avenue. WSLS-TV took its 90-minute program, *The Saturday Show,* to the avenue one week. Merchants put on fashion shows, dances and other special events. So pleased were they with the neighborhood spectacular that WSLS-TV came back for two more. The final show was an avenue re-opening party.

The epilogue was written when merchants on the stricken avenue checked sales figures for the month. This year's exceeded those for the comparable period in 1958. Even allowing for the Easter upsurge, they were pleased. The WSLS stations were satisfied, too. They helped out business and made the project pay, $3,500 in time sales for the promotion.

Braves-broadcasters' luncheon party held by Mathisson & Assoc., Milwaukee advertising agency.

The stations and broadcasters honored were KFIZ Fond du Lac (Emory Martin), WJPG Green Bay (John Walter), WHBY Appleton (Lew Process), KDHL Faribault (Minn.) (Joe Hyde), WEMP (Hugh Boice) and WTMJ Milwaukee (Bob Heiss), WCLO Janesville (Vern Williams), WNAM Neenah (Don Wirth), WBEL Beloit (Joe Moen), WISC Madison (Ralph O'Connor) and WKTY La Crosse (a special award to Herb Lee). The Braves network comprises 41 stations, all of which were commended for their promotional activities.

Among the luncheon speakers were Edward Ball, advertising and merchandising director, Miller Brewing Co.; Robert Atkinson, vice president, Clark Oil Co.; William A. Jordan, midwest states sales manager, P. Lorillard & Co.; Jack Severson, radio-tv director, Mathisson & Assoc., Earle Gillespie and Blaine Walsh, sports announcers. Representatives of Tatham-Laird (for Clark) and Lennen & Newell (for Lorillard's Kents and Old Gold cigarettes) also were present.

Russians want WBT series

Radio Moscow wants to hear *Radio Moscow,* the WBT Charlotte, N.C., series based on Russian propaganda broadcasts (BROADCASTING, March 16, Jan. 19). The Charlotte station has received a request from Radio Moscow's Eugenia Stepanova that it send "a few of these programs on tape for our information." WBT is shipping the tapes and billing the Russians at the same rate as WMBR Jacksonville, KSAY San Francisco and other stations using the program.

Radio Liberation is beaming *Radio Moscow* to Iron Curtain countries via transmitters in Germany and Formosa.

KYA awards a million

KYA San Francisco put on a "Be a French Millionaire" contest and found an authentic winner. Nearly two million numbered matchbooks were distributed by the Bay Area Plymouth Dealers Assn., and a number from one of the matchbooks was announced over KYA each hour until a listener called in with the correspondingly numbered book of matches. The winner, by coincidence a French-born listener, collected a million French francs ($2,050) and a $150 stereophonic phonograph.

WRC-TV has admen to capital

A group of 45 New York admen attended a WRC-TV Washington open house April 9 to celebrate the first an-

niversary of NBC's Washington headquarters building (BROADCASTING, May 26, May 19, 1958).

Arriving in Washington by special plane, the group had a police escort to the NBC headquarters where they were greeted by Robert E. McLaughlin, president of the District of Columbia Board of Commissioners.

After a tour of the building, reception and lunch, the admen went to Griffith Stadium to see Vice President Richard M. Nixon throw the first ball of the baseball season.

Selling summertime

Summer is a season of sunburn, soda pop and sinking sales for some television stations. Sun and soda are obviously here to stay, but WTVP (TV) Decatur, Ill., determined to do something about summer selling.

The result: a promotion-packed brochure, *103 Ideas to Hypo Summer Sales,* containing the suggestions of 75 tv stations across the country.

Ben K. West, general manager of WTVP, sent out questionnaires to every tv station. Those replying had their ideas incorporated into the brochure without identification although all cooperating stations are listed at the rear of the booklet. All received several copies of *103 Ideas,* which was produced by WTVP without cost to the participating station.

The basic theme of the book is contained in one of the first promotions: "We planned for summer—not around it." In contrast to the defeatist attitude of many stations, this outlet thought positively. Specifically, it:

• Offered a "two for one sale," giving one free spot for every one bought. The result was that 7 out of 30 sponsors stayed on during the winter at regular rates.

• Held a "sales contest for salesmen," with money prizes to spur incentive.

• Held "special weekend remotes like stockcar races."

Other ideas advanced by stations who had beat the summer doldrums were:

• Move a teenage dance show to the local swimming pool.

• Sell department stores on previews of fall fashions as well as back-to-school supplies.

• Emphasize the "package plan," by sending salesmen out to garner resort business for a "Vacationland Show." A "tourist package" also was outlined with a target of motels, restaurants and other tourist centers. One station commented, "Get the leaders of a community interested in such a project and you have it made."

Copies of the brochure can be obtained by writing to WTVP.

• Drumbeats

• WTAR Norfolk, Va., has erected a studio on the roof of a local drive-in. Plans are for d.j. Lou Nelson's *Nightwatch* (8-11 p.m.) to come from the specially-built booth each weeknight during the summer.

• KNOE Monroe, La., got Gov. and Mrs. Earl Long of Louisiana to take a run in its new promotion vehicle, a copy of an early Oldsmobile horseless carriage, at the governor's mansion in Baton Rouge.

• Jack Thayer, general manager, WDGY Minneapolis-St. Paul has given $250 to the Minneapolis Aquatennial Assn. for transportation of a silver service from *U.S.S. Minneapolis.* Minneapolis presented the silver to the ship in 1895. When the ship was decommissioned, the Navy said the city could have the service back if somebody paid the shipping cost.

• More than 500 letters were sent to WALT Tampa telling why the senders hated its d.j. Dave Archard. The contest offered a wrist watch for the best letter. At the end of the contest Mr. Archard went on vacation and listeners were asked to write "Come Back Dave" letters. This time nearly 700 pieces of mail were received at WALT.

• WCPO Cincinnati has added a solid block of music from 12:15 to 5:30 a.m., extending the schedule to 24 hours. The new segment carries neither commercials nor continuity, only music and required station breaks.

• A nine-day campaign by KLIF Dallas d.j.'s helped raise $25,424.44 for a Fort Worth orphanage after a wing under construction was razed by a near-tornado. The campaign culminated in a KLIF record hop in Fort Worth's Pioneer Palace that attracted more than 5,000 persons.

• KTVU (TV) San Francisco-Oakland signed on two hours early today (April 20) to brief an estimated 40,000 American Cancer Society workers on how to conduct their fund raising campaign.

• WKBW-TV Buffalo, N.Y., is letting viewers produce a new panel show, *By Public Demand,* a series of debates on local and national affairs. Viewers suggest panelists and topics for discussion.

• A float depicting a giant television screen, entered in a local parade by KFDM-TV Beaumont, Tex., won two awards: best entry and best commercial float. On the tv-screen float, one of 61 in the parade, were girls from KFDM-TV's coverage area.

• A double concert by Wayne King & His Orchestra is one of the WWST

One hundred eleven* national and regional spot advertisers know **Terre Haute is not covered effectively by outside TV**

*Basis: 1958

Laughing on the outside • The singer above is entitled to his stripes. He is a convict, one of 20 inmates from Southern Michigan Prison who presented an hour variety show from studios of WJIM-TV Lansing, Mich. The prisoners, including burglars, robbers, forgers and one man convicted for murder, were transported to Lansing under heavy guard via prison bus. A large force of prison security officers stood guard off camera. Judge Dale Souter, appearing on the program, offered words of encouragement to the men (some eligible for parole) and outlined his Prisoners Anonymous plan for rehabilitating criminals.

Wooster, Ohio, May promotions. Most of the tickets for the concerts (May 9) will be given to advertisers for their customers. The rest go to the public for contributions to The March of Dimes.

• About $1,000 was given away by CKNW Vancouver, B.C., in its "Bucks for Billboards" contest. The station put up 83 billboards in its coverage area and invited listeners to submit a letter informing it of a billboard's location. Eight times a day an entry was drawn and the sender given $1.

Top 10 for Ray-O-Vac

The Ray-O-Vac Co. (lighting equipment), Madison, Wis., has announced winners of its 1958-59 "Radio Announcers Top 10" contest. Announcers of 129 stations carrying the company's commercials were asked to submit tapes of ad-lib Ray-O-Vac announcements.

The winners: Charlie Greer, WAKR Akron, Ohio (who wins a two-week, expense-paid vacation for two at Northernaire Resort, Three Lakes, Wis., or $1,000); Robert M. Luck, KGU Honolulu (one week vacation for two at Northernaire or $500).

Stan Matlock, WKRC Cincinnati; Reese Rickards, WTAG Worcester, Mass.; Dave Schellenberger, WWSW Pittsburgh, Pa.; Bill Baker, WIBC Indianapolis; Denzil Finney and Sam Polland, WCHS Charleston, W. Va.; Doug Pledger, KNBC San Francisco; Foster Brooks, WHAM Rochester, N.Y., and Jack Purrington, WQAM Miami (all won award certificates and camping lights).

Ray-O-Vac's agency is Howard H. Monk & Assoc., Rockford, Ill.

KTTV (TV) local spectaculars

Something new is being added to Southern California television, a series of local spectaculars, each running anywhere from one to three hours, to be broadcast at intervals of approximately one month for the next 12 months by KTTV (TV) Los Angeles, sponsored by Riviera Mfg. Co. to advertise its convertible sofa-beds.

The series starts April 28 at 8-9 p.m. with *The Dictators*, hour-long study of Latin American "strong men," past and present, filmed in the Dominican Republic by Paul Coates, KTTV newscaster-commentator, and including interviews with Fulgencio Batista and Juan Peron, former rulers of Cuba and Argentina. Other programs in the series will include the tv premieres of two motion pictures, "Pride and Prejudice" and "Kon-Tiki," a filmed account of the adventures of a Southern California family in Europe and a year-end summary telecast which will emphasize the local scene.

With the coach 100%

WAZL Hazleton, Pa., staffers have contributed 100% ($3,600) to the city's second Can-Do (Greater Hazleton Community-Area New Development Organization Inc.) fund drive. Victor C. Diehm, WAZL general manager and head of the Vic Diehm Radio Group, is head of the Northeast Pennsylvania Industrial Development Commission and a board member of the Pennsylvania Industrial Development Authority. These groups have raised $500,000, half this year's goal. The first Can-Do campaign, also supported by all the WAZL staff, was instrumental in bringing four new industries into a depressed area. WAZL also gives all-out broadcast support to the drives.

One-man band

Michael Wynne-Willson is a radio personality who sells his own show and gets the sponsors to merchandise it. In this way, he put *Music and Michael*, a daily hour over WESX Sussex, Mass., on a paying basis from the beginning 13 weeks ago and has kept the promotion circle unbroken ever since.

The Monday-Friday origination from the Wynne-Willson home, Mendip Cottage in Hamilton, Mass., is underwritten by a group of businesses on Boston's North Shore, the "Combined Radio Advertisers." This is a number, averaging 15, organized by Mr. Wynne-Willson, who offers them either two minutes per program or an identification (name, service, address, telephone number and an ad-lib sentence elaborating). All are provided with printed flyers plugging *Music and Michael* and suitable for enclosure with products and mail.

But the enterprising m.c. goes further than that, suiting the promotion opportunity to the sponsor. While calling on a theatre client one day, he noticed the manager's telephone-answering unit working continually. Mr. Wynne-Willson (British born) got the manager to use him to record the answering tapes, with this result: "Hello! I am so glad you called. I've been waiting for you to call for ages. Now, I can tell you that starting today 'The Old Man and the Sea' is playing at the Fine Arts Theatre [etc. about the motion picture]. . . . Before you go, just let me tell you about my program. I am Michael Wynne-Willson and seem to be associated with *Music and Michael*, a daily program between 11 and 12 noon over WESX. We don't have much money but we do have fun on *Music and Michael*, so do join us tomorrow if you can, will you?"

Other accounts publicize the show in print advertising, product brochures and in other ways. One method succeeded in spite of itself. S.S. Pierce, Boston grocer and importer, gave the WESX personality a box of imported Dutch cookies to peddle. The plan was to mark them *"Music and Michael* Special Cookies," but something went wrong and they came out marked only "Special." Mr. W-W, "a little put out by this," told listeners to ask for the cookies which were *not* marked *"Music and Michael Special."* He reports the result: "They were sold out in 10 days, for it seems that these good people marched in and said just what I suggested, which delighted S.S. Pierce."

Hearing Cases

FINAL DECISIONS

By order, Commission made effective immediately Feb. 18 initial decision, as modified by Commission, and granted application of Georgia State Board of Education for new tv station to operate on commercial ch. 8 in Waycross, Ga. Ann. April 10.

By order, Commission (1) granted motion by Broadcast Bureau to strike appeal by Frederick J. Bassett and William E. Sullivan, d/b K-UHF (TV), for review of Aug. 7, 1958 initial decision and (2) made effective immediately that initial decision and granted application of Sherrill C. Corwin for new tv station to operate on ch. 34 in Los Angeles, Calif., and denied competing application of K-UHF (TV). Ann. April 9.

By order, Commission affirmed Aug. 27, 1958 initial decision, as modified by Commission, and granted application of Liberty Bcstg. Co. for new am station to operate on 1050 kc, 250 w, DA, D, in Liberty, Tex. Ann. April 15.

By memorandum opinion and order, Commission, on petition for reconsideration by Tri-County Bcstg. Co., granted latter's application for new am station to operate on 1480 kc, 500 w, DA, D, in Jerseyville, Ill., which had been in consolidated hearing with application of Radio Missouri Corp. (WAMV), East St. Louis, Ill. Ann. April 9.

By order, Commission granted petition by Norman O. Protsman and made effective immediately March 2 initial decision, as modified by Commission, granting Protsman application for new am station to operate on 1450 kc, 250 w, during specified hours 6 a.m. to 7 p.m., in Valdosta, Ga. Ann. April 15.

By order, Commission, on petition by Irving Braun, made effective immediately March 18 initial decision and granted Braun's application to change facilities of WEZY Cocoa, Fla., from 1480 kc, 1 kw, D, to 1350 kc, 1 kw-N, 500 w-D, DA-N. Ann. April 9.

By order, Commission, on petition by KWEW Inc., made effective immediately March 17 initial decision, waived Sec. 3.24 (b)(7) of rules and granted application to increase daytime power of KWEW Hobbs, N.M., from 1 kw to 5 kw, continuing operation on 1480 kc, DA, with 1 kw-N. Ann. April 9.

By memorandum opinion and order, Commission granted petition for reconsideration by Radio South Inc. (WXLI), Dublin, Ga., removed its application from hearing, and granted mod. of cp to change facilities from 1440 kc, 1 kw, D, to 1230 kc, 250 w, unl.; engineering condition. Ann. April 9.

INITIAL DECISION

Hearing Examiner J. D. Bond issued initial decision looking toward (1) dismissing applications of Tim Brite Inc., for mod. of cp of WTOV-TV to operate on ch. 13 in lieu of ch. 27 in Norfolk, Va., and Virginian Television Corp. for new tv station to operate on ch. 13 in Norfolk, and (2) granting application of Peninsula Bcstg. Corp. for mod. of cp of WVEC-TV to operate on ch. 13 in lieu of ch. 15 in Hampton, Va. Involves merger agreements. Ann. April 15.

OTHER ACTIONS

Majority of Commission on April 15 directed preparation of document looking toward adopting modified initial decision of Aug. 14, 1958, which affirmed Oct. 5, 1955, grant of application by Williamsport Radio Bcstg. Associates Inc., for new am station (WARC) to operate on 1380 kc, 1 kw, D, in Milton, Pa., denial of protest by Lycoming Bcstg. Co. (WLYC), Williamsport, Pa., and grant of WARC's application for mod. of cp to authorize change in trans. site, equipment and studio location. Ann. April 15.

Commission denied motion by Bakersfield Bcstg. Co. (KBAK-TV, ch. 29), Bakersfield, Calif., for additional time from 20 to 40 minutes for it to present argument in oral argument in proceedings on KBAK-TV's protests to grants of applications of Pacific Bcstrs. Corp. and Kern County Bcstg. Co. for new tv stations to operate on chs. 39 and 17, respectively, in Bakersfield. Ann. April 15.

By memorandum opinion and order, Commission denied petition by Walter T. Gaines for partial reconsideration of Dec. 12, 1958, decision which (1) granted protest by Community Service Bcstg. Corp. (WCSS), Amsterdam, N.Y., and (2) revoked July 18, 1957, grant of cp and denied application of Gaines for new am station (WGAV) to operate on 1570 kc, 1 kw, D, in Amsterdam. Chmn. Doerfer not participating; Comr. Cross dissented. Ann. April 15.

By memorandum opinion and order, Commission granted petition by Tribune Publishing Co. to extent of adding following issue in proceeding on its application and Fisher Broadcasting Co. for new tv stations to operate on ch. 2 in Portland, Ore.: "To determine in light of common ownership by Fisher's Blend Station Inc. and Messrs. Gamble and Lane (stockholders in Station KOIN-TV Portland, Ore.) of stock in Fisher's Television Company, licensee of tv station KOMO-TV Seattle, Wash., whether grant of Fisher Bcstg. Co. (owned 60% by Fisher's Blend Station Inc.) application would have adverse impact upon competition among tv stations in Portland, Ore., area contrary to public interest." Chmn. Doerfer not participating. Ann. April 15.

By order, Commission granted in part petition by Southeastern Indiana Bcstrs. Inc., and dismissed, but with prejudice, its application for new am station to operate on 1450 kc, 100 w, unl., in Jeffersonville, Ind., which was in consolidated hearing with application of Northside Bcstg. Co. for same facilities with 250 w; July 23, 1958 initial decision looked toward granting Northside application and denying Southeastern. Ann. April 9.

By memorandum opinion and order, Commission denied petition by Community Bcstrs. Association Inc., for reconsideration

KTAR CLOSES $750,000

In a letter to Mr. Russ Hudson, Western Sales Manager of Community Club Awards, Mr. Ray C. Smucker, Vice President - Commercial Manager, of Radio Station KTAR - KVAR, Phoenix, Arizona, wrote that:—"Our first CCA Campaign has been concluded and, as you know from the evidence, we had a great deal of success with it.

Mr. Smucker

From all indications, practically every club will be back in and the Campaign should be bigger and better than ever. There were almost three-quarters of a million dollars' worth of merchandise turned in during the campaign by these women's clubs and this contributes a goodly amount at retail sale control. We are now looking forward to our Fall Campaign with great anxiety.

Equipping a Radio Station?

Get More Coverage With The New RCA

500- and 1000-Watt

AM Transmitters

The ability of these new 500- and 1000-watt AM transmitters to achieve and maintain a higher average level of modulation assures more program coverage. Simplified tuning, ease of installation, built-in provisions for remote control, and low operating cost make the RCA Type BTA-500/1R your best transmitter buy. Color styling adds harmony to station decor—a choice of red, green, blue, or grey doors. Whatever your equipment needs—SEE RCA FIRST!

Or write for descriptive literature to RCA, Dept. SC-22 Building 15-1, Camden, New Jersey.

RADIO CORPORATION of AMERICA

Tmk(s) ®

of that part of June 2, 1958 report and order in Docket 12064 which rejected Association's request for mandatory power increase, in favor of rules adopted which provided for acceptance and consideration on case-by-case basis of Class IV am station applications for increases in daytime power up to 1 kw instead of 250 w minimum previously provided. Comr. Cross absent. Ann. April 9.

By memorandum opinion and order, Commisson denied joint protest by WMBO Inc. (WMBO) and Auburn Publishing Co. (WMBO-FM), Auburn, N.Y., to Feb. 11 grant, with condition, to Herbert P. Michels for mod. of cp to change trans. site and type trans. of am staton WAUB Auburn. Ann. April 9.

By letter, Commission advised Cameron A. Warren (KRCW-FM), Santa Barbara, Calif., that his letter and telegram directed against Feb. 19 grant without hearing of application of Western Bcstg. Co. to reduce ERP of KDUO (FM) Riverside, Calif., from 81 kw to 72 kw and ant. height from 1,690 ft. to 1,630 ft., continuing operation on 97.5 mc, do not furnish sufficient basis upon which to reconsider grant. Ann. April 9.

By memorandum opinion and order, Commission granted motion by Dan Richardson and struck exceptions filed by Joseph M. Ripley Inc., to Aug. 19, 1958 initial decision which looked toward granting Richardson application for new am station to operate on 550 kc, 1 kw, D, in Orange Park, Fla., and denying Ripley application for same facilities in Jacksonville. Ann. April 9.

By memorondum opinion and order, Commission denied petition by Kansas Bcstrs. Inc., for enlargement of issues in proceeding on its application and that of Salina Radio Inc., for new am stations to operate on 910 kc, 500 w, DA, D, in Salina, Kans. Ann. April 9.

Commission scheduled oral argument on May 8 on application of Granite State Bcstg. Inc. (WKBR), Manchester, N.H. Ann. April 15.

Richard L. DeHart, Mountlake Terrace, Wash.; KVOS Bellingham, Wash.; Lake Washington Bcstg. Co., Bothell, Wash.; KPDQ Portland, Ore.—Designated for consolidated hearing applications for new am stations to operate daytime only on 800 kc of DeHart with 250 w, Lake Washington with 500 w; KVOS (790 kc, 1 kw, DA-N, unl.) to increase daytime power to 5 kw, and KPDQ (800 kc, 1 kw, D) to increase power to 5 kw; made KWIL, Albany, Ore., and KXA Seattle, Wash., parties to proceeding; denied request by Lake Washington for extension of time to May 16 to amend application to specify different frequency. By letter, granted request by KXA Inc., not to consolidate in above hearing its application to increase power from 1 kw to 50 kw and change hours of operation from daytime to unl. time, continuing operation on 770 kc, and advised KXA that its application is being held without action pending conclusion of clear channel proceeding. Ann. April 15.

George T. Hernreich, Patteson Brothers, Jonesboro, Ark.—Designated for consolidated hearing applications for new tv stations to operate on ch. 8. Ann. April 9.

Bamray Bcstg. Co., Top Bcstrs. Inc., San Antonio, Tex.; The Natalia Bcstg. Co., Natalia, Tex.—Designated for consolidated hearing applications for new am stations to operate on 1480 kc, 500 w, D—Bamray and Top with DA. Ann. April 15.

Inter-Cities Bcstg. Co., Livonia, Mich.—Designated for hearing application for new am station to operate on 1220 kc, 1 kw, DA, D; made WGAR Cleveland, Ohio, party to proceeding. Ann. April 9.

Yakima Television Corp., Charles R. White, John W. Powell, Yakima Valley Television Co., Yakima, Wash.—Designated for consolidated hearing applications for new tv stations to operate on ch. 23; denied request by Yakima to dismiss Powell's application. Ann. April 15.

Birney Imes Jr., Newport Bcstg. Co., Crittenden County Bcstg. Co., West Memphis, Ark., KTRY Bastrop, La.—Designated for consolidated hearing applications of Imes, Newport and Crittenden for new am stations to operate on 730 kc, 250 w, D, and KTRY to increase power from 250 w to 500 w, continuing operation on 730 kc, D; made WARB Covington, La., party to proceeding. Ann. April 15.

WROA Gulfport, Miss.; Lionel B. DeVille, Franklin, La.—Designated for consolidated hearing application of WROA to increase power from 1 kw to 5 kw, continuing operation on 1390 kc, D, and DeVille for new am station to operate on 1390 kc, 500 w, DA, D. Ann. April 9.

North Shore Bcstg. Inc., Wauwatosa, Wis.; Suburbanaire Inc., West Allis, Wis.—Designated for consolidated hearing applications for new am stations to operate on 1590 kc, 1 kw, DA, D. Ann. April 9.

Binder-Carter-Durham Inc., Herbert T. Graham, Lansing, Mich.—Designated for consolidated hearing applications for new am stations to operate on 1010 kc, DA-D—Binder-Carter with 250 w, and Graham with 500 w. Ann. April 9.

KATZ St. Louis, Mo. — Designated for hearing application for additional time to change nighttime facilities from 1 kw to 5 kw and change DA. Station is licensed on 1600 kc, 5 kw-D, 1 kw-N, DA-N. Ann. April 9.

Entertainments and Amusements of Ohio Inc., Solvay, N.Y.—Designated for hearing application for new am station to operate on 1320 kc, 500 w, DA, D; made WOSC Fulton, N.Y., party to proceeding. Denied petition by Star Bcstg. Inc. (WTLB), Utica, that it be made party to proceeding. Ann. April 9.

WPTT (TV) Augusta, Me.—Being advised that application for authority to change trans. location approximately 2.7 miles southeast of present location, to increase ant. height from 497 ft. to 946 ft., and make equipment changes, indicates necessity of hearing. Ann. April 9.

Routine Roundup

Commission addressed following telegram to Mr. Bert Combs, allegedly candidate for Governor of Kentucky, in response to his question as to whether Section 3.654 of Commission rules requires aural as well as visual sponsorship announcements in connection with political spot announcements: "Reurtel March 31 concerning sponsor identification of political spot announcements. Sec. 3.654(a) of rules provides that station broadcasting a sponsored program shall make 'an appropriate announcement' that the program is sponsored. (See also Sec. 317 of Act.) The Commission's rule does not require an aural announcement. Purpose of rule is to provide a full and fair disclosure of facts of sponsorship. Responsibility for determining whether visual or

*ARB Continuing Readership Study

aural announcement is appropriate lies with licensee." Ann. April 9.

Commission has revised, as of Feb. 10, its list of transmitters and monitors considered acceptable for use in aural broadcast services (am and fm), provided operation is in accordance with rules and that technical specifications for such equipment as set forth in list are not exceeded. "Radio Equipment List Part B, Aural Broadcast Equipment," includes those transmitters which had been type approved under rules existing prior to June 30, 1955. Under present rules, type acceptance is required for transmitter listing; for monitors, type approval requirements continue applicable. Designation "F9" in Emission column indicates fm broadcast equipment type accepted for multiplex operation.

It is not possible for Commission to print list in sufficient quantity to permit general distribution. However, copies will be available for inspection at Commission's offices in Washington, D.C., and at each of its field offices. Industries and others interested may reproduce list in whole or in part if they so desire. Arrangements may be made through Technical Research Division of Office of Chief Engineer for loan of copy for this purpose.

OUR RESPECTS TO . . .

David Levy

A "new life" began at 40 for David Levy, recently appointed vice president in charge of programs and talent for NBC-TV.

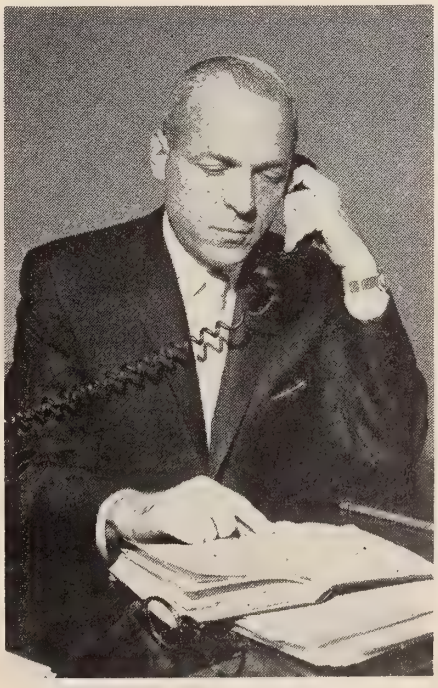
Perhaps the phrase, "a new life," is too sententious to describe the change in Mr. Levy's living pattern. But he resolved then to "do the many things that we all want to do but never can find the time to do." Over the past six years, he has found time to write short stories for leading magazines; travel to many parts of the world; read many books that were on his "must" list for years and write the lyrics for several popular songs.

"At 40, I felt I was at the crossroads," Mr. Levy explained. "There were so many things I wanted to do and time was fleeing. I decided then I was going to do these things and let nothing interfere. For eight to ten months of a particular year I did them. I realize that you cannot overhaul your old life completely and major objectives often cannot be scrapped. But if we have resolution, we can accomplish many of the 'little things' that we always wanted to do."

On April 1, Mr. Levy assumed his new position and new responsibilities at NBC-TV and he acknowledges that he will have to "stay on the treadmill of the old life" for an indeterminate period. But one of the unfilled objectives that he hopes to attain some day is a trip around the world.

Keeps Eye on Target • If past performance is a criterion, Mr. Levy will have his 'round-the-world fling. Patience appears to be one of his virtues. As a youngster in Philadelphia, he had always wanted to be a writer. The depression of the 1930's compelled him to accept jobs in the retailing field and with the Pennsylvania Dept. of Public Assistance. But in his spare time, he wrote short stories and radio scripts.

Three years after he left college, he obtained a position with Young & Rubicam, New York, as a script writer for *We The People.*



Mr. Levy's association with Young & Rubicam was rewarding and long-lived (more than 20 years). Former colleagues there picture him as "a reserved guy—but one who is direct in his opinions." They remember him as "extremely intellectual, but not a stuffed shirt, and a man who is very knowledgable about programming and talent." Mr. Levy is described as a "serious individual" with drive and a capacity for hard work but "on occasions, he shows a pixie type of humor that was all the more unusual because it came from Dave Levy."

David Levy was born in Philadelphia on Jan. 2, 1913, and attended local schools and the U. of Pennsylvania's Wharton School of Finance & Commerce from which he was graduated with a B.S. degree in economics (1934) and a master's degree in business administration (1935), specializing in advertising and merchandising. He wrote for amateur theatricals and local radio programs while awaiting a fulltime writing opportunity.

Mr. Levy credits Terry Lewis, story editor at Young & Rubicam in 1938, with encouraging him in his writing stints and with helping him to obtain his initial position with Y&R. Mr. Levy was gratified that many years later, he was among those instrumental in bringing Miss Lewis back to Y&R.

At Young & Rubicam, Mr. Levy acquired a reputation for creative talent as well as administrative acumen. Following his initial assignment as a writer on *We The People,* he wrote, directed and supervised many radio shows.

He interrupted his career in April 1944 when he was commissioned a lieutenant (j.g.) in the U.S. Navy. He served with the training film section of the Photographic Division of the Navy Bureau of Aeronautics and later was placed on detached duty as special radio consultant to the Secretary of Treasury and as chief of the radio section of the War Finance Division of the Treasury Dept. He was discharged from the service in May 1946 with the rank of lieutenant.

PROGRAM-TALENT CHIEF LEVY
Couldn't resist a new challenge

He returned to Young & Rubicam as supervisor of daytime radio programming and in 1947, Mr. Levy was named Y&R's first television supervisor. In this capacity, he helped develop some of the agency's initial tv programming, including *Bird's Eye Open House, Jell-O Seven Arts Quiz,* and *Hobby Lobby.* In 1950, he was appointed vice president in charge of programs and talent and in April 1958, he was advanced to associate director of the agency's radio and television department. He served for several years on Y&R's plans board.

Why did he leave Y&R after more than 20 years of service?

"It was probably the hardest decision of my life," Mr. Levy recounts. "I have deep ties at Y&R and many close friends. I think the main reason was the tremendous challenge offered by NBC. Along with others, I am in a position here of making a contribution to the overall programming pattern of a television network."

In the few weeks he has been at NBC-TV, Mr. Levy has been on a merry-go-round of appointments and telephone calls with executives at talent agencies, outside producers, advertising agencies, sponsors and within the network itself. He tries to return each call (or have an appropriate co-worker do it) but confesses that his assignment book is not yet up to date.

Quality—And What It Means • Mr. Levy points out that NBC-TV's fall programming was blueprinted before his arrival on the scene but he has made several recommendations which have been well received. Speaking generally, he believes that tv needs "quality programming," and hastens to explain:

"I know that sounds like a cliche. But quality is not restricted to one type of programming. You know, you can have a quality western or a cliche western. I think there are both types on the air today. Adopting a poet's logic, our job here is to see that the network's reach exceeds its grasp. That is the way to growth in any area of living."

In 1941, Mr. Levy married the former Lucile Wilds of New York City. They have two children—Lance, 16, a student at Staples High School in Westport, Conn., and Linda, 12, who, Mr. Levy says with a parental glow, is "quite an equestrienne." The family home is in Weston, Conn.

By his own admission, Mr. Levy is not a joiner and belongs to no outside organizations except the American Society of Composers, Authors & Publishers. He is a student of the national political scene and, dating back to 1940, has participated in the radio-television campaigns for the Republican Party presidential candidates.

Sports afield

NOT much publicity has been accorded the crop of bills introduced at this session of Congress to exempt professional sports from antitrust regulation.

But the absence of publicity doesn't mean the sports lobby hasn't been busy. It has. And the word from knowledgeable Capitol sources is that legislation might be sneaked through a House committee and onto the floor. Once on the floor, it is believed, a pro-sports bill is almost sure of passage.

The reason why broadcasters should be concerned by all this is that if professional sports are given antitrust protection, they can impose broadcast blackouts at will, in whatever combination or conspiracy among major league teams they choose to arrange. The inevitable consequence would be a severe reduction in the number of baseball or other professional games available to television and radio.

The request made last week by Harold E. Fellows, NAB president, for public hearings on the several bills now pending ought to be supported by broadcasters everywhere. Mr. Fellows directed his request to Rep. Emanuel Celler (D-N.Y.), chairman of the House Judiciary Committee which has the bills in its jurisdiction. Other members of that committee ought to be advised by broadcasters in their constituencies that hearings are not only advisable but mandatory in the interests of democratic legislative procedure.

With or without research

SOME sort of gauge that will show accurately the sales mileage obtained from an advertising dollar has been the goal of research gadgeteers for years. A year ago Prof. Albert Frey, in his exhaustive and in part controversial "Frey Report" for the Assn. of National Advertisers, put down "improved means for measuring the effectiveness of advertising" as "undoubtedly the most basic" need in the current advertiser-agency relationship.

There is no question about it: life would be a lot happier if a formula could be devised to show exactly what sales resulted, or would result, from a given advertising campaign. But advertising is not a machine—fortunately—and its results cannot be predicted like units coming off an assembly line. Henry Schachte, executive vice president of Lever Bros. and chairman of the ANA, said it well when he called upon advertising research people earlier this month to stop wasting time with what they *can't* do, accept the fact that advertising *does* work, and get busy to make it work better (BROADCASTING, April 6).

Research on the impact of the delivered message was part of the broad program Mr. Schachte recommended, and this brings us to another highlight of the same meeting at which he spoke: a study which beautifully points up television's power to turn lookers into customers.

It was conducted among viewers—and a matched sample of non-viewers—of a five-minute weather program sponsored by the New York Telephone Co. In part, this study showed that the television series "pre-sold" its audience to such an extent that the company sold three times as many extension telephones and other residence telephone equipment to people who watched the show as to people who did not.

It would be foolish to say, on the basis of these figures, that television will triple the sales of any product among the viewers of the sponsor's program. But it also would be short-sighted, if not foolish, for an advertiser to look at this study and dismiss the potential of television without giving it a serious second thought. For people with things to sell, it should make television overwhelmingly attractive.

A common danger

THIS week, at the Greenbrier in White Sulphur Springs, W. Va., leaders of top advertising agencies of the U.S. will face up to a problem that has been troubling advertising people increasingly in recent times. The problem is essentially one of public relations, with heavy governmental overtones, and the forum for its discussion is the annual convention of the American Assn. of Advertising Agencies.

If all this sounds strangely familiar to the broadcasters, it is only because the parallel with their own plight is striking. Television right now is in the process of mounting a massive public relations campaign of its own—or, to be more exact, is in the process of trying to develop a mountable campaign.

The advertising business, like television, is beset by many critical forces. One of the most powerful of these is government, and while it is difficult to imagine more government intervention in any business's affairs than broadcasting has endured, the record is plain: advertising faces serious legislative threats at all levels of government; federal, state and local. Taxes on advertising, restrictions on liquor and alcoholic beverage advertising, questions regarding the income-tax deductibility of institutional advertising expense —these are samples of some of the crippling moves that have been tried or proposed.

The need to improve understanding of advertising's function among both legislators and administrators—at all levels—is obvious. Public understanding needs improvement, too, for from the public, prodded by special-interest groups, comes much of the pressure that is exerted on legislators to "do something."

What will come out of the AAAA sessions we do not venture to predict. The problem is not a new one, either to the AAAA or to other advertising groups, but it is encouraging to see the 4A's give it the prominence that apparently it is due to get in this week's deliberations. For selling the story of advertising, we can think of no one better equipped or qualified than advertising agencies.

In its efforts to improve its own public image, advertising deserves the support as well as the sympathy of broadcasters—just as broadcasters ought to have advertising's sympathy and support in their own public relations undertaking. To the extent that either group succeeds, both are bound to benefit.

100% FRESH

If all stations were as fresh as this little rascal you could buy 'em blindfolded. But, they aren't! That's why smart buyers always ask for KPRC-TV. You see the station add its own personality, so you know it has to be fresh—100% fresh. Makes sense, doesn't it? You're always sure with KPRC-TV, the low charge Houston TV station with everything—quality, dependability, long life . . . extra sales at no extra cost.

the success of your campaign

Now what manner of man is this, ye say?
'Tis our lovable Irish Tom, it is!...

When one of the big network stars complains about how tough it is to turn out a weekly television show, we can't help but smile a little and think about Tom Duggan.

For 3 years now, Duggan has talked and kidded and charmed his way through 105 minutes *every weekday night,* and 75 more on Saturday. All live. Sundays we let him off.

He can't sing, can't dance, isn't much of a comic; but he's the kind of guy that's easy to take late at night, and his show is fun to watch. Once in awhile he even blows off a little steam when he thinks somebody's getting stepped on.

Maybe it's the way he handles guests. Maybe it's his handsome puss, or that Kilarney gift of gab. Or maybe it's the crazy commercials. All we know is that this warm, screwball Irishman attracts more people and more sponsors and sells more products than anyone ever imagined.

CLOSED CIRCUIT®

Vigilance at Greenbrier • While crisis developed in Television Code Review Board's decision to discipline stations carrying hemorrhoid remedy commercials (story page 31), subcommittee of board was screening score of other personal-product commercials that had been questioned. It could not be learned whether any was found offensive, but at least some were enthusiastically approved for their good taste. Subcommittee consisted of E. K. Hartenbower, KCMO-TV Kansas City, subcommittee chairman; Gaines Kelley, WFMY-TV Greensboro, N.C., and Donald H. McGannon, Westinghouse Broadcasting Co., code board chairman. They met at Greenbrier last Friday during American Assn. of Advertising Agencies convention.

New type song-plugging • Here's newest gimmick advertisers and agencies are using to get more mileage out of radio commercials at no extra media cost: After singing commercial is composed, instrumental version is recorded, with top-flight arrangement and production. Trick is to get stations which are carrying singing jingle to play instrumental version free as regular musical number on record shows.

Wrigley gum and Schlitz started trend by adapting instrumentals from singing commercials. New twist is being used by Corn-Chex and unidentified appliance. Both are asking stations to play instrumental versions of commercials before commercials themselves go on air. Purpose is to sneak commercials over on listeners who have been conditioned to think of the music as just another popular tune.

Option time • All-out network opposition, buttressed strongly by many affiliates, to FCC proposal to reduce option time to 2½ hours per segment and eliminate "straddle" programs (story page 65) already is in making. But one network—ABC-TV—would not object to elimination of option time altogether if FCC provided minimum of four reasonably comparable stations in first 100 markets.

Resistance forces • Assn. of Maximum Service Telecasters lost no time in marshaling forces in opposition to breakdown of existing mileage separations in tv allocations as proposed in FCC's report to Senate Committee last week (story page 68). MST's board of directors, at call of President Jack Harris, KPRC-TV Houston, met in Washington last weekend (Saturday and Sunday). Even before FCC report had been released, however, MST's executive director, Lester W. Lindow, was at work contacting membership in anticipation of short separation proposal.

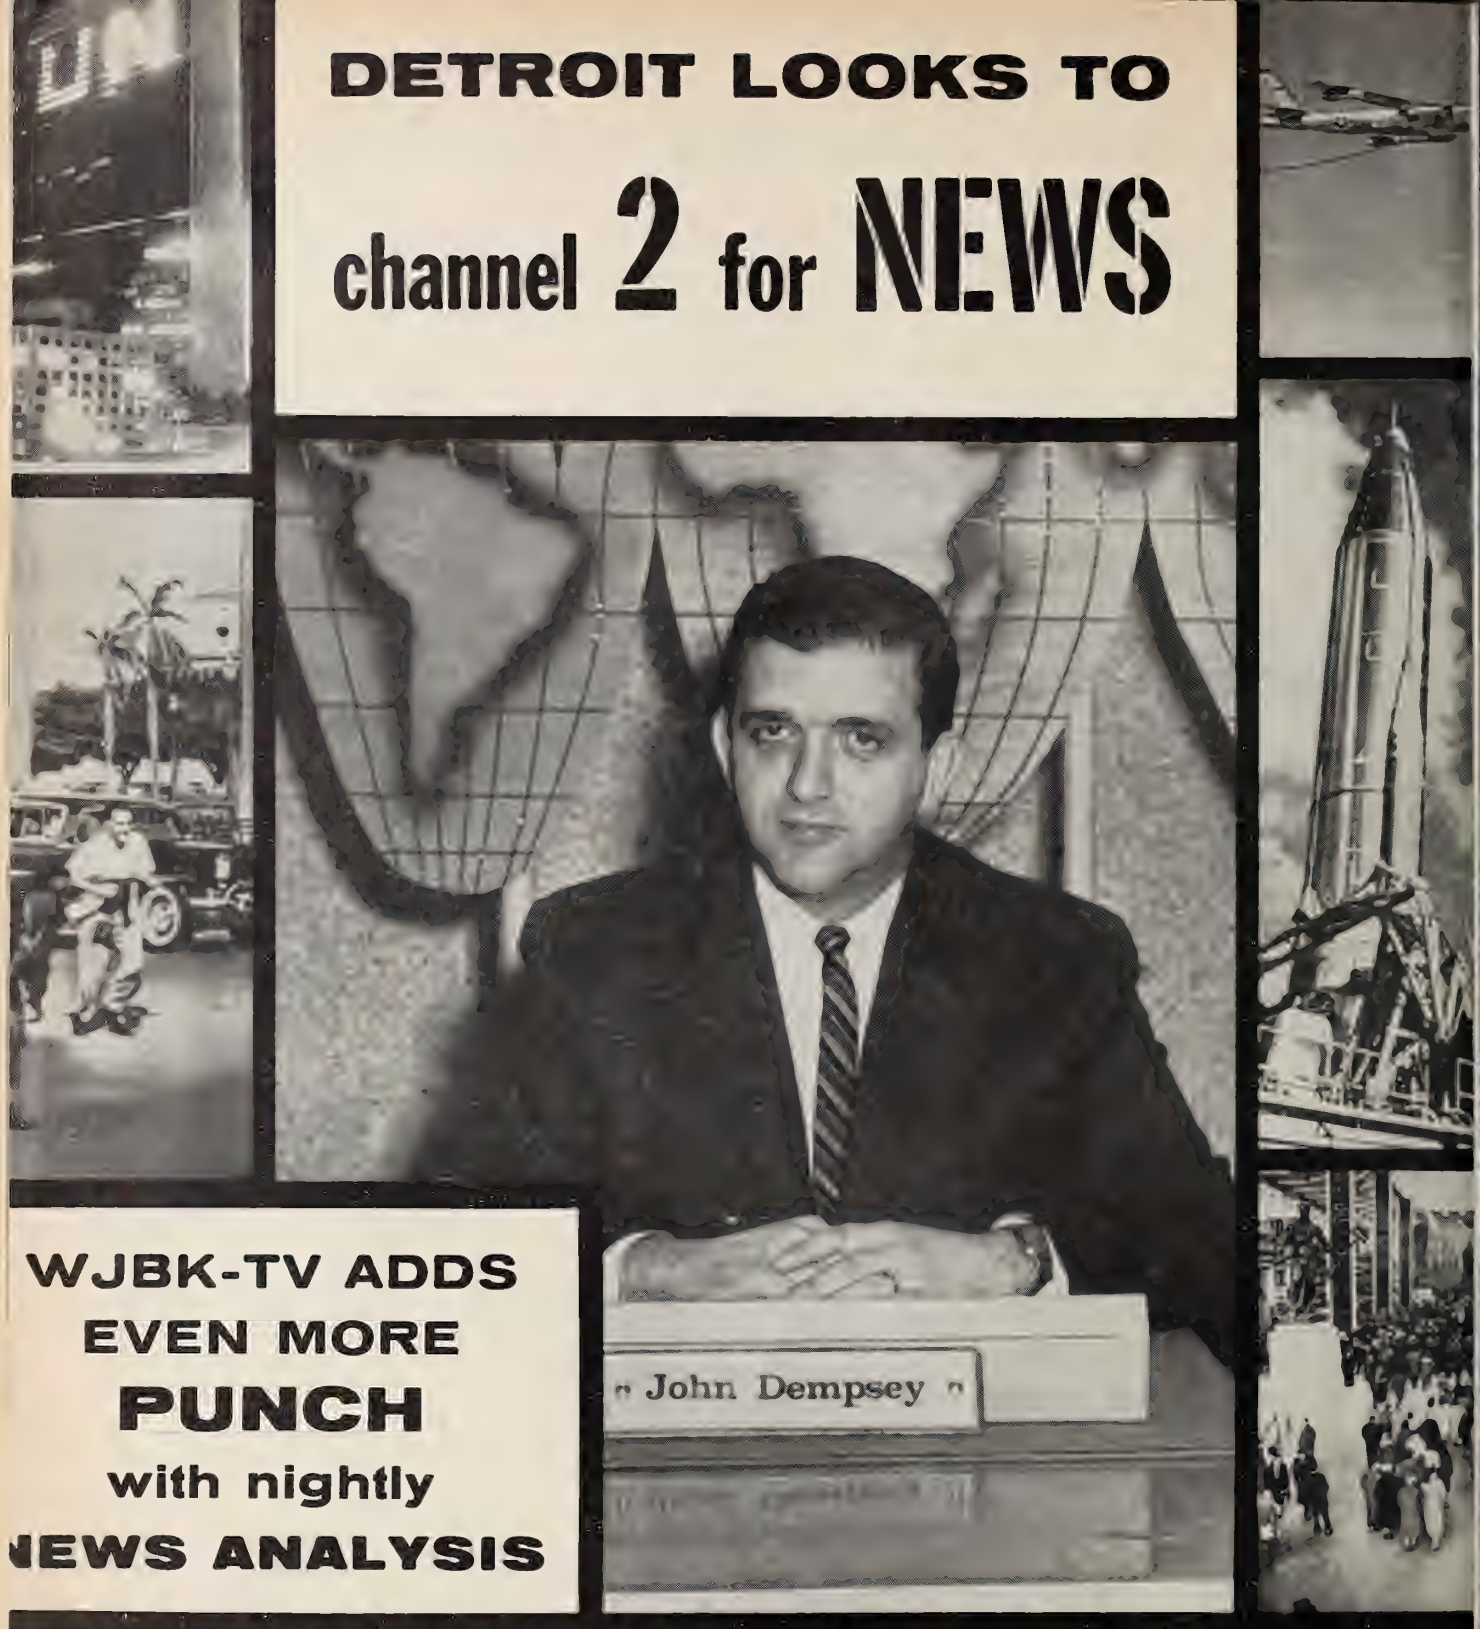
Networks also were on qui vive *on long-expected report. Shorter separation could affect not only coverage of their affiliated stations but also their owned and operated outlets. While FCC to date hasn't mentioned markets it regards as critical and in need of additional vhf stations, this random list was mentioned as among foremost: Birmingham, Providence, Rochester, Syracuse, Jacksonville, Charlotte, Raleigh-Durham, Shreveport, Louisville, Grand Rapids-Kalamazoo. These were mentioned aside from such areas as Greensboro-Winston-Salem; Tampa-St. Petersburg; New Orleans and Quad Cities, in which contests for additional v's are underway.*

Uhf in Britain • Approaching its tv allocations problems precisely in reverse of U.S., Great Britain is exploring prospects of eventual move of its tv operations to uhf, according to advices given authorities here. With geographically compact area and only comparative handful of stations to be accommodated, British engineers tentatively have concluded that uhf would provide higher quality service than its present allocations in vhf which fall below our ch. 2 allocations. British problem is simple, however, since government controls all technical services (both BBC and ITA) and simply leases programming to contractors for ITA operations.

Tv spot strong • Heavy advance sales of tv networks' fall season seems to be blessing for national spot business. Uncertainty of year ago in making network commitments held up spot plans as well because advertisers plan overall media budgets coincidentally. Station representatives already report brisk selling with spot advertiser decision-making on advanced spot orders.

Local radio strong • Word has filtered back to Radio Advertising Bureau from its executives on road in first-week swing of sales clinics that strong local radio business is making up for any softness in national activity. RAB officials already have been in Dallas, Memphis, Tulsa, New Orleans, Des Moines, Minneapolis and Kansas City.

Losses cut • Report of financial progress of ABC Radio has been submitted to board of parent AB-PT. Where network year ago was losing money at rate of $4.5 million per year, board members were told, it's now losing at rate of less than $2 million—most if not all of which can be charged up to "allocated costs" (radio network's share of cost of operating news, engineering and other service departments of ABC). Rate of improvement said to be greater than that of any other AB-PT division.



Space show • AVCO Mfg. Corp., New York, is understood to have budgeted about $250,000 for sponsorship of one-time, one-hour special on NBC-TV May 24. Telecast, which will be produced live by Robert Saudek Assoc., New York, will originate from Wilmington, Mass., and will spotlight dedication ceremonies there of AVCO's new $50 million space research center. Program said to be dramatic in nature and dealing with space research theme. Saudek Assoc. has produced several space research programs for *Omnibus*.

Border incident • U. S. broadcasters along Mexican border have unusual complaint against Conelrad test April 17, which blacked out half-hour of prime daytime. In one market — San Diego, which is opposite Tijuana, Mexico—broadcasters say they were forced to turn over their market to half-dozen Mexican border stations which ignored Conelrad tests. But even more serious, they contend, is that if real McCoy had happened, those important border cities would have been sitting ducks for homing enemy.

San Diego stations have been in running battle with Mexican broadcasters for several years. Indications last week were that one or more of them might formally complain to FCC and possibly OCDM on Conelrad incident.

Question of authority • Notwithstanding FCC's decision that it does not have jurisdiction over community antenna systems (BROADCASTING, April 20), it has legal opinion from its General Counsel John L. FitzGerald that existing law is sufficient to permit Commission to exercise authority. Mr. FitzGerald submitted these views before Commission made up mind it didn't want this power. In light of cable systems' attitude that they desire to be placed under FCC (see page 76), feeling is Commission can accede without new legislation.

DETROIT LOOKS TO channel 2 for NEWS

WJBK-TV ADDS EVEN MORE PUNCH with nightly NEWS ANALYSIS

With the addition of political science authority Dr. John Dempsey to WJBK-TV's award-winning news staff, Detroit's leadership station solidifies its position as the news channel in America's fifth market.

This 6:40-6:45 PM program feature is designed to give viewers a broader, more comprehensive background for interpreting the national and international news of the day.

WJBK-TV now has two Video Tape machines at your service and is still the only Detroit station with Video Tape facilities.

WEEK IN BRIEF

MR. STODEL

Get everybody into the act • Just buying spots will not solve all your marketing and distribution problems, Edward C. Stodel, president of Stodel Adv., Los Angeles, points out in this week's MONDAY MEMO. You must give the campaign all-out support by getting everyone involved—station personnel, distributor salesmen and merchants. Page **25.**

Crisis for the tv code • Nearly 70 stations defy code board and continue carrying commercials for Preparation H, hemorrhoid remedy. Will code board ask NAB tv board this week to lift their seals of good practice? Page **31.**

Defend ad role • American Assn. of Advertising Agencies' annual convention hears repeated calls to bolster public understanding of advertising and protect the industry from creeping encroachments of government restriction. Page **34.**

Where it's coming from • TvB reports on network tv advertisers and the brands that spent the most for time in January. Page **40.**

Network tv gross • Billing gains 9.5% in February, more than $48.8 million in time charges that month. Page **40.**

Paid advertising for government agencies? • Yes, says McCann-Erickson's Marion Harper in Chicago talk. He also scored politicians who shout "Hucksters" and use advertising as a "whipping boy"—until they need it at election time. Page **50.**

A distaff look at 1959 radio-tv • Some 900 members of American Women in Radio and Television will analyze the industry at their convention in New York this week. Page **52.**

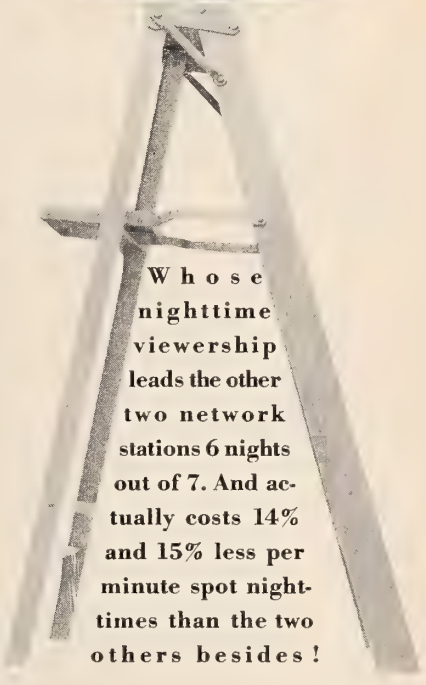
Newspaper's "Total Selling" versus television • The Bureau of Advertising of the American Newspaper Assn. explains its "total selling" program to increase newspaper advertising during ANPA convention and makes clear it will challenge television's advertising effectiveness. Page **54.**

Option Time Revisions Out • FCC issues proposed changes in option time rules including—30-minute cut, 13-week notice, straddle program interpretation and right of station to reject program after series has begun or substitute local program for network show. Comments due June 22. Page **65.**

No third round for Katzentine? • Government says it probably won't ask him to testify in Mack-Whiteside trial. Mack counsel pleads indigence, asks for government-paid assistance. Page **66.**

Tv Allocations Moves Set Out • FCC is going to wait for possible all vhf tv system, couple of months anyway. Meanwhile will start moving to squeeze in more vhf channels where they're hurtin'—in those markets having less than three vhf assignments and where uhf conversions are meager. Page **68.**

Regulation requested • Community antenna operators seek FCC control; legislation is being drafted to amend Communications Act to accomplish Commission jurisdiction. Page **76.**



Conelrad's better than ever • FCC, OCDM, others acclaim success, despite scattered defects and criticism, in backward look at April 17 test alert. Page **78.**

LATE NEWSBREAKS APPEAR ON THIS PAGE AND NEXT • DETAILED COVERAGE OF THE WEEK BEGINS PAGE 31

Sen. Monroney critical about 'Firestone' lapse

Sen. Mike Monroney (D-Okla), Congress' number one critic of network programming and rating services, Friday (April 24) struck out at ABC-TV for canceling *Voice of Firestone* on Monday nights (BROADCASTING, April 20).

"The Voice of Firestone has again become the victim of the mumbo-jumbo of tv ratings," senator charged. "This is another prime example of the lack of public service displayed by the network czars." He said ABC was anxious to get *Voice* from NBC-TV several years ago. "Since then, ABC apparently has become prosperous with the help of *Maverick*, two-gun westerns and whodunits," Sen. Monroney said. "It now seems to have gone trigger happy, along with NBC and CBS, for the highly-rated blood and thunder programs that fattens the batting average in the daily tv rating service."

Sen. Monroney said he plans to introduce into *Congressional Record* several statements and articles on Firestone situation.

Metropolitan gross up

Metropolitan Broadcasting Corp.'s gross revenue last year increased to $14,427,752 from near $10.3 million of year before, John W. Kluge, board chairman and president, reported Friday. Net income was $932,348, or 60 cents per share in 1958 compared to $243,460 or 16 cents per share in 1957 (last year's income was subject to specific writeoffs during year of more than $600,000 coming to 40 cents per share and no federal income taxes were payable because of carry-forward of loss). Stations: WNEW-AM-TV New York, WTTG (TV) Washington and WHK Cleveland (figures include only seven months of WHK operation).

Ganger affirms need

"Vital need" for "greater understanding between advertising and its publics" was stressed by Robert M. Ganger of D'Arcy Adv., new chairman of American Assn. of Advertising Agencies, in speech prepared for closing session of AAAA convention Saturday (see earlier stories page 34). He identified advertising's "publics" as government administrators, legislators and "the constituents behind the legislators."

Mr. Ganger said AAAA committees are studying to see how necessary, feasible and potentially effective are proposals which have been made "for lobbying, for a Washington headquarters for advertising, for a self-imposed levy on advertising revenue to finance a public education campaign and for many other kinds of action."

AAAA's new board meanwhile named following as its operations committee to meet monthly when board is not in session: Chairman Ganger; President Frederic R. Gamble; Harry Harding, Young & Rubicam; Andrew B. Meldrum, Meldrum & Fewsmith; Edwin Cox, Kenyon & Eckhardt; Otto Kleppner, Kleppner Co.; Raymond F. Sullivan, Stauffer, Colwell & Bayles.

Million dollar TvB

TvB's budget has hit million-dollar level, President Norman E. Cash is announcing today (Monday), following report to semi-annual board meeting at Greenbrier, White Sulphur Springs, W. Va., during AAAA convention (see page 34). TvB Board Chairman Roger W. Clipp, Triangle Stations, called it "more than just a coincidence that both television and the bureau which represents it are enjoying the greatest year in their histories." He said that "with the bureau continuing to increase in both scope and effectiveness, we are laying a firm foundation for the continuance of this success."

TvB's annual meeting will be held in Chicago in November.

Arizona Network new to ABC Radio fold

ABC Radio moves into this week with additional affiliates and programming feeds. As of yesterday (April 26) ABC Radio was to take over eight hours of programming weekly from Don Lee Broadcasting System and add them to existing ABC Pacific Coast regional network schedule. Effective today (April 27), ABC Radio adds 12 stations of Arizona Network, second such regional group to become associated with ABC Radio in past six weeks (Intermountain Network associated with ABC Radio March 15). Arizona Network, formerly with Don Lee, reportedly will continue to receive some Mutual programming. Arizona pact announced by John L. Hogg, president-general manager, KOY Phoenix, and manager of network, and Edward J. DeGray, ABC vice president in charge of radio network.

ABC Radio claims total 346 affiliations in U. S. with additional lineup in Arizona. KOY has been existing ABC Radio affiliate. Arizona Network formed in 1940 also includes KTUC Tucson, KSUN Bisbee, KNOT Prescott, KAAA Kingman, KGLU Safford, KVOY Yuma, KVNA Flagstaff, KVNC Winslow, KNOG Nogales, KWJB Globe and KHFH Sierra Vista. ABC-Don Lee agreement was signed March 26 (BROADCASTING, March 30).

Regional color set

What is believed to be first regional color television baseball network has been arranged to carry 13 home games of Cincinnati Reds. These are part of 53-game schedule fed to same stations throughout season under regular sponsorship of Sohio Oil Co. (through McCann-Erickson, Cleveland) and Hudephol beer (through Stockton, West & Burkhardt, Cincinnati). Thirteen colorcasts will originate at WLWT (TV) Cincinnati and will be carried by WLWD (TV) Dayton, WLWC Columbus, Ohio, and WSAZ-TV Huntington, W.Va. Extra costs of adding color to 13 of 53 games—and extensively promoting it—will be shared by RCA and by Crosley Broadcasting Corp. (Crosley owns WLWT, WLWD and WLWC).

Trendex adds five

Trendex Inc., New York, announced Friday it plans to add five new cities to present list of 20 used in publication of monthly tv program popularity report. New total also to be used to form sampling universe for bi-monthly Television Advertisers Reports. New cities are Pittsburgh, Little Rock, Richmond, Tulsa and Peoria, Ill.

Motorola sales jump

Motorola factory sales volume of consumer products was 101% ahead of first quarter 1958 during period ending March 31, with tv as largest single factor (up 97%), company announced Friday. It marked largest first quarter since 1953 and brought firm within

CONTINUES *on page 10*

AT DEADLINE

CONTINUED *from page 9*

5% of total sales volume for entire first half of last year, according to Edward R. Taylor, executive vice president. Phonograph record player sales were triple any previous best first quarter, while portable radio volume doubled 1958 first quarter and car units also showed marked increase.

WBC clinic Sept. 21-23

Westinghouse Broadcasting Co. will hold its third industry-wide public service programming conference in San Francisco Sept. 21-23, WBC is announcing today (April 27). Conference takes place at Stanford U. (Palo Alto).

KXLY to H-R Reps

KXLY Spokane will be represented by H-R Representatives Inc. and KXLY-TV by H-R Television effective June 1, it was announced Friday. Owned by Northern Pacific Tv Corp. and managed by James R. Agostino, both outlets are CBS affiliates. KXLY is on 920 kc; KXLY-TV is on ch. 4.

• Business Briefly

• R. J. Reynolds Tobacco Co. through William Esty Co., N.Y., and Miles Labs. through Geoffrey Wade, Chicago, to sponsor *Man from Black Hawk* on ABC-TV Fri. 8:30-9 p.m. starting Oct. 2. Program is being filmed by Screen Gems with Herb Meadow producer.

• Bristol-Myers moves its network tv-heavy Ban deoderant account ($2 million plus) from BBDO, N. Y., to Ogilvy, Benson & Mather there effective July 20. Ban is currently represented on B-M shows *Alfred Hitchcock Presents* (CBS-TV Sun.) and *Wanted—Dead or Alive* (CBS-TV Sat.), and order is in for *Jack Paar* (NBC-TV) late evening participations beignning first of May. BBDO, which handles other B-M products, has been Ban agency since deoderant's inception five years ago. B-M official said switch is desire for "another strong agency in our lineup."

• Renault of France has signed for half-hour, alternate week of *Playhouse 90* on CBS-TV (Thurs., 9:30-11 p.m.). Agency: Needham, Louis & Brorby, Chicago.

WEEK'S HEADLINERS

MR. SMITH

GAIL SMITH, formerly associate manager of advertising production of Procter & Gamble, Cincinnati, joins General Motors, Detroit, in newly-created post of director of television advertising, effective May 15. Mr. Smith will join staff of William F. Hufstader, GM vp in charge of distribution. He will work with GM in "consulting and coordinating capacity in tv advertising field." In addition, it was announced, he will "assist GM and division personnel responsible for tv ad schedules and programs in contacts with tv networks and advertising agencies." Mr. Smith joined Procter & Gamble in 1943 and was appointed director of radio in charge of daytime programs in 1949.

ALFRED J. SEAMAN, who resigned last week as executive vp and creative director, Compton Adv., N.Y., (WEEK'S HEADLINERS, April 20) elected vice chairman of board and chairman of executive committee, Sullivan, Stauffer, Colwell & Bayles, N.Y. At Compton all tv and radio programming as well as other creative activity reported to Mr. Seaman and at SSC&B Mr. Seaman becomes member of management working with board chairman and president of agency. Mr. Seaman was with Compton 13 years, past five as executive vp and remainder as vp and creative director. Other agency associations: partner in Knight & Gilbert, Boston, and associate account executive of Fuller & Smith & Ross, N.Y.

T. HART ANDERSON JR. has resigned as board chairman of Anderson & Cairns, N.Y., and JOHN A. CAIRNS, president of A&C, adds Mr. Anderson's position. Mr. Anderson will devote full time to marketing counsel activities which he started two years ago on part-time basis. His office will be in his Pennington, N.J., home. Anderson & Cairns was created in 1951 when Anderson, Davis & Platt merged with John A. Cairns Co. Mr. Anderson, one of AD&P's founders in 1929, previously had been in Rome with U.S. diplomatic service.

L. C. REDMON, station manager of WLAP Lexington, Ky., has been named vice president and general manager of WLAP Radio Inc., it was announced by John B. Poor, owner and president. In other WLAP promotion, WILLIAM R. LACKER, program director, was appointed national sales manager and assistant station manager, and NICK CLOONEY, on WLAP's staff since last year, promoted to program director. Mr. Redmon joined station in 1950 as account executive and left in 1953 to become merchandise manager of major appliances at Purcell Co., Lexington department store. He returned to WLAP in 1956 as commercial manager.

MORT GREEN, writer on *Perry Como Show* for over four years, to Revlon Inc., N.Y., as director of television and radio, effective June 1. Appointment is based on belief that "maximum results from tv and radio programming can best be achieved by turning responsibility over to top creative mind to work directly with individuals responsible for program creating," according to Revlon President Charles Revson. Both current and future programming will come under purview of Mr. Green, who is to work directly with Mr. Revson and F. Kenneth Beirn, vp in charge of advertising at Revlon. Some of Mr. Green's earlier writing assignments: *Mr. Ace and Jane* and Tallulah Bankhead's *Big Show*, both radio; *Milton Berle Buick Show, Colgate Comedy Hour*, Arthur Murray and Johnny Carson on tv.

MR. WILLIAMS

PHIL WILLIAMS, vp in charge of syndicated sales, ABC Films, joins United Artists Television on May 1 as eastern division manager. Appointment generally considered first major step by UA-Tv—other than production which is underway—toward national sales organization for syndication. As outlined by Bruce Eells, executive vp of UA-Tv, "first product to be put into national spot, major regional and local selling will be announced by June1." Mr. Williams' past associations include: Ziv Television Programs, where he was eastern spot sales manager preceded by spot sales manager, central division; Time Inc. (for 15 years) in sales and public relations; *March of Time* as theatrical sales manager and advertising director for motion pictures and tv.

RATINGS SHOWN ARE ARB, FEB. or MAR. '59

We want you to meet some of

our fair ladies

PTA WORK AND BEING A CUB SCOUT DEN MOTHER help to keep Mrs. William R. Hugill of Livonia, Michigan, busy. In addition, Mrs. Hugill, like many wives of Standard Oil dealers, helps her husband with the office work necessary for an efficient operation.

THE OTHER DAY someone remarked that the oil business was only a man's business. It isn't true—and thank heaven for that! Thousands of women have played a vital role in making Standard Oil what it is today—stockholders, employees, wives of employees, businesswomen and dealers' wives.

Here are just a few of our fair ladies. There isn't enough room on this page to print all of their pictures.

Women have an unerring instinct for quality and service and value—things on which our business is built. This is why so many women are busy *on* the scene at Standard Oil. But we are equally grateful to wives and mothers *behind* the scene. They know how to ladle out generous portions of praise and encouragement—just when they're needed the most. Progress depends on perseverance. And we count on thousands of the best bucker-uppers in the world!

A "man's business," indeed!

MISS MARY GARVEY IS A SCIENTIST in our research center at Whiting, Indiana. A graduate of Purdue University, her branch in science is chemistry. She is conducting one of hundreds of experiments that go on here continually to improve petroleum products.

MISS AGNES TOKHEIM is president of The Tokheim Company, Cedar Rapids, Iowa. Her company manufactures and sells gauges to Standard Oil. More than 30,000 independent businesses supply Standard with the services and materials needed to give you top-notch service.

BEFORE HER RECENT RETIREMENT, Miss Flora Adler was executive secretary to a Standard Oil official. An employee of Standard for more than 22 years, she is now on a world tour. Back in 1903, when retirement benefits were virtually unheard of in industry, Standard Oil started its retirement plan.

MISS MARGARET JOHNSON, an assistant principal in a Chicago high school, is shown going over a problem with George Mitchell (left) and Tom Madden. Miss Johnson is one of more than 53,000 women who own stock in Standard Oil. Standard has paid dividends in 66 consecutive years.

PAUL MILLER
Managing Director

When the Wheeling Advertising Club recently presented WWVA Radio with *seven awards* for outstanding programming, advertising, and promotion (a record number) . . . we were frankly pretty proud.

Because this cherished honor reflects tremendous recognition in the community, it indicates one reason why WWVA is first *in every time period from 6 A.M. to midnight, 7 days a week,* in 46 surrounding counties, and dominates the vital half of the $6,000,000,000 Pittsburgh Tri-State Market that other media don't effectively cover. It shows, too, that Storer stations consider it important to be *local stations,* as well as being known throughout the nation.

April '58 Pulse Grand Rapids — 5 county area

WOOD-TV is first — morning, noon, night, Monday through Sunday
February '59 ARB Grand Rapids

WOOD AM TV

WOODland Center, Grand Rapids, Michigan

WOOD-TV — NBC for Western and Central Michigan: Grand Rapids, Battle Creek, Kalamazoo, Muskegon and Lansing.
WOOD — Radio — NBC.

OPEN MIKE

No razzle-dazzle wanted

EDITOR:

Congratulations to Muriel Bullis of Erwin Wasey, Ruthrauff & Ryan for her Monday Memo "The Station Merchandising Plan" (page 29, March 23). We have always felt that a station's prime responsibility to its advertisers is to deliver the largest possible audience at the lowest possible cost. It's good to learn that some agency people aren't impressed by razzle-dazzle and false promises.

Charles A. Sprague
General Manager
WMAX Grand Rapids, Mich.

WQXQ thanks WGMS

EDITOR:

This is a "thank you" letter . . . to Charles O. Wood of Washington's good music station, WGMS. BROADCASTING'S Jan. 12 (page 93) story of WGMS' successful "tell the advertiser" promotion brought copycat success to our good music station . . . WQXQ began a campaign asking listeners . . . to let our good music sponsors know the advertising was heard on WQXQ.

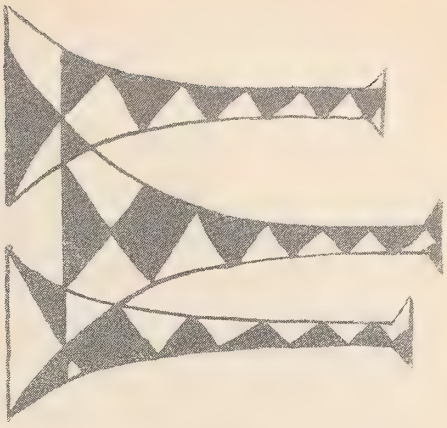
The resulting outpour of listener "thank you's" so pleased sponsors and brought so many new success stories, renewals and new sales, that WQXQ has just concluded the second consecutive record sales month . . .

Don Ritter
General Manager
WQXQ Daytona Beach, Fla.

Levy levity?

EDITOR:

Have noticed on-the-air expressions for editorials on radio. One station calls these expressions "air-opinions." What would be wrong with calling them "air-ditorials."



Milton L. Levy
Manager
California Farm Network
Berkeley, Calif.

MONDAY MEMO

from **EDWARD C. STODEL,** *president, Stodel Adv., Los Angeles*

Get everybody into the act

It's amazing how many advertisers with good products chunk down a sizeable budget on spot radio, carefully buy the top rated stations, write the prettiest, downright clever, strongest copy . . . then stand there and virtually dare it to crack a new market, force distribution or skyrocket sales by the sheer magic of simply broadcasting the message to the mostest people.

Today, with the terrific competition of copy and promotion and production ideas and gimmicks for the listeners' interest, the usual battle for product acceptance plus the fight for distributor-dealer cooperation, you have to get *everybody* and *everything into the act* to really cash in fully on spot radio.

We have an interesting case in point with one of our accounts, Baker Boy Bakeries Inc. of Los Angeles and Amarillo, Tex., which produces and markets fudge brownies, a cinnamon-nut confection roll, low sodium diet cake and other items to grocers nationally. Like many manufacturers, they are somewhat at the mercy of their various distributors when it comes to local promotions, keeping markets stocked and the product displayed.

'Run Some Spots' • Last fall, the account was faced with a definite sales slowup in the important Dallas - Ft. Worth and Houston areas. "We need to jack them up—run some radio spots," the client instructed.

Now, that's one thing we don't believe in—just running some spots, especially without an on-the-spot appraisal of the marketing situation they're supposed to solve.

So, armed with a modest budget and bold plans, we arrived in Dallas set for an 8 a.m. pep-up meeting to excite the cooperation of the distributor, one of the nation's largest. By 8:30 we had problems. They were appreciative of the value of our radio campaign but, frankly, they had head office orders to push their own fruit cake for the holidays . . . so don't count on much activity from their salesmen. To make matters worse, we found their warehouse supplies of Baker Boy products were low and a quick check of grocers and supermarkets revealed less than desirable shelf space displays and dealer enthusiasm.

Setting the Stage • We chose a combination package of WRR Dallas and KXOL Ft. Worth, backed up by a secondary buy of KBOX Dallas to cover the twin market. In Houston, KNUZ.

Two weeks before the start of the campaign, meetings were held with the staffs of each station. Not only the star disc jockey personalities who were to do the selling, but everyone from the secretaries and engineers were brought into the act. Special coffee breaks were held to treat them all to Baker Boy fudge brownies and coffee cake. Supplies were sent out to the disc jockeys' homes for their families to enjoy first hand. We wanted everyone to be sold on the products—and it worked. We prepared copy and fact sheets so the disc jockeys could inject their personal ad lib endorsements. Of course, they were always eating Baker Boy in the studio and on the air, with their coffee. The copy catch line, "Oh Boy, Oh Boy, It's Baker Boy," quickly became a popular salutation around the studios.

Next, the big job was to pass that enthusiasm down to the distributor, his salesmen, and on to the dealers. In Houston, for example, KNUZ' Dave Morris went to the distributor branch office with us to help convince the area manager that fruit cakes or not, he just couldn't afford not to take advantage of the business KNUZ was going to produce for him. It didn't take long for this distributor to place a sizeable order with Baker Boy's Amarillo bakery to stock up again on brownies and confection rolls.

Ed Stodel at 17 was bylining features from Hollywood for Hearst newspapers and soon was writing-producing early radio daytime serials originating there. After a year as KFI Los Angeles continuity editor, he formed Stodel Adv. (1935), specializing in radio for retailers and brand accounts as well as for major movie studios. Latest effort is a new tv film series based on adventures of U.S. Marines. Screen Gems made the pilot. Mr. Stodel lives in Sherman Oaks, Calif., with his wife Charlotte, daughter Jackie 14 and son Jeffrey 11.

With the help of promotion staffs at KXOL, WRR and KBOX, a similar prebroadcast buildup impressed the distributor headquarters for Dallas - Ft. Worth enough to restock their depleted supply of Baker Boy.

The Follow Through • Then to make sure the all-important distributor salesmen—the men who must sell the market which sells the consumer, are in the act—a personal letter signed by all the star disc jockeys was sent to each by each station. Not only was this designed to make him feel these famed radio personalities were on his team to help increase his "take home" . . . but also how to use the campaign to excite maximum cooperation from his dealers. Included was a copy of the impressive radio listening schedule so he could personally catch the spots.

The final clincher was a special letter, sent by each station on its letterhead, to every grocer and supermarket in its listening area. The letter, personally signed by the radio disc jockeys, did a powerful job of selling the dealer on getting on the bandwagon, stocking up and planning displays so he, too, could cash in on the Baker Boy broadcasts. Of course, dealers were assured mentions for their markets on the spots.

Sells Big in Texas • As you can see, we managed to get everyone in the act. And the formula worked. The disc jockeys did a delightfully informal, highly effective sell. Getting them, their wives and kids and the gang at each station pre-sold on the product itself really paid off. In less than a month, radio was moving the products off the shelves faster than ever before experienced in Texas.

So, naturally, the reluctant but now convinced distributor had to split time between pushing its own fruit cake and rushing re-orders of Baker Boy to meet the demand. Admittedly, they had never before seen such fast results, such impact on a product from spot radio in this market. The three-month campaign paid off for Baker Boy and is still paying off in far better distributor-dealer cooperation and continued healthy sales.

So, just don't stand there, do something. Get everybody in the act!

How television serves its public

IF YOU'RE STILL AMAZED by the American people's insatiable appetite for television, you might find the answer in the record of how it serves most of its public most of the time.

The 19,000 broadcasts presented by the television networks in a single year are 19,000 responses to the demands and needs of television's many different "publics."

ONE MEASURE of how well television serves their needs is supplied by the audience itself. Every night, for example, during the average minute, 61 million people are watching their television screens, and this number grows larger every year. Week after week they transform television into the nation's biggest theatre, concert hall, lecture platform, house of worship and source of news.

Another index of its performance can be found in the annual George Foster Peabody Awards—"the Pulitzer prizes of broadcasting." Earlier this month all of the networks were honored for their contributions to the medium in this gratifying competition in which the public reaps the richest rewards.

FOR THE THIRD CONSECUTIVE YEAR, the Peabody Committee presented what it termed its "most important" award—the one for "Public Service"—to the CBS Television Network. The award was made for a series of special CBS News programs, most of which were scheduled at night to reach the largest possible audiences.

The committee also honored the Network for Television Musical Entertainment *(Lincoln Presents Leonard Bernstein and the New York Philharmonic* . . ."has inspired a resurgence of interest in symphonic music . . .") and for Television Dramatic Entertainment *(Playhouse 90* . . . "stands alone among dramatic programs in television in aiming at the best . . .")

IT WOULD SEEM ONLY TOO CLEAR that people give more of their attention to television than to any other medium of communication simply because television gives them so much more of what they want. And because they find so much of what they want, in such even balance, at a single point on the dial, they turn their attention most often to the CBS Television Network.

REVOLT AGAINST THE TV CODE?

Showdown nears as many stations stick with forbidden commercials

The Television Code this week faces the toughest test of its seven-year life.

Nearly 70 tv station subscribers to the code have defied an ultimatum by the Television Code Review Board to quit carrying commercials for Preparation H, a hemorrhoid remedy.

The code board has threatened to certify violators to the NAB Television Board for disciplinary action. Only the NAB tv board has the authority to revoke a station's code membership, the stiffest penalty for code infraction. That board meets this week (Thursday, April 30) in New York.

A fortnight ago a code board spokesman reported that 15-20 subscribers had been formally certified to the NAB Television Board for action (BROADCASTING, April 20). These, he said, constituted the lot of subscribing stations which had refused to drop the Preparation H schedule.

Last week, from other sources, BROADCASTING obtained a list of 149 stations now carrying the Preparation H commercials. Seventy-five of the stations were discovered to be subscribers to the television code. Of those, seven have notified Ted Bates, the agency for Preparation H, that they are canceling the schedule. The other 68 have given no indication of cancellation.

A code board spokesman was asked last week about these 68 stations. After overnight deliberation he issued this statement: "Of the stations who are [code] subscribers and who are said to be carrying the advertising copy, 40% have cancelled the advertising and another 35% are in the process of making a decision." He refused to give specific figures.

How It Started • The Preparation H issue has been building toward a showdown for more than three years.

The product was first tested in television three and a half years ago after it had been advertised for some time on the Gabriel Heatter show on the MBS radio network. The test developed into a tv schedule.

In February 1957 the Television Code Review Board notified subscribers it regarded the commercials as objectionable.

A year later, in March 1958, the code board repeated its advice.

TED BATES' RODGERS
250 stations okay his commercials

The third—and stiffest—warning was issued early this year. Three weeks ago the code board advised the 15-20 stations which the spokesman said were still carrying the commercials that they would be certified to the tv board.

In the same three-year period, the list of stations carrying the Preparation H schedule has steadily grown. According to Dan Rodgers, senior vice president of Ted Bates and account group head on Whitehall Laboratories Division of American Home Products Corp., 57 tv stations have carried Preparation H schedules more than two years and 125 more than one year.

"Today 142 stations carry the Preparation H advertising schedules," Mr. Rodgers said last week. "An additional 108 stations have cleared the copy but have not been ordered, either because of unsatisfactory availabilities or special local market situations."

It could not be learned how many of the 108 that had cleared the copy were subscribers to the tv code.

Million Dollar Problem • Mr. Rodgers said last week that the Preparation H television spot budget was now running more than $1 million a year.

Advertising for the product has also appeared in more than 1,200 newspapers and some 300 magazines including the *Saturday Evening Post, Parents, McCalls, Cosmopolitan* and *Coronet.* Mr. Rodgers said that *Life* had approved copy for a Preparation H schedule which will soon start.

A year ago Mr. Rodgers made a personal appearance before the Television Code Review Board to plead for a reversal of its ruling on Preparation H. At that time, and since, he has asserted that the product is of high quality, that its advertising has been accepted by reputable publications, that no station carrying the commercials has ever received a complaint from a viewer, and that its acceptance among consumers has widened steadily.

Preparation H is now the third biggest selling item in the Whitehall line. Its sales are exceeded only by Anacin and Dristan, Mr. Rodgers reported.

The Disputed Spot • The basic Preparation H television commercial is a minute film. It opens with a man seated at a desk. He reaches for a book from a bookshelf behind the desk and says: "These are doctors' reports on hemorrhoids revealing a new medication that relieves pain promptly, heals injured tissue."

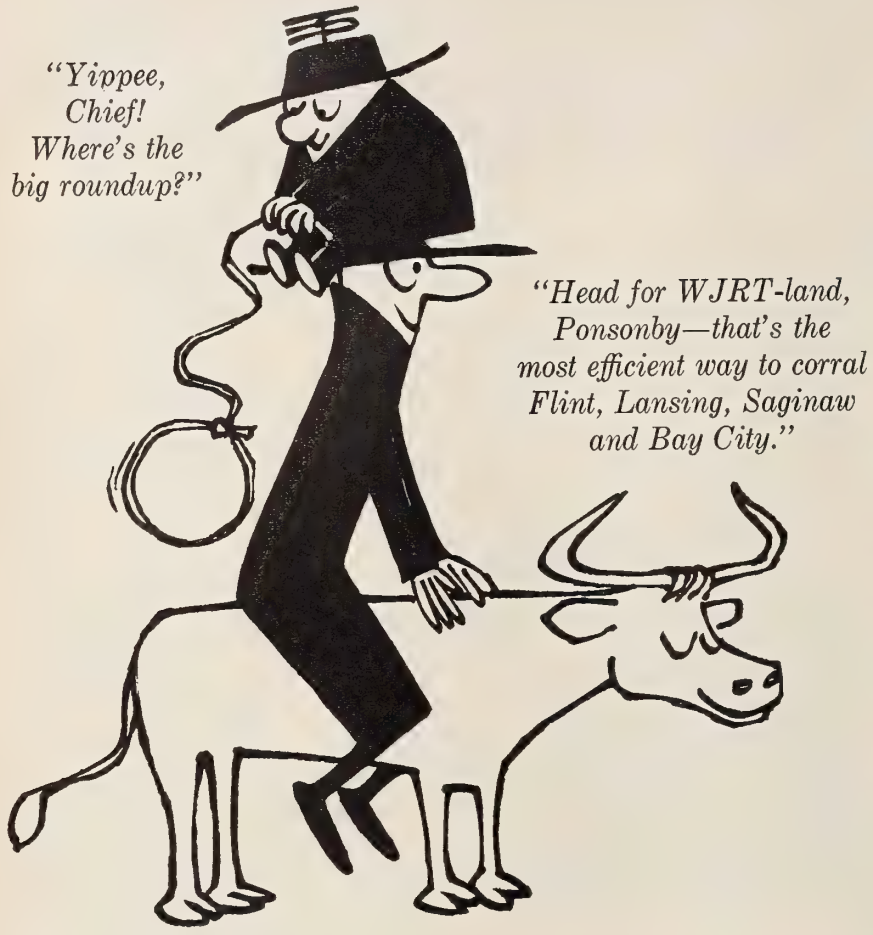
The camera closes in on an open book

Shrinks Hemorrhoids New Way Without Surgery

Science Finds Healing Substance That Relieves Pain—Shrinks Hemorrhoids

For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to stop bleeding—without surgery.

In case after case, pain was relieved promptly. And, while gently relieving pain, actual reduction (shrinkage) took place.



Most amazing of all—results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!"

The secret is a new healing substance (Bio-Dyne®)—discovery of a world-famous research institute.

Now this new healing substance is offered in ointment form under the name of *Preparation H.*® Ask for it at all drug stores—money back guarantee. ®Trade Mark

and a chapter title: "Shrinks Hemorrhoids without Surgery." The picture shows a package of Preparation H emerging from the book as an announcer, voice over, says: "And actually shrinks hemorrhoids without surgery. It's the new medical discovery, Preparation H. . . ."

As the video cuts back to the man at the desk, he points to the book and says: "Yes, hospital tests and clinical tests now show prompt relief of pain, healing and shrinking of swollen, injured tissue." The man takes a laboratory tube from a rack and tips it, saying: "The secret? Only Preparation H contains Bio-Dyne."

The camera closes on a glistening drop of liquid clinging to the mouth of the tube with the title "Bio-Dyne" superimposed on the bottom of the screen. The announcer says: "The remarkable substance that draws the body's own healing oxygen to the painful area."

The video shows the page in the book which has various copy points in headlines, and the announcer continues: "The medical reports prove: Preparation H with Bio-Dyne relieves pain promptly . . . all without narcotics, without astringents, without surgery."

The camera returns to the man behind the desk who says: "Now hemorrhoid suffering can cease to be a problem. Remember, doctors' reports reveal this new medication shrinks hemorrhoids without surgery."

The camera shows two Preparation H Packages, one of ointment and the other suppositories. The announcer says: "Clinically tested Preparation H, suppositories or ointment."

The Official Word • Here is the full text of the only comment which a spokesman for the Television Code Review Board made last week after he and members of the board had been asked for comment by BROADCASTING:

"The decision concerning the nonacceptability of advertising on hemorrhoidal treatments by the new code review board, confirming the unanimous decision of three prior code boards, was recently made known to all stations. Over 80% of those who have replied have indicated that they have never accepted or will cease accepting such advertising. Of the stations who are subscribers and who are said to be carrying the advertising copy, 40% have cancelled the advertising and another 35% are in the process of making a decision.

"In accordance with television code procedures the cases of the remainder will be referred to the NAB Television Board of Directors for action concerning the use of the code seal by these stations. Some of these will be heard by the television board at its next meeting in New York on April 30."

AD ROLE MUST BE STRENGTHENED

Need for greater public and governmental understanding of advertising's contributions to U.S. economy is cited at 4-A convention

Importance of improving public and especially governmental understanding of the role of advertising was put under a microscope last week at the American Assn. of Advertising Agencies convention, held Thursday through Saturday (April 23-25) at the Greenbrier in White Sulphur Springs, W.Va.

It was examined in detail by an agency-man-turned-congressman; it was probed by the principal banquet speaker; it was dealt with by a banker guest; and it figured in private sessions of the annual meeting, which before the week was out had attracted a record AAAA convention registration of some 700 members and guests.

Rep. Bob Wilson (R-Calif.), speaking Friday, again urged agencies to immediately form a Washington-based trade association "to speak out for advertising." Rep. Wilson, a partner in the San Diego agency of Champ, Wilson & Slocum, espoused such an association before the Advertising Federation of America last February (BROADCASTING, Feb. 16).

Government 'Octopus' • He warned that inroads are being made at all levels of government on the right of the businessman to advertise. "As men and women entrusted by clients to invest their dollars in advertising, you should be concerned about these trends," Rep. Wilson said. "They are not new, they are not partisan, but they are alive . . . and growing.

"I think it is obvious that advertising needs effective trade representation in Washington. . . . This can only be accomplished through a contributory plan whereby agencies, the media, the suppliers and the advertisers alike take on the responsibility of financing and directing."

He said advertising is losing the legislative battle because it does not inform and educate the lawmakers. "Legislators are prone to hold up a wet finger to see which way the wind is blowing," Rep. Wilson continued. "Efforts to help create favorable impressions for advertising in consumers' minds are bound to create favorable impressions for advertising in the minds of politically-acute legislators."

The adman-congressman said that such a trade association would not be classified as a lobby. Also, he said, the House Ways & Means Committee and the Treasury Dept. have stated that the association's expenses would be deductible.

Television Inquiry • Rep. Wilson saw this further disturbing sign for advertising: "A new congressional subcommittee [headed by Rep. Charles Brown (D-Mo.)] has been set up this year to inquire into television advertising ostensibly to see if small businessmen are suffering because of our network time sales practice."

The need for advertising people to get into politics and to get the true picture of their business across to both public and politicians was stressed by Arthur H. Motley, president and publisher of *Parade* magazine, in a speech prepared for the banquet Friday night. He said:

"Isn't it one of the most important things that you or I or anybody else in advertising can do in 1959 to see that the public gets a clear idea of the profession we represent—its importance, its contribution, its vital function in making our economy work? That's where more public participation comes in.

"Let's show in political life, as well as in business life, that advertising men have the courage and the brains and the vigor to stand up and show the country that there's nothing wrong with Madison Avenue, nothing wrong with Michigan Avenue, nothing wrong with the advertising agencies of Los Angeles, San Francisco, Dallas, Pittsburgh, Detroit. Let's show that the 'image' they've hung on us in a lot of half-baked novels is strictly a phoney—a phoney that covers up the real contributions of advertising."

Urging political activity, he asked: "Why aren't all of us as advertising people in there pitching to be sure that *our* ideas and *our* kind of approach are reflected in government?" He recommended that agencies take advantage of U.S. Chamber of Commerce material which he said "you can use in your own shop to show how to get started in politics."

The Financial Story • The importance of getting advertising's story across to financial leaders was stressed by William S. Renchard, executive vice president, Chemical Corn Exchange Bank of New York, in a speech prepared for the Saturday morning session. Calling advertising "the hidden asset" which too many companies fail to mention in their financial reports, he said agencies should "bring your story" to all areas of clients' operations, "including particularly the financial officers who present the company's case to their bankers."

The nation's commercial banks themselves are spending more and more on advertising, he said, pointing out that their 1959 expenditures are expected to total $143 million, up 12% from 1958 and seven times their annual advertising outlay immediately after World War II.

For new AAAA officers, see page 87.

TV COMMERCIALS: EGOISTIC

Failure to sell 'outsiders' attacked at AAAA

The trouble with television commercials—one trouble, anyway—is that too many of them are made to please the people who produce or pay for them, rather than to sell "outsiders."

This criticism was aimed by John A. Sidebotham, director of Young & Rubicam's tv art department, in a speech prepared for delivery Saturday morning at the creative session of the American Assn. of Advertising Agencies convention (see above).

"We should be concerned," he said, "with commercials aimed at customers, not copy chiefs, plan boards or even—God bless you, sirs—clients. . . . Why pay money to talk to yourself?"

Mr. Sidebotham told his agency, media and advertiser audience that "we're probably the only group in the country that fixes our snacks during the show and rushes back into the living room to catch the commercial." It's this "uncommon interest in commercials," he said, "that causes us to produce uninteresting, unbelievable commercials." Allowing them to be influenced by "too much self interest" of those who con-

ceive, approve, execute and pay for them results in watering down their "marvelous potential."

Commercials, he said, should "be interesting," should "attract" and "entice"; should be "specific" in "simple, agreeable terms," should be "honest" and should "be something."

Two Is a Crowd • Some of the problems of creativity were examined by Anthony C. Chevins, vice president and director of Cunningham & Walsh's creative department, also in a speech for the Saturday session.

The "only important rule" for being creative, Mr. Chevins said, is to do it alone; the greater the number of people involved, the less the productivity.

He singled out other impediments: "Too often we get so impressed by all the statistics, get so carried away by all the directions and restrictions, that we forget to add the creative touch. This can lead to a dismal display of canned cliches that follow beautifully the party line of research but fail to make a single sale."

In another Saturday address, David Ogilvy, president of Ogilvy, Benson & Mather, was scheduled to evaluate the "brains, guts and discipline" of creativity.

Earlier, in the Friday session, the agency executives and their guests heard and saw a morning-long presentation on "the revolution in rising expectations" by a panel of correspondents, editors and publishers from the Time Inc. group of publications.

A group of award-winning tv commercials, selected for the annual exhibition of art and design staged by the Art Directors Club of New York (BROADCASTING, April 6), was shown twice during the convention.

Comic Alan King was to be featured entertainer at the Friday night banquet, courtesy of CBS. AAAA members were to be guests of Television Bureau of Advertising at a cocktail party scheduled for Saturday evening.

Spadework that pays by NBC Tv Spot Sales

In less than a year, NBC Tv Spot Sales' campaign to sell the virtues of spot advertising directly to prospective clients has resulted in sales estimated at $1.9 million—on stations *not* represented by NBC Spot Sales.

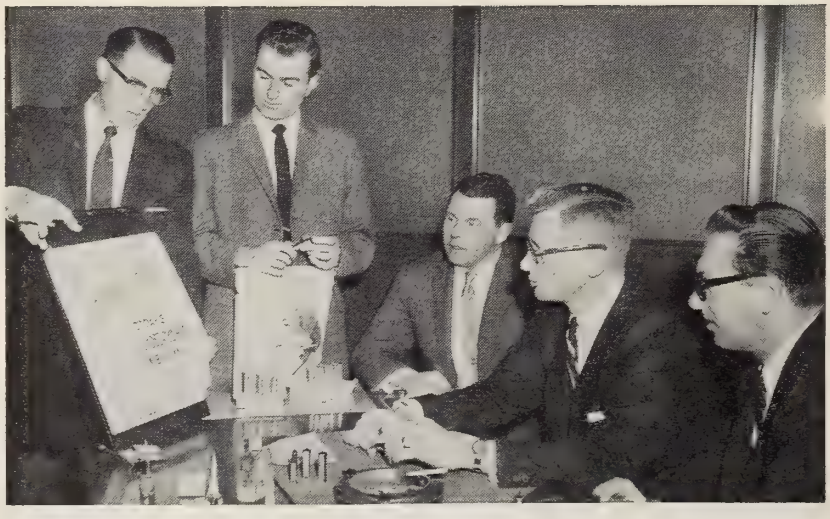
For NBC Spot Sales stations, the campaign has produced approximately $2.2 million in sales to advertisers who had not previously been using spot television. NBC Spot Sales client stations have gained approximately $250,000 in renewals and extensions of these new orders.

On top of this, close to $18 million in potential new business is represented in campaigns already proposed or being prepared for submission at the request of specific advertisers.

Missionary Work • These figures were reported by NBC Spot Sales officials last week to show that their drive to sell the broad concept of spot advertising, while not unique among rep organizations, nor conducted with immediate sales as a primary objective, is paying off.

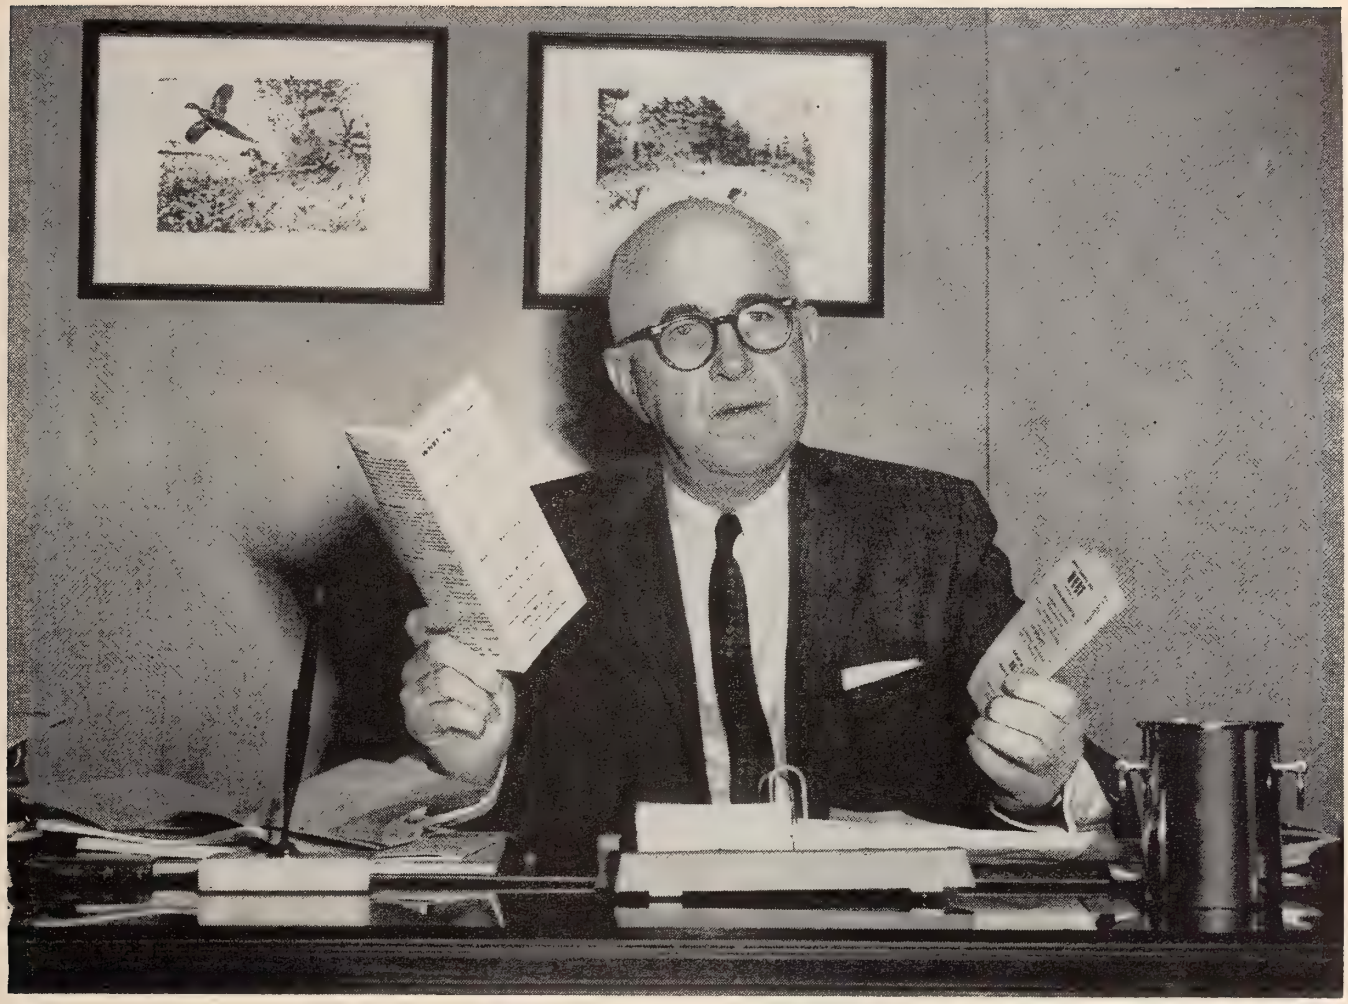
Ed Jameson, director of NBC Tv Spot Sales, and Mort Gaffin, director of new business and promotion, make up the special team doing the missionary work in the NBC organization's campaign. They estimate they have traveled more than 20,000 miles and made presentations in 13 cities since the project was launched just last summer.

With the assistance of NBC Spot Sales researchers, presentations have been tailor-made for the automotive, transportation, drug, food, insurance and other trades. Upcoming shortly are presentations in San Francisco and Los Angeles to executives in the cannery, food packing, fruit growing, oil, metals, chemicals and wine industries. After that: soft goods.



Spot as a Medium • Objective of the campaign is to sell spot advertising generally, rather than NBC Spot Sales specifically, to advertisers that use this medium little or not at all. The Jameson-Gaffin team pitches directly to top executives of advertiser companies, rather than to their agencies (although the agencies are kept posted). If the advertisers then ask NBC Spot Sales to recommend a campaign, that organization is happy to comply.

The overall missionary program is coordinated with the regular activity of the NBC Spot Sales organization, under the supervision of Director Dick Close.



Thus far, officials said, they have brought approximately a dozen new advertisers into the spot television fold, and a number of others are considering specific recommendations. Among those that have become clients: Charles Pfizer & Co., Hertz Corp., Northam Warren Corp., Campbell Soup Co. and Florists' Telegraph Delivery Assn. Officials said Pfizer created a budget (for Candettes) and then had to select an agency to administer it (Paul Klemtner & Co., Newark).

Here is the dollar breakdown of results of the project, as compiled by NBC Spot Sales:

$2,200,000 in new orders on stations represented by NBC Spot Sales; $250,000 in renewals and extensions of these orders; $1,900,000 (estimated) in new business that went into other markets or to other stations in NBC Spot Sales markets; $7,400,000 is represented in tv spot schedules proposed by NBC Spot Sales and under consideration by prospective clients; $10,500,000 is involved in proposals in preparation at the request of specific prospects.

Selling the idea of spot • Edwin T. Jameson (l), director of NBC Tv Spot Sales, and Mort Gaffin, director of new business and promotion, make a presentation in their tv "institutional" campaign. With them (l to r) at offices of Northam Warren Corp. (toilet requisites), Stamford, Conn., are James E. Turck, salesman, NBC Tv Spot Sales; Richard E. Marsh, advertising manager, Northam Warren; Harold I. Seltzer, merchandising account executive, Doyle Dane Bernbach agency.

Maurice Corken, assistant general manager of WHBF and WHBF-TV says:

WHBF adheres to its published rates . . . assures advertisers of equal, fair treatment

WITHOUT ASSUMING a holier-than-thou attitude WHBF desires simply to state this fact about its business policy. Fair rates are maintained for excellent coverage of the market. WHBF clients can be sure that they receive all WHBF broadcasting services at the card rate — with equal treatment to everyone.

We believe that this policy fosters sound, productive business relationships. This factor together with the usual standard criteria for measuring a station's strength is why WHBF is selected repeatedly by agencies and advertisers to promote the sales of their products to the Quad-City market. Mutual respect and integrity contribute an extra measure of satisfaction to these frequent transactions with many, many clients.

TV MAKES WHIRLEY-WHIRLER GO

Novice toymen with broadcast savvy sell 3½ million in a hurry

A soup plate on a stick became an international toy fad and not a flop because of television.

That's the reasoning of broadcasting-wise John Hyatt and Louis Westheimer, president and vice president respectively of the Whirley Corp., St. Louis, makers of the Whirley-Whirler, a plastic soup plate spun on the pointed end of a 30-inch stick.

Hitting the market in November 1958, more than 3½ millions of the Whirley-Whirler have been sold, with orders from Hawaii, South America and Europe. And tv's visual impact put the toy before the public as no other medium could.

The Whirley-Whirler was born in an airplane. Mr. Hyatt, who resigned as general sales manager of KTVI (TV) St. Louis last summer, was returning home after a job-hunting trip to New York. He read an article about the phenomenal success of the hula hoop and told himself, "This toy isn't a freak. Its success could happen again through television."

Tv Inspiration • "I got to thinking," he recalls, "about the hula hoop and what made it popular. It was circular. It had action. It requires some skill and coordination. Suddenly I remembered the jugglers and their spinning plates that I had seen a thousand times in vaudeville and on *The Ed Sullivan Show*."

After conferring with a plastics designer about a possible design, Mr. Hyatt went to his friend, Mr. Westheimer, a founder of Westheimer & Co., the fourth largest advertising agency in St. Louis.

They decided that the Whirley-Whirler was a toy that needed 100% exposure to sell. Both men knew that they could not afford the necessary store personnel to display their toy but with tv, they could "put a demonstrator of the Whirley in every living room."

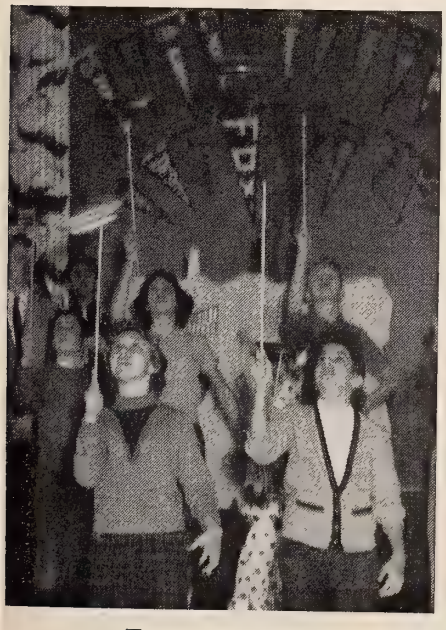
As Mr. Hyatt explains, "Both Lou and I had been taking other peoples' products for 20 years and putting them over the top with radio and tv. Now we had a challenge to prove that we could do the same thing with our Whirley-Whirler."

New Trail • Toy makers have never been big users of the media and usually concentrate their advertising in the immediate period before Christmas. "However," remarks Mr. Westheimer, "we wouldn't buy the concept that tv and radio were too expensive, regardless of the season we chose for introduction of the Whirley."

The W-W campaign began in November 1958 and continued at a peak level through February 1959. In those four months, the Whirley Corp. bought $100,000 worth of spots, in conjunction with such children shows as *The Three Stooges, The Mickey Mouse Club* and *Popeye*. This amount is more than 25% of the total budget with the rest going for direct mail to toy jobbers, shops and department stores, and for print ads.

In addition the Whirley-Whirler was seen on such network shows as *Beat the Clock, Do-Re-Mi, Today,* the *Jack Paar Show, Johnny Carson* and most recently, on April 19, on ABC-TV's *You Asked For It.*

Although no radio time was bought, disc jockeys used the toy in many promotions and spread its name among teenage audiences.



Ad Bonanza • "Developed from tv and radio," says Mr. Westheimer, "unlimited product publicity resulted in national wire stories, magazine articles, features in almost every daily and coverage in neighborhood and weekly papers so extensive we didn't have time to put together a clipping book."

The Whirley Corp. estimates that in November and December it was spending $1,000 a week on tv in St. Louis alone. During the peak four-month period, Whirley spots appeared on 211 tv stations while the toy was mentioned on 244 radio stations and 14 tv network programs.

Sales hit 250,000 per week at Christmas but now have declined to "several thousand a week." The drop started in February when the first of 26 imitations hit the counters.

"They sold without tv advertising," states Mr. Hyatt, "and they died. They wanted a free ride and in the end they killed themselves and almost us because they didn't use broadcast advertising."

On the Board • What are the future

Kids give 'em a whirl

TOYMAKERS HYATT AND WESTHEIMER
Tv's visual impact puts sales in a spiral

plans of Whirley Corp.? Two new toys are on the drawing board, slated for fall introduction. "In the old days," reveals Mr. Hyatt, "you needed six months of promotion to put over a toy. Now, with tv and radio, you can reach everyone in America almost over night."

Complete secrecy will be maintained about the new toys until they are released. Tv commercials, supervised by Mr. Hyatt, will be shot under wraps and saved for the fall.

"We've proved that the hula hoop 'miracle' could happen again with the help of broadcasting. There's no reason," added Mr. Hyatt, "why, with the right product and the right media advertising, that it couldn't happen again and again and again."

ON JANUARY BOOKS

P&G takes early lead in network television

Each of the top six investors in network tv in January spent more than $1.5 million (gross time charges). Procter & Gamble weighed in for the first month of the year with over $4.3 million, while three other advertisers, American Home Products, Lever Bros. and Colgate-Palmolive were over the $2 million mark.

General Foods, No. 5 on the list, was only a hair under the $2 million level. General Motors with nearly $1.9 million in gross time expenditure came in as No. 6 on the list.

The compilations on network gross time charges in January—that month hit a high of some $52 million—showing estimated expenditures of the top 15 network advertisers by company and by brand as well as a breakdown by product classification were reported last week by the Television Bureau of Advertising. Figures were supplied by Leading National Advertisers and Broadcast Advertisers Reports.

In the product classification, the food category remained the largest, showing a near $11 million invested in network tv, or an increase of about 17% over January of a year ago.

Top brand advertiser was Whitehall's Anacin (Whitehall is a division of American Home Products) with close to $1 million in gross time charges in January. Bayuk's Phillies, Procter & Gamble's Tide detergent were second and third, both in the $600,000 level. Whitehall had two brands (Anacin and Dristan) in the top 15, as did Liggett & Myers (Chesterfield and L&M cigarettes). The other brand entries in the top 15 were "singles" for the advertisers.

Estimated Expenditures of Network Tv Advertisers By Product Classification

	January 1959	January 1958
Agriculture & Farming	$ 154,340	$ 13,066

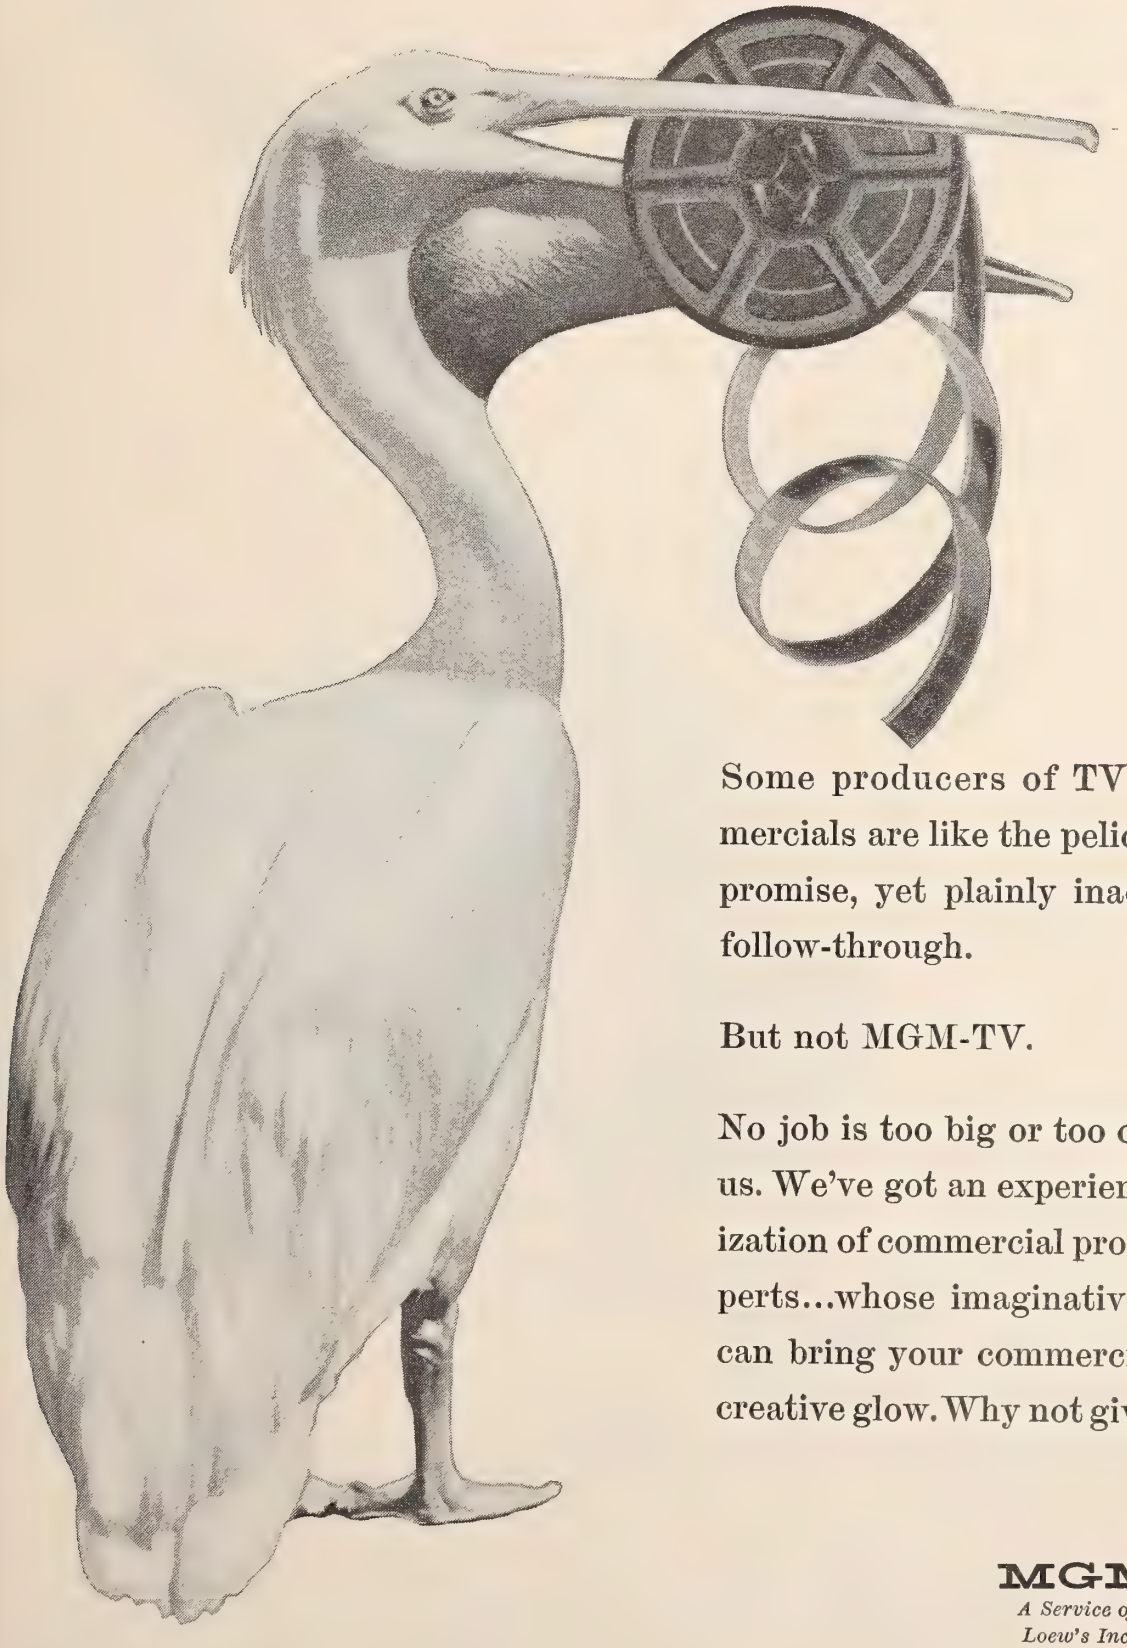
15. Old Golds (Lorillard)	448,350

Jan.-Feb. network gross up over 1958

Network tv gross time charges totaled over $48.8 million in February and more than $100.9 million for January-February of this year, representing respective increases over the same periods last year of 9.5% and 7.1%.

Compilations of the network gross time costs were made by Leading National Advertisers and Broadcast Advertisers Reports, and released last week by Television Bureau of Advertising.



Each of the three networks showed gains: ABC-TV up 18.7% for February and 17.4% for the two months; CBS-TV increased 7.2% and 3.4% for the respective periods, and NBC-TV advanced 7.5% and 6.3%.

	FEBRUARY			JANUARY-FEBRUARY

Serving all Chicagoland!

WGN-Radio's 'copter service gets flood of favorable comments!

WGN-Radio scored a Chicago "first" several months ago with evening rush hour traffic and news bulletins beamed from a helicopter by Chicago police officer Leonard Baldy.

Recently when this service was expanded to the morning hours, the flood of approving comments by phone, wire and letter proved that the program had built a sizeable audience of loyal WGN-Radio listeners.

- "Thank you for your kindly tip on traffic the other night. I saved a half an hour on the outer drive thanks to your advice."
  Mr. D. J. Freeze, 7621 Wilsham Ave., Chicago 31, Ill.

- " . . . and Officer L. Baldy, is cutting down on accidents—believe me! And it's the best guide for all on the road. Thanks for the swell service."
  Harry J. Axal, 6243 S. Ashland Ave., Chicago, Ill.
- " . . . I'd like to express my appreciation for the late afternoon and early evening broadcasts covering the traffic movements in and around the Chicago area from a helicopter. Keep up with the good work."
  Mr. Floyd N. Gatrell, 406 Morgan Blvd., Valparaiso, Ind.
- " . . . tell Officer Baldy I am most grateful for the fine service being rendered by the Chicago Police Department."
  Genevieve Austin, C. S., 16918 S. Wood St., Hazel Crest, Ill.
- " . . . the traffic reports are terrific and more cities should adopt this same technique."
  Mrs. W. F. Gruning, Jr., 3718 N. 92nd St., Milwaukee, Wis.

In providing this valuable service to the people of Chicagoland, WGN-Radio and the Chicago Police Department have the full cooperation of the Traffic Communications Center of Chicago's Department of Streets and Sanitation; the Citizens Traffic Safety Board; the National Safety Council and The Chicago Motor Club.

This type of programming is just one reason why WGN-Radio delivers loyal audiences for advertisers who want to *sell* all Chicagoland.

10% SPOT RADIO SLIP—YOUNG

Rep projects for year on current sales

Based upon the current rate of business, national spot radio billing in the United States in 1959 can reach an estimated $143 million, down about 10% from the 1958 level, Adam Young, president of Adam Young Inc., New York reported last week.

Mr. Young also released the company's estimates of national spot radio billing in 1959 in multi-station markets. He stressed that these figures are not predictions but are estimates "of what the volume will be if the rate of business during the first quarter of the year continues."

In preparing the estimates, Mr. Young said, the company has noted "a marked trend toward the concentration of spot revenue in the top markets at the expense of the medium and smaller-sized markets." A spokesman for the company later said the projected decrease in spot business can be attributed in part to the concentration of billing in larger markets and to use by some advertisers of "more economical network radio buys."

Estimated 1959 Spot Radio Billing

(Base: National Total $143 Million)

Ad efficacy evaluated in ANA guidebook No. 7

A four-year, $200,000 study of advertising fundamentals was completed by the Assn. of National Advertisers last week with publication of a 418-page volume on "Evaluating Advertising Effectiveness," number seven in the ANA Advertising Management Guidebook series.

Separate chapters, buttressed by case examples, evaluate markets, motives, messages, media and overall results. Leading advertiser, agency and advertising research men contributed to the volume.

Paul B. West, ANA president, says that with the seven-volume series completed, ANA must now see to it that the guidebooks are used. He describes them as "a unique working tool for solving the daily problems that arise in advertising." A half-day session at ANA's May 20-22 meeting in Chicago will be devoted to case histories showing the benefits which advertisers can derive from putting the volumes into actual use.

Among the contributors: A. W. Harding, manager of the marketing research department of General Mills (now with C. E. Hooper Inc.), on "How General Mills Tests Its Television Commercials" (see page 47); Geoge Blechta, vice president of A.C. Nielsen Co., on "How to Match Your Television and Radio Coverage to Your Specific Market"; Paul E. J. Gerhold, media and research vice president of Foote, Cone & Belding, on (among other topics) allocating the direct advertising costs of television, radio and other media.

Other contributors, covering a wide range of subjects, include Maxwell Ule, Kenyon & Eckhardt; Dr. Wallace H.

ARBITRON'S DAILY CHOICES

Listed below are the highest-ranking television network shows for each day of the week April 16-22 as rated by the multi-city Arbitron instant ratings of American Research Bureau.

Date	Program and Time	Network	Rating
Thurs., April 16	Real McCoys (8:30 p.m.)	ABC-TV	17.7
Fri., April 17	77 Sunset Strip (9:30 p.m.)	ABC-TV	22.2
Sat., April 18	Gunsmoke (10 p.m.)	CBS-TV	29.8
Sun., April 19	Dinah Shore (9 p.m.)	NBC-TV	23.2
Mon., April 20	Desilu Playhouse (10 p.m.)	CBS-TV	30.1
Tue., April 21	Rifleman (9 p.m.)	ABC-TV	27.3
Wed., April 22	Wagon Train (7:30 p.m.)	NBC-TV	24.9

Color outsells b-w in General Mills' test

A tv commercial in color "out-sold" the black-and-white version of the same message by almost 50% in a test conducted by General Mills. This, although General Mills did not feel that color was used as effectively as it could have been in the commercial.

The instance is reported in a case history of "How General Mills Tests Its Television Commercials," in the Assn. of National Advertisers' new management guidebook on "Evaluating Advertising Effectiveness" (see page 44). It was presented by A. W. Harding, then General Mills manager of marketing research, now with C.E. Hooper Inc., at a closed workshop session conducted by ANA about a year and a half ago.

Participants in the test were interviewed first to find their preferences in cake mixes. Then they were shown the commercials. Of those who saw the black-and-white version, 12.3% switched preference to the mix shown in the commercial. Among those who watched the color commercial, 17% switched to the advertised brand. The color commercial also registered more solidly, producing higher recall of sales ideas (63% as against 41% for the black-and-white).

Another test compared the effectiveness of a commercial used on the *Wyatt Earp* show with one on the same theme but integrated into the *Burns & Allen Show*. The integrated version outscored the non-integrated in switching viewer preferences, 19.5% to 6.7%. But the *Earp* commercial ranked higher in getting across a number of specific sales points, leading General Mills to conclude that "we can make good use of both of these commercial approaches."

The tests were made for General Mills by Schwerin Research Corp.

Revlon planning big

Revlon Inc., New York, reported last week it is in the process of negotiating for a series of 40 hour-long television programs. The main obstacle is lack of a suitable network time.

Revlon is discussing the project with the William Morris Agency and with ABC-TV and NBC-TV. The series would cover ten programs starring Esther Williams; ten shows starring Marlene Dietrich; ten featuring Dick Shawn and ten written by Goodman Ace, based on his old *Big Show* variety series on radio. Revlon presently co-sponsors *The Garry Moore Show* on CBS-TV (Tues., 10-11 p.m.).

PREVIEW . . .

Bubbling over • Radio and television, selected to introduce Bubble-Up to southern California in a $125,000 six-week campaign, did the job so effectively that the available supply for the market was completely sold out in two weeks, according to apologetic signs posted by Coca-Cola Bottling Co. of Los Angeles in supermarkets throughout Los Angeles and Orange Counties, test area for the new soft drink. The radio-tv spots, prepared by Freberg Ltd. and placed by Carson/Roberts Inc., agency for the bottler, stressed the "bigger then king-size" bottle in which Bubble-Up is packaged.

'KING' FREBERG

Core of the commercials is a jingle:

"What's that bottled revelation
Bigger than king-size?
It's the new soft drink sensation
Bigger than king-size.
With a kiss of lemon and a kiss of lime,
Bubble-Up anytime."

On radio, the commercials feature the King who terms himself "official measuring standard for king-size cigarettes . . . king-size tweezers . . . roller skates . . . et cetera." "Nothing is bigger than me," the King ungrammatically boasts. He takes the announcer's statement that Bubble-Up is as a personal affront and when asked to stand up alongside a bottle he readily agrees: "All right. Now you see . . . Hmmm." When the announcer suggests that he drink some Bubble-Up to feel better, the King does, smacks his lips, "Very refreshing," pauses and adds "I'm bigger than my wife, you know." Stan Freberg plays the King in these 20- and 30-second radio spots and the agency chief in the one-minute commercials. On television, the King is a cartoon character.

The six-week introductory campaign in the two southern California counties backed up the broadcast saturation spots with four-color ads in newspapers and for two weeks included a sampling offer of a free carton of Coca-Cola with each purchase of a carton of Bubble-Up. Cost of the six-week drive was estimated at approximately $125,000.

Liquid detergents: $15 million tv client

With Adell Chemical Co.'s Lestoil far ahead of the pack, a total of five heavy-duty liquid detergents invested $14.6 million gross for tv time in 1958, a 232% increase over the previous year, according to the Television Bureau of Advertising. Lestoil's spot tv budget accounted for $12.3 million of that amount.

Second largest spender in 1958 was Lever's Handy Andy with over $740,000, followed by: Texize detergent, $645,000; P&G's Mr. Clean, $421,300; Colgate's Genie, $319,800, and Barcolene, $114,400 (The Barcolene Co., Boston).

Expanded use of spot and network tv by the three major soap companies —P&G, Colgate and Lever—has been planned for their respective detergents (BROADCASTING, April 6). This indicates that Lestoil, which pioneered the way and had the tv field to itself from 1954 until last year, can expect a greater competitive battle before achieving national distribution.

Increased spot tv on restaurant menus

Increased confidence in spot tv again was expressed last year by the nation's restaurant chains, according to Television Bureau of Advertising. Estimated expenditures for 1958 hit $359,600, the highest on record since such yearly figures became available in 1956, TvB said. The total represents a 9% increase over the 1957 mark of $331,150 and is 63% greater than the $22,000 spent in 1956.

Restaurant chains spending more

than $50,000 in spot tv in 1958 were: Frisch Big Boy Drive-Ins ($203,120), Hot Shoppes ($78,790) and Howard Johnson Restaurants ($55,270) which also spent $33,373 in network tv.

In the fourth quarter of each year TvB gathers trend information on restaurants by covering their local tv activity during a sample week in 11 large cities. For the 1958 period, TvB reveals that 57 restaurants used a total of 175 spot commercials and sponsored three programs. The figures tripled comparable 1957 information, the bureau reported.

ON THE ROAD
86% of new cars have radios—RAB

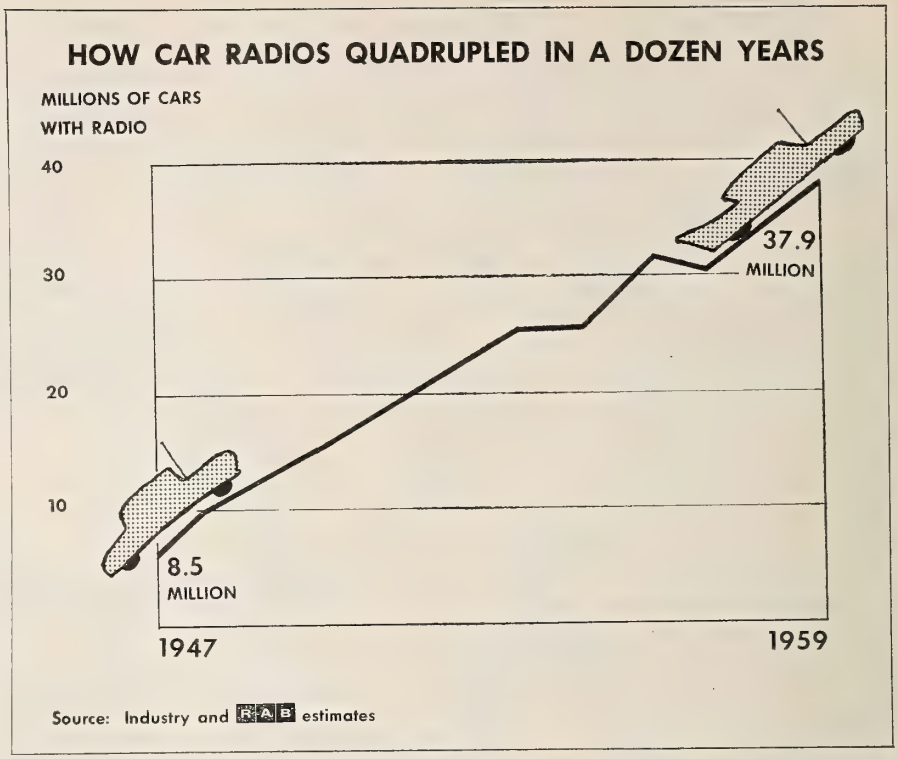
"There are more car radios now than there were radio homes a dozen years ago," and "an estimated 3,650,000 radio-equipped new cars took to the road last year." These illustrative points are included in a new brochure, "The Facts About Auto Radio," published last week by the Radio Advertising Bureau Inc., New York.

RAB's pocket-sized b o o k, which looks like a travel guide and opens like a road map, tells in question-and-answer form the growth of auto radio and its significance to advertisers. RAB cites independent research to report that 86 out of every 100 new cars sold last year were equipped with a radio, making an estimated total today of 37.9 million radio cars. RAB also points out a prediction of a 57% gain in auto ownership during the next eight years.

Comparing auto radio's size with other media, RAB states that the radio-in-auto count comes within 14% of matching the total number of tv homes; within 11% of magazine homes, and within 3% of newspaper homes.

Commenting on the fact book, Kevin B. Sweeney, RAB president, said, " . . . No matter where people go, in or out of the house, radio catches prospects on the run—even at 60 miles an hour."

Success Stories • In another RAB presentation a new package of case histories is offered to advertisers, detailing how gasoline "private branders" use radio. In many cases, the bureau states, strong radio advertising has helped these firms to out-pump the major oil companies in their areas. The success stories are the latest compilations for RAB's series of "radio-activity" reports which are supplied to advertisers.



Among RAB's examples in this retailing group:

Martin Oil Co., which operates in five midwestern states, has the highest per station average sales in the Chicago market. Its formula—60% of its advertising budget in radio, with as many as 40 announcements plus newscasts on a single station in a week.

Mars Oil Co., St. Louis, for four years has put all its expenditures in radio, placing up to 140 spots, seven days per week, on a single station.

Clark Oil & Refining Corp., Milwaukee, spends 90-95% of its budget in radio sports sponsorship. Clark reports its sales have nearly doubled after four years of airing the Milwaukee Braves on a 40-station regional network.

Private branders' copy preferences include, according to RAB, both straight "hard-sell" and musical jingles, with stress placed on price and merchandising gimmicks.

Tv tape might thaw retail coolness to tv

Tv tape commercials made in local department stores were suggested as a method whereby "those diehards of American business, the local retailers," could be convinced to use more tv, by Jerome Feniger, vice president of Cunningham & Walsh, New York Friday (April 24).

In a speech entitled "Better Programming Means Better Sales," before the Ohio Assn. of Broadcasters in Cincinnati, Mr. Feniger said better programs result in better sales for "both the station and the advertiser unless the station succumbs" to the ancient temptation—greed. He cited cases of stations "triple, quadruple and quintuple spotting," where the advertiser's message "never had a chance to penetrate the consumer's skull."

In another speech, Adam Young of Adam Young Inc., New York station representative, said many stations oversimplify the station's rep's role as that of selling the station's time to national accounts. He said a modern station representative also provides program advice, helps in the proper design of rate cards, and helps the station create a salable reputation.

Mr. Young defined modern radio as "a station with a definite plan to reach a specific group with management capable and firm enough to see that the plan is carried through."

Other speakers at the two-day meeting included Ed Broman, Ziv Productions, "Syndicated Tv Film" and Sol Taishoff, editor and publisher of BROADCASTING, "Editorializing in Radio."

No 'Biography' in Equitable's future

The Equitable Life Assurance Society of the U.S., New York, will sponsor a series on CBS-TV next fall but, contrary to earlier announcements, it will not be entitled *Biography*.

CBS-TV's Hubbell Robinson Jr., executive vice president, network programs, and Jack Simpson, vice president and national director of broadcasting at Foote, Cone & Belding (Equitable's agency), said last week that there had been a "change in plans." The projected series will be "broader in

is for product

It's available now...52 weeks of fresh, timely, sensibly-priced first-run product that has won Coates a roomful of citations from industry, civic and educational organizations. It's a virtually endless supply of top-flight programming that proves what the industry has been hearing about videotape quality and reduced costs. It's the special, patented Coates change of pace—bold and beautiful... poignant and funny—an uncanny insight into adult taste, with no punches pulled!

Freshup Freddie Offends FBI

J. Walter Thompson's Chicago office got its Seven-Up account bottled up by the government last week—but all came out well.

A Federal Bureau of Investigation agent took exception to one of Seven-Up's "Freshup Freddie" interview type radio commercials and politely asked the agency to drop it. The spot closes with Freshup Freddie's reminder: "Thank you, Kim Schultz, and we'll be watching for your next picture, 'I was a wonderfully terrific teenager for the FBI.'"

The agent heard the spot in Kansas City and felt the satire may have held the FBI up to disdain. He called on Thompson representatives and cited the criminal code prohibiting use of the department's name or initials in any kind of advertising. Agency officials quietly agreed to pull the commercial, which was going off the air anyway at the end of April.

Ironically, the commercial was part of a packet prepared by Thompson for suggested use by local Seven-Up bottlers in perhaps 25 markets and has appeared in only a few markets as part of a limited national spot radio campaign. The client has been more active in spot tv, utilizing the same Freshup Freddie.

The action came as JWT continued to shop around for a network tv property on behalf of Seven-Up, which has dropped ABC-TV's *Zorro*. Previously, the client had been heavy in spot television.

Thompson has been conducting a promotion contest for station managers among ABC-TV affiliates, based on Freshup Freddie and built around the *Zorro* program. It closed April 10 with over 60 entries and winners are expected to be announced shortly by the agency.

scope" and the series' title changed. Details will be announced soon, they said.

Initially, Equitable was to sponsor a new series of 90-minute programs with the title of *Biography* and apparently with the format of presenting real life stories of prominent people. It was set for the Thursday night period to alternate with *Playhouse 90* next fall but suddenly the network pulled it from that period (BROADCASTING, April 20).

Government must use not abuse advertising

Departments of federal agencies should be provided public information funds for paid advertising and some government politicians ought to stop using advertising as a "whipping boy" when they can utilize its resources for valid purposes.

So said Marion Harper Jr., president and board chairman of McCann-Erickson, New York, in a luncheon talk before the Chicago Federated Adv. Club at the Morrison Hotel April 17. His speech followed the Advertising Council's annual Washington conference a fortnight ago. He devoted much of his talk to the value of ad council projects.

"Government can profitably employ the services of advertising on a scale five to ten times its use today," Mr. Harper is convinced. He argued such policy could result "in better knowledge of the audience—better measurement and appraisal of the electorate and other audience; more effective information program; in more responsible and ethical communications." Advertising can, in fact, help raise "the ethical standards of political expression" he said. and even aid in developing "a more scrupulous code in politics."

Handy Target • Too often, Mr. Harper said, "people in government with authority" use advertising as a "whipping boy—or at least until they need its help." He scored some attacks on "Madison and Michigan Ave. advertising 'hucksters' as a pretty disappointing display of the caliber of some of our government deliberations. I suppose a crack against advertising somehow establishes a politician's purity—his incorruptibility." Actually, he suggested, "people who live in glass porches should not throw stones."

Mr. Harper cited the Dept. of Commerce as an example that "great resources are being wasted because of a failure to spend a relatively small amount of money for public information." An "erosion sets in once an enterprise becomes sizable," he said, "unless communications makes its services known and appreciated." Accordingly, he suggested, such departments as Agriculture, State and, Interior should tell people what they're doing.

Meanwhile, Mr. Harper recommended, advertising should continue to "furnish its services free" to all community levels and, where other voluntary services fail to fulfill needs, "government should be prepared to pay for the balance." He also urged advertising to make known its values to responsible government people and its people to "take an active interest in the services that advertising can render government, both on a voluntary and a business basis."

Ad evolution began with U.S. Revolution

Advertising has changed since Paul Revere rode through the night to tell the New England farmers that the Redcoats were coming, NAB President Harold E. Fellows said Monday (April 20) in an address before the Hollywood Advertising Club titled, "184 Years Ago Yesterday."

"The years have brought an evolutionary development," Mr. Fellows said. "Now the copywriter, the film maker, the producer, the illustrator, the announcer—all of these and others in related functions in the world of advertising must *know* about the products to which they lend their talents of illustration, demonstration, composition, and so forth."

• Business briefly

• Lanolin Plus (Rybutol), Chicago, is launching a three-month, $1 million advertising campaign in early May, placing the major portion of its budget in spot radio-tv in 163 markets throughout the country. A total of about 5,000 radio-tv spots will be used each week. Agency is Erwin Wasey, Ruthrauff & Ryan, N.Y. and Chicago. Lanolin Plus also announced the appointment of Gene Schoor Assoc., N.Y., to handle the entire line of company products.

• The Ford Motor Co., Dearborn, Mich., will be spending some $200,000 on local radio-tv over the next six months to promote its "American Road Shows." These traveling exhibits, to be set up for nine-day stints at approximately 50 shopping centers throughout the nation, show Ford cars, trucks and farm equipment against a background of other newly developed products for suburban and country living. Additional expenditures boosting the "Road Shows" via local media are expected to come from the shopping centers, Ford dealers and other merchants of involved products. Agency is J. Walter Thompson, N.Y.

• The General Tire & Rubber Co., Akron, Ohio, has signed as sponsor of *Top Pro Golf* (ABC-TV Mon., 9:30-10:30 p.m.) effective June 8. Placed through D'Arcy Adv. Co., the order extends to Aug. 24.

YOU'RE INSISTENT . . .

YOU know quality and integrity are important.

YOU know they're especially important in the handling of newscasts.

YOU know that as well as we do, so we won't belabor the point.

YOU, as a businessman, realize it makes a difference what kind of news programs you're trying to sell.

WHY SETTLE FOR LESS THAN THE BEST?

A DISTAFF LOOK AT 1959 RADIO-TV

900 AWRT members to assay conditions at busy N.Y. convention

Some 900 members of the American Women in Radio & Television this week will examine "Our Changing Industry" when the group assembles at the Waldorf Astoria Hotel in New York for its eighth annual convention. Discussion topics based on this overall theme are scheduled for the Thursday through Saturday meeting (April 30-May 2). Pre - convention and post - convention meetings of the board and officers also will be held.

Many leading executives and personalities in the radio-tv industry, as well as figures in public life, have been invited to speak at AWRT's convention workshops, luncheons and dinners. Sen. John F. Kennedy (D-Mass.) will launch the convention with a talk on "The Challenge Ahead" at the opening banquet Thursday night. Nena Badenoch, AWRT president, will give the convention call to order and will introduce Sen. Kennedy.

Also during the banquet, AWRT's 1959 scholarship award winner will be presented by Dorothy Fuller, WBET Brockton, Mass., chairman of the scholarship committee.

Other headliners on AWRT's speaker roster include: Harold E. Fellows, NAB; David Miller, Young & Rubicam; Robert L. Foreman, BBDO; Howard P. Abrahams, TvB; John Day, CBS News; David Susskind, Talent Assoc.; Pauline Frederick, NBC, and Mildred Freed Alberg, producer.

From 10 to 11 p.m., Thursday, following the banquet, delegates will remain in the ballroom for their first general session. Muriel Fox, vice president for radio and tv, Carl Byoir & Assoc., New York, will moderate a group discussion on "Brainstorming for a Better AWRT."

Among the corporations that will host luncheons and receptions during the convention are: ABC, CBS, NBC, *Better Homes & Gardens Magazine, McCall's Magazine,* Celanese Corp. of America, Clairol Inc.; Millinery Institute of America, Campbell Soup Co. and The Toni Co., Arnold Bakers and General Foods Corp.

Noteworthy dates and times:

April 28—(9:30-10 p.m.) Board of directors' meeting and executive session.

April 29—(9:30-10 p.m.) Advisory council meeting; (10:30 p.m.-1 a.m.) open house welcome party.

April 30—(9-10 a.m.) Five area chapter presidents meetings; (9:30 a.m.-4:15 p.m.) tours of the city; (7-10 p.m.) opening of convention and banquet; (10-11 p.m.) general session.

May 1 — (9:45-10:15 a.m.) Opening session keynote address by Fannie Hurst, author and commentator, WNTA-TV New York; (10:15 a.m.-12 noon) general session, "Pitfalls—Legal and Public Relations Problems in Communications," featuring Harold E. Fellows, president and board chairman, NAB; David Miller, vice president and general counsel, Young & Rubicam; Carleton G. Eldridge Jr., partner in law firm of Coudert Brothers, New York; Geraldine B. Zorbaugh, vice president and general attorney, CBS Radio, and Stockton Helffrich, director of continuity acceptance, NBC; (2:30-3:30 p.m.) general session, "Selling Techniques in a Changing Society," moderated by Jayne M. Shannon, broadcast supervisor, J. Walter Thompson, New York, and speeches by Virginia Graham, tv and radio commentator; Robert L. Foreman, executive vice president, BBDO; Howard P. Abrahams, vice president, Television Bureau of Advertising; (3:30-5 p.m.) business meeting, presentation of officer candidates and drawing of door prizes.

May 2—(10:30 a.m.-12 noon) Two simultaneous sessions: (1) "Technical Progress—How to Make the Most Of It," with John Day, director of CBS News, as moderator, and speeches by Fedora Bontempi, WNHC - TV New Haven, Conn.; Howard Maschmeier, general manager, WNHC-TV; Frank Marx, vice president in charge of engineering, ABC, and Alexander E. Cantwell, head of live and closed circuit operation, BBDO, New York; (2) "Program Sources—Keeping a Step Ahead," moderated by Duncan MacDonald, Yankee Network, Boston, and the following as panelists—Richard Pack, vice president in charge of programming, Westinghouse Broadcasting Co.; David Susskind, executive vice president, Talent Assoc., New York; Rege Cordic, KDKA Pittsburgh; Sunnie Jennings, WRGB-TV Schenectady, and R.J. Pressman, WRCA-TV New York; (2:30 - 4:30 p.m.) general session, "Entertainment and Enlightenment," moderated by NBC News analyst and UN correspondent Pauline Frederick, and the following participants—Mildred Freed Alberg, executive producer, *The Hallmark Hall of Fame;* John P. Cunningham, board chairman, Cunningham & Walsh, New York; Don Jones, producer, Bell science series, N.W. Ayer Inc., New York; Richard D. Heffner, director of programs, Metropolitan Education Tv Assn., New York, and Basil Thornton, executive director, The Broadcasting Foundation of America; (8-10 p.m.) *McCall's* Award Dinner.

May 3—(10:30 a.m.-12 noon) business meeting and installation of officers; (2:30-5:30 p.m.) board meeting.

The Case of the Brand New Half-Billion Dollars!

When WSM-TV started telecasting from the Central South's Tallest Tower (1408 feet above average terrain), over $1/2 Billion in Effective Buying Income, and better than 1/2 million people, were automatically added to the Nashville Television Market.

HERE ARE THE FACTS AND FIGURES:

The New Nashville Market	Total (New Tower)	Gain (New Tower)
Population	1,728,800	546,700
Effective Buying Income	$2,074,487,000.00	$568,875,000.00
Retail Sales	$1,519,052,000.00	$413,981,000.00

(Market Data — Sales Management)

ALL THIS AND A 40.5 SHARE TOO (FEB. '59 ARB)

If you want to garner your share of that $1/2 Billion, use WSM-TV, the station that has expanded the Nashville Market by better than one-fourth.

'TOTAL SELLING' ANPA sales campaign to take swipes at tv

The Bureau of Advertising of the American Newspaper Publishers Assn. last Wednesday (April 22) presented a full-dress display of its "Total Selling" program designed to bolster newspaper advertising, and made clear that one of the objectives is to challenge television's effectiveness as an advertising medium.

The bureau's "Total Selling" program, which has been developing for nine months, was explained in detail to more than 1,000 management executives in attendance at the annual convention of ANPA in New York. The bureau presentation took the form of oral reports by its staff executives and musical and dancing skits in which professional artists performed.

The skits, on occasions, took pot shots at television. During a songfest on "Total Selling," the singers chanted:

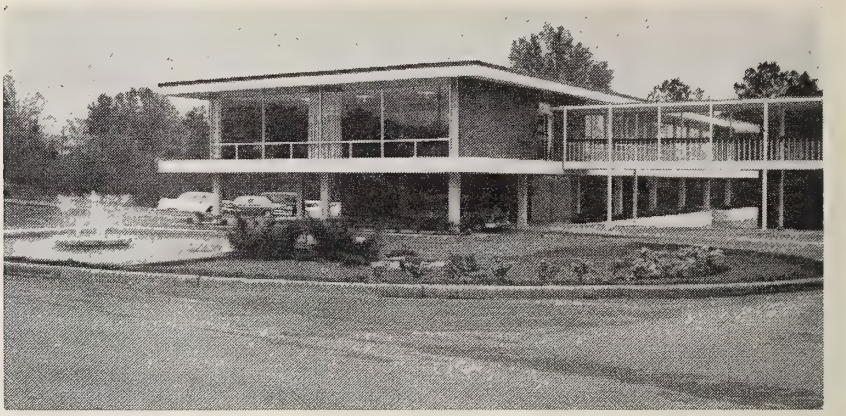
"Accounts may put their dough into a big tv show

But they'll switch, when we give them the pitch

On total selling."

Another skit that drew applause from the crowd involved three performers dressed as babies, who were representing television channels. They moaned that "they looked the same, sounded the same, played the same old films, westerns, shoot-'em-ups . . . and nobody knows who the sponsor is."

Charles T. Lipscomb Jr., of the bureau, was even more direct. He said several presentations had been prepared to point up the superiority of newspaper advertising over tv advertising. One is titled "20 Reasons Why Newspaper Advertising is Better Than Television" and another, a brief presentation, is designed to show that television's audience is "highly fragmentized," while the newspapers deliver a "total audience."



As the program unfolded, it was pointed out that "Total Selling" has five major elements: a new and expanded bureau research program; expanded coverage by the bureau of major business conventions; depth selling—selling of individual industries and individual companies by the newspaper's field forces; new sales tools for daily use by bureau member newspapers; a series of promotions, including three industry promotions in the automotive, food and appliance fields, and four season efforts—home improvement, summer sales, back-to-school and Christmas.

It was stressed that "Total Selling" is a "unified" effort by various elements of the newspaper business—the Newspaper Advertising Executives Assn., the American Assn. of Newspaper Classified Advertising Managers and the National Newspaper Promotion Assn. Bureau material will be channeled to these organizations as well as individual newspapers.

Edward A. Falasca, creative vice president of the bureau, said that since last October, the bureau has produced and issued 349,446 pieces of material to member newspapers, advertisers, agencies and others, plus 250,000 items ordered by members for use by their staff.

Mr. Falasca disclosed the first of the three industry promotions—"Live Better By Far With a Brand New Car" automotive drive from April 6-18—was conducted in 534 markets. He said that "there's not the slightest doubt from advance reports in some areas that there were some dazzling successes."

Mr. Lipscomb noted that food companies spend only about 25% of their advertising budgets in newspapers, while food stores and chains allocate 92% of their expenditures to newspapers. The "total selling" effort, he said, is enlisting the cooperation of the food retail industry in an attempt to persuade food manufacturers and processors to channel a larger portion of their advertising money into newspapers.

WRAL-TV office building • NBC-TV's affiliate in Raleigh, N.C., dedicated its $300,000 administrative building April 15. Robert W. Sarnoff, the network's board chairman, cut a ribbon of video-tape to open the 11,000-sq. ft. structure adjoining WRAL-TV's production building which was completed about a year ago. WRAL-TV serves an area of 2 million people in central and eastern North Carolina.

ANPA tells Mutual no, Defense ok's coverage

Mutual claimed a victory for broadcasters last week in their continuous battle for "freedom of access to the news" along with newspapers. Mutual's opponent: The Bureau of Advertising of the American Newspaper Publishers Assn., which initially denied, then approved, the network's request to cover Defense Secretary Neil McElroy's speech during the bureau's annual dinner in New York last Thursday.

Bureau officials had advised Mutual earlier in the week that they could not permit the broadcast because they were acting "in accordance with an agreement between the secretary's office and the bureau dinner committee." Robert F. Hurleigh, MBS vice president for news, asked Asst. Defense Secretary Murray Snyder for clarification regarding this "agreement." Mr. Snyder immediately wired ANPA that "the Department of Defense has no objection whatsoever to coverage by any media of this address." ANPA then reversed its stand and permitted Mutual to broadcast Mr. McElroy's speech.

Genii award to Dinah

Radio & Television Women of Southern California honored Dinah Shore Tuesday (April 21) with the group's Genii Award as outstanding feminine broadcast personality of the year. Jack Benny made the presentation at the Club's fifth annual awards banquet, at the Beverly Hills Hotel.

Among the other honors given was a public service award to Lenore Kingston for organization of radio amateurs to cope with disasters.

PGW makes new pitch

Peters, Griffin, Woodward, station representative, last week showed its new slide presentation for local advertising

Sound Appearance for a Top Position

"SOUND THAT REPRESENTS OUR STATION SHOULD BE OF GREATER QUALITY AND BRILLIANCE THAN ANY OTHER SOUND ON THE STATION"

These leadership stations agree and have leased the Channel Image Identification Plan since it was unveiled in March. They now have an excitingly distinctive sound personality in their markets.

Air assignment: Montana riot

There were more radio-tv newsmen in Deer Lodge, Mont., during the recent prison riot than there were hostages. More than 30 newsmen from 16 radio-tv stations in Montana, Washington and Oregon converged on the scene as rioting prisoners held 21 hostages inside the prison.

Within a half-hour of the riot's beginning, KANA Anaconda, Mont., closest station to Deer Lodge, was on the air with around-the-clock reports, including coverage for the *New York Daily News* and the *London* (England) *Times*.

On the riot's second day, CBS flew a team including Grant Holcomb and cameraman George Hause from Los Angeles to supplement the coverage it received from KBOW Butte and KGVO Missoula.

Network Feeds • NBC relied on KXLF-AM-TV Butte and KTVT (TV) Salt Lake City, for its coverage. KXLF-TV film was also supplied to Telenews and Movietone.

Spokane, Wash., stations on the scene included KXLY-AM-TV, KREM-AM-FM-TV and KHQ-AM-TV. During the riot, KREM fed reports to more than 20 stations throughout the U.S. and Canada. KREM's Art McDonald was one of three newsmen who entered the prison to hear grievances of the rebellious convicts on the riot's second day.

KUDI Great Falls, reports a local men's clothing shop chartered a plane and flew staff members to Deer Lodge to provide sponsored coverage.

Other stations covering the riot included KGW-TV Portland, Ore.; KGEZ Kalispell, KBMY Billings, KOOK Billings, KOPR Butte, KOYN Butte, and KBTK Missoula, all Montana.

and sales people, called "Mr. Thinkbigly Goes to Town," the sales pitch brings up to date an earlier version (introduced in 1957) called "A Local Affair."

It approaches spot tv from the viewpoint of the man who "makes the decisions" for a national advertiser, then proceeds to explain the differences between spot and network, stressing audience and coverage factors and attempts to put over the theme that spot tv is a "basic tool" for advertising. It contains filmed commercials for such sponsors as Procter & Gamble's Zest, Piel's beer, Chevron gasoline and Lipton tea products.

Tv tape coverage: 84% by fall—Meighan

About 84% of all U.S. television homes should be covered by tv-tape equipped stations by September, Howard S. Meighan, president of Videotape Productions, New York, predicted Thursday (April 23) before a Radio and Television Executives Society luncheon meeting in New York.

Reporting on the progress of videotape since its introduction in 1956, Mr. Meighan also expressed his views on future developments of the process.

Mr. Meighan said there are three relative benchmarks against which the status of tape should be checked—speed, quality and cost. "The two chief characteristics of the speed of tape," he pointed out, "are the saving of valuable man hours per net show hour and being able to get a show 'on the road' quickly." Mobile units, with video-tape recorders, will add new dimensions, he said. As to quality, Mr. Meighan forecast greater similarity between live and tape shows with the "almost sure introduction of 4½-inch cameras to replace present 3-inch standard Image Orthicons." The cost of tape is due to come down "about 50%" within the next five years, he said. "In sum," Mr. Meighan added, "better cameras, better recorders, better tape and better knowledge of the problems of use are all a part of the increasing quality of this system which has been tailormade for television, and will hasten the obsolescene of film for tv."

CBS gathers changes, issues new rate card

CBS-TV has incorporated all of its rate and discount changes, most of which have been reported previously, in a new rate card (No. 14), the first published by the network since March 1957. The new card is effective May 1. Two new changes not reported before:

(1) The discount provided in the Extended Market Plan—if all EMP stations are ordered by the advertiser—is increased from 20 to 25%.

(2) Station-hour discounts were revised, using 30 station hours as the base for minimum discount of 5%, the first such change in the weekly discount structure since 1952. The net percentage discount ranges from the 5% for less than 30 station hours to 15% for 100 or more station-hours per week.

The new card no longer breaks down the station lineup into classifications of basic required, basic options, supplementary interconnected or supplementary non-interconnected—the so-called "must buy" station lists. It incorporates such previously announced changes as new affiliates and station rate increases, reduction of weekend afternoon time rates, introduction of a Class D rate before 9 a.m. and liberalization of the annual discount policy for clients with both consecutive and alternate-week schedules.

Daylight Savings Time activates tape relays

The three television networks were prepared to meet the contingencies of Daylight Savings Time yesterday (April 26), with repeat feeds on tape permitting the large majority of stations remaining in Standard Time to carry programs in the same local time. A uniform exception to the arrangement are programs which demand live coverage, such as sports and special events telecasts.

At NBC-TV, the main exception is on the West Coast. The plan provides clock-hour release of programs in the evening schedule and a combination of two- and one-hour delay repeat for the daytime schedule. In Washington and Oregon, where stations remain on Standard Time, programs will be carried on the outlets one hour earlier because there are not sufficient facilities available to provide a one-hour delay.

At CBS-TV, the program schedule on the West Coast is this: All shows prior to 1 p.m. will be released one hour earlier, local time, than release in New York. After 1 p.m., programs will be released on a "clock time" basis. In the Pacific Northwest, programs will be carried an hour earlier.

At ABC-TV, all programs will be carried in clock time except in the Mountain and Pacific Northwest states where sufficient facilities are not available. Programs there will be fed at varying times.

Tv city expansion

Television City in Hollywood will be expanded through the addition of extra floors to the existing building, Louis G. Cowan, president of CBS-TV, announced last week. The building now consists of a full first floor and partial second and third floors, he said, and it will be built into a full four-story structure. Construction will begin this sum-

Superlative Equipment

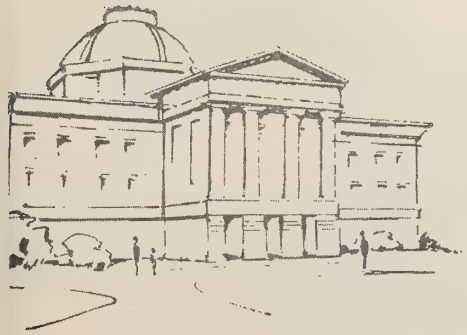
means more viewer attention

Radiating effectively from the Raleigh-Durham area

Good programming attracts viewers — good "delivery" holds them! And WRAL-TV provides its skilled staff with the finest facilities....

The station is furnished throughout with new General Electric equipment.

There are two mammoth studios, one 60 x 60 feet and another 60 x 40 feet, each with a 20-foot ceiling.



The studios are equipped with seven cameras, a rear-screen projector, and three 70-circuit lighting boards.

A $100,000 remote unit is equipped with four cameras.

North Carolina's first Ampex Videotape recorder provides money-saving advantages with "live" quality for commercials and programs.

mer and is expected to be completed within two years. The expansion will provide additional office space needed to accommodate the larger production staffs at Television City, Mr. Cowan said.

Georgians honored by AP for reporting

Georgia AP Broadcasters Assn. presented awards for outstanding newscasting in the state during 1958 at an association dinner Wednesday (April 22).

Categories and winners:

General News • Superior: WBML Macon, WGAU Athens. Excellent: WSB-AM-TV Atlanta, WKEU Griffin, WDUN Gainesville. Meritorious: WCOH Newnan.

Sports • Meritorious: WSB, WBBQ Augusta. Honorable mention: WBIA Augusta, WCOH Newnan.

Farm News • Superior: WSB. Excellent: WCOH. Honorable mention: WSAV Savannah.

Special Events • Superior: WSGA Savannah. Excellent: WBML. Honorable mention: WBBQ, WAVO Avondale Estates.

Features • Excellent: WSB-AM-TV. Meritorious: WSGA, WBBQ. Honorable mention: WDUN.

Editorial & Interpretation • Superior: WDEC Americus. Excellent: WSB-AM-TV, WGST Atlanta, WSGA. Meritorious: WBBQ, WDUN.

Real reason

The West Virginia Broadcasters Assn. has scored the *Saturday Evening Post* for its half-year-old policy of accepting alcoholic beverage advertising (BROADCASTING, April 6). The West Virginia broadcasters in a resolution stated their wish that "such changing of standards had been the result of objective decision rather than retreat from financial pressure."

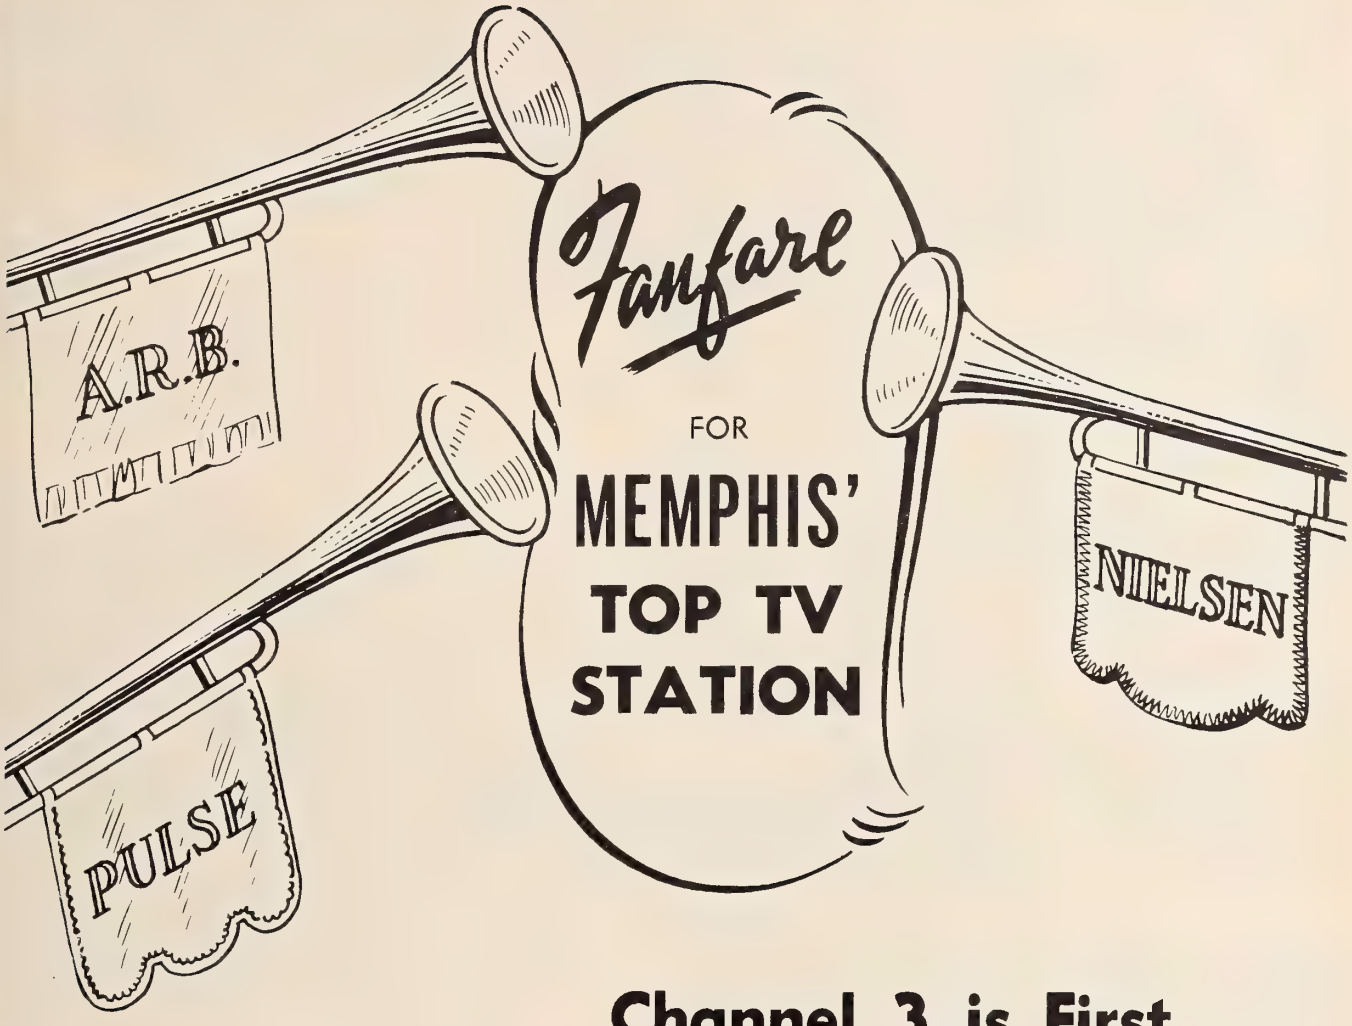
The resolution noted that the *Post* expects $5 million from liquor ads in 1959 and that the magazine's black-and-white page ad revenue of last year "declined by approximately $11½ million." The broadcasters went on to express "little concern" over the influence of *Post* advertising in West Virginia, where they said 45,595 homes receive the publication in comparison with 395,000 tv homes and over 500,000 radio homes "which will remain free" from liquor advertising.

Changing hands

ANNOUNCED • *The following sales of station interests were announced last week, subject to FCC approval:*

• KOMO-TV Seattle, Wash.: Sold remaining one-third to two-thirds owner Fisher's Blend Station Inc. by Theodore R. Gamble and C. Howard Lane for $1.83 million. KOMO-TV is on ch. 4 and is affiliated with NBC-TV.

• WDAU-TV Scranton, Pa.: 75% sold to Mrs. M.E. Megargee and family for $700,000 by WCAU Inc., former licensee of WCAU-AM-FM-TV Philadelphia before it was bought by CBS last year. Megargee family, which owns WGBI-AM-FM Scranton, now owns 100% of WDAU-TV. Megargees sold 75% interest to WCAU Inc. for $650,000 in February 1956 and transaction represents repurchase of tv outlet. WDAU-TV is on ch. 22 and is affiliated with CBS-TV.



• WPIC-AM-FM Sharon, Pa.: Sold by John Fahnline Jr., A.W. McDowell and associates to Sharon Broadcasting Co. for a total sum including substantial current assets and real estate of $510,000. Sharon Broadcasting is owned equally by William H. Rich and Alastair B. Martin, owners of WMGW Meadville, Pa. Mr. Rich is a former ABC account executive. WPIC is on 790 kc, with 1 kw, day.

• KIVA (TV) Yuma, Ariz.: Sold to Electro Investors Inc. by Harry C. Butcher for the payment of $241,000 in debts. Electro Investors will be owned 25% by Mr. Butcher who will turn over promissory notes to the firm totaling $150,508. Majority owner (67%) of Electro is well-known financier Floyd B. Odlum. KIVA (TV) is on ch. 11 and is affiliated primarily with NBC-TV.

• WHYE Roanoke, Va.: Sold to Joseph Mullen and Jon A. Holiday (program director WIST Charlotte, N.C.) by Jefferson Broadcasting Corp. (Sherwood Tarlow group) for $125,000. Other Tarlow stations include: WHIL Medford, Mass., WARE Ware, Mass., WWOK Charlotte, N.C., WLOB Portland, Me., and WJBW New Orleans, La. The sale was handled by Paul H. Chapman Co. WHYE is on 910 kc with 1 kw, day.

• WILI Willimantic, Conn.: Sold to Herbert C. Rice (former owner of KVNI Coeur D'Alene, Idaho) by Windham Broadcasting Co. for $107,000. The sale was handled by Paul H. Chapman Co. WILI is on 1400 kc with 250 w.

• WARN Fort Pierce, Fla.: Sold to South Jersey Broadcasting Co. (WKDN

Fellowships include tuition and additional sums of $1,500 to $2,500 for a year's study leading to a Master of Arts' degree. Also being accepted are applications from "a few experienced professionals who may want to broaden their perspective through a return to academic life." These men will be eligible for Annenberg Fellowships with a maximum value of $6,500. The graduate school was founded with funds provided by Walter H. Annenberg, president of Triangle Publications. All

This is the kind of hold our station has on people . . .

What people? Say, aren't sponsors people? Actually, aren't account executives and time-buyers people? Why have we always assumed that only our viewers are people? Time we stopped. Our one story is for both.

They look. *You* buy. *You* buy because *they* look, in confidence, in multitude and in wealth. We offer identical plus values to you both. A station strong in audience loyalty because of local civic interest, public service, human-type programming, complete dearth of double-talk-type announcing and triple-spotting. A rewarding setting for honest wares.

So our area people live with us nearly constantly* and our sponsor people hold with us long. Let the George P. Hollingbery people beguile you with figures that (with those facts) show America's 17th quantity market to be significantly more potent than the figures say.

**George P. has evidence-ratings, mail count, you-name-it.*

questions should be directed to Dr. Patrick Hazard, 201 S. 34th St., Philadelphia 4, Pa.

• WVET Rochester, N.Y., has awarded its first annual WVET $1,000 scholarship for graduate study at the Eastman School of Music, Rochester. The winner was Mrs. Patricia Selover Hanson, reports the station, who is "wife, mother, artist and student."

• The Illinois Broadcasters Assn., meeting in Peoria April 16-17, adopted a resolution declaring its "unequivocal opposition to government controls of radio and television programming and editorializing. . . ." The association urged NAB and other state broadcaster associations "to join the fight for freedom for broadcasting with active and vigorous support. . . ."

• Capital Cities Television Corp., radio-tv station ownership group has established its national headquarters office at 65 E. 55th St., New York. The company's officers are: Frank M. Smith, president; Michael Joseph, vice president in charge of radio, and Harmon L. Duncan, J. Floyd Fletcher, and Thomas S. Murphy, all vice presidents. Stations owned and operated by Capital Cities are WTEN (TV) and radio companion WROW, both Albany-Troy-Schenectady, WTVD (TV) Raleigh-Durham and WPRO-AM-TV Providence. All are CBS affiliates.

• Joe Wolhandler Assoc., public relations firm, moves its New York office to penthouse at 280 Madison Ave. New phone: Oregon 9-8386.

• Columbia Broadcasting System Foundation has contributed $100,000 to the Lincoln Center for the Performing Arts, according to Clarence Francis, chairman of the center's $75 million fund-raising campaign. Construction of the center will begin May 14. The 12-acre project in midtown New York will include facilities for Philharmonic Hall, a new Metropolitan Opera House, a repertory theatre, a theatre for the dance, a chamber music and recital hall.

• The John M. Branham and the John M. Petrie Memorial Scholarship Awards will be offered again this year, Monroe H. Long, board chairman of the Branham Co., announced last week. The college scholarships were established last year in commemoration of the company's 50th anniversary as national advertising representative and named after the company's founders. To be eligible for the two awards, applicants must be either employes or direct descendants of employes of Branham represented newspapers, radio or tv stations. Winners, chosen by a Columbia U. board, will be announced next September.

• The Metropolitan Educational Television Assn. of New York has reported that the New York State Education Dept. budget for educational tv through March 1960 has been cut to $550,000. META said the department asked for $850,000 but the state legislature approved the lower figure, which was said to be $50,000 lower than a $600,000 budget for a six-month period ending last March for programming in New York City alone.

• N. E. Paton Jr. Assoc., Kansas City, Mo., has added public relations consulting for radio stations to its services. The company has moved into larger offices in the Wirthman Bldg. where it has been since its founding three years ago.

• ABC Radio reports that its new affiliates are WBBC Flint, Mich., effective last Monday (April 20) and KBND South Bend, Ore., effective yesterday (April 26). WBBC is owned by Booth Broadcasting Co., of which John L. Booth is president and Joseph R. Fife is general manager. KBND is owned by Central Oregon Broadcasting Co., Frank H. Loggan president and general manager.

• Three George Polk Memorial Awards went to broadcast newsmen. They were Chet Huntley, commentator, and Reuven Frank, producer, NBC-TV, for the tv documentary, *Argentine Crisis* (foreign reporting category); Gabe Pressman, WRCA-TV New York, for tv reporting, and Jay McMullen, writer-producer of CBS News for a show on juvenile crime heard on CBS Radio (radio reporting category). The awards, made by the Long Island U. Dept. of Journalism were established in memory of George Polk, a CBS correspondent killed in Greece in 1948.

• Irving Gitlin, director of public affairs department of CBS News, last week was presented a Sidney Hillman Foundation award for his supervision of "Unit One," which produced documentaries for CBS Radio in 1958. Praised at the awards luncheon in New York were the programs *Who Killed Michael Farmer?* and *POW—A Study In Survival.* Mr. Gitlin's prize was a citation and $500 from the Foundation which was established in 1946 as a memorial to the late president of Amalgamated Clothing Workers of America.

• Storer Broadcasting Co. has reported net earnings after taxes for the first quarter of 1959 were $1,024,183, compared with $751,204 earned in the corresponding period of 1958. Net earnings per share amounted to 41.4 cents in the 1959 period against 30.4 cents in 1958, based on a total of 2,474,750 shares of common and Class B common stock outstanding in both years. This year's earnings include the results of operations of WITI-TV Milwaukee which was acquired last December. Other Storer stations are WGBS-AM-FM-TV Miami; WJBK-AM-FM-TV Detroit, WSPD-AM-FM-TV Toledo, WAGA-TV Atlanta, WJW-AM-TV Cleveland, WWVA-AM-FM Wheeling, W.Va., and WIBG-AM-FM Philadelphia. The Storer purchase of KPOP Los Angeles and sale of WAGA-AM-FM Atlanta are yet to be submitted for FCC approval.

• KNXT (TV) Los Angeles has published rate card No. 10, raising the base evening hour one-time rate from $3,750 to $4,250. New rates were effective April 1.

• When WGN-AM-TV Chicago moves to new quarters in the spring of 1960, the *Chicago American* will take over its space in the WGN Building and be published by the parent Chicago Tribune Co. WGN Inc. plans to move its radio-tv properties to a location on the city's northwest side within perhaps a year, with ground expected to be broken in the next few weeks. The present WGN facilities will be expanded from four to eight floors to accommodate all departments of the *Chicago American.* Daily and Sunday editions will be printed on *Tribune* presses. The *American's* headquarters presently are located in the Hearst Building.

• Keystone Broadcasting System has extended its service to Alaska, completing affiliation agreements with four stations in the 49th state, it was announced last week. The stations are KLAM Cordova, KINY Juneau, KIBH Seward and KIFW Sitka, according to Blanche Stein, station relations director.

• WPOM Pompano Beach, Fla., commenced operation April 4. William A. Knight is general manager. Other staffers: Mike Thomas, program director; C.G. Huey, chief engineer; Hal Heller and Bob Utley, disc jockeys. WPOM's coverage extends from Fort Pierce to North Miami. The new daytimer is on 1470 kc with 5 kw.

• Rep appointment

• WHAT Philadelphia names Bob Dore Assoc., New York.

FEDERAL AX FALLS ON OPTION TIME

FCC knocks out ½-hour of networks segments, makes other trims

Television networks got the bad news last week.

The FCC issued a formal rulemaking notice proposing to change significant elements of option time (BROADCASTING, April 13).

The Commission proposed to—

• Reduce option time to two and one-half hours in each segment of the broadcast day. Present rules permit the optioning of three hours.

• Count in option time "straddle" programs which begin in option time but run over into station time, or begin in station time and run into option time. Under present rules only that part of the program in option time is counted as option time.

• Require networks to give stations 13 weeks' notice before pre-empting an option time segment—or until the end of the contract with a non-network advertiser, whichever is shorter. But in any event at least a four-week call must be given. Under the present rule, the network may capture its option time on eight weeks' notice.

• Permit affiliates to reject network programs as unsuitable for local audiences, even after the series has started, or permit affiliates to substitute a more suitable local program for a network program when a station believes it is in the best interest of its audience to do so. Under present rules, affiliates may reject a program only when offered, and also may pre-empt network time only for an "outstanding" local program.

Comments on this rule were requested by June 22, with replies up to 30 days thereafter. Comments on how this would apply to radio were requested, also.

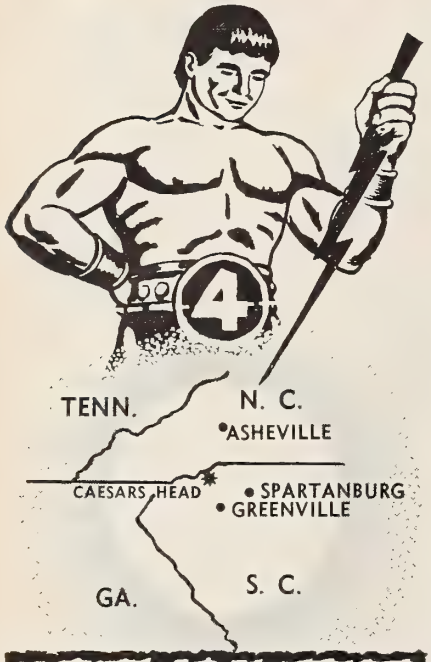
Vote is Split • The proposal had the full backing of four FCC commissioners.

Comr. Frederick W. Ford concurred in the notice, but expressed the view that the proposed rule does not entirely eliminate the legal question, although it minimizes it.

The legal question is whether option time violates the antitrust law. The Dept. of Justice maintains that it does. Last February, Justice Antitrust Chief Victor R. Hansen told the FCC that option time runs "afoul" of the Sherman Antitrust Act (BROADCASTING, March 9).

A dissent *in toto* was expressed by Comr. Rosel H. Hyde. Mr. Hyde stated that he felt the FCC should forbid option time entirely and "rely on the self-regulating force of competition." He said the proposed rule illustrates how regulation "breeds further and more complicated regulation." He said that last week's move indicated a trend toward involving the Commission more and more deeply in regulating terms and conditions under which stations make program choices.

Comr. T. A. M. Craven dissented



The face that launched a million sales: GLENCANNON

From Beer (Olympia) to Bakery Products (Holsum), the pre-accepted "Oscar"-"Tony"-"Emmy" Award Winning face, name and talent of Mr. Thomas Mitchell is launching sales—big sales for advertisers all over the country. As Glencannon, in the hilarious half-hour series of high comedy on the high seas, this beloved character stands ready to steer sales your way, too. What's more, Thomas Mitchell will sell for you personally, at the all-important point of sale.

only to those proposals which would reduce option time by 30 minutes and construe straddling programs as entirely within option time.

The option time proposals emanate from the recommendations of the Barrow Report that option time be prohibited on the ground that it violated the antitrust laws.

This was one of the recommendations made by the Network Study Staff, headed by U. of Cincinnati Law School Dean Roscoe Barrow. A hearing on all these recommendations was held by the whole FCC in the spring of 1958. Virtually all witnesses testified to the importance of option time and the seriousness to networking if it was prohibited.

Early this year the FCC made findings on the option time question and referred them to the Justice Dept. It was to these findings that Mr. Hansen replied in February. The Commission found that option time was "reasonably necessary" to networking and that networking was in the public interest.

The purpose of deleting 30 minutes from option time, the FCC said last week, was to provide "greater latitude to stations to select among alternative program sources." It also stated that this move would provide non-network groups with an additional period of prime time. Such groups include, the Commission listed, program suppliers, station representatives, and local, regional and national advertisers.

There are four segments to the broadcast day. The first runs from 8 a.m. to 1 p.m.; the second, 1-6 p.m.; the third, 6-11 p.m., and the fourth, 11 p.m.-8 a.m.

In commenting about the proposed new straddle program regulation, the Commission noted that the new interpretation would not make it impossible for a station to carry such a program, but would require the station and the network to remove from option time the amount of run-over time.

Public Affairs Exempted • There would be an exception to this measure. Live network programs of national importance involving educational, cultural or public affairs, special events or sporting events which run over from option time to station time would not fall under the new terms, the Commission said. It emphasized, however, that this exemption would not apply to dramatic programs or entertainment variety—the length and time schedule of which were under network control.

The FCC discussed variations on the proposed 13-week rule, including the question of how to count multiple-sponsored programs. In this case, the Commission said, the suggested rule would provide that a network's option could not be exercised prior to the latest termination date of the several contracts.

In various sections of the proposed rule making notice, the Commission pointed out that none of the option time rules, or the proposals, prohibit a station from accepting a network program in or out of option time. The purpose of the option time rules, it emphasized, was to prevent a network from enforcing contractural rights without some protection to the station.

Mack trial witness parade is underway

The government said it probably won't call A. Frank Katzentine, one of three losing applicants for ch. 10 in Miami, to testify in criminal charges against former FCC Comr. Richard A. Mack and his Miami lawyer friend Thurman A. Whiteside. They are charged with conspiring in behalf of National Airlines in the FCC's February 1957 grant of ch. 10 to an NA subsidiary, Public Service Tv Inc.

Federal District Judge Burnita S. Matthews said if Mr. Katzentine is called by Justice Dept. prosecutor J. Frank Cunningham, then she will permit a defense subpoena of Sen. Estes Kefauver (D-Tenn.). Defense counsel Nicholas Chase (Mack) and Arthur Hilland (Whiteside) say they feel Sen. Kefauver's testimony would contradict that of Mr. Katzentine.

Judge Matthews denied a defense motion asking for appointment of a government-paid psychiatrist to help in questioning Mr. Katzentine. Mr. Chase, pleading indigence on Mr. Mack's part, asked that the government furnish a psychiatrist as well as pay for the services of Mr. Mack's doctor while he is undergoing trial and $25 an hour for the services of an accountant. The judge deferred action on the last two requests.

She also denied a motion by Mr. Chase that Sherman Adams, former presidential assistant, and Gerald Morgan, former presidential counsel, be subpoenaed at government expense.

Will Subpoena Two • Judge Matthews agreed to a move to subpoena Washington attorney William Porter and former White House aide Roger Robb, both of whom acted as counsel to Mr. Mack in the House Legislative Oversight subcommittee hearings.

It was agreed last week that FCC Chairman John C. Doerfer, who is under defense subpoena along with five of the other six FCC members (all but Comr. John S. Cross), could make a deposition at his office tomorrow (April 28). Chairman Doerfer is scheduled to be in Tokyo, Japan, by May 4 to discuss the possibility of a cable between the U.S. and Japan.

New appliance décor...and

NATIONAL STEEL

Fresh colors and textures, custom-tailored to fit any designer's imagination, are on tap at National Steel for the appliance industry and many others.

For National, through its new Enamelstrip Division, is opening an age of fresh product appearance and cost savings. How so? Through two lines of beautiful pre-coated metal in coils. One: metals with enamel coatings in almost every color imaginable. The other: metals with laminated vinyl coatings in an almost limitless variety of colors, patterns and textures—every one of them with high resistance to abrasion, fire, scratching and stain.

Think of it for your products—the fresh appeal of new colors or textures—plus eight built-in manufacturing economies such as eliminating painting operations and reducing capital equipment.

Now enamel-coated and vinyl-laminated metals take their place alongside the fine cold rolled sheet steels and zinc-coated steels with which National has long served the appliance industry and others through its six major divisions: Weirton Steel Company, Great Lakes Steel Corporation, Stran-Steel Corporation, The Hanna Furnace Corporation, National Steel Products Company and, of course, Enamelstrip Corporation.

NATIONAL STEEL CORPORATION, GRANT BUILDING, PITTSBURGH, PA.

FCC PROPOSAL: STUFF IN MORE V'S

• Majority report to Senate group reveals interim plan

• Would expand vhf band to 50 channels in military swap

• Alternatives: live with present set up; go whole-hog uhf

The FCC last week announced it is going to try to shoehorn more vhf stations in problem areas—by cutting down on mileage separation.

This is the majority view for the interim measure to meet head-on the five-year-old tv allocations problem.

The decision was made known last week when the Commission's statement to the Senate Commerce Committee was made public. The statement was submitted in lieu of a hearing because the Senate committee is tied up in other matters at present.

The report also held out a 50-channel expanded vhf system as the most desirable and ideal solution to tv's intermixture problem. This would depend, it was pointed out, on persuading the military services to surrender space they now occupy above ch. 13, in exchange for the uhf television portion of the radio spectrum.

Consultations between FCC and military officials are expected to get underway soon. The military already have agreed to sit down with the FCC and consider the problem.

Alternate Solutions • Failing this, the Commission said, only two possibilities are left:

• A continuance of the present 12 vhf-70 uhf system, or

• An all uhf system.

The Commission's views were opposed by Comrs. Robert T. Bartley and Robert E. Lee.

Mr. Bartley concurred in the long range viewpoint, but dissented on the interim measure.

The interim action is premature, Mr. Bartley said, and may prejudice any long range program other than an all vhf system.

If the expanded vhf system is feasible, Comr. Bartley said, the first areas which should be provided for are those without vhf service, then those with a single vhf service, etc.

If the expanded vhf system cannot be accomplished, an interim plan should mesh with a long range plan, Mr. Bartley said, and added:

". . . it may well be that a more vigorous program of deintermixture toward uhf markets is the only solution."

Mr. Lee, who as of last weekend had not written his views, takes the position, it was understood, that the ultimate allocation for all of tv is in the uhf band.

He is said to be dubious that the Commission will be able to persuade the government to relinquish vhf frequencies for tv.

Hearings Soon • In making public the FCC's presentation (BROADCASTING, March 30 et seq.), Sen. Warren G. Magnuson (D-Wash.), chairman of the Senate committee, declared that hearings on the entire allocations' problem would be scheduled in the near future as soon as the committee's agenda would permit.

Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, said he could not comment on any of the FCC's alternatives because it all "is a matter of determining how many channels we might need." He pointed out that the whole subject of allocations is up for study by his communications subcommittee. This was a reference to the overall spectrum study which the House committee has undertaken with an initial $150,000 appropriation.

Rep. Harris said he had not rejected anything in the FCC statement. This was in answer to published reports that the Commerce chairman had "rejected" the FCC's recommendation for a 50-channel, vhf television system.

Sen. John A. Pastore (D-R.I.), chairman of the communications subcommittee of the Senate Commerce Committee, said he had had no time to study the document and therefore could not comment.

One of the salient recommendations in the FCC report was for Congressional legislation to require all tv receivers in interstate commerce to be capable of receiving all tv channels. A second suggestion was for Congress to empower the FCC to establish standards for receiving sets.

Manufacturers Will Consider • Electronics Industries Assn. Executive Vice President James D. Secrest said that the FCC's recommendations would be considered by radio-tv manufacturers at EIA's Chicago convention May 20-22. What this position would be, Mr. Secrest said, could not be foretold at this time.

Radio-tv manufacturers historically have resisted any attempt to grant the FCC the right to set standards for receivers. The most recent evidence of this was during the FCC's 1950 color tv hearings when the FCC tentatively approved the then CBS "mechanical" field sequential system if manufacurers would promise to produce receivers with "bracket standards" permitting reception of both color and black-and-white transmissions. Manufacturers virtually unanimously refused to accept this barrier to their independence.

The FCC's decision to adopt a policy of squeeze-ins of vhf channels in various tv markets through reduction in mileage separations—in order to equalize the competitive factors among the three networks—galvanized the Assn. of Maximum Service Telecasters to call a special board of directors meeting in Washington for Saturday and Sunday (April 25-26).

The special meeting was called for the purpose of discussing the FCC's statement on tv allocations, Lester W. Lindow, AMST executive director, said.

Report Presented • The 42-page FCC statement on tv allocations was submitted to the Senate Interstate and Foreign Commerce Committee Friday, April 17. Copies also were made available to the House Commerce Committee.

On Tuesday, the Senate committee made the statement public, including a statement by its chairman, Sen. Warren G. Magnuson (D-Wash.).

The document, prepared as a statement by FCC Chairman John C. Doerfer, is in three parts: (1) an introduction, (2) a discussion of various alternatives, and (3) a summary.

In his introduction, Mr. Doerfer referred to the fact that the Commission has met frequently on this subject and has had a special staff working on the problem.

This staff included Broadcast Bureau chief Harold G. Cowgill, Standard & Allocations Division chief Hart Cowperthwait, Technical Research assistant chief Arnold Skrivseth, and Broadcast engineers McIvor L. Parker and Louis R. Rein.

In commenting on the report of the Television Allocations Study Organization, Mr. Doerfer said that the data on equipment was based on current design and performance and estimates of future improvements were left for the Commission to determine.

Mr. Doerfer said that "substantial"

agreement had been reached on two general conclusions:

• That no rearrangement of the 12 vhf channels can provide a nationwide, competitive tv system.

• That deintermixture — eliminating the assignment of vhf and uhf channels to the same communities—cannot provide a long-term answer to the allocations "dilemma."

By "substantial" it was presumed Mr. Doerfer meant that five of the commissioners favored that position.

Comr. Robert T. Bartley objected to that part of the presentation which recommended interim action. He said he was afraid it would prejudge long term action.

Comr. Robert E. Lee has maintained that the proper move was to all uhf. He is preparing a statement setting forth his views.

The Alternatives • Five "alternative" policies were studied, the document stated. These were:

• A 50-channel expanded vhf system, retaining the present 12 vhf channels.

• A 50-channel vhf system, beginning at the present ch. 7.

• A 25-channel vhf system, beginning at the present ch. 7.

• The present 82-channel system continuing to use both the present 12 vhf channels and the 70 uhf channels.

• A 70-channel all uhf system.

In relating the current exploration with the military on the possible release of additional vhf frequencies for television, Mr. Doerfer declared that he was hopeful that a "definitive" answer would be given "within the next few months." He referred to the negative answer the Commission got on the same request in 1956.

This was the attempt made by former FCC Chairman George C. McConnaughey to also secure extra vhf channels from the government users. This request was turned down because of national defense requirements plus the cost of moving non-government (largely military) out of present assignments (BROADCASTING, April 16, 1956).

The FCC chairman called attention to the fact that if and when additional vhf frequencies are made available for non-government use, the Commission will have to consider the needs of non-broadcast services as well as the television users.

The overall spectrum requirements are now the subject of an FCC study, covering the 25-890 mc area. This includes the tv and fm allocations.

The Commission last week announced that public hearings would commence on this inquiry May 25. Previously the Commission had asked for and received written comments.

Mr. Doerfer called attention to the failure of the FCC's "hope for commercial success of uhf television." Since 1952, he said, almost half of the 369 uhf permits have been surrendered and 90 of the 165 uhf stations built and put into operation have ceased broadcasting. Uhf receivers account for less than 10% of total tv production, he said.

In the spring of 1958 there were only 3.2 million tv homes viewing one or more uhf stations, Mr. Doerfer pointed out. This compares with 3.7 million uhf homes in 1956, he said.

"Any allocation plan designed to meet the nation's television needs must provide opportunity for expansion. . . . The task is to shape an application plan that will foster an expanding and competitive nationwide television system. Such an allocation plan should provide adequately, within the framework of private operation, for coverage of all the people, for local community outlets, for competition particularly in the larger markets, and for educational needs."

The Commission has decided, the document pointed out, that the desir-

WILLIAM TELL

WILLIAM TELL PACKS THE BIG SELLING PUNCH! And whatta punch! Socko in Cleveland with audience research comments like this: "well acted," "wholesome," "fast-moving," "suspenseful.*" Socko in Pittsburgh, Houston, and all around the country for such advertisers as Meadow Gold Dairy, Fisher Foods, and Lucky 7 Stores. And soon William Tell comes out swinging in 5 new markets via the Triangle stations who've just bought into the big excitement. What's more, William Tell keeps punching for advertisers with unprecedented merchandising, on-the-air, at-point-of-sale, everywhere! And it's all part of the buy...when the buy is "THE ADVENTURES OF WILLIAM TELL."

Allocation shoehorn: tv's tight fit

Here is the summary statement by FCC Chairman John C. Doerfer which concluded his official presentation to the Senate Commerce Committee. In it he recapitulated the sense of his colleagues that an expanded, 50-channel vhf television system is the most desirable goal and the reasons why most of the FCC feel that an interim, vhf drop-in policy now is best for immediate and long range solutions. The text follows:

On the other hand, both of these alternatives also have substantial disadvantages. The effectuation of an 82-channel system depends on nationwide conversion, which can be achieved only by a Congressional requirement that all sets shipped in interstate commerce shall be equipped to receive both vhf and uhf channels. Such a statute would not guarantee the success of uhf, but it would remove one of the major obstacles to its success. At the same time it must be recognized that because of the range of frequencies involved between the low vhf and the high uhf, the public probably would be required to pay more for good quality receiving equipment than under an expanded vhf system.

Likewise, a majority of the Commission prefers an expanded vhf system to an all-uhf system because of the greater likelihood under a vhf system of providing adequate nationwide coverage with a smaller number of channels. The Commission cannot move television to the uhf unless and until it has strong evidence that uhf over-all can provide service equal to that in vhf without requiring major increased outlays by the public generally. Such evidence is not yet forthcoming, although as we pointed out there have been some developments which show promise.

We are hopeful that within the next few months we will know whether an expanded vhf system is a feasible eventuality. However, as we have emphasized, the implementation of this allocation solution, or of any other, will require a long transitional period.

As interim cure, some mileage reductions

Meanwhile, some interim action is clearly needed. The Commission is of the view that immediate steps must be taken to remedy the critical shortages of facilities in a number of important population centers. Characteristically, these markets have only one or two vhf stations, and little or no uhf set conversion. The only practicable short-run solution in these cases is to add vhf assignments, even if this requires less than our minimum spacing requirements. Only in this way can we obtain sufficient competitive outlets to serve the public interest.

This interim policy must be carefully circumscribed to be consistent with our long-range allocation policy. It must be focused on alleviating only the most critical shortages.

If the future allocation solution lies in an expanded vhf plan, the Commission will have the opportunity in the future to delete any short spacings which are required immediately. A similar opportunity to remove short spacings would be present if the long-range solution must be sought in a practicable 82-channel vhf-uhf system or in an all-uhf system. If, however, none of these alternatives proves feasible, and we must rely on the 12 vhf channels then the number of short separations will inevitably increase.

A limited short-range program of adding vhf assignments at the necessary spacings can probably be engineered to avoid serious deterioration in the general availability of television service. To this end television stations may have to utilize directional antennas, precision offset, and such other techniques as the Commission may require in the public interest.

Currently, the Commission is exploring the most feasible and expeditious procedures for achieving this interim approach. We expect within a short time to initiate the necessary rule making proceedings.

We are hopeful that our discussions of this matter today will not result in a flood of petitions for rule making on this subject, at least until we can complete our work on the notice of the proposal we intend to publish.

We appreciate the opportunity you have given us to explain in detail the status of our consideration of the allocation problem. We are continuing to give this matter high priority, both at the Commission and at the staff level, and we are hopeful that in the near future we can arrive at an appropriate solution in the public interest.

We have reviewed for you the advantages and disadvantages of the various alternative solutions to this most difficult problem.

A 10-year transition period in reallocation

Common to all of these allocation solutions are certain general considerations. One is the long transitional period required to effectuate an allocation change. Any solution permitting television to use effectively more than the present 12 vhf channels necessarily must involve a transition period of perhaps 10 years or longer. This time is required to enable the over 40 million vhf-only set owners to enjoy full use of their present sets before being required to purchase new receivers. In addition, a reasonable conversion period must be granted to the broadcasters and to the nonbroadcast radio spectrum users that may be affected if an allocation revision is made.

A second consideration is the need for all-channel receivers. If a transition from the present television structure is to be successful, it is essential that after a given

---

able number of assignments in each major television market is five stations —four commercial and one educational (CLOSED CIRCUIT, April 13.)

A major television market, it defines as one having 100,000 or more homes within the area covered by a tv station signal. This includes multiple communities, it is pointed out.

The discussion then goes into the pros and cons of each of the five alternative plans:

• A 12-vhf-channel only tv system.

The only method of substantially increasing the number of stations is to reduce spacing requirements. This will remedy current shortages in a number of markets, but cannot provide sufficient outlets to satisfy the long-run, expanding needs of tv.

One method is to cut mileage separations to 100 miles (vs. 170 miles in northeast). This permits a "large increase" in assignments, but usable signal of squeezed-in station extends only "few miles" in direction of service areas of existing stations. If existing stations are also cut, then coverage of both new and existing stations would extend only to 30-35 miles (vs. up to 70 miles in some instances).

This would result in loss of service to rural and fringe area population. "A plan which requires general reduction in station spacing may delete some or all of the program services for an indefinite period in many homes where such program services are now available," the report stated.

Room for Expansion • Chairman Doerfer said:

In test plans, this move did not contain sufficient outlets to meet criteria, falling short of providing even four sta-

date all receivers sold to the public should be equipped to receive all television channels. This is necessary to enable broadcasters on any channel assigned to television to reach the public effectively. We have learned from experience, however, that a Commission decision on allocations does not ensure necessarily the marketing and sale of all-channel receivers. Cost considerations and other factors may result in the continued production and sale of sets equipped to receive only 12 channels. This is particularly true because during the transitional period operation by present stations on existing channels is likely to continue until an ultimate cut-over point is reached.

A law to force all-channel set making

We, therefore, believe that the Congress should consider a requirement that all sets shipped in interstate commerce shall be equipped to receive all television channels in order to permit an allocations' solution. Otherwise, there is a real danger that irrespective of any Commission decision television will continue to be limited effectively to 12 channels.

Two other general factors are involved in the television allocations' problem. One is the current proceeding in Docket No. 11997, which is designed to ascertain the future requirements of all radio services using spectrum space between 25 and 890 mcs. This proceeding undoubtedly will affect our conclusions as to the appropriate division of this spectrum space between television and other services.

The other general factor which cannot be overlooked is the dynamic and ever changing character of the electronic art. Plans devised today for the proper development of television may be affected by innovations tomorrow.

A 50-channel vhf system is the aim

In discussing the specific allocation solutions, we have indicated that an expanded vhf system comprising 50 channels (including the present tv channels 2-12, or alternatively channels 7-12) would satisfy the public interest criteria insofar as television is concerned. It would permit nationwide coverage, competing stations in the major markets, local community stations in the small communities, and adequate outlets for educational need.

To obtain the additional vhf and contiguous uhf channels requires an exchange of spectrum space with the U.S. government. A cooperative study of the possibilities in this area has been started jointly by the Commission and the government (OCDM). In addition, the President has suggested the establishment of a committee to study the uses of the radio spectrum with a view to an improvement in allocations. Also, a study of spectrum usage is being initiated by the House Committee on Interstate and Foreign Commerce. We are hopeful that these studies will be of great assistance in determining the feasibility of an expanded vhf television system.

Inherent in the problem of exchanging spectrum space between the government and non-government users are the actual operational requirements of the Dept. of Defense under the emergency conditions of today. The armed services have developed radio equipment to support these operational requirements based upon the spectrum allocation decision of 1945 which assigned blocs of spectrum space between 25 and 890 mcs to government and non-government services. The Army, Navy and Air Force have invested many hundreds of millions of dollars in establishing their communications' systems in accord with this 1945 decision. It is therefore necessary to give proper consideration to the factors of cost, obsolescence of equipment, and time in which it would be feasible for the armed services to reestablish their communications' systems in another portion of the radio spectrum between 25 and 890 mcs.

Such reallocation would have very substantial international repercussions, as well. The rearrangement of spectrum space undoubtedly would involve conflicts with existing international agreements to which the United States is a party. Renegotiation of such agreements is an extremely delicate and time consuming process, particularly since it involves international defense communications.

In our current study with the government looking toward a possible exchange of spectrum space, we are seeking additional space for a total allocation of 50 channels for television. The government has indicated a cooperativeness and willingness to reconsider the allocation of the spectrum on a long-term basis. Nevertheless, in the balance which must be struck between national defense needs, other services, and television needs, we must consider realistically the possibility of obtaining less than 50 channels. An ideal or ample allocation of spectrum space to television in this area may prove to be infeasible under present world conditions. The government, for example, may be able to release to television only enough channels to meet a few of the serious deficiencies of the present system. More definitive information on this point will come from the study now in progress.

But if 50 vhfs can't be obtained . . .

Clearly, Congressional assistance will be vital in the reconsideration of the spectrum allocation as between government and non-government uses. If, nevertheless, an expanded vhf television system which is preferred by the Commission proves infeasible, there are two allocation alternatives. They are the present 82-channel vhf-uhf system or a 70 channel uhf-only system.

Both of these alternatives have certain advantages. One significant advantage is the present availability of spectrum space for these alternatives, which obviates the need for a costly and complex conversion of government communication systems.

---

tions to each of the top 100 markets. It did not permit sufficient vhf assignments to replace all operating or granted uhf stations in the same communities.

This failing was also true of less extreme spacing reductions by an extensive reshuffling of existing vhf assignments.

Use of directional antennas or precision offset would permit reduction of mileage separations to 140 miles, but does not make possible needed flexibility and expansion of assignments.

• Deintermixture.

Experience with this program since it was initiated in 1956 has shown that it is ineffectual as a national allocation policy. Because of various considerations the number of possible communities which could be deintermixed is narrowed as to be almost a worthless move. Procedural delays in those instances where the FCC has ordered removal of a vhf assignment have blocked the immediate benefits expected to result from deintermixture.

Not only would some of these markets be overshadowed by vhf signals from nearby big city vhf outlets, but it is questionable whether deintermixture would stimulate the market for uhf receivers.

The area deintermixture plan—whereby a large geographical area would be unmixed—has one major drawback. This is that the plan would require the deletion of about 90 vhf stations which could not be transferred elsewhere. This would be too disruptive to be feasible as an interim measure and too inefficient to serve as a long run solution.

• 50 channel vhf continuous system,

retaining present 12 vhf channels. This allocation would run 54-72 mc (chs. 2-4), 76-88 mc (chs. 5 and 6), and 174-444 mc (chs. 7-51).

This the Commission called the "optimum or ideal" solution. "Such a system would meet the public demand for a generally satisfactory and economical service, under varying conditions," permitting the five channels to each community.

There are two critical questions: Can the necessary additional vhf spectrum space be allocated to tv, and what are the costs of such a reallocation?

The Commission referred to the demands for additional space by other services—"so critical that the Commission is currently engaged in a general allocation proceeding with respect to the spectrum space between 25-890 mc."

It also called attention to the military use of space between 216 mc and 450 mc and the equipment standardization between the U.S. and other countries. This would require, if changes are made in the domestic allocations, negotiations with other countries which might extend over a period of years. Also, it pointed out, some of the military systems operating in this band are there because of propagation characteristics. These systems would have to be moved to spectrum areas having similar propagation characteristics. Involved also is the 328.6-335.4 mc band used by aircraft for instrument landing.

Although this solution has been referred to as an all-vhf tv system, it was pointed out that actually this would be a vhf-uhf allocation. There would be 26 channels in the vhf and 24 in the uhf. The vhf portion of the spectrum runs from 30 mc to 300 mc; the uhf from 300 mc to 3,000 mc.

This means, it was pointed out that the upper channels of the 50-channel system would be more subject to shadowing, absorption, and "other undesirable effects."

Move to this kind of a 50-channel system would involve extra costs to the public. Not only would receivers probably cost more than the present 12-vhf receiver, but there is no assurance manufacturers may not continue to produce and market 12-channel vhf sets.

It is here that the FCC recommended that Congress enact legislation to require that all tv receivers shipped in interstate commerce be equipped to receive all channels assigned to television.

A reallocation along these lines would take "at least a full decade," the FCC said. It also would "involve the expenditure of large sums of money by the government for conversion of existing facilities; it would require the cooperation of other nations; it might cost the public some additional, although, now indeterminate, sums for all-channel sets; and it would require new legislation to ensure production of all-channel receivers only," the FCC declared.

• A 50-channel vhf system, beginning with present ch. 7.

This would increase the amount of space available for allocation to other services. It might also permit some economies in set design and production.

Many of the burdens involved in the 50-channel vhf system retaining chs. 2-6 are the same, and in addition a substantial burden would be placed on stations required to move to new assignments above 216 mc.

Because existing stations would undoubtedly oppose each individual move, the process "could be so time consuming and burdensome" as to defeat the solution which the plan proposed to alleviate.

To cope with this problem, the Commission said, it may recommend that Congress amend the Communications Act to authorize the FCC to change the assignment of any individual station through general rule making when an overall readjustment of station assignments is decided upon.

• A 25-channel vhf system, beginning at ch. 7.

This falls short of the flexibility and opportunities for expansion in the 50-channel plan. Using present spacing requirements, the 25-channel plan would permit five stations in the "bulk" of the top 100 tv markets.

The major shortcoming would be in the inability to meet community needs for local outlets, under the Commission criteria. But if this were reduced to a goal of four stations per community, the 25-channel plan would permit "moderate expansion."

• Maintaining the present system of 82 vhf-uhf channels.

The only way the present dual system can work is by the imposition of a statutory requirement that all sets in interstate commerce must be equipped to receive both vhf and uhf channels. This would permit uhf conversion over a period of 10 years.

By retaining the present 12 vhf channels, wide-area service could continue. The 70 uhf assignments would permit multiple stations in major markets and local stations in over 1,000 communities.

This would, however, involve the public in higher costs. The differential today between vhf-only sets and those containing uhf is about $25. In addition antenna installations are more critical and this would require probably another $25.

The requirement that tv receivers be all-channel might permit economies since full production of all-channel sets would permit cutting the price differential.

But, uhf receivers today are unsatisfactory—in both tuning and component longevity. In order to upgrade both these failings, the Commission said it might require Congressional action permitting the FCC to set standards for receivers—similar to what it now does in type-approving transmitters.

Thus, improved uhf requirements might add to the cost of an all-channel receiver—at least initially.

Even with all-channel receivers, an intermixed vhf-uhf system might not prove competitively feasible in markets with multiple vhf outlets. Uhf stations suffer propagation-wise in comparison with vhf outlets; they have shorter service ranges and greater variability in quality of service (due to uneven terrain, tall buildings, changing atmosphere and foliage conditions).

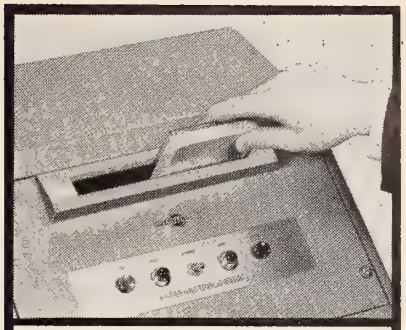
"In the final analysis, the economic prospects for uhf stations in an intermixed vhf-uhf system may depend on the general availability of inexpensive and popular programming fare as well as on the requirement of all-channel receivers," the FCC said.

• A 70-channel, all uhf system.

Major benefits from this move would be the fact that (a) no service would have to move, (b) other services would benefit from the vhf space vacated by tv, (c) there would be no international problems, (d) there would be adequate opportunity for multiple, competing stations in larger markets and sufficient assignments available to permit local outlets in other communities.

The TASO report failed to discuss equipment research and development programs because of antitrust implications, but the Commission's own staff has ascertained that some improvements in both receiving and transmitting uhf equipment have been made.

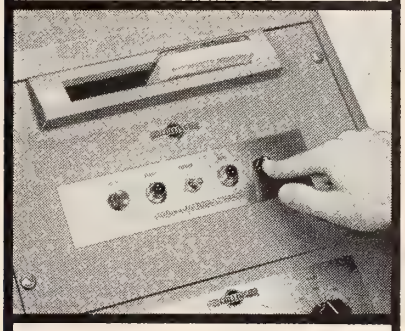
These include reducing the noise level of uhf tuners, the use of transistors, parametric amplifiers and other semiconductors. Use of these would increase the present $25 differential between a vhf-only receiver and one with uhf to $35-$40.



There have been no major developments in the uhf receiving antenna field.

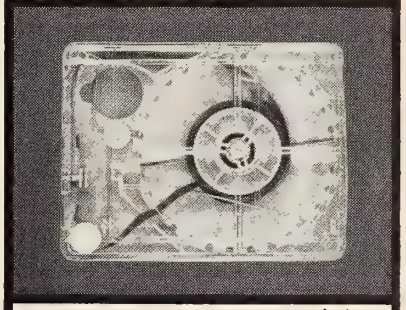
The lack of any major breakthroughs in uhf efficiency may be laid to the lack of interest in uhf civilian use. Most of the advances have come from military usage of uhf equipment—and hence are expensive.

A method of enlarging uhf service areas is through boosting uhf power, but the limiting factor here is cost. A 250 kw uhf station costs about $200,000 (exclusive of tower, buildings, studio and studio equipment and other facilities). If power were upped to 1,000 kw, the cost would be about $280,000—and



3 easy steps to automatic continuous programming

1.



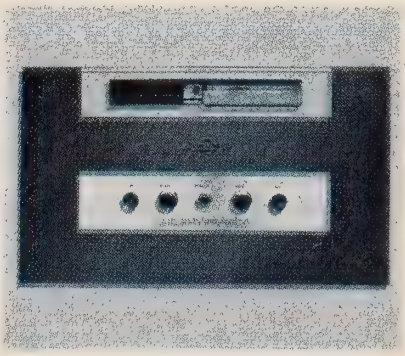
Insert cartridge into Collins Automatic Tape Control.

2.

A press of a button, you're on the air, right on cue. Instantaneous, no-wow starting.

3.

Finished tape automatically recues itself and stops—ready for storage or rebroadcast.



Three easy steps. That's all it takes for automatic, continuous programming with Collins Automatic Tape Control. Just the touch of your finger and you're a production genius.

Collins Automatic Tape Control features instantaneous, no-wow starting; automatic cueing; automatic stopping; simplified handling and tape storage. Units adaptable to remote control operation.

When your tape-recorded announcements and programs are produced with Collins Automatic Tape Control, they are run quickly, easily, automatically. No mechanical threading and cueing of tapes.

For professional production made easy, your station needs Collins Automatic Tape Control. For complete information call your nearest Collins broadcast representative, or write for literature.

Playback only and playback/record units are available in rack mount or console models. Cartridges available with tape capacities from 40 seconds to 45 minutes.

COLLINS

COLLINS RADIO COMPANY • CEDAR RAPIDS, IOWA • DALLAS, TEXAS • BURBANK, CALIFORNIA

if this were boosted to 5,000 kw (the present maximum uhf power permitted to uhf stations), the cost rises to $740,000.

Even operating expenses rise sharply; a 250 kw station would run $25,000 annually for power and tube expenses; a 5,000 kw outlet would cost $120,000 annually.

Another method of increasing coverage would be through the use of multiple transmitters, known as a polycasting. This is "promising," but has not been field tested. It also poses certain problems respecting the availability of channels and commercial identification of stations.

There is merit also in the view that if the Commission were to order all tv to uhf, the present shortcomings of uhf equipment would be overcome—similar to the experience of other services moved upward in the spectrum.

The Commission cannot, however, initiate such a move until it has strong evidence that uhf overall can provide service "substantially equal to that in vhf without requiring major increased outlays by the average family. . ."

It cannot overlook the time lag before improvements occur, the additional cost to the public, the probable loss of national program services to the rural public, and the possibilities that some proportion of tv families now receiving service would be deprived of this service.

The Commission's document concluded with the summary, published in full on pages 70-71.

FCC requests changes in Communications Act

The FCC last week sent to Congress requested amendments to the Communications Act requiring, among other things, community antenna systems to secure a station's permission before rebroadcasting its signal (BROADCASTING, April 20). They are designed to bring catv under essentially the same procedures which regulate tv boosters as "they perform a function basically similar," the Commission said.

The FCC amendments also define catv systems to exclude master antennas in apartment buildings and services serving less than 50 subscribers and require a system to offer the signals of a local station. Text of the amendments follow:

Add a new Section 3 (hh) reading as follows: "Community antenna television systems mean any facility performing the service of receiving and amplifying the signals transmitting programs broadcast by one or more television stations and redistributing such programs, by wire, to subscribing members of the public. As used in this Act, the term community antenna television system shall not include: (1) such facilities which serve fewer than 50 subscribers; (2) such facilities whose service is limited to the residents of one or more apartment dwellings under common ownership, control, or management, and to commercial establishments located on the premises; or (3) facilities used for the distribution, by wire, of programs

The cities set for the big 'squeeze'

Which are the cities in which the FCC is going to shoehorn additional vhf channels?

The official response is that the FCC has not made up its mind.

Engineering studies are underway to determine where such drop-ins are technically possible.

Statistical studies are underway to determine where there is uhf "saturation"—for the Commission said it would not add another vhf to areas where uhf stations have managed to secure an audience.

When these are accomplished, the Commission will issue a general rule-making notice.

Thus the Commission's interim policy has engendered a nationwide guessing game among broadcasters.

The document contained a list of 268 tv markets where stations were operating as of April 4. The tv markets are the FCC's own, but, it was learned, are based on the old CBS and NBC must-buy lists.

BROADCASTING filled in existing unbuilt cps and added vhf assignments now in hearing. From this complete list, the following tv markets are those having less than three commercial vhf assignments where additional "v" channels might be moved in:

Birmingham, Dothan, Montgomery, Selma, Ala.; Yuma, Ariz.; El Dorado, Fort Smith, Hot Springs, Ark.; Chico-Redding, Salinas-Monterey, San Diego, San Jose, San Luis Obispo, Santa Barbara, Calif.; Grand Junction, Montrose, Sterling, Colo.

Fort Myers, Jacksonville, Panama City, West Palm Beach, Fla.; Albany, Augusta, Macon, Thomasville and Tallahassee (Fla.), Ga.; Boise, Idaho Falls-Pocatello, Lewiston, Nampa, Twin Falls, Idaho; Champaign-Urbana, Quincy and Hannibal (Mo.), Ill.; Terre Haute, Ind.; Sioux City, Iowa; Ensign, Garden City, Goodland, Great Bend, Hays, Topeka, Kan.

Louisville, Paducah, Ky.; Alexandria, Monroe, Shreveport, Houma, La.; Augusta, Bangor, Presque Isle, Maine; Cadillac, Cheboygan, Grand Rapids-Kalamazoo, Ironwood, Marquette, Traverse City, Onondaga, Mich.; Alexandria, International Falls, Mankato, Minn.; Biloxi-Gulfport, Greenwood, Columbus, Hattiesburg, Jackson, Laurel-Pachuta, Meridian, Tupelo, Miss.; Cape Girardeau, Columbus-Jefferson City, Joplin (and Pittsburg, Kan.), Kirksville (and Ottumwa, Iowa), St. Joseph, Sedalia, Springfield, Mo.

Billings, Butte, Great Falls, Glendive, Helena, Kalispell, Missoula, Mont.; Alliance, Hay Springs, Hayes Center, Hastings, Kearney, Lincoln, McCook, North Platte, Scottsbluff, Neb.

Reno, Nev.; Manchester, N.H.; Carlsbad, Clovis, Roswell, Santa Fe, N.M.; Carthage-Watertown, Plattsburgh (and Burlington, Vt.), Rochester, Syracuse, Utica-Rome, N.Y.; Charlotte, Greenville-Washington, New Bern, Raleigh-Durham, Wilmington, N.C.; Bismarck, Dickinson, Fargo, Grand Forks, Minot, Pembina, Valley City, Williston, N.D.; Dayton, Toledo, Ohio.

Ada, Ardmore, Elk City, Lawton, Okla.; Eugene, Klamath Falls, Medford, Roseburg, Ore.; Altoona-Johnstown, Pa.; Providence, R.I.; Florence, S.C.; Aberdeen, Florence, Lead-Deadwood, Reliance, Rapid City, Sioux Falls, S.D.; Bristol-Johnson City, Jackson, Tenn.

Abilene-Sweetwater, Austin, Big Spring, Brownsville-Harlingen-Weslaco, Bryan-College Station, Corpus Christi, Laredo, Lufkin, Monahans, Odessa-Midland, San Angelo, Texarkana, Tyler, Waco-Temple, Wichita Falls, Tex.

Logan, Ogden, Utah; Harrisonburg, Va.; Bellingham, Wash.; Bluefield, Clarksburg, Wheeling (and Steubenville, Ohio), W.Va.; Eau Claire, La-Crosse, Wausau, Wis.; Casper, Cheyenne, Riverton, Wyo.

Among the markets where the extent of uhf conversion will count are the following:

Bakersfield, Fresno-Tulare, Calif.; Hartford-New Haven-New Britain-Bristol, Conn.; Columbus, Ga.; Harrisburg, Ill.; Rockford, Ill.; Evansville, Ind.-Henderson, Ky.; Baton Rouge, La.; Binghamton, N.Y.; Erie, Pa.; Columbia, S.C.; Knoxville, Tenn.; Norfolk-Portsmouth-Newport News-Hampton, Va., and Madison, Wis.

To make your radio station franchise more valuable . . .

Effective May 15, RADIO PRESS will occupy greatly enlarged, permanent quarters at its present location. In addition to existing receiving and transmission facilities, the most modern available electronic equipment and additional studio space has been committed, thus making RADIO PRESS a complete, self-contained communications center, designed and staffed to operate 24 hours, seven days a week.

This expansion is in line with RADIO PRESS' policy of continually improving and widening service to its subscribers, who now number over seventy of some of the leading radio stations coast-to-coast.

It is this ability, leading from management strength and foresight, to grow and provide expanded service and facilities, which we believe is making a substantial contribution to the welfare of the industry as a whole.

More specifically, however, here are some of the ingredients that benefit stations directly at the local level:

Prestige of a world-wide news organization of experienced correspondents, exclusively identified with the local station.

Highest Standards backed by full-time news bureaus and experienced correspondents throughout the globe.

Exclusivity of Service of complete foreign, national and Washington coverage, with round-the-clock standby for fast news breaks.

We will be glad to supply you with additional information, rates and audition tapes. Please write, wire or telephone:

RADIO PRESS

18 East 50th Street, New York 22, N.Y., PLaza 3-3822

RADIO PRESS will provide particularly extensive Washington and Overseas material in connection with the forthcoming Summit Meeting. This extensive coverage assures every RADIO PRESS subscriber news leadership in the market at a time of increased tension, when radio listenership will be at a particularly high level.

for which a charge is imposed generally on all subscribers wherever located, and which are not in the first instance broadcast for reception without charge by all members of the public within the direct range of television broadcast stations."

Add the following sentence at the end of Section 325 (a): "No community antenna television system (as defined in Section 3 [hh] of this Act) shall redistribute the program or any part thereof of a broadcasting station without the express authority of the originating station."

Add a new Section 330 reading as follows: (a) "Upon request by the licensee of a regular television broadcast station (other than a station engaged solely in rebroadcasting) which is assigned to a city or community in which a community antenna television system provides television programs to local subscribers, such community antenna television system shall regularly redistribute programs broadcast by such local television broadcast station.

(b) "The Commission may, by rule or order, prescribe such standards and conditions as it may find necessary to assure that the reception of the programs redistributed by the community antenna television system under subsection (a) hereof shall be reasonably comparable in technical quality to the reception of programs of other television stations redistributed by the community antenna television system.

(c) "The Commission also may, by rule or order, prescribe the period of time within which the community antenna television systems shall complete preparations for and commence the redistribution of programs under subsections (a) and (b) hereof."

View with alarm

Broadcasters protesting against the inroads of community antenna systems have viewed with special alarm the growth of privately owned common carrier microwave relay systems which feed distant tv station signals to antenna systems in broadcaster's backyards.

Because of the inquiry into catv operations, the FCC in 1958 ceased processing these microwave applications. There were about 60 of them. A group of these applicants went to court, but the appeals court ruled that the FCC had the right to hold such applications in abeyance until it resolved its inquiry.

The Commission's order disavowing jurisdiction over catv operations was issued April 14. In that first week, the Commission's Common Carrier Bureau approved 11 applications. They involve feeding distant tv signals to the following catv systems:

Rapid City, S.D.; Alliance and Scottsbluff, Neb.; Farmington, N.M.; Wenatchee and Cashmere, Wash.; Florence, Sheffield and Tuscumbia, Ala.

LETTER TO UNCLE
Catv asking Congress for regulation by FCC

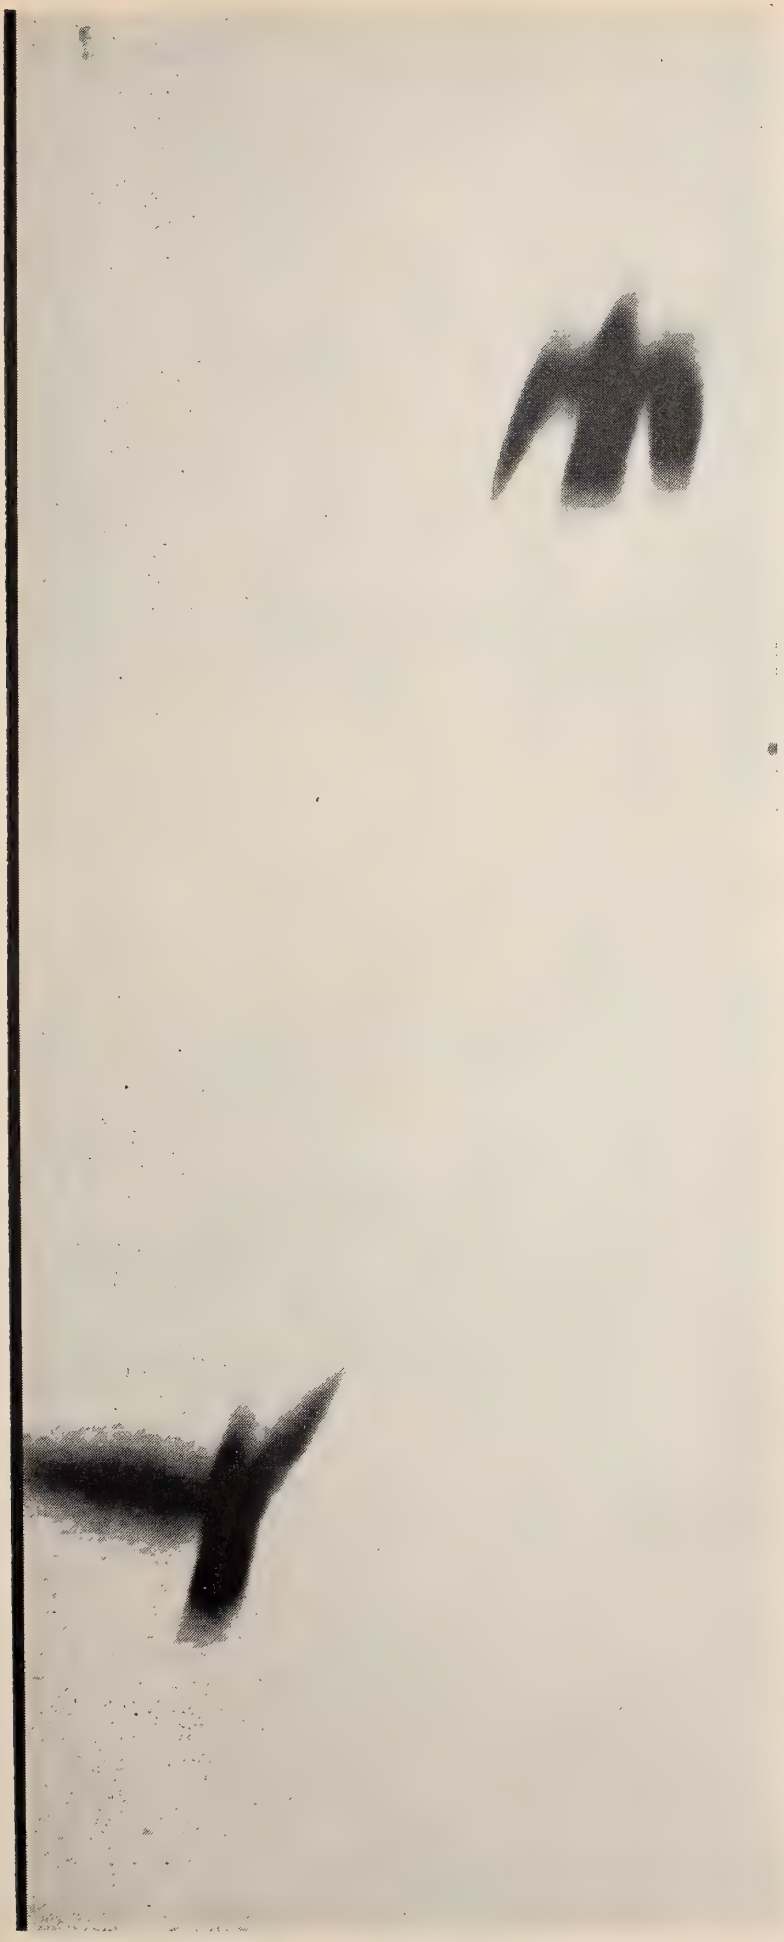
Rugged, individualistic community antenna operators who have built one of tv's minor but significant success stories have decided to ask for FCC regulation—notwithstanding the Commission's decision only two weeks ago that it does not have authority to regulate these small, highly successful businessmen (BROADCASTING, April 20).

In preparation is a formal request to Congress to amend the Communications Act to bring catv operators under the FCC.

The Commission's order two weeks ago called on Congress to enact legislation which would require cable companies to secure permission from tv stations before using their signals, and also requiring catv operators to carry the local stations on request.

Final Okay • The proposed legislation, being drafted by E. Stratford Smith, general counsel of the National Community Tv Assn., is being submitted to the NCTA executive board at its Philadelphia meeting today (April 27). Upon approval it will be submitted to Congress.

The action has the unanimous approval of all NCTA members, Mr. Smith said last week. It was endorsed by the NCTA board of directors twice in the last two years, he pointed out.



The legislation would perform two things, Mr. Smith explained:

• It would stop, "once and for all, the harassment of antenna systems by a small group of western broadcasters" by providing a forum for their complaints and a legal, prescribed procedure for handling such matters, and

• It would place catv systems under the umbrella of federal control—thus eliminating pressures by state public utility commissions to assert jurisdiction over tv cable companies.

Means Licensing • Mr. Smith acknowledged that this move would also give the FCC control over the licensing of antenna systems.

"That's all right," he said, "we are willing to be judged on whether we per-

The shape of flight

The shapes of things that fly have always been determined by the materials they are made of. Feathers form wings that are basically alike for all birds—and membrane forms an entirely different wing for insects. It takes thousands of years, but nature improves its materials and shapes, just as technology improves the materials and shapes of aircraft. But here, the improvements in materials are so rapid that designs become obsolete almost as soon as they are functional.

Today, our aeronautical designers and missile experts work with types of materials that didn't exist just a few short years ago. Steels are probably the most important examples: United States Steel has just developed *five* new types of steel for the missile program. They are called "exotic" steels because they have the almost unbelievable qualities necessary for unearthly flights.

The shape and the success of our space birds depend on steel.

USS is a registered trademark

USS **United States Steel**

form in the public interest."

The request will be for an amendment to the Communications Act placing catv systems under the FCC's broadcast licensing authority. Antenna operators are unanimously in favor of this move, Mr. Smith stated. They are also unanimously opposed to being considered as common carriers, he added. A common carrier classification would permit the FCC to set rates and regulate other business practices.

In 1957, a group of 13 western broadcasters petitioned the FCC to assert jurisdiction over community antenna systems under the Commission's common carrier authority. The broadcasters claimed that the antenna systems were using their signals without permission and that by bringing in "outside" signals the catv operators were disrupting the tv allocation plan and wreaking economic injury.

In April 1958 the Commission denied this request. The FCC said it had no power to control catv operations.

The subject was also investigated during the 1958 hearings before the Senate Commerce Committee.

No State Control • On the second point, no state is today regulating catv systems. In Wyoming and California, state courts have ruled against public utility commissions which attempted to assert jurisdiction. In Wisconsin and Utah, state utility commissions themselves ruled that they have no authority.

Legislation to bring catv operations under state utility regulation is pending in California and Pennsylvania. In Montana the state legislature passed such a bill, but it was vetoed by the governor.

By placing community antenna systems under FCC control, it was pointed out, the Commission would also be able to enforce engineering standards.

Community antenna systems came into being in the late 1940's in Oregon and Pennsylvania. There, viewers at a distance from big city tv transmitters —or unable to receive tv signals normally because of mountainous terrain —agreed to sign up for a wire service.

Antenna systems place a highly directional, high gain receiving antenna at a mountaintop best suited for picking up the distant or difficult signal. This signal is fed down the mountainside to subscribers' homes via coaxial cable.

Originally there was a $100-$175 installation charge for each subscriber, plus a $3.50-$6.00 monthly service charge. Most of today's more than 550 systems—serving an estimated 500,000 subscribers (1.5-2 million people)—have minimum or no installation charges, although the monthly service fee is still about the same.

Voices for Defense • These are the familiar voices heard over the Conelrad frequencies during the drill two weeks ago when all radio and tv stations went silent except those involved in the Conelrad emergency network. Shown at the "secret" civil defense headquarters on the day of the Conelrad drill are: Back row (l to r), Lewis Shollenberger, CBS; Leo A. Hoegh, director, Office of Civilian & Defense Mobilization; Charles Ashley, ABC. Seated, Robert McCormick (l), NBC, and Steve McCormick, MBS.

FCC SATISFIED WITH ALERT

Criticism notwithstanding, Conelrad works

The nation's second Conelrad alert test on April 17 has been termed a success by the FCC, the Office of Civil Defense Mobilization and almost everybody else concerned.

There were some shortcomings and some criticism, but an FCC spokesman said reports from all over the country indicate the emergency radio enemy attack alert "worked like a charm." FCC Comr. Robert E. Lee, the Commission's liaison officer for Conelrad, said he was "pretty happy" with the overall success of the April 17 alert. Howard Handelman, OCDM official, said "We're please with it, of course," and added that OCDM was "extremely happy working with the National Industry Advisory Committee."

The alert was held 11:30-noon (EST), with more than 3,000 radio and tv stations going off the air and 1,200 other am radio stations switching to 640 kc or 1240 kc Conelrad frequencies.

National Coverage • NIAC reported excellent reception on the West Coast, where trouble was encountered in the first Conelrad alert July 16, 1956 (BROADCASTING, July 30, 23, 1956), and similar reports were coming in to the FCC from other parts of the country last week. An FCC spokesman said it will be several weeks before reports are complete nationwide.

The FCC has worked out detailed engineered plan approaches for Conelrad clusters in 60 major metropolitan areas and expects to work out similar systems for 900 to 1,000 other big population centers and the rest of the U.S. radio communities within six months. This will include microwave "backups" borrowed from industrial radio users and pressed into service to feed network communications to stations participating in Conelrad, a spokesman said. The FCC sent out notices to non-broadcast radio services before the alert ordering extensive curtailment of these operations during the alert, allowing only emergency transmissions to be sent.

Comr. Lee said he understood one station at Butte, Mont., remained on the air despite FCC orders beforehand to go off the air. He said this was during the time of the Montana State Prison riot at Deer Lodge and the FCC is investigating whether there were "mitigating circumstances."

OCDM's Mr. Handelman said an an-

SUCCESS STORIES

One of a series of salutes to successful Radio and TV stations across the nation . . . and to Northwest Schools graduates who have contributed to their success.

WJIM-TV

CBS

Channel 6

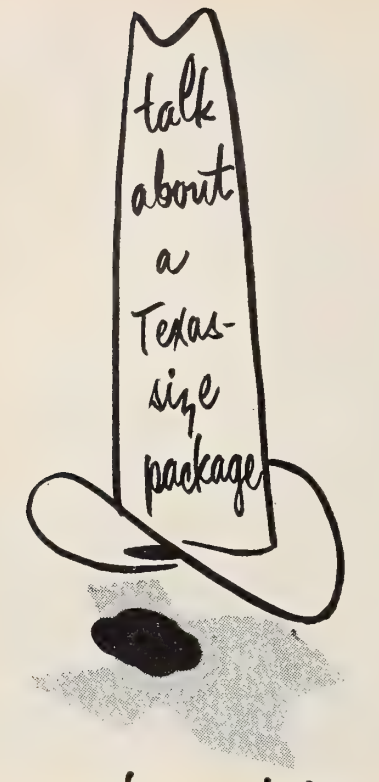
LANSING, MICHIGAN

SALUTE TO: Station WJIM-TV, Channel 6, Lansing, Michigan — owned and operated by Gross Telecasting, Inc.

WJIM-TV serves a vast area of mid-Michigan, including Lansing, Flint and Jackson. Its studios are located in the WJIM "Country House" on the Eastern edge of Lansing. The building is one of the most modern broadcasting plants in the country and is famous as a "Showplace". WJIM-TV is a basic CBS-TV affiliate, but also carries many of the top shows from NBC and ABC.

Mr. Harold F. Gross, president of Gross Telecasting Corporation, operator of WJIM Radio and TV.

The management of WJIM-TV says this of Stuart Hazard, Northwest Schools graduate: "Stu has been a valued member of our staff from the very beginning. His well-rounded working knowledge of broadcasting has made him at home in just about every TV assignment we can think of. His work has always been highly commendable."



Northwest graduate, Stuart Hazard, shown (at left) with Martha Dixon, hostess of WJIM-TV's "Copper Kettle" homemakers program, as he explains how he wants a studio "Zoom" closeup of some of Miss Dixon's cookery.

Mr. Hazard joined the station in 1956 as Film Editor. He serves as Film Director for the station, as well as director of many local "live" shows. Last spring he produced and directed the nationally-acclaimed "What's With My Time" series, produced in cooperation with the Junior League of Lansing.

nouncement over the nationwide live Conelrad network by Defense Mobilization Director Leo A. Hoegh, asking listeners to write to OCDM headquarters in Battle Creek, Mich., for a booklet on building bomb shelters, had drawn more than 20,000 letters by last Thursday (April 23).

Not Total Approval • There were some complaints or criticisms. The *Savannah* (Ga.) *News* complained to its congressional delegation that Conelrad is "obsolete," and Sen. Herman E. Talmadge (D-Ga.), said he has referred the criticism to the Senate Armed Services and Commerce Committees, the OCDM and FCC. Sen. Richard Russell (D-Ga.), chairman of the Armed Services Committee, said he has asked OCDM and the Defense Dept. for a "full report" with any recommendations for improvement.

There have been charges made before that Conelrad is "obsolete," largely because of presumed use of missiles instead of manned aircraft in future wars. The Air Force assured the FCC, however, that Conelrad operation is necessary for at least 10 more years. This, says the Air Force, is because electronic "homing" (automatic direction finding) equipment is used even in modern missiles; if Conelrad were discontinued, an enemy would know this and take advantage of that fact; although there are more intricate devices than radio navigation, radio direction-finding is more useful to the basic navigation problem; and that Conelrad provides a needed strict control of all radiation devices, including commercial aircraft.

OCDM picked Conelrad test period

The National Industry Advisory Committee explained last week that the Office of Civil Defense Mobilization, not NIAC, was responsible for picking the 11:30 a.m.-12 noon EST time for the April 17 Conelrad practice alert.

Southern California broadcasters had complained that eastern broadcasters picked the time (8:30-9 a.m. on the West Coast), when morning traffic there was at its peak and during the heaviest shopping day of the year. (BROADCASTING, April 20).

Joseph Keating of NBC, program chairman *pro tem* for the Conelrad exercise, said the date and time had been selected far in advance by OCDM, which told NIAC and the FCC that the time period was picked to provide the widest possible variety of conditions simultaneously in the various time zones across the country. Since NIAC membership is made up of representatives from NAB and the networks and since all networks have owned stations and/or affiliates on the West Coast, NIAC members were "fully mindful of problems in all areas of the country, and indeed sought to alleviate them," Mr. Keating said.

Mr. Keating said NIAC protested, noting particularly the problem on the West Coast, but that OCDM said it wanted to find how the public would react while enroute to work or school.

General overhaul

Sen. Warren Magnuson (D-Wash.), chairman of the Senate Commerce Committee, last week introduced nine bills amending the Communications Act. The amendments, all requested by the FCC:

S 1733 — Gives Commission more discretion in sending McFarland letters to applicants.

S 1734—Clarifies and strengthens law relating to *ex parte* contacts before commissioners. Extends ban to all parties as well as those assisting or appearing in case.

S 1735 — Repeals honorarium provision of Act.

S 1736 — Eliminates the requirement that certain documents and applications must be notarized.

S 1737—Grants FCC authority to fine violaters of its rules in the common carrier and safety fields.

S 1738 — Gives Commission greater discretion in the utilization of its review staff, now separated by law.

S 1739 — Gives Commission authorization to license already-operating "illegal" boosters.

S 1740 — Gives Commission authority to regulate charges and services of common carriers in all types of broadcasting. Present law covers wires only.

S 1741—Removes requirement that transmitting equipment be operated by licensed operators.

On Thursday, Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, introduced measures identical to four of Sen. Magnuson's bills. Rep. Harris already had offered legislation to effect the other FCC recommendations. Rep. Harris' bills: HR 6571 (identical to S 1740), HR 6572 (identical to S 1733), HR 6573 (identical to S 1738) and HR 6574 (identical to S 1737).

25-890 mc hearing is set for May 25

The start of the FCC's in-depth study of the non-government services in the radio spectrum between 25 and 890 mc (BROADCASTING, April 6) will be May 25, it was announced last week.

A tentative list of witnesses for the proceedings, before the Commission *en banc*, included a number of broadcasters: Fm Broadcasters (Ben Strouse), WQXR-AM-FM New York (Elliott M. Sanger), NAB (Harold E. Fellows, A. Prose Walker), Assn. of Maximum Service Telecasters Inc. (Lester W. Lindow, Howard T. Head, Harold G. Ross), National Assn. of Educational Broadcasters (Harry Skornia) and the Joint Council on Educational Television (Ralph Steetle). Most of the broadcasting witnesses are scheduled later in the proceeding and it is estimated that they will not appear until the second week of the hearings.

Other witnesses include: Institute of High Fidelity Manufacturers (Alfred M. Zuckman), RCA Communications Inc. (Thompson H. Mitchell), AT&T (four witnesses), Motorola Inc. (four witnesses), Electronic Industries Assn. (six witnesses), and the American Rocket Society (17 witnesses).

Regional airspace switch to FAA aegis

The new Federal Aviation Agency has issued tentative orders for discontinuance of regional airspace subcommittees to clear radio and tv station applications for tall towers.

But, said Charles W. Carmody, chief of FAA's Airspace Utilization Div., last week, the same people who have served on the subcommittees in the field will handle clearance applications by radio and tv stations and there will be no changes in the mechanics or standards.

Lt. Gen. E. R. Quesada (USAF, ret.), administrator of the FAA, was to have signed the order last week transferring the functions of the regional groups to the Airspace Utilization Div. headed by Mr. Carmody.

Two-Agency Tangle • Mr. Carmody said last week the FAA has begun talks with the FCC looking toward a solution of what he termed an internal government problem—the jurisdiction of each of the two agencies insofar as tall radio-tv towers are concerned. He felt it would be "several months, at least" before FCC and FAA make a joint announcement on which agency will do what. The 1958 Federal Aviation Act creating the FAA, is specific about FAA's authority over utilization of airspace by aircraft, but is much less clear about its authority over use of airspace by tall structures, he said.

CONDENSING

Big Console Facilities into the Ease of Four Mixing Channels

GATES STUDIOETTE SPEECH INPUT CONSOLE

The Gates Studioette is a perfect blending of workhorse versatility and reliability for day in and day out operation. An unusual generosity of controls, new performance standards, service ease and smart commercial appearance highlight this outstanding speech input console.

Four channel, step type mixer, with generous key switching facilities accommodates four microphones into two preamplifiers, three turntables, two tapes or projectors, network and three remote lines. Three utility keys are provided for your individual needs. The Studioette also includes a high gain program amplifier, 10 watt ultra linear monitoring amplifier, dual muting and warning light relays, 4″ illuminated VU meter, self-contained power supply, complete cueing facilities for turntables, net, tapes and remotes, and output emergency key, plus many additional facilities to create wide versatility in meeting the needs of modern radio, television and recording.

AFM head aroused by 'Firestone' fate

The programming policies of television networks were described as "immature, shortsighted and incomprehensible" last week by Herman D. Kenin, president of the American Federation of Musicians. His sharp comment followed the announcement recently that the *Voice of Firestone* program might not return to tv next fall unless a network could allot a suitable time period (BROADCASTING, April 20).

Mr. Kenin, in an article to appear in the forthcoming issue of *The International Musician,* official publication of the AFM, asserted:

"Their [the networks'] refusal to sell prime viewing-listening time once a week to the *Voice of Firestone*—a program that for 31 years has provided a rich feast of fine, live concert music for millions of Americans—is a frightening symptom of dollar policy-making in the broadcast industry."

Mr. Kenin referred to broadcasters' "solemn pledge to serve the public interest," and added:

"It is about time the broadcasters commenced to live up to their responsibilities; it is high time the Federal Communications Commission started enforcing the terms of the contract. And the Congress must make sure this happens."

Mr. Kenin recently issued a statement in Toronto, saying the AFM planned to ask the FCC to look into the amount of "canned music" being used by U.S. radio-tv stations. A spokesman said in New York last week that he has made no formal request as yet to the commission. Mr. Kenin's remarks at that time were prompted by an action of the Board of Broadcast Governors of Canada, which gave seven radio stations there short-term licenses (less than the customary five-year licenses), with the suggestion that they cut down on recorded music and "high-pressure chatter."

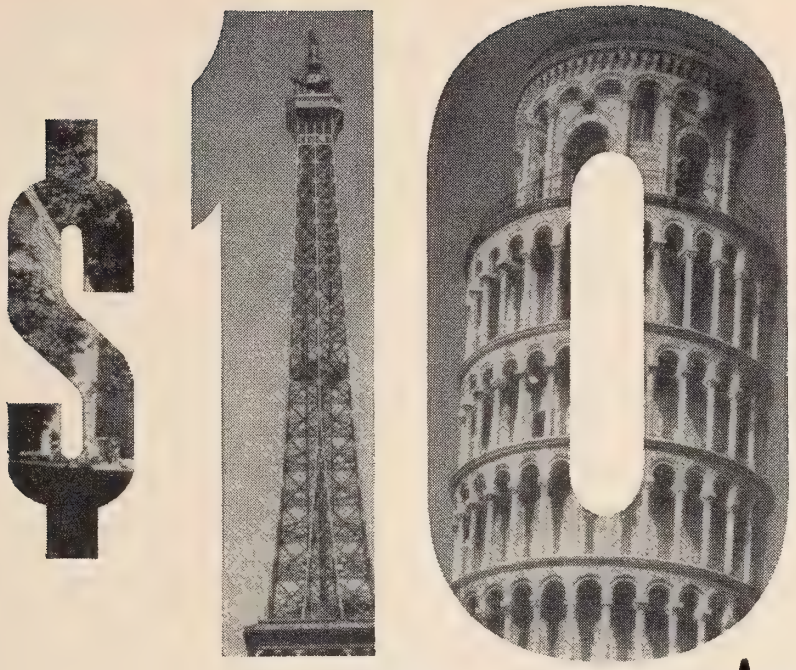
Godfrey on leave for chest surgery

Arthur Godfrey entered a New York hospital over the weekend for probable chest tumor surgery.

The 55-year-old CBS personality-supersalesman, currently responsible for some $9 million in annual billings for tv alone, told his radio audience last Tuesday morning April 21): "I will be absent from these airwaves for a couple of months I'm afraid, because chest surgery, you know, is not minor and it takes a little while to get back on your feet. But if you keep your fingers crossed, I think I'll be back with you again one day. . . ."

THE REDHEAD

Medical leave from air selling



The network had to do some fast shuffling to compensate for the 30-year broadcasting veteran's unexpected medical leave. Comedian Sam Levenson was signed to pinch-hit on the daily tv show (10:30-11 a.m.), beginning Wednesday (April 29) with Jack Sterling filling in today and tomorrow. Mr. Godfrey's daily radio (9:05-10 a.m.) substitute is to be comedian Robert Q. Lewis, who begins his duties today. *Peck's Bad Girl,* new situation comedy originally scheduled to replace Mr. Godfrey's Tuesday evening tv program (9-9:30 p.m.) May 19, is having its debut moved forward to May 5.

A remaining, long-range uncertainty is the *Person to Person* tv interview show for which Mr. Godfrey has been designated to assume Edward R. Murrow's vacated seat next fall.

TelePrompTer in black

TelePrompTer Corp., New York, last week reported that net earnings for 1958 amounted to $41,956, equal to 12 cents per share on 356,591 common shares outstanding. In the previous year TelePrompTer had a net loss of $212,694, or a deficit of 59 cents per share on the same number of shares outstanding.

Gross revenues, the company reports, in 1958 reached a total of $3,414,499 the largest year-to-year dollar increase in the company's history. The previous year's gross revenue totalled $2,264,345. TelePrompTer's common stock was admitted to trading on the American Stock Exchange on Dec. 16, 1958.

Rebel musicians win restoration of funds

The American Federation of Musicians had no right to divert wage increases negotiated for musicians employed by phonograph recording companies from the men and into the Music Performance Trust Funds, Judge Clarence L. Kincaid of Los Angeles Superior Court ruled Wednesday (April 22). He ordered that approximately $1.8 million, which recording companies have paid to a receiver under a court order, be paid to 6,000 recording musicians employed under the AFM 1954-58 agreement.

Cecil F. Read, leader of the group of Hollywood musicians who rebelled against the AFM trust fund policies and in November 1956 went into court to get trust funds monies restored to individual musicians, hailed the decision as the first fruit of "three years of effort sustained by thousands upon thousands of dollars contributed by the recording musicians." Judge Kincaid's ruling, Mr. Read said, gives the musicians a "firm foundation" for an appeal to reverse an earlier decision which denied the right of the plaintiff musicians to sue AFM for some $13 million they claim was illegally withheld from them as a result of the union's trust fund policies (BROADCASTING, March 16).

Henry Kaiser, general counsel of AFM, announced that the decision awarding the impounded trust fund payments to the plaintiff musicians would be appealed promptly to higher courts. "We are prepared to carry our appeals as far as the U.S. Supreme Court," he stated.

700 exude optimism at Muzak 'convention'

Muzak Corp. last week held its first national "convention" at a three-day session at the Hotel Biltmore in New York. Highlights, several hundred Muzak programmers present from 47 states and seven foreign countries:

• News that Muzak had a 13.9% increase in new subscribers in 1958 over the year previous with a net dollar gain of about $2 million, in new billings. A still larger increase for 1959, based on a 20% increase in business during the first two months of this year, was predicted. Speaker on Muzak's business health was Joseph W. Roberts, vice president of marketing.

• Announcement by Donald O'Neill, Muzak's program director, that the public's taste in music is changing from concert music and toward popular music. He supported the contention with figures taken from a Muzak survey.

• Word of an out-of-court settlement between Muzak and ASCAP (see below).

• Presentation of the first Golden Ear Award to Muzak's "man of the year." Wallace A. Moritz of San Angelo, Tex., received the award from Muzak's Board Chairman Jack Wrather.

Muzak, ASCAP sign

The nation's radio stations, dickering for new ASCAP music license contracts, were offered encouragement last week by Muzak. President Charles C. Cowley announced that Muzak had signed a new five-year contract with ASCAP at rates virtually the same as those paid in 1946 and in some cases lower—this despite ASCAP wanting increases ranging from 100% to 200%.

The parallel with radio-ASCAP negotiations is close. Actually, negotiators for ASCAP and the All-Industry Radio Music License Committee have reached a broad agreement calling for approximately 9% reduction in the total that stations will pay to ASCAP. But negotiations are still in progress to fix a formula implementing this overall agreement, with no indication yet that settlement is near. With their own settlement accomplished, Muzak officials termed theirs "the first successful challenge" of ASCAP's royalty rates.

NTA's Unger says pay-tv is inevitable

Toll-tv is bound to come, once the Hollywood feature film vaults run dry, and broadcasters and advertisers must learn to live with it, Oliver A. Unger, president of National Telefilm Assoc., told the Chicago Broadcast Adv. Club Thursday.

In a surprise speech, he gave what he acknowledged to be "qualified approval" of the pay-television concept. It will come if the American public decides it is prepared to "pay for the kind of entertainment it wants and which the advertising budget simply cannot afford," he asserted.

Mr. Unger suggested that "whether this pay-tv will come over the air lanes or whether it will come over a wire system is not important. The fact is certain—it will come. Whether Congressmen will try to create artificial problems that will impede its arrival, or whether various pressure groups speaking for the Theatre Exhibitors of America who fear the coming of toll tv as much as some people in the broadcasting industry fear it, won't make the least bit of difference."

Broadcasters must study the problem, learn to live with it and "make it work for us," he emphasized, while

Study of a Colorful Interviewee • Radio-tv newsmen last week got first-hand examples of the uninhibited nature of Cuban Premier Fidel Castro. Dropping in unannounced at a Washington restaurant (left photo) where WWDC's Steve Allison conducts a late evening interview show, Dr. Castro consented to an impromptu interview marked by fiery moments. And, in a planned appearance at WRC-TV Washington for NBC-TV's *Meet The Press* (right photo), Dr. Castro was no less colorful in his discussion with panel member Richard Wilson, Cowles Publication, and underscored feelings with a flailed fist (blurred in center of photo).

advertisers must ascertain where they fit into the picture because "I don't think they will be locked out." Toll-tv would provide a "greater opportunity" to free creative forces in the industry and may even eliminate advertisers from being the "deciding force" in programming, Mr. Unger said. As in England, he added, it may be "inevitable" that both free and fee systems can work together.

Discussing programming, Mr. Unger emphasized that the quality of entertainment to the American public "is locked in most of the time by the economic limitations imposed on us to create entertainment in the terms of its cost to the advertiser and the amount he can possibly spend."

He continued, tv is compelled to try to make a good show for about 10% of what the motion picture industry spends on an equivalent show for theatre exhibition. "The moment is going to come when the American people will rebel against the mediocrity of television entertainment and are going to demand from the broadcasters the right of getting superior entertainment in their homes," Mr. Unger warned. "I think it will arrive very rapidly the moment the Hollywood vaults have been depleted of their backlogs."

The crisis will come, he suggested, as broadcasters find they need to program "more and more of the on-the-air time out of their own resources."

Shortage of talent could weaken tv

Network television's strength as an advertising medium is seriously threatened by a continuing lack of "some real method for developing new, young personalities to increase today's scarce talent pool and to replace tv personalities now in declining stages of viewer popularity," Philip L. McHugh, radio-tv vice president, Campbell-Ewald Co., Detroit, is to tell the 10th annual Atlanta Advertising Institute today (April 27). ". . . Talent and new ideas are so scarce and getting scarcer," Mr. McHugh says, "that the advertiser's agency must work harder . . . to deliver a quality program without being trapped by talent costs that won't fit into the advertiser's budget."

The added plus of sponsor-product identification is lost with alternating and multiple-sponsored tv shows, Mr. McHugh opines. "Westerns, for instance, bring a lot of viewers into their tents, but the great majority of the viewers are unaware who brought them there," says Mr. McHugh.

UPI annual report lists 5,628 clients

United Press International serviced 5,628 clients last year, including radio and tv stations, newspapers and commercial subscribers, as compared with 5,063 in 1957, Frank H. Bartholomew, president and general manager, told the company's annual meeting in New York last week. The present number of clients was said to be "an all-time high."

A total of 344 International News Service and news-picture clients, not previously subscribers to United Press, elected to continue service when the merger last year resulted in UPI, according to Mims Thomason, first vice president and general manager. No breakdown was provided on total radio-tv station customers.

Dean C. Miller, national radio news manager, reported that during 1958, UPI supplied stations with more regional news than in 1958 and with additional "in depth" reports of all developments. UPI, he noted, provides two packaged news shows per hour throughout the day.

William R. Higginbotham, manager of United Press Movietone television film service, stated that expansion in film service continued in 1958. He pointed out that service in Japan was expanded from one client to five, and new subscribers were enrolled in Thailand, Yugoslavia, Denmark, Hungary, Czechoslovakia, Colombia, Alaska, and in 12 U.S. cities. (The Associated Press annual report was covered in BROADCASTING, April 13).

• Program notes

• Ziv Television Programs, N.Y., reports a regional sale on *The Cisco Kid* in 10 southern states, to H.W. Lay Potato Chip Co., Atlanta. Twelve major markets are set and others are in the process of being cleared for time. The business was placed through Liller, Neal, Battle & Lindsey, Atlanta.

• The Assn. of Cinema Laboratories Inc. has produced a worldwide directory of motion picture laboratories. It contains 134 American companies and 114 foreign. A single copy costs $1; ten copies $5; twenty $8; forty $15; over forty, 30 cents each. Address: Dudley Spruill, secretary, 1226 Wisconsin Ave., N.W., Washington 7, D.C.

• KTTV (TV) Los Angeles has sold three of its video-taped shows to three New York City stations. *Peter Potter's Juke Box Jury* (distributed by NTA) goes to WNTA (TV); *Divorce Court* (distributed by Guild Films) to WPIX (TV); *Paul Coates Show* (distributed by KTTV) to WNEW-TV.

• CBS News' video-taped report of the Japanese royal wedding was edited from 5½ hours to 14 minutes. The editing required 35 splices, said to be a record for a tv-tape presentation. CBS News executives acknowledged that there was "some roll-over at the splices."

• Independent WNMP Evanston, Ill., has revamped its programming in favor of semi-classical and classical music. The change in programming is the result of a 10-day poll conducted by WNMP. Results: 75% voted for classical, 24.9% for classics and semi-classics, 0.1% for popular. "The policy has increased our listenership substantially," WNMP says.

• The U. of Texas broadcasting department has produced a documentary, *Vision Across Texas*, for the State Commission for the Blind. *Vision*, 14:30 minutes long on 16 mm film, is being released to the state's tv station next month.

• Hamilton & Bell (radio-tv productions), San Diego and Mexico City, has packaged *Your Show—U.S.A.*, a one-hour music-news program for showing in Mexico City. As well as local sponsors, three national clients have requested availabilities on the show. H&B's offices: 3282 Lincoln Ave., San Diego. Telephone: AT 4-3749. Aud 50-204 Niza, Mexico, D.F. Telephone: 25-89-26.

• *The Ed Sullivan Show* will use European facilities of the newly-organized Intercontinental Television Corp. when it goes to Rome in June to tape a one-hour show. In September when the show goes to Moscow, Intercontinental will use its $300,000 mobile video-tape unit. Dave Garroway's *Today* show, starting today (April 27) through May 2, is scheduled to tape five programs in Paris, also using Intercontinental's services. The company has opened offices in Paris and Geneva and maintains a New York sales office.

COLORCASTING

Here are the next 10 days of network color shows (all times are EDT):

NBC-TV

April 27-May 1, 4-6 (2:30-3:00 p.m.) **Haggis Baggis**, participating sponsors.

April 27-May 1, 4-6 (4-4:30 p.m.) **Truth or Consequences**, participating.

April 27, May 4 (10-10:30 p.m.) **Arthur Murray Party**, P. Lorillard through Lennen & Newell and Pharmaceuticals Inc. through Parkson Adv.

April 28, May 5 (8:30-9 p.m.) **Jimmie Rodgers Show**, Liggett & Myers through McCann-Erickson

April 28 (9:30-11 p.m.) **Hallmark Hall of Fame**, Hallmark through Foote, Cone, & Belding.

April 29, May 6 (8:30-9 p.m.) **The Price Is Right**, Speidel through Norman, Craig & Kummel and Lever through J. Walter Thompson.

April 29, May 6 (9-9:30 p.m.) **Milton Berle**, Kraft through J. Walter Thompson.

April 30 (9:30-10 p.m.) **Ford Show**, Ford through J. Walter Thompson.

April 30 (10:30-11 p.m.) **Masquerade Party**, Lorillard through Lennen & Newell

May 1 (8-9 p.m.) **Ellery Queen Show**, RCA through Kenyon & Eckhardt.

May 2 (8-9 p.m.) **Perry Como Show**, participating sponsors.

May 3 (8-9 p.m.) **Dean Martin Show**, Timex through Doner & Peck.

May 3 (9-10 p.m.) **Dinah Shore Chevy Show**, Chevrolet through Campbell-Ewald.

• Film Producers Assn. of New York appoints Phil Dean Assoc., N.Y., to handle its publicity-public relations.

• A film documentary, *Time and St. Louis*, highlighting that city's 195-year history, has been completed by KMOX-TV St. Louis for telecasting May 12. Douglas Edwards, CBS news commentator, narrates the 60-minute program, incorporating on-the-spot film coverage of various area scenes. The documentary will be sponsored as a public service by Community Federal Savings & Loan and will be offered to audio-visual departments of area educational institutions.

• In a departure from usual programming practices, NBC-TV will present repeat episodes of *Dragnet* earlier than in past years in order to introduce new episodes during the summer months and thereby whet sponsor interest. P&G, the sponsor, will continue with the show through the end of June, with repeats scheduled, starting May 5 (Tues., 7:30-8 p.m.) and continuing through June 30. NBC-TV will schedule new *Dragnet* episodes, starting July 7, and continuing through the end of August. During September, the network plans to program four additional repeats.

• 20th Century-Fox Television has sold *5 Fingers* to NBC-TV for fall viewing and is putting the international spy series in full production next month with Herbert B. Swope Jr., as producer and Robert Stevens directing. In announcing the sale, Martin Manulis, executive production head of 20th Century-Fox Tv, noted that it is the fourth series the organization has sold within the last few weeks, giving it representation on all three networks. CBS-TV will broadcast *The Many Loves of Dobie Gillis* and *The Last Frontier* and ABC-TV will carry *Adventures in Paradise*.

• Writers Guild of America West has issued strike orders against five production companies charged with releasing post-'48 theatrical films to television without making arrangements for additional payments to the writers. The companies are Lippert Pictures Inc., Lippert Productions Inc., Alson Productions Inc., Alco Pictures Corp. and Filmakers Inc. None of the five firms is currently active.

ETHRIDGE, publisher of *Louisville Courier-Journal* (WHAS-AM-TV), named first vp; RICHARD W. CLARKE, executive editor of *New York Daily News* (WPIX [TV]), elected to executive committee; FRANKLIN D. SCHURZ, publisher of *South Bend* (Ind.) *Tribune* and *Sunday Tribune* (WSBT-AM-TV), elected director. Re-elected director was KENNETH MACDONALD, editor of *Dallas Times Herald* (KRLD-AM-FM-TV).

• JOSEPH J. LA BARBERA, formerly director of communications and press relations of Title Insurance and Trust Co., L.A., named vp of Spotlite News, that city, national tv newsreel organization.

• D. TENNANT BRYAN, *Richmond* (Va.) *Times Dispatch & New Leader* (WRNL-AM-FM), re-elected president of American Newspaper Publishers Assn. Also re-elected: MARK FERREE, Scripps-Howard newspapers (WEWS [TV] Cleveland, WCPO-AM-TV Cincinnati, WNOX Knoxville and WMC, WMCF [FM] and WMCT [TV] Memphis), vp, and J. HALE STEINMAN, *Lancaster* (Pa.) *Intelligencer Journal & New Era* (WGAL-AM-FM-TV Lancaster), treasurer.

• HOWARD W. TOWN, formerly engineer of RCA, N.Y., to National Educational Tv & Radio Center, Ann Arbor, Mich., as technical director.

• CY KERTMAN, formerly promotion manager, Warner Bros. Record Sales Corp., Burbank, Calif., resigns to open his own public relations and personal management office in Beverly Hills, Calif., with branch offices in New York.

• WILLIAM R. BARTON, formerly west coast editor of *Film Daily* and *Radio-*

Davidson Taylor, formerly a vice president of both CBS and NBC, has been appointed director of the Arts Center Program for Columbia U., effective May 15.

MR. TAYLOR

The $6½ million Arts Center, when completed, will house a graduate school of modern arts uniting the university's activities in arts and communications. Mr. Taylor's duties, explained university President Grayson Kirk, will not only include fund raising but also the "planning and supervision of the physical structure of the Center, and the main task of directing the activities which will be housed in it."

Mr. Taylor was with CBS from 1933-1949, serving there as vice president of both programs and public affairs. He was vice president of NBC from 1954-58 also in the fields of public affairs and programs.

Tv Daily, named editor of *Film & A-V World,* monthly magazine covering films in educational, industrial, tv, etc., fields.

• LORRAINE GORI, formerly project director, media studies, Alfred Politz Research, N.Y., appointed project director of Audits & Surveys Co., N.Y.

• MRS. ELINOR ROYEN, formerly of NBC and CBS, both Washington, D.C., joins Carl Byoir & Assoc., Washington public relations firm.

International

• TREVOR G. GOODMAN, vp and manager of Toronto, Ont., office of Young & Rubicam Ltd., to vp and managing director of company, with offices in Toronto and Montreal, Que. C. WILLIAM VAN HOUTEN, head of contract department of agency, succeeds Mr. Goodman as vp and manager of Toronto office.

• BARRIE THORNE, BBC's North American representative, named treasurer, radio-tv services, and leaves New York May 6 to take up his appointment in London. DEREK RUSSELL, head of publicity in London, is Mr. Thorne's successor.

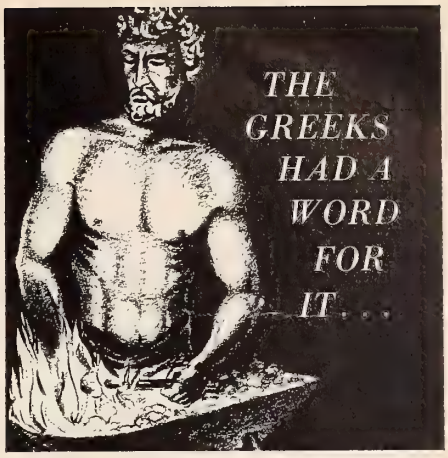
• CHARLES C. HOFFMAN, executive vp of Bureau of Broadcast Measurement, Toronto, Ont., resigns effective in June for new post outside broadcasting.

• EDWARD LLOYD MOORE, 68, formerly manager of CFRB Toronto, Ont., died April 18 following heart attack at his home in Toronto. Before joining CFRB he had been manager of CKOC Hamilton, Ont., and of former CKGW Toronto.

• JACK KENT COOKE, owner of CKEY Toronto, Ont., has established Kentco Records Co., N.Y., as subsidiary of Consolidated Frybrook Industries Ltd., Toronto, record manufacturers in Canada. He plans to press records using Canadian and U.S. talent in New York.

• PHIL STONE, announcer of CHUM Toronto, Ont., promoted to director of public service and live talent departments.

BOOKS



• *Freedom of Speech by Radio and Television, by Elmer E. Smead, Public Affairs Press, 419 New Jersey Ave., S.E., Washington 3, D.C.; 182 pp.; $4.50.*

The problems, present and past, of the broadcaster in walking the precariously balanced line between government regulation and self regulation while serving the public interest and at the same time making a return on his investment is treated by Dr. Smead, professor of government at Dartmouth, who for the past 10 years has concentrated on the field of government regulation of broadcasting.

Dr. Smead's thought-provoking and dispassionate chapters cover programming (and advertising) content in the public interest; public interest problems such as program balance, controversies and commercial-sustaining balance; news and the various influences on news coverage; regulation and the conflicts engendered by it; politics affecting broadcasting, and an appendix on the engineering, political and economic motives that create — and resolve — the many problems of the business.

• *Electronic Communication, by Robert Shrader, McGraw-Hill Book Co., 330 W. 42nd St., New York 36; 937 pp.; $13.*

The dust jacket of this volume wraps up the contents as including: "Everything you need to know about electricity, electronics and radio to pass FCC amateur or commercial license examinations." The author is an instructor in radio communications at the Laney Trade-Technical Div. of Oakland (Calif.) Junior College.

VULCAN
ΧΑΛΚΕΥΣ
ARMORER

VULCAN (Gr. Hephaestus) called God of Fire, was honored by the Olympian gods because he was the workman of the immortals, their armorer and smith. Even though he was ugly and lame, he had his compensations—for not only was he married to the beautiful Aphrodite, he also had the company of golden handmaidens he had made in his forge, to help him with his work for the gods. As Vulcan was armorer to the gods, so the Cincinnati area is an important armorer to the nation. It is highly industrialized—the home of giant machine tool companies, jet aircraft engine plants, automotive plants, atomic energy producing companies, and hundreds of smaller companies, supplying vital machinery and products to other parts of the country. Ranking 15th in national markets, it is important to every advertiser who wishes to reach the 468,000 homes in the Cincinnati trading area—homes of busy, thrifty, prosperous people.

And the wise advertiser and agency man knows that WCKY is the best buy to reach this prosperous market. WCKY offers the advertiser:

1. Responsive adult audience
2. 50,000 watts of SELLING POWER, covering ALL of the Cincinnati trading area
3. Refreshing, modern music and latest news 24 hours a day
4. Experienced air personalities who SELL your product
5. A prestige station with progressive management.

Call Tom Welstead at WCKY's New York office, or AM Radio Sales in Chicago for the latest facts and figures on Cincinnati and WCKY.

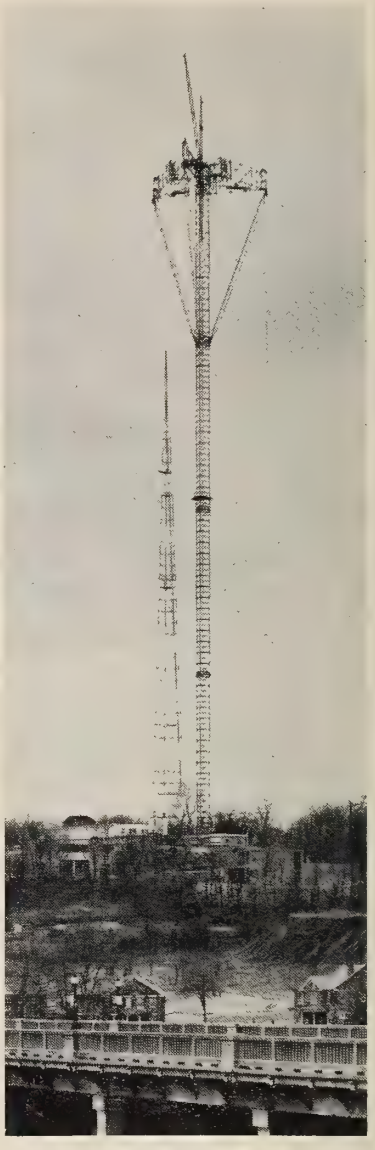
WCKY
50,000 WATTS
OF SELLING POWER
Cincinnati, Ohio

Low-power tv station

Electron Corp. of Dallas, Tex., a subsidiary of Ling Electronics Inc., Culver City, Calif., has introduced a complete low-power broadcast television station for vhf or uhf. Components include: cameras, transmitter, film and slide chain, monitors, antenna, audio facilities and all other operating accessories.

The station will give coverage of Class A signal characteristics within a radius of 15-20 miles with a 100-200-ft. antenna. The studio equipment, film chain and transmitter can be housed in a 10 x 12-ft. room and maintained by three persons.

Prices: Installed ready for operating, $26,500. Variations in equipment suitable for educational tv can bring the price down to $19,000. Electron has established a department to prepare and submit tv applications to the FCC.



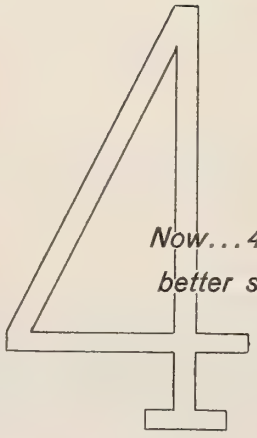
• Technical topics

• Houston Fearless Corp., Los Angeles, is marketing a new automatic rapid spray film processor. The company says 16 mm or 35 mm monochrome positive movie film can be processed at speeds up to 150 ft. a minute while negative film is processed up to 100 ft. a minute with the new machine. This is made possible by high impingement spray application of the developing solution, fix and wash, utilizing improved spray bars that assure uniform results. Impingement drying also is employed. HF address: 11807 W. Olympic Blvd., Los Angeles 64.

• Philco Corp., Philadephia radio, tv and appliance manufacturer, filed a patent infringement suit last week in the U.S. district court in Wilmington, Del., against Admiral Corp. Philco charged Admiral had used a Philco-patented portable tv receiver design, without taking out a license from the Philadelphia manufacturer. Philco asked for an injunction and an accounting of profits.

• The Middle Eastern District meeting of the American Institute of Electrical Engineers this month in Baltimore heard John B. Bullock, RCA engineer at Camden, N.J., report on the operation of a privately-owned microwave system. In his paper on "A Medium Haul Private Microwave System for Television," Mr. Bullock described a three-channel, five-hop system carrying programs from Denver, Colo., to Rapid City, S.D., where it feeds a community antenna system. Important aspects of this system, Mr. Bullock said, are: use of equipment which demodulates to baseband at each repeater; high-quality performance on color signals, and the system's antenna multiplexing which is accomplished by using waveguide filters and circulators. Throughout the system the three transmitters at any one location are fed to a single antenna and the three receivers.

• Ampex Corp. during March shipped 40 VR-1000 Videotape recorders to 19 stations and production companies, including these U.S. tv stations: WFLA-TV Tampa, Fla.; KFMB-TV San Diego, Calif.; KGBT (TV) Harlingen, Tex.; KTRK-TV Houston, Tex.; WLW-TV Cincinnati, Ohio; WPRO-TV Providence, R.I.; WDAF-TV Kansas City, Mo. (two units); KFJZ-TV Fort Worth, Tex.; KTNT-TV Tacoma, Wash., and KTEN (TV) Ada, Okla. The machines shipped to San Diego, Harlingen, Cincinnati and Fort Worth are the first vtr recorders to go to those cities, Ampex reported. Also during March, Ampex completed delivery of 12 color tape recorders ordered by NBC. Foreign shipments included seven units to Mexico, two to England, one to West Germany and four to Japan.



Interim "Candelabra" report • The second phase in the construction of the 730-foot tv tower to be used jointly by WBAL-TV, WMAR-TV and WJZ-TV, all Baltimore, has begun. With mechanical work completed RCA engineers in conjunction with station engineers have started the electrical checkout of the antenna systems.

Boasting the first "Candelabra" top to be built on the East Coast, the tower was designed and fabricated by the Dresser-Ideco Co., Columbus, Ohio. United States Steel's T-1 constructional alloy steel was used in the lower legs to bear the weight of the top and its three 10-ton antennas.

Upon completion of electrical tests, the stations will start the final phase—the installation of the transmitting equipment.

'NICE' CAMPAIGN

Thousand vie to name KYW's friendly imp

The friendly imp of KYW Cleveland was around quite a while before he ever acquired a name.

Now, after a two-week contest, climaxing the little fellow's four-month stand this year on the air and in KYW promotion, he has a name: "Elfis," picked from nearly a thousand entries.

NICE THINGS HAPPEN . . .

Elfis is an integral figure in a general sales and goodwill campaign, the "Nicest Things Are Happening" promotion. The Westinghouse station for four months this year arranged for nice things to happen to listeners, to advertisers and to their agencies.

KYW planned surprises to brighten winter months and keep attention focused on a happy station image. Some of the "happenings":

. . . to Listeners • Car cards and posters reminded that the "Nicest things happen to KYW listeners."

Local industry employes were saluted regularly on the air for nice deeds performed on the job.

Special community service projects were undertaken by KYW. These included a star-studded benefit for retarded children, co-sponsorship of an office-girl "Mardi Gras," and participation in the area boat show with special promotions for many thousands of visitors.

"Nice" stories were included in the KYW news whenever possible. "Nice" records and programming got a big play.

Gifts went out to Cleveland parents of babies born on the 11th of each month (KYW is at 1100 on the radio dial).

Elfis, famed in jingle and advertising, made the rounds of Kroger supermarkets, civic, social and fraternal affairs, handing out gifts to those who came up and identified him (see picture).

. . . to Advertisers • Three advertisers took advantage of the "Nicest Things Happen" campaign for special promotions in cooperation with the Kroger Co. supermarkets ("The nicest things happen when you go Krogering"). Oasis and Chesterfield cigarettes, Schlitz beer and Ideal dog food, all tied in air schedules with special displays at Kroger stores during designated weeks, with a complete kit of supporting promotion.

. . . to Agencies • Advertising people got frequent reminders of the theme from January through April. Trade impressions were registered with candy gifts and other mailings. Agency executives got free drinks at plush places in Chicago, Detroit, Cleveland and New York if their birthdays fell within the four months (letters of credit were sent for the toasts). Trade advertising carried the happy faces theme.

Letterheads featured the Elfis drawing in a warm pink, with separate versions each for listeners, advertisers and agencies.

Janet Byers, KYW advertising-promotion manager, is responsible for the nicest-things campaign. Assigned to personifying the imp was Jack Villari, a vocalist on the KYW *Road Show*. Besides appearing at innumerable functions to hand out gifts, he also took busloads of shoppers on free rides and

ELFIS IN ACTION

They tear his clothes too

picked up grocery tabs from time to time when purchases rang up to include the number 11 on the cash register.

Many vouch for WGY

WGY Schenectady, N.Y., has a backlog of 1,400 recorded testimonials for on-the-air promotion. The tapes were recorded during the station's contest to find the "Smoothest Voice Around" at its booth in the Greater Albany Home Show. The 1,400 women who entered the contest gave permission for their recordings to be broadcast. First and second prizes: 13 cubic-ft. GE refrigerator and a GE washer, respectively to the winners.

KETV (TV) asks 'Brand It'

A KETV (TV) Omaha, Neb., contest that invited viewers to identify debranded products was staged as a merchandising extra for advertisers. Nearly 3,500 entries were received identifying 15 national products that had been shown on tv with the words "Brand It" masking product names.

Worldwide service

Volunteer WWJ Detroit engineers are manning amateur station W8USA at WWJ-TV's transmitter site round-the-clock to receive messages from local men stationed at distant military bases. The shortwave transmitter that sends the servicemen's messages is aboard a Military Air Transport System plane. Interviews with the servicemen, conducted by WWJ newsman Britton Temby, are recorded and broadcast on station newscasts.

KPLK ups power on birthday

KPLK Dallas, Ore., took advantage of its fourth anniversary to announce that the station's power had been doubled (500 w to 1 kw) and that it would

War Council • WERE Cleveland invited Cherokee, Wotomnes-Mewauk and Sioux tribesmen to the Cleveland Advertising Club luncheon pow-wow opening the baseball season. Here Frank Lane, general manager of the Cleveland Indians team, unrolls a "papoose" bundle just handed him by a squaw-costumed beauty who told him, "This is your baby." Mr. Lane is surrounded by Cherokee Indian Jim Fletcher (c), Joe Gordon (r), Indians field manager, team members and ad clubbers in headbands. WERE originates games for a 41-station Indians network.

spearhead a regional promotion this summer.

The community promotion, brainchild of Ray L. Kozak, station manager, is a bean picking contest patterned after the annual midwest corn harvesting event. It will be conducted mid-August in cooperation with the Oregon State College and Northwest Freezers & Packers. Substantial prizes will be awarded to contestants.

Guest of honor at KPLK's birthday luncheon was Oregon Governor Mark Hatfield.

WKOW-TV helps bank accounts

A Junior Savers Club promotion by the Bank of Madison (Wis.) over WKOW-TV there (BROADCASTING, Feb. 16) has produced more than 1,000 new accounts for the bank within 13 weeks. The bank sponsors a western series Sundays, 5:30-6 p.m.

A ceremony at which the 1,000th Junior Saver was presented with artist's material for his painting hobby was telecast by WKOW-TV. The bank gives cowboy-apparel premiums and movie tickets to children as their savings accounts grow.

The Junior Saver promotion was conceived and produced by Fred A. Rickli, president of Madison Adv.

Pre-empted but not silent

WMCA New York staged a private "broadcast" when a half-hour of the *Ted Steele Show* was pre-empted by Conelrad April 17. Mr. Steele's d.j. show went to Newark, N.J., to the Memorial Center for Women. For several days prior to the Conelrad test Mr. Steele had asked listeners to send in their reasons for not wanting to miss a half hour of radio. Out of several hundred replies, a card from a patient at the Memorial Center was selected as the winner and Mr. Steele went to the center for a record and interview program over the p.a. system.

• Drumbeats

• The first annual salute to St. Louis food brokers was undertaken by KMOX there yesterday (April 26). The week is proclaimed "Food Brokers' Week" by Mayor Raymond R. Tucker. One of the major features is a Teamwork Breakfast, which is expected to draw 100 food brokers.

• Luke and Zeke, two bearded "hillbilly characters" greeted listeners on the streets of Memphis to help announce the new call letters of country music station KWAM Memphis, formerly KWEM. Accompanying Luke and Zeke were a couple of models wearing radio-equipped barrels. They strolled around giving out candy kisses to passersby. Posters on Memphis buses and billboards augmented the announcement of the "new KWAM."

• Warner Bros., Burbank, Calif., is licensing manufacture of "Kookie combs." The name comes from Kookie, the part played by Edward Byrnes in *77 Sunset Strip* (ABC-TV, Friday 9:30 p.m.) who constantly combs his hair. A flood of requests for Kookie's combs followed Mr. Byrnes' appearance on *Dick Clark's American Bandstand* on ABC-TV.

• WKRC TV Cincinnati got a slogan coined by city Mayor Donald Clancy on its 10th anniversary. The mayor in official congratulations said, "I know it makes you happy when I say, 'Our eyes are always on you.' "

• Pat Landon, d.j. with WRCV Philadelphia, broadcast 47 commercials free April 15 (his birthday) as a bonus to sponsors.

• A dramatic recreation of the first broadcast over KFI Los Angeles 37 years ago was presented April 16 in a special 55-minute anniversary broadcast.

• WMT-TV Cedar Rapids, Iowa, reports a 51% sales increase during Easter weekend for a service-station client who used three tv announcements to promote a special offer. The stations used WMT-TV's western personality, "Marshal J," to announce that gas patrons would get a baby chick with each gas purchase.

• Some 3,000 secretaries of agency media men were designated as recipients of orchids flown in from Hawaii, compliments of Blair-Tv and Blair Tv Assoc., during National Secretaries' Week (April 19-26). The salutation accompanying the flowers: "Sh-h-h, this one's for you!"

Equipping a Radio Station?

Get More Coverage With The New RCA

500- and 1000-Watt

AM Transmitters

The ability of these new 500- and 1000-watt AM transmitters to achieve and maintain a higher average level of modulation assures more program coverage. Simplified tuning, ease of installation, built-in provisions for remote control, and low operating cost make the RCA Type BTA-500/1R your best transmitter buy. Color styling adds harmony to station decor—a choice of red, green, blue, or grey doors. Whatever your equipment needs—SEE RCA FIRST!

Or write for descriptive literature to RCA, Dept. SD-22 Building 15-1, Camden, New Jersey.

Hearing Cases

FINAL DECISIONS

By memorandum opinion and order, Commission, on petition by applicant for reconsideration, granted without hearing application of Quad Cities Bcstg. Co. for new am station to operate on 1380 kc, 500 w, D, in Brazil, Ind.; terminated proceeding. Ann. April 22.

By letter, Commission waived Sec. 3.651 (c) and granted U. of New Mexico (*KNME-TV, ch. 5), Albuquerque, N.M., six months' temporary authorization to broadcast from 10:30 p.m. to 11:30 p.m., Monday, utilizing aur. trans. of its station to transmit stereophonic sound broadcasts in conjunction with KHFM (FM) Albuquerque; engineering condition. Ann. April 22.

By report and order, Commission finalized rulemaking and amended tv table of assignments by adding ch. 10 to Medford, Ore., in addition to its present ch. 5 assignment. TOT Industries Inc., had petitioned for channel allocation. Effective date of amendment is June 4. Ann. April 22.

INITIAL DECISION

Hearing Examiner Basil P. Cooper issued initial decision looking toward granting application of Santa Monica Bcstg. Co. for new class A fm station to operate on 103.1 mc in Santa Monica, Calif. Ann. April 20.

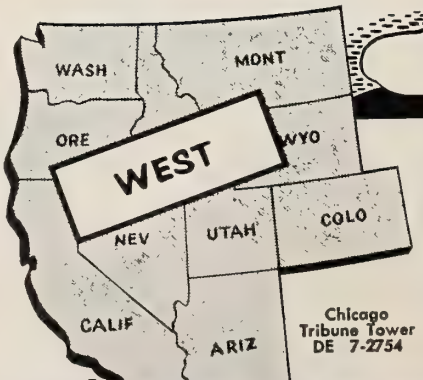
OTHER ACTIONS

By order, Commission designated Horace Stern to serve as presiding officer in reopened proceeding on applications of Biscayne Television Corp. (WCKT), East Coast Television Corp., South Florida Television Corp. and Sunbeam Television Corp. for new tv stations to operate on ch. 7 Miami, Fla.; ordered that further hearing and hearing conferences shall be held at such times and places as may be designated by presiding officer; and rescinded that part of April 3 order (which reopened proceeding) which provided for holding of further hearings in Washington, D.C. Ann. April 16.

By memorandum opinion and order, Commission dismissed protest and petition for reconsideration filed by Evanston Bcstg. Co. (WNMP), Evanston, Ill., directed against Feb. 25 grant of application of South Cook Bcstg. Inc., for new am station (WCGO) to operate on 1600 kc, 1 kw, DA, D, in Chicago Heights, Ill. Ann. April 22.

By memorandum opinion and order, Commission granted petition by WWDC Inc. (WWDC), Washington, D.C., party intervenor, for enlargement of issues in proceeding on applications of Alkima Bcstg. Co. and Howard Wasserman, both West Chester, Pa., and Herman Handloff, Newark, Del., for new am stations. Ann. April 22.

By memorandum opinion and order, Commission denied petition by Tele-Views News Inc., for reconsideration of Feb. 5 memorandum opinion and order which enlarged issues in Moline, Ill., ch. 8 tv comparative proceeding. Ann. April 22.



By memorandum opinion and order, Commission denied petition for review and motion by Upland Bcstg. Co., Upland, Calif., to dismiss application of South Coast Bcstg. Co., Laguna Beach, Calif. These applications are in consolidated hearing with other am applications. Ann. April 22.

Commission postponed oral argument from April 24 to May 22 on application of United Bcstg. Co. for new fm station in San Jose, Calif. Ann. April 22.

Commission denied petition of City of New York Municipal Bcstg. System for extension of time for oral argument on its application for extension of SSA to operate am station WNYC New York, N.Y., additional hours; rescheduled oral argument from April 30 to May 22. Ann. April 22.

Commission adopted new order correcting one of April 1 which consolidated applications of Sierra Bcstg. Co. (KATO), Reno, Nev.; Finley Bcstg. Co. (KSRO), Santa Rosa, Calif., and Sanval Bcstrs., Oroville, Calif., in hearing with that of James E. Walley, Oroville. New order amends issues only. Proceeding involves proposed operations on 1340 and 1350 kc. Ann. April 22.

Seasoned salesman. Relocate in Florida metropolitan market. Station has excellent ratings. Owned by expanding chain, with executive jobs open on proof of performance. Hospitalization. Paid vacations. Bonus for producers. Include billing figures on current or last job, resume and references. Box 564K, BROADCASTING.

Somewhere in the broadcasting industry there is a real-honest-to-goodness salesman on some station's radio staff. This man feels stymied in his progress. Perhaps the job he wants as sales manager is held by a capable man who is young enough to keep the job for a long time. If you are this man, if you really know radio in all its phases, if you understand how to sell competitively yet cleanly, if you are use to competition and to winning after a scrap for a piece of business then here is your opportunity. We are a network affiliated station that has revamped its programming to conform to its network and as a result has to re-vamp its selling approaches. We have a good job to offer a good man in a fine company located in a top market in the middle west. Our choice will be an intelligent, level headed, experienced man who understands the tricks of the trade, who will go out and sell himself and who can handle people. To him we will entrust the sales destiny of our radio station and to him we offer progress in our radio and television stations as he proves his worth. If you qualify, contact Box 610K, BROADCASTING.

Help Wanted—(Cont'd)

Sales

Two qualified salesmen wanted by west coast independent. Station will pay RERB registration fee. Box 635K, BROADCASTING.

PETITION FOR RULEMAKING FILED

Fisher Bcstg. Co., Portland, Ore. (4-9-59)—Requests change as follows: Salem, Ore. 3+, *18—, 24+, 66. Subject to condition that trans. of any station using ch. 3 be located at distance no less than that specified by sec. 3.610 of rules, from any authorized or proposed trans. site for operation on ch. 2 in Portland, Ore.

KTNT-TV Tacoma, Wash. (4-14-59)—Requests that Commission specifically condition future use of ch. 3 at Salem, Ore., on specification of trans. site at least 60 miles from trans. sites of three existing stations that serve Portland, Ore.

PETITION FOR RULEMAKING DENIED

KFJZ-TV Fort Worth, Tex. (12-23-58)—Requested amendment to substitute ch. 2 for ch. 11 in Fort Worth, Tex. and specifying ch. 11* in place of ch. 2* in Denton, Tex. Further requested issuance to KFJZ-TV of order to show cause why its authorization should not be modified to specify ch. 2 in lieu of ch. 11. Denied by memorandum opinion and order adopted April 8, 1959 and released April 14, 1959.

From the SEC record:

The following stock transactions by officers and directors of companies in radio-tv and allied fields have been released by the Securities & Exchange Commission. Sales, reported to SEC between Feb. 11 and March 10, involved common stock unless otherwise indicated.

American Broadcasting-Paramount Theatres Inc.—James G. Riddell purchased 1,000 shares giving him total of 1,980.

Ampex Corp.—James E. Brown increased holdings to 225 shares by purchasing 100.

CBS Inc.—Louis G. Cowan acquired 721 shares for 1,648 total.

Guild Films Inc.—C.W. Alden Jr. and Gerald Dickler purchased 50,000 and 10,000 shares, respectively, from issuer for their initial ownership in Guild; John J. Cole had pledged 34,000 shares he owned as collateral for loan which were sold by lenders because of inability to meet margin calls.

Paramount Pictures Corp.—Louis A. Novins exercised option to purchase 27,500 shares of capital stock of International Telemeter Corp., which in turn was exchanged for 2,291 shares of Paramount in merger effective Jan. 3.

National Theatres Inc.—E.C. Rhoden sold 9,650 shares held indirectly through Precision Holding Co. Mr. Rhoden retains 26,800 National shares individually and 7,325 indirectly through two investment companies.

RCA—Charles R. Denny purchased 188 shares through incentive plan, for 1,018 total.

Skiatron Electronics & Tv Corp.—Frank V. Quigley sold 100 shares, retaining 435; Kurt Widder disposed of 2,500 shares leaving him with 4,000.

Storer Broadcasting Co.—Abiah A. Church purchased 100 shares for 213 total.

TelePrompTer Corp.—Salter Hirshon sold 5,000 shares leaving him with 1,000.

NOTICE TO EDITORS—For more than 30 years, Metropolitan Life has sponsored advertising messages on national health and safety. Because of public interest in the subject matter of these advertisements, Metropolitan offers all news editors (including radio news editors) free use of the text of each advertisement in this series. The text may be used in regular health features, health columns or health reports with or without credit to Metropolitan. The Company gladly makes this material available to editors as one phase of its public-service advertising in behalf of the nation's health and safety.

Now you can protect him from polio... why don't you?

PERHAPS no medical development was ever so eagerly awaited as the vaccine against polio, or infantile paralysis.

But when the vaccine was perfected and supplies became plentiful, a strange thing happened. Millions of Americans failed to take it—or neglected to get the three injections needed for their protection.

In fact, recent studies show that more than 35 percent of our people under age 40—the period when most cases occur—have not had any shots; only half have had the full series. *Of the pre-school children who are most susceptible, nearly one-third have not been vaccinated at all.*

To help correct this situation, the U. S. Public Health Service, the American Medical Association, the American Academy of Pediatrics, the American Academy of General Practice and The National Foundation (for Infantile Paralysis) are spear-heading a drive for the conquest of polio.

You can strike a blow against polio!

If you have children, now is the time to provide them with protection—well in advance of the polio season which is at its height during hot weather.

Three injections—properly spaced by your physician—are 85 to 90 percent effective against paralytic polio. If your children completed their series of three injections a year or more ago, ask your doctor about a fourth "booster" shot at this time.

Remember, it is especially important to protect children under age five. Doctors say that polio injections can be started as early as six weeks of age.

If you are under 40, see that you, too, are vaccinated. Polio isn't limited to children. Although it rarely strikes adults, it is usually severe when it does occur.

So, you could do no wiser thing than to call your physician or clinic *now*—and arrange for your family's injections.

If we all act immediately, we can face the summer of 1959 with the bright hope that there will be no polio epidemics!

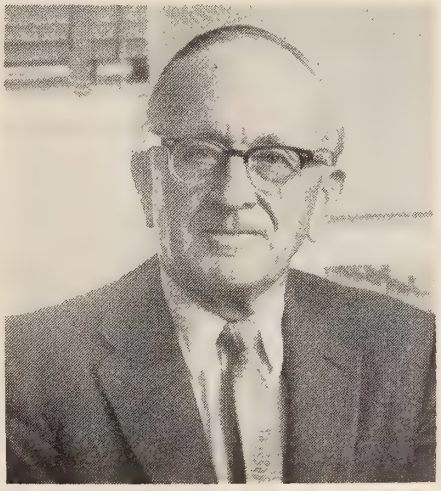
OUR RESPECTS TO . . .

Norton William Mogge

"The opportunities for radio selling are today greater than ever before," Norton William Mogge, president of the Los Angeles agency, Atherton Mogge Privett, believes.

"And no one takes better advantage of those opportunities than Nort Mogge," a Los Angeles broadcaster has commented. He described Mr. Mogge as "the most astute user of saturation radio in the West."

Among the accounts under Mr. Mogge's jurisdiction is Seven-Up Bottling Co. of Los Angeles, described as the most profitable soft drink franchise in the country. This enviable position is maintained by a barrage of local radio spots on about a dozen stations at all times of the day and night on all types of programs from music to news to sports to weather, with which the agency supports Seven-Up's national television, magazine and outdoor advertising. Other heavy radio users in the AMP client list include Pacific Hawaiian Pineapple products, Jerseymaid Milk products, Barbara Ann Baking, Luer Packing and Pacific Cracker as well as a number of local accounts.



Yet it is only since 1947, when he and Jack Privett left J. Walter Thompson to start their own agency, that Mr. Mogge has personally had much to do with radio. New business development, client contact, merchandising and marketing have been his specialties and in the major national agencies where much of his more than 40 years in advertising were spent, there had been able media departments to handle the details of buying time and space. But food advertising has always been Nort Mogge's major interest and since the beginning of commercial broadcasting food companies have been major users of radio, and latterly tv as well. So, without really trying, he absorbed a lot of knowledge of the broadcast media that was there when he needed it.

A Start at Sunkist • Nort Mogge may well be the only advertising agency president who prepared for a career in advertising by attending an agricultural college—Michigan State, where he majored in horticulture and received a B.S. in 1914. Peculiarly, his first after-college job was not on a farm but as a fruit auction salesman for Sunkist in New York City. Equally off-beat, he got the job not through his superior knowledge of oranges, but because he'd been captain of the Michigan State baseball team. (The man doing the hiring had been baseball captain at Cornell.)

For two years he spent his days inspecting deciduous and citrus fruit coming into Pier 20 on ferries from the railroad terminal across the Hudson River and watching auctioneers to see that the fruit brought a reasonably good price. Next he was sent to Chicago as head of the Sunkist premium department and then to Kansas City as manager of dealer service for an area that stretched from Oklahoma City north to the Canadian border and east almost to St. Louis. "I'd be on the road for six to eight weeks at a time," he recalled, "living in my Ford and often without money because my expense and salary checks couldn't catch up with me."

Tired of life in a Model T, Mr. Mogge obtained an interview with an executive of Northwestern Fruit Exchange who turned out to be a fellow native of Buffalo. More important, he was the brother-in-law of a girl Mr. Mogge had dated during his high school days. So Mr. Mogge was off to Seattle as an assistant sales manager of this apple marketing organization.

After World War I, in which Lt. Mogge spent two years teaching close order drill to non-coms at Ft. Lee, Va., he moved to New York to work with

AGENCY CHIEF MOGGE

Spot radio a specialty

Mutual Service Corp. advertising agency whose main account was Northwestern Fruit Exchange's Skookum apples. Five trips back to Seattle in a year (and in 1919 each cross-country trip meant a week on the train each way) made it plain where he was needed most and in 1920 he returned to Seattle as advertising manager.

Out the Window • Two years later a dispute between eastern interests and the western growers' association (which jointly owned NFE) split the company in half. In the rift "the $125,000 ad budget went out the window with me after it," Mr. Mogee recalled. He opened a marketing office in Wenatchee, center of Washington's apple country, but in 1923 a record-breaking crop drove apple prices down to the breaking point and Mr. Mogge accepted the post of Pacific Coast manager of Meredith Pub. Co. "Freely translated, that meant I sold space for *Dairy Farmer, Better Homes & Gardens* and *Successful Farming* up and down the Coast."

In 1926, when Meredith wanted him to move to the firm's headquarters in Des Moines as advertising manager, Mr. Mogge elected to stay on the Coast and over the next 15 years he successively had charge of food advertising for the Lord & Thomas (now Foote, Cone & Belding) office in San Francisco, was advertising manager of United Prune Growers of California, manager of the Los Angeles office of J. Walter Thompson Co., and opened and managed a Seattle office for JWT (bringing into the agency's client roster the Washington State apple, dairy and progress commissions). Mr. Mogge returned to Los Angeles in 1941 to reopen a general advertising office for JWT, which then was maintaining only a Hollywood radio service branch there. He began with himself and a secretary and six years later had a staff of 52.

Partner and President • In 1947, when JWT decided to transfer some of its top Los Angeles personnel to the agency's Chicago office, Mr. Mogge and Jack Privett, who handled the Ford Dealers of Southern California for JWT, left and opened their own Los Angeles agency, Mogge & Privett. In November 1958 the agency combined with Alfred Atherton to become Atherton Mogge Privett, with Mr. Mogge as president, a post he still holds.

Nort Mogge was born Aug. 26, 1891, in Buffalo, N.Y. In 1924 he married Aileen Brown of Wenatchee. They have two sons: Dwight C., a medical student at UCLA, and John N., also in the advertising agency field, with Keys & Adams, Los Angeles.

Always active in advertising organizations, Mr. Mogge has been president of the Seattle Sales & Advertising Club and of the Advertising Assn. of the West, chairman of AAAA's Southern California chapter, an ad club board member in Seattle, San Francisco and Los Angeles and is currently chairman of the Western Region of AAAA. An ardent golfer, he belongs to the Los Angeles Country Club and is past president of Southern California Advertising Golfers' Assn. He is also a member of the Beverly Hills Club, Big Ten Club and Advertising Club of Los Angeles.

Meritorious

IN nominating Rosel H. Hyde for another seven-year term as a member of the FCC, President Eisenhower recognized dedicated public service, and he disregarded politics.

Others sought the position because a $20,000 salary, among politicians, is a political plum. By naming Mr. Hyde well in advance of the expiration of his present term on June 30, the President cut off the politicking for the Republican assignment.

Mr. Hyde has been a member of the FCC since 1946. With one exception, he has served as a commissioner longer than anyone in the history of communications regulation, which began with the old Federal Radio Commission in 1927. And when he completes his new seven-year term in 1966 he will have exceeded the tenure of Paul A. Walker by a year. From docket clerk to commissioner, he has been with the FRC and the FCC for 31 years.

Mr. Hyde is an unusually youthful, vigorous man at 59. His background and knowledge of communications, and his judicial temperament are admirable qualifications for the position he has held with such distinction over the years. He is not a politician, but rather one of those rare men in public life who has made public service his career.

Too hot to handle

IN bucking the tv allocations hot potato to Congress the FCC took the most expedient, if not the only, course available in the light of the complexities and the unsettled state of spectrum use.

In proposing temporary or interim action by squeezing new stations into critical markets through shorter separations the FCC opens a new Pandora's box.

It could not by decree order what it regards as the optimum solution—extension of the existing vhf spectrum of 12 channels to cover a contiguous band of 50 channels. That must await negotiations with the present government users. And even if this develops, as the FCC majority optimistically hopes, it would take 10 years or longer, plus legislation for all-band receivers, plus adjustment of foreign commitments, to effectuate.

Thus the FCC did the next best thing by presenting to the Senate Commerce Committee a statement of the various long range alternatives to alleviate the scarcities in assignments. It is a clearly-worded exposition, so simply presented that members of Congress, preoccupied as they are with other matters, should have little difficulty understanding the problem.

Where the FCC foments trouble is in announcing that it intends to abandon existing mileage spacings to shoehorn new stations into areas having fewer than three vhf stations, but on a "temporary" basis. It would do this before it knows whether it can work out an expanded vhf plan with the government, or before the proposed President's commission to study spectrum use or the House Commerce Committee's spectrum subcommittee are even off the ground.

It could very well be that shorter spacings, directional antennas, precision offset and other techniques will become the main ingredients in the solution of the vexatious shortage problem. But like Comr. Bartley, we feel that to institute the shorter vhf separations now could prejudice any long range plan. It would jerk the rug from under uhf before it is known whether all 70 uhf channels will be needed. The majority holds that it should know in a few months whether the government will play ball on exchange of spectrum space. Certainly it would cause no onerous hardship to wait that long, particularly since the problem has remained unsolved since 1952.

Meanwhile, there are areas like Syracuse, Rochester, Fresno and Bakersfield, among others, where drop-ins presumably can be authorized without doing violence to the existing separations. Why delay here?

Reducing separations now, even on an interim basis, would be another cruel blow to the 85 operating uhf stations, which certainly should have some priority in succeeding to whatever better assignments become available.

There's no indication as to the extent to which the FCC proposes to reduce vhf separations. What about the effect on existing services which would be impaired or perhaps destroyed? Experience has shown that once standards are compromised, the exception becomes the rule and the degrading process by force of Congressional and other pressures, keeps boring deeper.

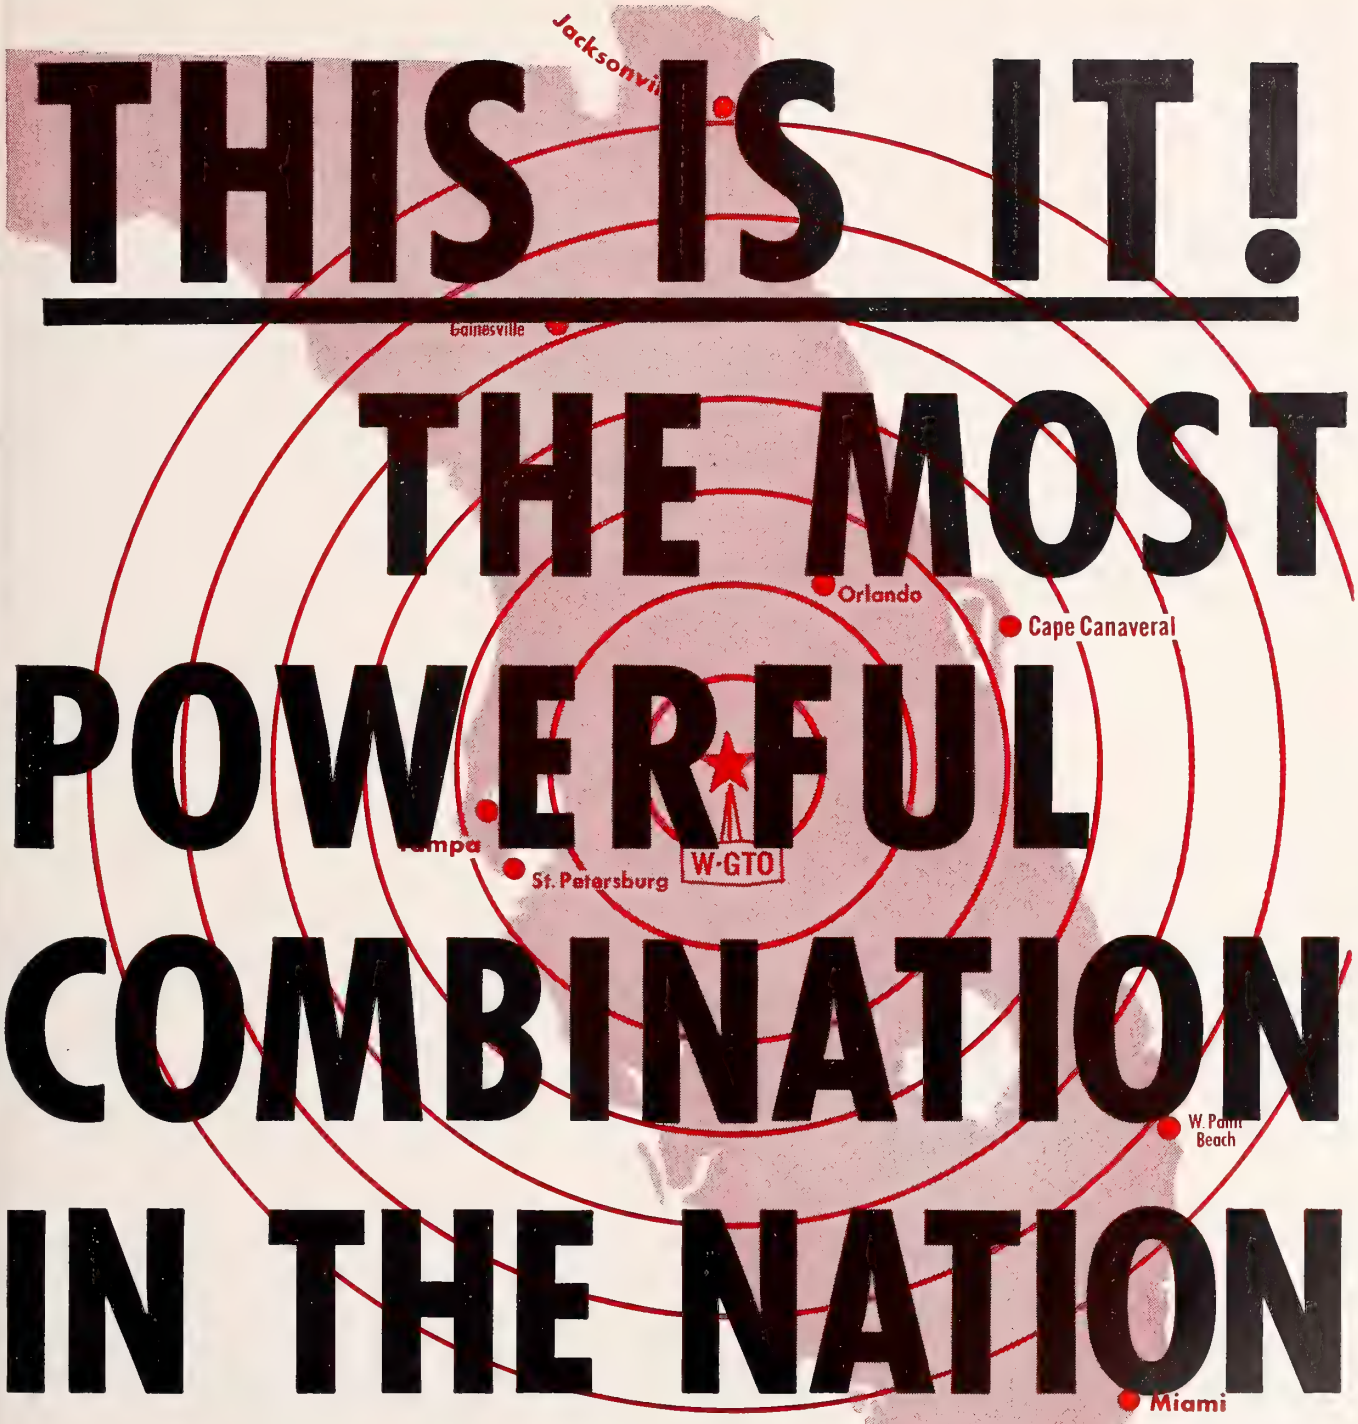
If the FCC concludes that shorter separations are inevitable, it should establish a definite outer limit. And it should hold to that line. But first, it must establish to the satisfaction of the public, through Congress, and to the broadcasters who have made their heavy investments, what that line should be. Otherwise the tv allocations are destined for the same fate as am radio.

'News' associations

WE are tempted from now on to refer to the two major news services as the Associated "Press" and United "Press" International.

Both are less press than broadcasting these days.

In a report issued before the annual meetings of the American Society of Newspaper Editors and the American Newspaper Publishers Assn., the AP announced it was serving more U.S. broadcasting stations than newspapers (BROADCASTING, April 13). The figures are 1,878 radio and television stations and 1,638 newspapers.



We asked UPI last week how its score stood. It is even more heavily weighted in favor of broadcasting than AP: 2,226 stations to 1,592 newspapers.

Things have changed rather dramatically in the little more than 20 years since the press associations were refusing to sell their service to radio. They have also changed in the slightly more than 10 years since AP agreed to admit broadcasters to associate membership, a status they still occupy. Associate members have no vote in AP affairs. Newspapers, as full members, control the destinies of the AP. Perhaps it is time they let the majority of AP outlets have at least an equal voice in AP operations.

Run it once-a-week or stripped across the board . . . in any size market—small, medium or large . . . daytime, early evening or nighttime . . . IT'S A GREAT LIFE delivers the big audience every time!

Here's a series that's topping its own outstanding network record with an even more successful syndicated run. Look at these ARB scores:

DAYTIME STRIP—Knoxville, Tenn. (Mon.-Fri., 1:00 p.m.) Leading its time period with a four-week 60% share and a 9.2 rating, IT'S A GREAT LIFE is among the highest-ranking daytime strips in the market.

EARLY EVENING—Cleveland, Ohio (Saturdays, 7:00 p.m.)—IT'S A GREAT LIFE tops SEA HUNT to lead in its time period with a 23.9 rating, 49% share-of-audience.

NIGHTTIME—Huntington, W. Va. (Sundays, 10:30 p.m.)—IT'S A GREAT LIFE, with a 15.5 rating, 36% share, leads in its time period, the first program ever to beat WHAT'S MY LINE in this market.

No wonder IT'S A GREAT LIFE has already been renewed for a third consecutive cycle in Seattle and Detroit! No wonder it's just been bought in Los Angeles for a full three cycles *in advance!*

Whoever you are, wherever you are, whatever your programming problem, a moment's calm reflection will reveal the sensible solution—IT'S A GREAT LIFE!

CLOSED CIRCUIT®

Station trading • Next major study by FCC is subject of radio and tv station sales. Staff is preparing historical-legal document on transfers and assignments, Commission policies and court decisions. It's due for submission to full FCC in week or so. Basic question is: When is station sale trafficking in licenses (forbidden by Communications Act)? Study was impelled by year-end Harris Oversight Committee recommendations, one of which was on station sales (BROADCASTING, Jan. 5).

Fellows' future • NAB's ad hoc committee negotiating with Chairman-President Harold E. Fellows on new arrangement upon expiration of his term in mid-1960, now is disposed to propose year-to-year renewals rather than long-term (five-year) contract. Mr. Fellows, who was 60 in March, now is drawing maximum pay of $75,000, plus $12,000 living expenses, per year. Upon termination of his presidency, he would become consultant at $20,000 per year until 65 and after that be pensioned at $7,500 per year.

Ad hoc committee of eight will make interim report to combined NAB board at meeting in Washington, June 15-19. Considered at same time, it's expected, will be results of survey made by Stewart, Dougall & Assoc. on shape NAB should take. Trend seems to be in direction of federation of broadcasters under NAB aegis (BROADCASTING, *March 16-23; April 6, 1959). Highest commendation reportedly is being given NAB's labor relations activities headed by Charles H. Tower.*

Triple threat • There's more coming from John P. Cunningham, board chairman of Cunningham & Walsh, on his advocacy of establishment of national educational tv system (AT DEADLINE, Feb. 9). Agency head warmed up on subject in talk slated for delivery to American Women in Radio & Television convention in New York over past weekend, and he plans major speech with more detail on same subject Thursday (May 7) at Ohio State U. Institute for Education by Radio-Tv meeting in Columbus. Mr. Cunningham has begun to take tripartite view of tv, differentiating among what he calls educational tv, commercial tv and "cultural tv."

P.R. push • Tiredest bunch of broadcasters in New York last Thursday night was all-industry public relations committee which that day submitted its recommendations for tv pr campaign to NAB tv board (see page 32). Nineman group, headed by C. Wrede Petersmeyer of Corinthian Broadcasting, after starting from scratch developed, wrote and brought in report and proposals in exactly one month and three days. Estimated minimum man-hours spent on project: 700 to 800. This was aside from time spent trying to keep on top of full-time jobs. Closing pace was so fast that some New York members didn't get home at all last week.

That special five-man NAB Tv Board committee to explore and implement recommendations submitted last week for industry-wide public relations campaign should be ready this week to organize itself and get going. NAB President Harold E. Fellows said he expected to have acceptances in time for announcement probably today (May 4). C. Wrede Petersmeyer, only tv board member on committee that brought in recommendations, reportedly was approached about serving on new committee, but it's understood his first reaction was that he should not do so.

Front and back • Sweetness and light onstage at Emmy awards telecast Wednesday (May 6) won't reflect backstage controversy over awards structure itself. New York members of sponsoring Academy of Television Arts & Sciences are split over maintaining current system of category awards (42 this year) or going to smaller number (10 or 12) of generalized honors for "outstanding achievement." Leading opposition are commentators Walter Cronkite and Ben Grauer.

No hidden meaning • Though WJR Detroit and WTAG Worcester, Mass. have signed for Radio Press voice news service, it's reported move has no bearing on future of Radio World Wide, cooperative program project in which they are two of leaders. At one time Radio Press was said to be under consideration as possibility for news service to all RWW stations. Sole significance of signings, it's understood, is that as only present RWW members who have disaffiliated from a network (CBS Radio), WJR and WTAG need additional news sources, of which Radio Press is one.

Eye in the West • Establishment of NAB television code office in Hollywood was voted by NAB Tv Board in New York last Friday, though officially they want to keep it quiet till more details are buttoned up—probably this week. Plan is to open office as soon as man is found to head it, but as of Friday officials reportedly were not decided as to exactly what type of executive they were looking for. Budget for office said to be in vicinity of $30,000 per year. Idea is to work more closely with tv film fraternity, and project is looked upon as two-year undertaking, at least. Plan was submitted to tv board by Don McGannon of Westinghouse Broadcasting, chairman of code review board.

Power of a woman • Loretta Young, whose *Loretta Young Show* has been on NBC-TV for years in Sunday, 10 p.m. period, had woman's last word in give-and-take engaged in by herself, by Procter & Gamble, her sponsor since show's inception, by P&G's agency, Benton & Bowles, and by NBC-TV. Her show next fall will stay right where it's always been although P&G wanted it moved. Philip Morris (Marlboro cigarettes) has signed on as full sponsor through Leo Burnett. P&G will pick up full tab of *Wichita Town*, Wednesday, 10:30-11 p.m., period to which P&G wanted Miss Young to switch.

Argument for interims • Here's one FCC commissioner's answer to complaints that FCC's interim plan to shoehorn more vhf channels into "critical" areas is premature. Criticism has been that before such stations become operational, FCC will know whether or not it is getting more v's from military and therefore long-range solution ostensibly should be established. Answer, according to key figure in working out interim policy, is this: If more v's are secured from military—or even if it becomes definite that none can be had and that other changes in allocations must be made—it will take 10 years more or less to make permanent adjustments. Therefore, drop-ins not only will take care of immediate problems and give public service quickly, but such stations will be in business for decade.

Don't kiss off 12-channel vhf television service as future solution to tv allocations problem, even though FCC Chairman Doerfer's statement to Congress puts that possibility at very bottom of list of desirable long-range solutions. Some commissioners still feel—albeit regretfully—that it may come to this if Commission is unsuccessful in working out swap deal with military for more vhf channels and if Congress refuses to legislate requirement that all tv sets be capable of receiving all channels.

WEEK IN BRIEF

MR. MORGAN

Buy productive ideas, not 'bigness' • The sincerity and sense of your program and its commercial message have much more sell-ability than mere size of show, talent or expenditure. Raymond R. Morgan Jr., vice president, Fletcher Richards, Calkins & Holden, Los Angeles, cautions to think whose money is being spent when fast talkers want to peddle something "big." It's in this week's MONDAY MEMO. Page **27.**

Tv Board lifts seals • Seven or more tv stations lose code membership as NAB directors act against violators of personal products ban, believed to center around Preparation H commercials. Board votes to name committee to carry forward the proposal for a major tv publicity campaign. Page **31.**

From quiz to quality • Revlon blueprints top-grade tv programming that will be coupled to quality cosmetic product image. Page **39.**

Spot radio fights back • Station Representatives Assn. to promote spot at agency level; H-R representatives starts campaign to bring "romance back into radio." Page **42.**

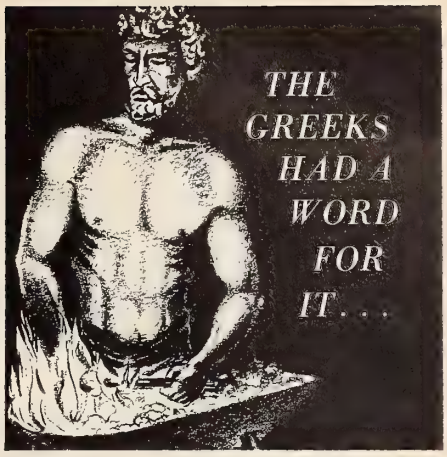
Broadcast business better • Most tv stations and over half of radio stations expect revenues this year to be above those in 1958, according to survey conducted by NAB. Page **54.**

Labor legislation flaws • NAB forms task force to watch labor legislation; President Eisenhower says Senate labor bill is weak because it fails to protect secondary boycotts and coercive picketing. Page **56.**

NBC operates despite strike • Network service continues after 1,500 NABET technicians walk off jobs following tape pickup in Paris. Network files suits against union claiming contract violations. Page **60.**

Threat to baseball telecasts • Dancer-Fitzgerald-Sample says pending legislation calling for blackout protection of minor league games could destroy network game-of-the-week telecasting. Page **66.**

Should nets be reps? • Of course, say networks and some of their represented stations in comments filed re FCC's proposal to force them out of representation business. No, never, says Station Representatives Assn. Page **70.**



More vhf space? • FCC announces it is consulting with government agency on long-range, 10-15 year allocations plan, with key target more vhf for television. AMST warns FCC to be careful on interim moves to shoehorn more v's into cities. Page **74.**

Property rights in signals • Three Salt Lake City tv stations ask U.S. court to rule on property rights in their signals and to restrain microwave and community antenna firms from using signals without permission. The suits may set an important legal precedent. Page **78.**

Path to toll tv • It will be made easier via public acceptance hastened by critics' attacks on commercial television's programming, says Paramount's Balaban. Page **83.**

VULCAN
ΧΑΛΚΕΥΣ
ARMORER

VULCAN (Gr. Hephaestus) called God of Fire, was honored by the Olympian gods because he was the workman of the immortals, their armorer and smith. Even though he was ugly and lame, he had his compensations—for not only was he married to the beautiful Aphrodite, he also had the company of golden handmaidens he had made in his forge, to help him with his work for the gods. As Vulcan was armorer to the gods, so the Cincinnati area is an important armorer to the nation. It is highly industrialized—the home of giant machine tool companies, jet aircraft engine plants, automotive plants, atomic energy producing companies, and hundreds of smaller companies, supplying vital machinery and products to other parts of the country. Ranking 15th in national markets, it is important to every advertiser who wishes to reach the 468,000 homes in the Cincinnati trading area—homes of busy, thrifty, prosperous people.

And the wise advertiser and agency man knows that WCKY is the best buy to reach this prosperous market. WCKY offers the advertiser:

1. Responsive adult audience
2. 50,000 watts of SELLING POWER, covering ALL of the Cincinnati trading area
3. Refreshing, modern music and latest news 24 hours a day
4. Experienced air personalities who SELL your product
5. A prestige station with progressive management.

Call Tom Welstead at WCKY's New York office, or AM Radio Sales in Chicago for the latest facts and figures on Cincinnati and WCKY.

Kansas City has the pitch

Or should we say pitches! For Kansas City's a big-league town in lots of ways. The A's fill up the ball park week after week. The Downtown Committee has given the retail district a shot in its wallet. Redevelopment of the North End is making national news.

And it won't be long before there's an area authority to preside over the booming, bustling 4-county, 2-state community that is Greater Kansas City. More than a million persons live here. They pack a walloping buying power of nearly $2 billion.

So stakes (and steaks, as you well know) are big in big-league Kansas City. And KCMO-Radio —50,000 watts and basic CBS—has the leadership that can make your claim stick.

LATE NEWSBREAKS APPEAR ON THIS PAGE AND NEXT • DETAILED COVERAGE OF THE WEEK BEGINS PAGE 31

No agreement close in NABET NBC walkout

Work stoppage at NBC by 1,500 members of National Assn. of Broadcast Employes & Technicians continued last Friday (May 1), with no prospects in sight for settlement by weekend. NBC has continued radio-tv programming schedule since start of walk-out last Monday through use of supervisory personnel (see story, page 60).

Joint Council 16, International Brotherhood of Teamsters, which had announced last Thursday it would ask local unions in New York area to respect picket lines, reversed itself Friday morning and advised members they could cross lines. But NABET spokesman said Friday that some members of Teamster locals were respecting picket lines.

Support for NABET was announced Friday by Communications Workers of America, which said it had directed its members to respect picket lines. Joseph Beirne, president, said union was examining its contracts and if permissible, CWA would not operate telephone equipment on "hot cargo" NBC programs.

NBC spokesman said late Friday telephone company had given assurance that in any eventuality, service would be continued through use of supervisory and administrative personnel.

Sessions were held by both parties with federal mediator J.R. Mandelbaum late Thursday and on Friday but "no progress" was reported. Dispute resulted from taping of *Today* show in Paris. NABET workers at NBC in New York declined to handle tapes, claiming that basic positions in producing tapes were held by non-union, French technicians "in violation of contract" with network. NBC called union action "a strike," which abrogated "no strike" clause in contract.

Asks free tv lift

American Dairy Assn., Chicago, which last week bought Lawrence Welk's *Top Tunes and New Talent* on ABC-TV for fall, has come up with soft sell twist in "public service films" built around 1960 Olympic Games, which it is offering free to stations. ADA has financed production and distribution of 13 3½-minute films which feature past Olympic champions. Films have opening and closing institutional commercial for American Dairy, plus fund appeal, with Bob Considine as m.c. Series made in cooperation with U.S. Olympic committee. ADA says some 200 stations have expressed prior interest.

CBS-TV's Cuban 'bombshell'

Charge that Cuba today is "a totalitarian dictatorship and is rapidly becoming a communist beachhead in the Caribbean" was to be made in special CBS-TV film report yesterday (Sun., May 3, 6-6:30 p.m. EDT). Program featured CBS newsman Stuart Novins on return from two month investigation in Cuba.

In survey of Cuban economy, censorship, cultural and entertainment media, education and other factors, Mr. Novins said this about news media and advertising: "The bilateral squeeze—government on the one hand, communist-led unions on the other—that has clamped down on business, has also clamped down on business' advertising budgets. With revenue cut, most news media—newspapers, radio and television — are operating very close to economic failure. The government has just decreed a 30% wage increase for editorial employes. Many papers will have to close down. One Havana television station and a chain of radio stations have already been taken over by the government on political grounds.

"This network is now called 'Rebel Radio'—and it is run by Violetta Casals, a communist. Another television station has been 'persuaded' to keep a communist in its staff of news commentators."

Dristan 'available'

Spot tv-heavy Dristan (with bulk of estimated $5 million advertising budget in medium) is latest account catch for agencies. It leaves Bryan Houston, N.Y., June 30, effective date of Houston's resignation of Whitehall Labs. account (which include Dristan [cold tablet] and two test products). Bryan Houston had account for little over two years, hopes to replace account that had "successful record." Whitehall's other most active tv agencies: Ted Bates & Co. (Anacin, Preparation H, among others) which has bulk; Sullivan, Stauffer, Colwell & Bayles, and Tatham-Laird (Kolynos Toothpaste). Dristan has hot sales record, claims rank next to Anacin in volume.

ACLU reverses ban on air editorials

Ten-year policy against radio and tv station editorializing on public issues reversed by American Civil Liberties Union, New York.

Patrick M. Malin, ACLU executive director, and Thomas R. Carskadon, chairman of radio-tv committee, were to release policy statement yesterday (May 3) adopted by board of directors. Messrs. Malin and Carskadon emphasized reversal based on need "in today's turbulent, complex world for the fullest exchange of information and opinion, a need which the radio-tv industry is uniquely able to help fill."

ACLU's statement stipulates: "Such editorializing on any subject matter should be done in the context of a station's overall balanced programming, including that subject matter. There need not be an affirmative seeking out of an opposing view in every instance . . . but that opportunity will be offered for the presentation of a responsible opposing view seeking such opportunity."

In 1949 ACLU opposed decision of FCC's reversal of its 1940 ruling against editorializing, warning that it would be "confusing and unworkable" for stations.

Two affiliate ABC

ABC Radio Friday announced signing of affiliation agreements with WTUP Tupelo and WBIP Booneville, both Mississippi, and both effective May 18. WTUP, owned and operated by Lee Broadcasting Co., is on 1380 kc with 1 kw. T. L. Estess is general manager. WBIP, owned and operated by Booneville Broadcasting Co., operates on 1400 kc with 250 w. Dexter Cadle is station manager. Both stations are E. O. Roden Stations.

Regimen consent order

Federal Trade Commission to announce today (Monday) consent order forbidding Drug Research Corp., New York, from misrepresenting effectiveness and safety of "Regimen-Tablets," weight reducing product. Order is binding on company, its officials and its advertising agency, Kastor, Hilton, Chesley, Clifford & Atherton, New York. FTC complaint was issued last year, charged printed advertising and radio-tv commercials falsely stated no special diet, with up to six lbs. loss in three days, up to 10 lbs. first week. Agreement was for settlement purposes and did not constitute admission of violation.

AFTRA, SAG talks set

American Federation of Television & Radio Artists announced Friday (May 1) that committee from AFTRA will meet with representatives of Screen Actors Guild in Hollywood May 9-10 to discuss selection of research organization which will study feasibility of merger between AFTRA and SAG. AFTRA delegation to be headed by Clayton (Bud) Collyer, national president, and Donald F. Conaway, national executive secretary.

New Ampex vtr

New model VTR-1000-B video tape recorder to be unveiled by Ampex Corp., Redwood City, Calif., at Society of Motion Picture & Tv Engineers at Miami Beach convention Thursday. Innovations include cueing feature to simplify program production, better signal-to-noise ratio.

Ariz. tv bid filed

Ling-Altec Electronics through wholly-owned subsidiary Friday filed application at FCC for ch. 3 in Douglas, Ariz. Ling-Altec proposed 0.595 kw visual, 0.372 aural, with antenna 238 feet below average terrain. Firm plans to spend $26,000 to construct, $38,000 for first year's operation and expects revenue of $43,000 first year. Ling-Altec, manufacturer of electronics equipment, is result of merger between Ling Electronics Inc. and Altec Companies Inc., announced last January.

WOV aids WMCA fund

WOV New York Friday joined forces with WMCA there to solicit contributions to add to WMCA's $5,000 reward for information leading to arrest and conviction of persons responsible for abduction of rape suspect, Mack Charles Parker from jail in Poplarville, Miss. Since Wednesday (April 29) WMCA has aired hourly 30-second announcements for donations. Station said its announcements would continue indefinitely.

• Business briefly

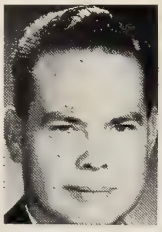
• Bristol-Myers Co., N.Y., has renewed *Peter Gunn* over NBC-TV (Mon., 9-9:30 p.m.) starting in fall and has placed order on NBC-TV for alternate-week sponsorship of Saturday 9-9:30 p.m. Time period for next season. Name of this program to be announced later. Agencies: Doherty, Clifford, Steers & Shenfield, N.Y. (for *Peter Gunn*) and Young & Rubicam, N.Y. (Saturday evening program).

• Miles Labs., Elkhart, Ind., has renewed sponsorship of *The Rifleman* (ABC-TV, Tues., 9-9:30 p.m.) starting Oct. 6 and also co-sponsorship of *Wednesday Night Fights* (ABC-TV, Wed., 10 p.m. to conclusion). Agency: Geoffrey Wade Adv., Chicago.

• Boyle-Midway Div. of American Home Products Corp., N.Y., on May 19 starts a summer-long spot campaign for Black Flag insect killer. Some 25 markets have been selected and others may be added for approximately six daytime and nighttime station breaks per week, the order, placed through J. Walter Thompson Co., continues through September.

WEEK'S HEADLINERS

MR. HIRSCH

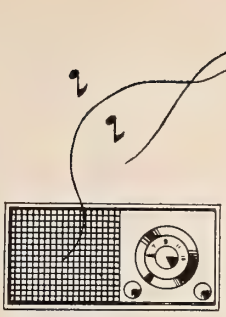


JAMES C. HIRSCH, national sales representative of Television Bureau of Advertising since 1956, promoted to newly-created post of director of national sales TvB. Before joining bureau, he was director of research, promotion and sales development for radio, Edward Petry & Co. N.Y. Earlier he had been sales manager of WRC Washington and director of advertising and promotion of WRCA-AM-TV New York.

MR. HOGUE

RICHARD P. HOGUE, formerly general manager of WXIX (TV) Milwaukee, named vp and general manager of KXTV (TV) Sacramento, Calif. Mr. Hogue has been in broadcasting field since 1939 when he started at KDKA Pittsburgh. Later he was announcer at WHN New York (now WMGM). In succeeding years he was on spot and network sales staff of ABC, vp and sales manager of Headley-Reed Tv, on sales staff of CBS-TV Spot Sales and commercial manager of WXIX (TV) before becoming general manager. KXTV, formerly KBET-TV, was recently acquired by Corinthian Stations, N.Y.

JOHN V. B. SULLIVAN, vp in charge of sales for WNEW New York, appointed general manager of station succeeding RICHARD D. BUCKLEY, who has resigned and sold his interest in Metropolitan Broadcasting Corp. to syndicate of investors (WEEK'S HEADLINERS, April 13). Mr. Sullivan joined WNEW in 1942 as promotion manager; was named account executive in 1948 and vp in charge of sales in 1957. Earlier he had been with WJZ New York (now WABC) and *New York Mirror*.



MR. WRIGHT

MR. ROBERTSON

JOSEPH S. WRIGHT, executive vp of Zenith Radio Corp., Chicago, elevated to president and general manager, succeeding HUGH ROBERTSON, who moves up to board chairman. Other top appointments: SAM KAPLAN from vp and treasurer to executive vp and assistant general manager and LEONARD C. TRUESDELL from vp and sales director to executive vp-marketing. Mr. Robertson fills post vacated by late Comdr. E.F. MCDONALD JR., and continues as chief executive officer. Mr. Wright joined Zenith in 1952, was appointed general counsel in 1953 and elected director in 1954 and vp following year. He was named executive vp in April 1958. Mr. Truesdell came to company in 1949 as vp in charge of radio-tv and was named vp and sales chief in 1955. Both Messrs. Truesdell and Kaplan are directors.

BLAIR RADIO STATIONS

help FLAKO products show

SOLID GAINS

in important radio markets

In market after market, FLAKO products are making new sales records. And their advertising is concentrated in one powerful medium—Spot Radio.

Through strategy planned by the parent organization, Quaker Oats, advertising of FLAKO products is closely geared to the distribution patterns in individual markets. In many of these markets, Blair Stations are the spearhead of the advertising attack. The simple fact is: BLAIR STATIONS SELL. Through applied audience-research, they have developed and intensified the elements that give radio its real selling-power:

1. *Local-interest programming*, which appeals to listeners throughout the station's own area in a way no distant program-source can duplicate.

2. *Local selling personalities*, who speak the language of the area they serve, and endow commercial messages with believability that converts ratings into cash-register results.

Over 40 stations in major markets are represented by John Blair & Company—by far the most important group of stations and markets served by one representative firm. So when you're thinking about radio, as most advertisers are, talk with your John Blair man. In many of your best markets, he represents stations that really sell.

When the Red Army marches on May Day, when the Russians vault into space, or test us in Berlin or meet with us at Geneva, every American is thrust into the picture. An understanding of how and why is essential for all who believe that the strongest armor of a free nation is an informed citizenry.

Momentous events are impending in May. To place them in full perspective, NBC is presenting month-long news and information programming on a scale unprecedented in television. Scheduled in the evening and in the daytime, on weekdays and on Sundays, these television programs will offer every American a vivid insight into the forces and events that are shaping his future.

Emphasis on news is traditional with NBC. Each week, 5¼ hours of television news programs—more than on any other network—are presented by the world-wide staff and facilities of NBC News, the largest news organization in broadcasting and the winner, so far this year, of 16 major awards for excellence of coverage and commentary.

This is one of the ways in which NBC practices its basic philosophy: totality of program service . . . rewarding television for every program taste, and for every public necessity.

TO WHOM IT MUST CONCERN! KEEP THIS LIST NEAR YOUR TV SET. NO ALERT AMERICAN CAN AFFORD TO SAY AFTER THE FACT: **"IF I'D ONLY KNOWN IT WAS ON, I'D HAVE WATCHED IT!"**

FIRST MEN INTO SPACE—PART 1 (MAY 3, 6:30-7:00 P.M.) An exclusive two-part documentary, filmed at Wright Air Development Center, on how the U.S. tested its first seven astronauts physically and psychologically for survival in outer space.

PRIMER ON GENEVA (MAY 3, 7:30-8:00 P.M.) A guide to the forthcoming Foreign Ministers' meeting—possible prelude to the Summit—by five distinguished NBC newsmen: Joseph C. Harsch (London), Edwin Newman (Paris), John Rich (Berlin), Irving R. Levine (Rome), Frank Bourgholtzer (Washington).

YOU ARE IN THIS PICTURE!

WHY BERLIN? (MAY 8, 8:00-9:00 P.M.) NBC News' Chet Huntley pinpoints Free Berlin's importance in the current world political struggle with special film that tells the city's story in affectingly human as well as strategic terms. Live inserts will give last-minute developments on the eve of the Foreign Ministers' Conference.

FIRST MEN INTO SPACE — PART II (MAY 10, 6:30-7:00 P.M.) The conclusion of NBC's two-part documentary on how the U.S. tested its first seven astronauts.

RED CHINA . . . UPDATE (MAY 10, 7:00-7:30 P.M.) NBC News' second Special Report on Red China. Exclusive films, shot behind the Bamboo Curtain, show some of the growing failures in the Communist regime, reflected in open resistance to communal nurseries and the desire of Chinese families to return to many of their traditional ways. Frank McGee is narrator.

GENEVA CONFERENCE REPORTS (BEGINNING MAY 11 TO THE END OF THE CONFERENCE) NBC News' special corps of correspondents (Harsch, Newman, Rich and Levine), supported by two camera crews, will cover the Geneva Conference in full. Their reports will be carried on TODAY (7:00-9:00 a.m., Monday-Friday), HUNTLEY-BRINKLEY REPORT (6:45-7:00 p.m., Monday-Friday), inserted into other regularly scheduled programs when necessary, and incorporated into NBC News Specials.

OUR MAN IN THE MEDITERRANEAN (MAY 17, 5:00-6:00 P.M.) NBC News' David Brinkley, in the role of observer, brings his distinctive journalistic style to bear on the manners and moods of Cairo, Beirut, Athens, Rome, the Riviera, Algiers, Granada and Cadiz.

NOW, AND TEN YEARS FROM NOW (MAY 24, 5:00-6:00 P. M.) A look at the events leading up to the eventual employment of manned space satellites... and a glimpse at the exciting future. Part of the dedication of the Avco Research Center at Wilmington, Mass.

MEET THE PRESS (SUNDAYS, 6:00-6:30 P.M.) Penetrating questioning of the newsmakers—still to emerge from the month's breaking news—by the headline-making press panel that has recently interviewed such personalities as Fidel Castro and Anastas Mikoyan.

Makes WKMH A Major Network Station!

WKMH

IS DETROIT'S NEW CBS AFFILIATE

Effective May 24, 1959

Adding to its present powerful list of radio personalities, WKMH will bring to its listeners such top CBS attractions as Art Linkletter, Robert Q. Lewis, Mitch Miller, Galen Drake, Amos 'N' Andy, Arthur Godfrey, the Metropolitan Opera, and the New York Philharmonic . . . plus CBS world-wide news coverage. Yet it will retain its identity as the foremost *family* station in the Detroit area . . . with programming for everyone. Get the facts on Detroit's *NEW BEST BUY* from Edward Petry and Company.

WKMH Detroit - Dearborn

John Carroll, Managing Director

Represented by EDWARD PETRY & CO.

"Book Match Advertising

Direct mail book matches arrive "on top" of the executive mail and your sales message is repeated 20 or 30 times per book. Book matches are invaluable for new product promotions, building company prestige, brand name and package recognition, salesmen's aids, reaching hard-to-see prospects.

Sparks WSOC-TV SALES

3 DIFFERENT WAYS"

writes C. George Henderson, executive vice president and general sales manager, WSOC Broadcasting Co., Charlotte, N.C. "We're sold on book match advertising as an excellent medium for building our 'corporate image' as well as for specific jobs on special promotions. We use 'Diamensionized' book match advertising 3 ways: (1) as direct mail to time buyers and agencies, (2) as reminder advertising left on all local sales calls, (3) as institutional advertising placed in our lobby, at the press club and at civic luncheons.

"Our most recent order was prompted by the completion of our sparkling new million dollar home with the most modern telecasting facilities available anywhere. When we want *everyone* to know, we use book match advertising."

A recent survey audited by a C. P. A. firm, Scovell, Wellington & Company, proved that prospects *welcomed* WSOC-TV's book match advertising. *85% of the respondents receiving the direct mail book matches requested to continue receiving the mailings! 87% replied they considered book match advertising an effective way to keep the station's name before buyers.*

Complete Service — Low Cost

Diamond Match handles all details, from package design to mailing on dates you specify to the lists you supply. And—the cost is surprisingly low. Diamond Counselors are professionally trained to design book match programs to meet your specific needs.

For more information on modern "Diamensionized" book match advertising, write on your letterhead.

"DIAMENSIONIZED"

Book Match Advertising Gives Your Advertising Message . . .

1. **AN EXTRA DIMENSION . . . takes it out of flat 2-dimensions and gives it the third dimension of depth . . . something tanglible to put in the prospect's hand.**
2. **NEW MAGNITUDE . . . by constant exposure of the selling message.**
3. **NEW PENETRATION . . . through the high utility of Diamond Book Matches.**

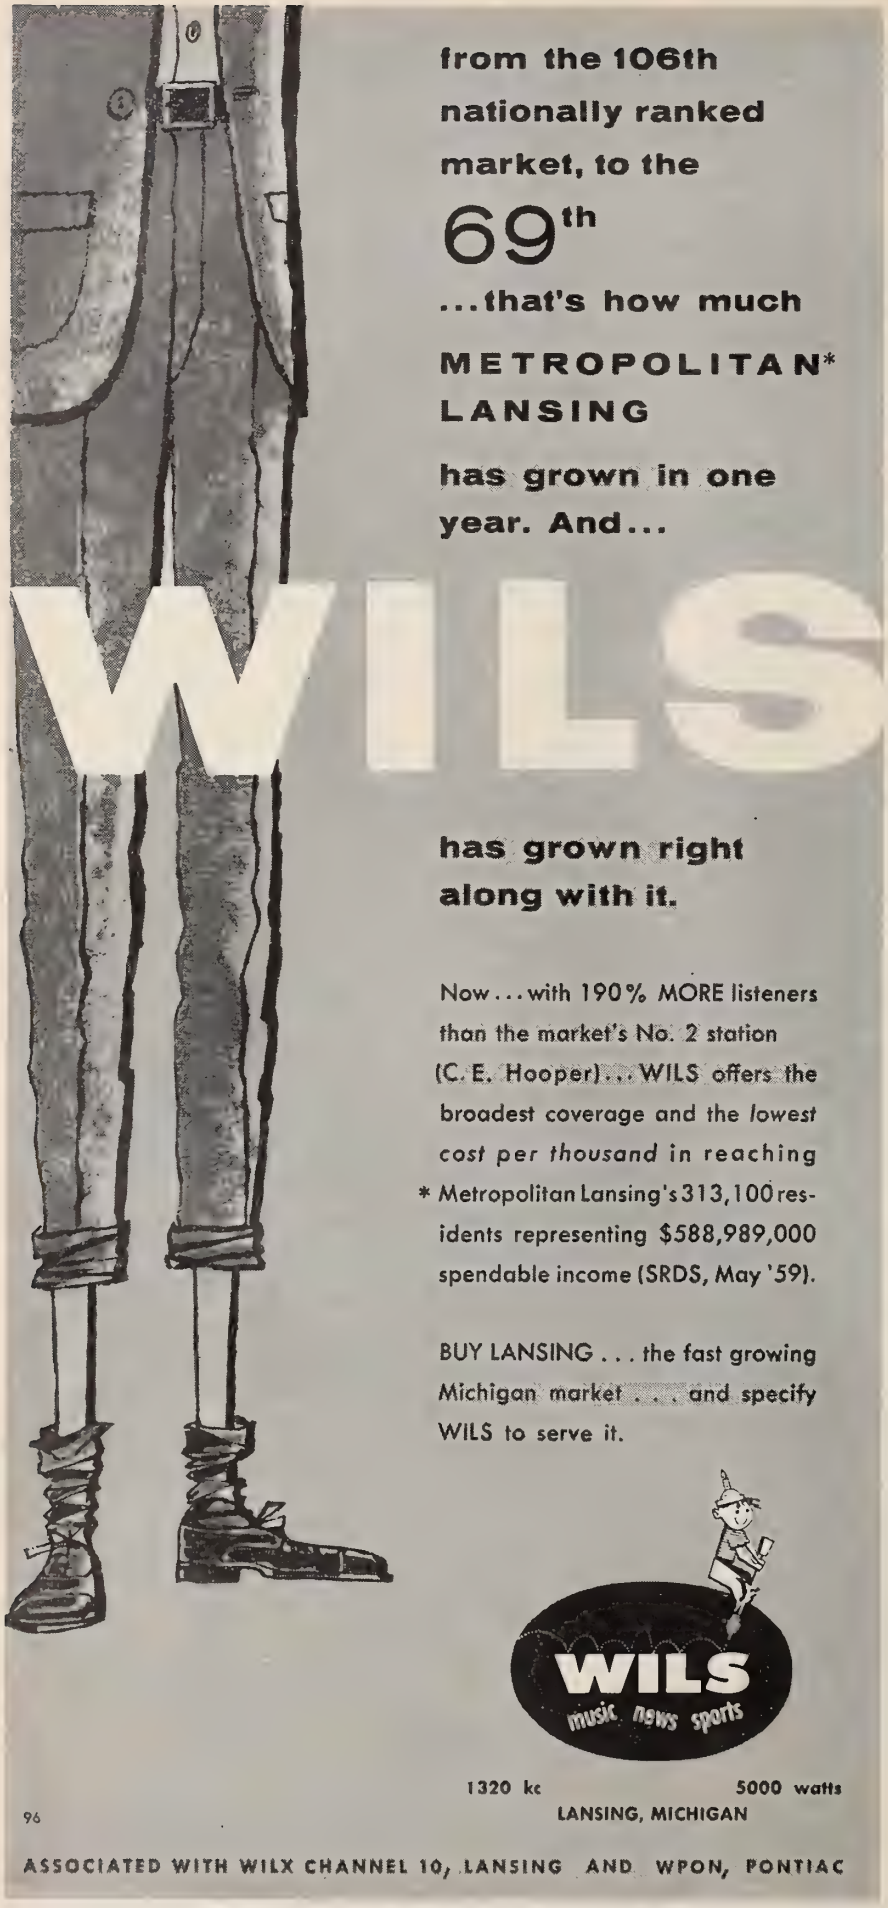
DIAMOND MATCH Division of Diamond Gardner Corp.,
125-M Paridon St., Springfield, Mass.

HERE'S WHAT WSOC's PROSPECTS SAY ABOUT BOOK MATCH ADVERTISING

"I believe this to be one of the most useful forms of station advertising available"

"Fine idea . . . and they're greatly appreciated"



"Everytime a match is struck WSOC-TV lights up in my mind"

"Book matches are one of the best ways for a station to promote"

"A constant reminder"

"Excellent for promoting the call letters"

"Medium reminds one constantly of the station"

*June 7-10—Advertising Federation of America, annual convention, Hotel Leamington, Minneapolis. An advertising "situation report" will feature Jean Wade Rindlaub, BBDO vice president; Fairfax M. Cone, chairman of Foote, Cone & Belding, and Sen. Hubert H. Humphrey (D-Minn.). Public service awards will be presented. Other speakers: David Susskind, executive vice president of Talent Assoc.; Mitch Miller, Columbia Records; James S. Fish, General Mills, presiding at the awards luncheon; John J. Ryan, AFA counsel.

June 9-11—National Community Television Assn. annual convention, Mayflower Hotel, Washington, D.C.

June 12-16—National Federation of Advertising Agencies, annual convention, Chatham Bars Inn, Chatham, Mass.

June 13—UPI Broadcasters of Pennsylvania, Penn-Harris Hotel, Harrisburg. Gov. David L. Lawrence, principal speaker.

June 13-14—UPI Broadcasters Assn. of Texas, annual meeting, Hilton Hotel, San Antonio, Tex.

Pick a star...
The CBS Radio Pacific Network has the greatest galaxy of stars available to a regional radio advertiser anywhere. Entertainers like Art Linkletter and Harry Babbitt. Dramatic shows such as the daytime serials, Johnny Dollar and Suspense. Authoritative CBS Radio newsmen such as Robert Trout and Carroll Alcott. There's no more effective, efficient way to reach westerners than by picking a fistful of stars on the quarter-million watt CBS Radio Pacific Network. See your CRPN or CBS Radio Spot Sales rep for all the heavenly details.

'Freedoms legislated away'

EDITOR:

I was a little bit disappointed in your coverage of my slander indictment in that you printed a story (page 102, April 13) with very negative connotation . . . even the nationwide news services in their condensed version . . . mentioned that we had evidence which we stated could "prove every word of our allegations against the Oregon State Police. . . ."

Secondly, the legal consensus is that even if all we said [in broadcast editorials] were unfounded that it pretty well comes under the head of fair comment . . .

On every side we are seeing our freedoms legislated away, one by one. There are various factors that cause mediums to be "lily livered" in the defense of what is right. Not that we feel that we are one who can infallibly determine that, but we do feel that all the pressure of the state was used through the grand jury to indict us to "keep us quiet" . . .

W. Gordon Allen
KGAY Salem, Ore.

The lady's choice

EDITOR:

Would appreciate receiving the [cartoon] in your March 23 issue referring to *26 Men.*

Feel sure Russ Hayden [producer] will get a tremendous kick out of same.

William L. Clark
Vice President, ABC Films Inc.
Hollywood, Calif.

[EDITOR'S NOTE: Sid Hix' cartoon showed a charming young lady answering an interviewer: 'My favorite program? Twenty Six Men.' Original art is en route.]

Right man, wrong network

EDITOR:

Thanks for the generous personal plug on page 80 of the April 27 issue regarding the National Industry Advisory Committee. However, I respresent Mutual, not NBC on the NIAC.

Joseph F. Keating

RCA 5KW FM TRANSMITTER

TYPE BTF-5B

DESIGNED FOR MULTIPLEXING AND REMOTE CONTROL

THIS NEW FM TRANSMITTER is designed for both conventional and multiplex operation. Outstanding performance features such as, a direct FM system, built-in remote control provisions, screen voltage power output control, and many others, make the BTF-5B today's best FM transmitter buy.

ADEQUATE COVERAGE—Its 5000-watt power output provides adequate coverage of a multiplex channel and improved coverage for conventional operation. The high power level permits the use of low-gain antennas to achieve a high ERP.

UNIQUE EXCITER—New FM Exciter, Type BTE-10B, uses "Direct FM" modulator circuits, thus fewer tubes are required. Automatic frequency control system with frequency detector prevents off frequency operation.

MULTIPLEX ACCESSORIES—Subcarrier generators for multiplex operation are available as optional equipment. There is room inside the new transmitter for mounting one of these generators. Exciter and subcarrier generators are also available as separate items for use with existing FM transmitters.

BROADBAND ANTENNA—New antenna designed to meet low VSWR requirements of multiplex system is available, along with a complete line of FM accessories.

★

For all your FM needs call your nearest RCA Broadcast Representative, or write RCA, Dept. TA-22, Camden, N. J.

IN CANADA:

Buy productive ideas, not 'bigness'

Once upon a time it was smart to be big. We said *once* upon a time. If you wanted an automobile you bought a Thomas Flyer. Of course, this highway hotshot was so clumsy it couldn't keep out of its own dust. But it was big—and that was the point.

If you were in the *big time* you had to have a *big* house. Out here, over in Pasadena, Orange Grove Dr. is lousy with big houses that people once thought were great. These magnified mansions are sleeping today in the California sunshine. You can buy them for buttons.

Women wore *big* hats—and big bustles. The symbol of the *big* business man was the big black cigar.

After size came sighs. Came "David" Ford and slew "Goliath" Thomas Flyer. Entered sleek streamlines and bumped bulging behinds into oblivion. Big cheroots disappeared from the mouths of men who started walking miles for little Camels.

How Big Is Big • Well, the great god size has entered the portals of television. What it is that provokes all the salaaming at his elephantine feet we don't know. Sheer size doesn't kid us a bit. But some people! If they could move the pyraminds into their offices, they'd do so and use them for paperweights just because they were big.

The creation of advertising is essentially a very simple operation. But it's made very complex by the scramble for size. We say the hell with size and all the phony things it implies. It doesn't take a regiment to turn out a great piece of copy.

Some *one* lonely guy cubby-holed with a typewriter does the job.

Some *one* artist covers canvas with crayon. And size doesn't have a damn thing in the world to do with whether it's good or bad. Corot wasn't a very big Frenchman and one of his best paintings wasn't so large. In fact, it was painted on the cover of a cigar box.

The patter of size is glib and glamorous, and, Mr. Advertiser, if you've got elephantiasis of the television ego, if you can stand big bills and migraine magnified, go ahead and buy size.

We live in Hollywood where people wearing names so big they would knock your hat off are wearing out our reception room chairs. We could get some latter-day DeMille to direct a big television show for you. Of course, he wouldn't want to do it in a television studio. He'd pack fifty thousand people into the Rose Bowl for the mob scenes. You'd get a thrill all right and apoplexy when the bill arrived.

The Guy in Des Moines • Don't tell us you've got to have the biggest television around because you've got big competition. That's lame duck logic. Why shoot your megacycles at your competitors? They're not interested in buying anything you've got for sale. Chances are, in your eagerness to outdo, outdazzle and outbuy, you'll forget that guy and his wife in Des Moines who are interested in buying. They don't know what the fuss is all about and wouldn't care if they did.

Raymond R. Morgan Jr. b. Oct. 2, 1925, Oakland, Calif. High school into Marine Corps. Discharged in 1946 as a PFC ("Meet the only enlisted man in advertising"). B.A. Stanford U. 1949 (journalism). Joined WDSU-TV New Orleans as sales representative in 1950 and switched to his father's advertising agency three years later. A third generation Californian and second generation adman. Married a native as well, the former Mary Lou Johnson of Ojai. Became agency vice president in 1958. "Dad was the greatest idea guy and teacher on earth—and this we believe!"

You can't win on size alone. You want to know how many *viewers* you have? We want to know how many customers we make. You want to know what star you've got, what producer, director, arranger, orchestra, gag men and guests. Nuts! These things are just the accoutrements of television. It isn't what happens (or doesn't happen) in the studio that really counts. It's what happens in homes where the program is tuned in (or out).

And that depends on the *size* of your program idea. It depends on the sincerity and sense—not the *showcase* or *size*—of your words. It depends on how well your salesmen can sell against your show. How much you know about the kind of merchandising that will go up and *stay* up. How much you know about landing publicity—not just now and then—but day after day. The list is endless.

Next time the fast talkers walk in and say "I've got something BIG," you can (and should) stop them cold in their tracks. Just ask them, "Is it a big program or a big idea?" Most of them won't know what you mean because they never had one. Oh, they'll tell you the show is a natural, the stars are honeys, the director is tops, the orchestra is swell and the gags are the greatest —but that's pretty empty talk . . . because it's your money they're talking about. And that's hard and real and when that runs out, you'll find many a loud larynx is stilled.

Making It Count • Two final thoughts if you're still crazy on the subject of size. (1) The *big* ideas, the ideas that hit, that live, are simple. (2) It's not so much what you have, but what you do with it. Neither require a budget that looks like the national debt. And when you spend less producing size you'll be able to buy *more* producing ideas!

Then strange and wonderful things will start happening to your business. Your competitor will laugh himself silly—at first. He'll think you're slipping, that he's got you on the run. Forget it. He's a bum anyway, so what do you care what he thinks! But you will be darn sure Mr. Guy in Des Moines won't forget you. He will believe you—and buy.

'You can't win on size alone'

The
Blu
Fair

The George Foster Peabody Award presented to "The Blue Fairy", WGN-TV, as the nation's outstanding program for children during 1958.

WGN-TV— only TV station to win a Peabody award in 1958!

The citation reads: "An imaginative and enchanting series, which, through live acting, puppetry and narrative, brings to magic reality the most enduring of children's stories. It is noteworthy that, despite nominations of network programs, this award goes to a program series telecast live and in color by an independent station in Chicago—WGN-TV."

WGN-TV is proud to have won this award. Its winning adds to a vast store of proof that WGN-TV's policy of quality programming presented with integrity results not only in industry recognition but in audience growth and loyalty as well.

WGN-TV originates more live and color programming than all other Chicago stations combined, and is dedicated to providing the finest programming and quality community service to the great Chicago market.

REBELS AGAINST TV CODE STRIPPED

- **NAB Television Board pulls seal from 7 to 10 violators**
- **Bates' Rodgers says attitude on Preparation H unfounded**
- **N.Y. session also considers tv public relations campaign**

Seven to ten stations had their NAB television code memberships revoked and plans for an approximately $725,000-a-year television public relations program were taken under consideration as the NAB Television Board met in a day-long session last Thursday (April 30).

Revocation of the right to display the NAB television code seal was imposed on all of some "15 or 20" stations which had been cited to board for this meeting and which had not, following citation, either agreed to abandon the questioned practices or said they would withdraw voluntarily from code subscribership. G. Richard Shafto, WIS-TV Columbia, S.C., chairman of the television board, said the "15 or 20" had dwindled—by reason of compliance with or voluntary withdrawal from the code—to "half or less" before the meeting was held.

A two-sentence announcement of the tv board's action on code revocations said only that it involved "several stations in various parts of the country" and was "in response to charges brought by the NAB Television Code Review Board for continued and willful violations of provisions of the code, relating to personal products advertising, triple spotting and advertising time standards."

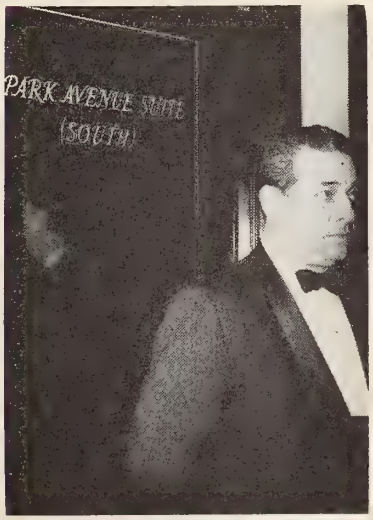
But it was generally acknowledged that most of the "violations" related to personal products advertising — and, though the board members would officially name no product, that the one whose advertising was primarily involved was Preparation H, a hemorrhoid remedy. It had been confirmed earlier that 68 code subscribers were carrying the Preparation H commercials and that seven other subscribers were carrying the schedule but had notified Ted Bates & Co., the agency, that they were cancelling it (BROADCASTING, April 27). Counting non-subscribers, 142 stations are carrying Preparation H, and another 108 have cleared the copy but have not been ordered, according to Dan Rodgers, senior vice president of Bates.

All Violators on Carpet • Donald H. McGannon, Westinghouse Broadcasting Co., chairman of the code review board, was said to have assured the television board that all stations continuing to carry hemorrhoid-remedy commercials would be hailed before the television board for code violation. The next tv board meeting is set for June 17.

The board's decision to revoke was not made without protest. Ted Bates' Mr. Rodgers sent a telegram asserting that after more than three years' exposure to the commercials "a substantial and responsible segment" of the public has given no indication it finds Preparation H advertising offensive. And another opponent of the board's action invoked a consumer study commissioned by the code review board itself.

This was said to be Julius Barnathan, ABC-TV vice president and research director. Mr. Barnathan, although known to be at the meeting, declined to comment on why he was present or what he said. But from other participants it was learned that he cited a consumer study, conducted for the code board last summer by W. R. Simmons & Assoc. Research Inc., an independent firm, which purportedly found that 82% of the respondents did not consider hemorrhoid-remedy advertising objectionable if telecast after children have gone to bed.

Mr. Barnathan was said to be there representing some ABC affiliates carrying Preparation H commercials. His position, similar to that of Mr. Rodgers, was described as being that it is discriminatory to classify hemorrhoid-remedy advertising as verboten when commercials for laxatives, deodorants, depilatories, toilet paper and the like continue without censure.



In addition to this opposition, it was known that the station of one television board member has been carrying the Preparation H schedule. This member's position in the board discussion was not learned.

A Re-evaluation Plea • Mr. Rodgers' message to the board maintained that there was "no evidence of trouble even after $2.8 million have been expended on tv" for Preparation H. He offered this suggestion:

"A thorough re-examination of the code, aimed at making it more appropriate to the time and maturity of the viewing public, might be a more states-

Guarded door...

The NAB Television Board had this sturdy sentinel posted outside its meeting room in the Waldorf-Astoria last Thursday.

. . . guarded words

At the end of a long day the board issued announcements which, in effect, postponed decision on a public relations program and ducked the question of why 68 code subscribers are still carrying a hemorrhoid commercial the Tv Code Review Board banned.

MR. PETERSMEYER MR. SHAFTO MR. MCGANNON

For public relations, more study; for the code, several seals lifted

manlike and more realistic solution than any attempt to impose a ruling inconsistent with conditions that exist today. We believe that thoughtful consideration of the above would result in a course of action in the best interests of the total broadcast industry."

The arguments were unavailing. Guarded though the television board's brief statement was, it made clear that those stations which had been cited—and had not afterward indicated they would comply or voluntarily withdraw from the code—had met revocation of their code seal privileges. Another board meeting was scheduled for Friday morning, but this was said to be for the purpose of hearing code board plans for the coming year.

Officials did say that any station whose code privileges had been revoked could obtain reinstatement by agreeing in 30 days to cease alleged violations.

Lack of Precision • Like the tv board's announcement of action on code violations, its statement on the Television Information Committee's proposal for an industry-wide public relations campaign was vague as to specific details, although it ran to four pages.

The tv board had unanimously voted, it said, "to carry forward immediately plans for a vastly increased industry-wide public information program."

The statement also said that the tv board received with "enthusiastic appreciation" an "extensive report" from the committee, which is headed by C. Wrede Petersmeyer, of Corinthian Broadcasting, and that the board authorized appointment of a five-man committee to "investigate the financial, organizational and functional relationships between the proposed program and the NAB and other industry organizations." The five-man committee, to be named "within the next few days" by NAB President Harold E. Fellows and to report back to the next tv board meeting June 17, also was asked to "develop and explore with affected components of the industry specific proposals for financing."

The committee is to be chosen from members of the NAB Television Board.

The overall assignment given to the new five-man committee was "to further define and implement the recommendations made by the [Petersmeyer] committee."

The report submitted to the board, the announcement said, described the "primary task" as being "to make possible the creation of a more informed atmosphere than now exists among many groups, both lay and professional, and among the general public." The program will seek to bring to "all elements of the american public a greater understanding of television's obligation and desire to serve the interests of all segments of the American audience."

Foundation for Campaign • One section of the committee report was made public. It was titled "Statement of Broadcasters' Convictions and Beliefs," and the board said it will form the basis of the forthcoming information campaign. This section reads:

"(1) The vast scope, impact and acceptance of television imply profound social responsibilities and opportunities. This places upon each component of the industry a heavy responsibility to be self-critical and to analyze continuously the programs it offers.

"(2) Television is a mass medium now serving virtually every home in America. Most of its programming efforts, therefore, must serve the desires and interests of the great majority of the American people. Yet broadcasters also recognize and undertake the important function of serving the specialized tastes and desires of minority audiences.

"(3) Television is not only an entertainment medium but an instrument of information, culture and education. While its major programming mission, as demanded by the American people, is to entertain, substantial parts of the schedule are and must continue to be devoted to informational, cultural and educational ends. It must present a full variety of program types so the public itself can make a choice.

"(4) Television has demonstrated unique power in marketing products and, therefore, serves as a powerful and constructive force in our economy. It functions most effectively, both for the viewer and the advertiser, when it adheres to reasonable standards in terms of frequency, length and good taste, as set forth in the NAB code.

"(5) While broadcasters take pride in the accomplishments of television, they also recognize an even greater potential still to be fulfilled. Each broadcaster, at the station as well as the network level, must constantly and critically re-examine his output to raise individual program standards, to create and expand program concepts and to enhance the diversity and balance of his whole schedule so that broadcasting may continue to advance in greater service to all."

The plan which the Television Information Committee presented last Thursday to the NAB Television Board was a last-minute modification of one adopted tentatively two weeks earlier.

Budget Is Trimmed • In its original version, the plan called for a budget of $1,140,000 a year (CLOSED CIRCUIT. April 20) and the appointment of an outstanding public figure to head the operation and an administrative deputy to run it. Committee members who favored that version spoke of finding a man of comparable stature to Eric Johnston of the Motion Picture Producers Assn. or Gen. Alfred Gruenther of the American Red Cross.

This version, which was understood to be supported by NBC-TV, was modified last Tuesday, reportedly after CBS had urged the recommendation of a much less ambitious plan. The plan submitted to the NAB tv board last week was a compromise between these two extremes. It embraced these main points:

• The television information office would have an annual budget of roughly $725,000 and a minimum life of three years.

• It would be headed by an experienced administrator but not necessarily one of national prominence.

• Stations would be asked to contribute each year the equivalent of three

A good SALESMAN is more believable...

and so is a good STATION!

CITY people, farmers, *everybody believes* a sincere, established salesman more readily than a fast-talking Johnny-Come-Lately.

This is exactly why WHO Radio *sells* better. For generations WHO has been known and respected throughout Iowa — and Iowans *believe what they hear* on WHO Radio. We make every effort to keep this confidence by providing them with outstanding professional programming — the *best* in news, sports, entertainment.

As a result, more Iowa people listen to WHO than listen to the next four commercial stations combined. And they BELIEVE what they hear!

Next time you consider radio — radio with the same outstanding qualities you demand in a salesman — remember to ask PGW about WHO, the very best there is in Iowa radio!

WHO

for Iowa PLUS!

Crosley Broadcasting Corporation,

You won't find our ten birthday candles on a cake.
Instead, you'll find them scattered out there in the darkness—wherever they are needed to make some lives a little brighter.
Because our ten birthday candles represent not only our ten years in television—but more important, our ten years of public service in television.
For it has long been the principle of the Crosley Broadcasting Corporation that a Television Station or a Radio Station must be truly a good neighbor in its community—by putting public service above all other considerations.
So on our tenth birthday at WLW-C Columbus and WLW-D Dayton, we don't look back, but forward to the many ways in which we can continue to fulfill this public service responsibility in keeping with the tradition of the WLW Stations.

times their highest half-hour rate, in three installments per year. Assuming 50% of all operating tv stations participated, this would bring in an estimated $415,000 a year.

• The three television networks would contribute a total of between $175,000 and $200,000. Their owned stations would contribute separately at the regular station rate.

• The NAB would contribute $75,000.

• Television station representatives, film companies and other suppliers and services would be invited to participate, at subscription rates to be determined.

The temporary Television Information Committee which developed the plan was appointed in mid-March at the end of the annual NAB convention in Chicago (BROADCASTING, March 23). A dramatic build-up preceded the formation of the committee.

At a convention of CBS-TV affiliates which was held just before the NAB convened, CBS President Frank Stanton announced his network was ready to invest $100,000 in a special research study to find out what people really thought of tv. He described that as a necessary preliminary to a public relations program. The CBS research project is now under way (see box this page).

Sarnoff Sets the Stage • In a keynote speech to the NAB convention two days later, NBC Chairman Robert Sarnoff called for an industry-wide public relations program supported by "all those with a stake in the medium." It was he who first publicly urged that the project be staffed and financed separately from existing associations.

Mr. Sarnoff also proposed that the project start with a survey of public attitudes toward tv.

In his Chicago speech, Mr. Sarnoff said the massive public relations campaign was needed because of growing criticism which he feels is creating a climate for more government regulation of broadcasting.

The day after Mr. Sarnoff's keynote address the television membership of the NAB adopted a resolution directing NAB President Harold E. Fellows to appoint the special committee to develop a plan and charging the committee to submit the plan to the NAB Tv Board by April 30.

The resolution said the campaign "is to be conducted in liaison with the NAB, but is to be undertaken as a major new effort and separately staffed, operated and financed."

The members of the Television Information Committee were appointed the day after the tv membership acted. They were: C. Wrede Petersmeyer, Corinthian Broadcasting Corp.; Robert D. Swezey, WDSU-TV New Orleans; Ward Quaal, WGN-TV Chicago; Jack Harris, KPRC-TV Houston; Roger W. Clipp, Triangle Stations; Don McGannon, Westinghouse Broadcasting Co.; Kenneth Bilby, NBC-TV; Charles Steinberg, CBS-TV, and Michael Foster, ABC-TV.

The committee elected Mr. Petersmeyer chairman. He is the only committee member who is also a member of the NAB Television Board. Privately he had been active among fellow NAB board members in urging an invigorated public relations effort.

All members of the information committee except Mr. Swezey were present for the submission of their report to the television board last week. Mr. Swezey was in Europe.

All tv board members were present: Chairman Shafto; Mr. Petersmeyer; Joseph Baudino, Westinghouse Broadcasting; John Fetzer, WKZO-TV Kalamazoo, Mich.; W.D. (Dub) Rogers, KDUB-TV Lubbock, Tex.; C. Howard Lane, KOIN-TV Portland, Ore.; Clair McCollough, WGAL-TV Lancaster, Pa.; Dwight Martin, WAFB-TV Baton Rouge, La.; Payson Hall, Meredith Stations; Willard Walbridge, KTRK-TV Houston; James Russell, KKTV (TV) Colorado Springs; Alfred Beckman, ABC-TV; William B. Lodge, CBS-TV, and David Adams, NBC-TV.

Running start

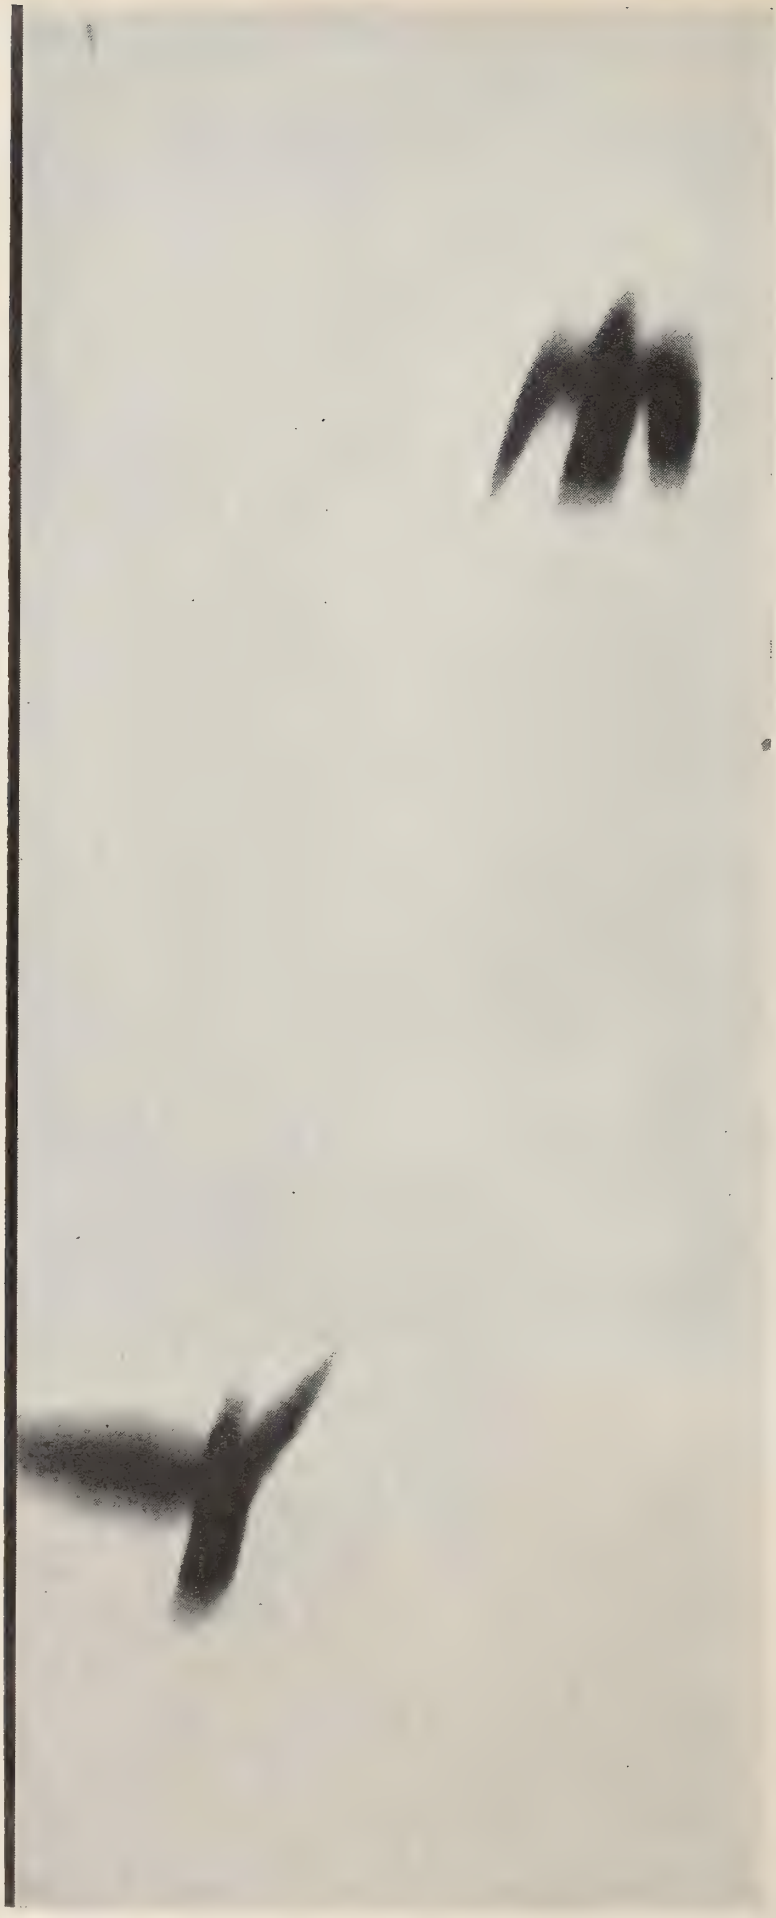
Preliminary work has been started on the CBS-supported, $100,000 studies of public attitudes toward broadcasting.

Much more must be done before the studies themselves are conducted. Questions and interviewing techniques will be painstakingly tested to make the surveys as immune to criticism as possible, a CBS spokesman said last week.

Two similar studies will be conducted independently by two research agencies, a commercial firm, Elmo Roper, and an academic organization, Columbia U. The public's attitudes toward both radio and television will be studied (CLOSED CIRCUIT, March 30).

When will results be known? CBS expects some of them will be compiled by next fall, but the complete findings may not be finished for a year.

As the results are tabulated and interpreted, they will be made available to whatever television information organization emerges from the present planning, in accord with an offer made by CBS to the NAB during the Chicago NAB convention last March.



Hands that are gnarled, calloused, grease-stained....yet there is a touch so highly sensitive, a mind so keenly trained that the entire key to the machine's effectiveness lies here.

He truly has the "quality touch", just as the behind-the-scenes hands and minds and hearts guide the quality touch of great radio and television stations of today!

BROADCAST SERVICES OF THE DALLAS MORNING NEWS • EDWARD PETRY & COMPANY, NATIONAL REPRESENTATIVES

The shape of flight

The shapes of things that fly have always been determined by the materials they are made of. Feathers form wings that are basically alike for all birds—and membrane forms an entirely different wing for insects. It takes thousands of years, but nature improves its materials and shapes, just as technology improves the materials and shapes of aircraft. But here, the improvements in materials are so rapid that designs become obsolete almost as soon as they are functional.

Today, our aeronautical designers and missile experts work with types of materials that didn't exist just a few short years ago. Steels are probably the most important examples: United States Steel has just developed *five* new types of steel for the missile program. They are called "exotic" steels because they have the almost unbelievable qualities necessary for unearthly flights.

The shape and the success of our space birds depend on steel.

REVLON SWINGS TO 'QUALITY' BUYS

Heavy tv-spender plans series of 90-minute and one-hour programs

Is Revlon Inc., New York, the multi-million dollar cosmetic advertiser, scenting a sizable swingabout in viewer preference in home-screen entertainment?

It was Revlon that made dramatic contact in 1955 with the tv audience by sponsoring the granddaddy of the giveaways—*The $64,000 Question* on CBS-TV—which before it met a natural death this past season spawned a host of quiz program imitators on the networks. *Question,* during its long stay on tv, led viewers to Revlon's commercials and to cosmetic counters everywhere, unquestionably spurring the sales volume of Revlon products to unprecedented levels.

Now Revlon is off on an entirely different tack: From the giveaway it is graduating to the high-quality, high-budgeted 90-minute variety show that the company hopes will appeal to what it believes is really the common denominator of the tv audience.

The Revlon project—a series of 15 90-minute specials will alternate with *Playhouse 90* in CBS-TV's prestige 9:30-11 p.m. period and five one-hour specials, presumably to be placed elsewhere during next season on the same network.

Wants Quality • The direction, according to Mort Green, who on June 1 becomes Revlon's director of television and radio, is to a concept of coupling "a quality cosmetic product with quality television entertainment."

He says it is fallacious to believe that tv entertainment must be aimed at the lowest segment of the audience—because "there is no such segment." The "audience is you and me," he said, and the public is receptive to tv programming that basically is good entertainment whether it be an appeal to sophistication or keyed to low comedy."

A mass medium, Mr. Green stated, always must have its share of "low-grade" comedy but the medium "grows and flourishes" with good entertainment, one that "sells with high-grade, wide-screen tv in its fullest intellectual sense."

Revlon will supervise its own show in the broad selection of material and name stars. Control generally will be invested in a triumvirate made up of company President Charles Revson, Advertising Vice President F. Kenneth Beirn, who moved to Revlon earlier this year from the presidency of agency C.J. LaRoche, New York, and Mr. Green, who currently is winding up affairs as writer on the *Perry Como Show* (NBC-TV).

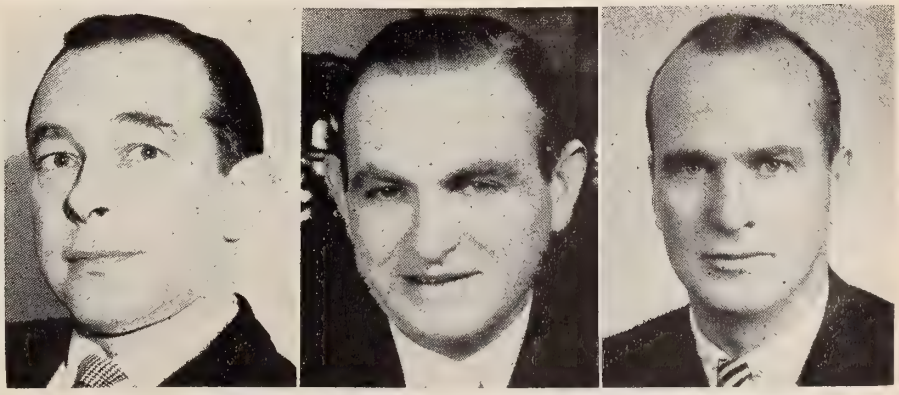
Heavy Network Spender • In television, Revlon is basically network. Last year, the company invested more than $7.1 million at gross rates (time costs only) in the medium, and of this total more than $6.3 million was in network.

Tentative title of the 20-show series is *The Revlon Party*. The dramatic showcase, *Playhouse 90,* will total a series of 32 productions through the season, while *Revlon Party* will slot its 15 90-minute series in that Thursday period. The positioning of the other five hour-long specials is not set.

The cosmetics firm hopes to emphasize a well-written show and toward that end has hired Easy Aces Inc. (writer Goodman Ace's organization), which has been associated with Mr. Como's program. Messrs. Beirn and Green said program development will be "unhurried," permitting the performer to work out on the show "what he can do best."

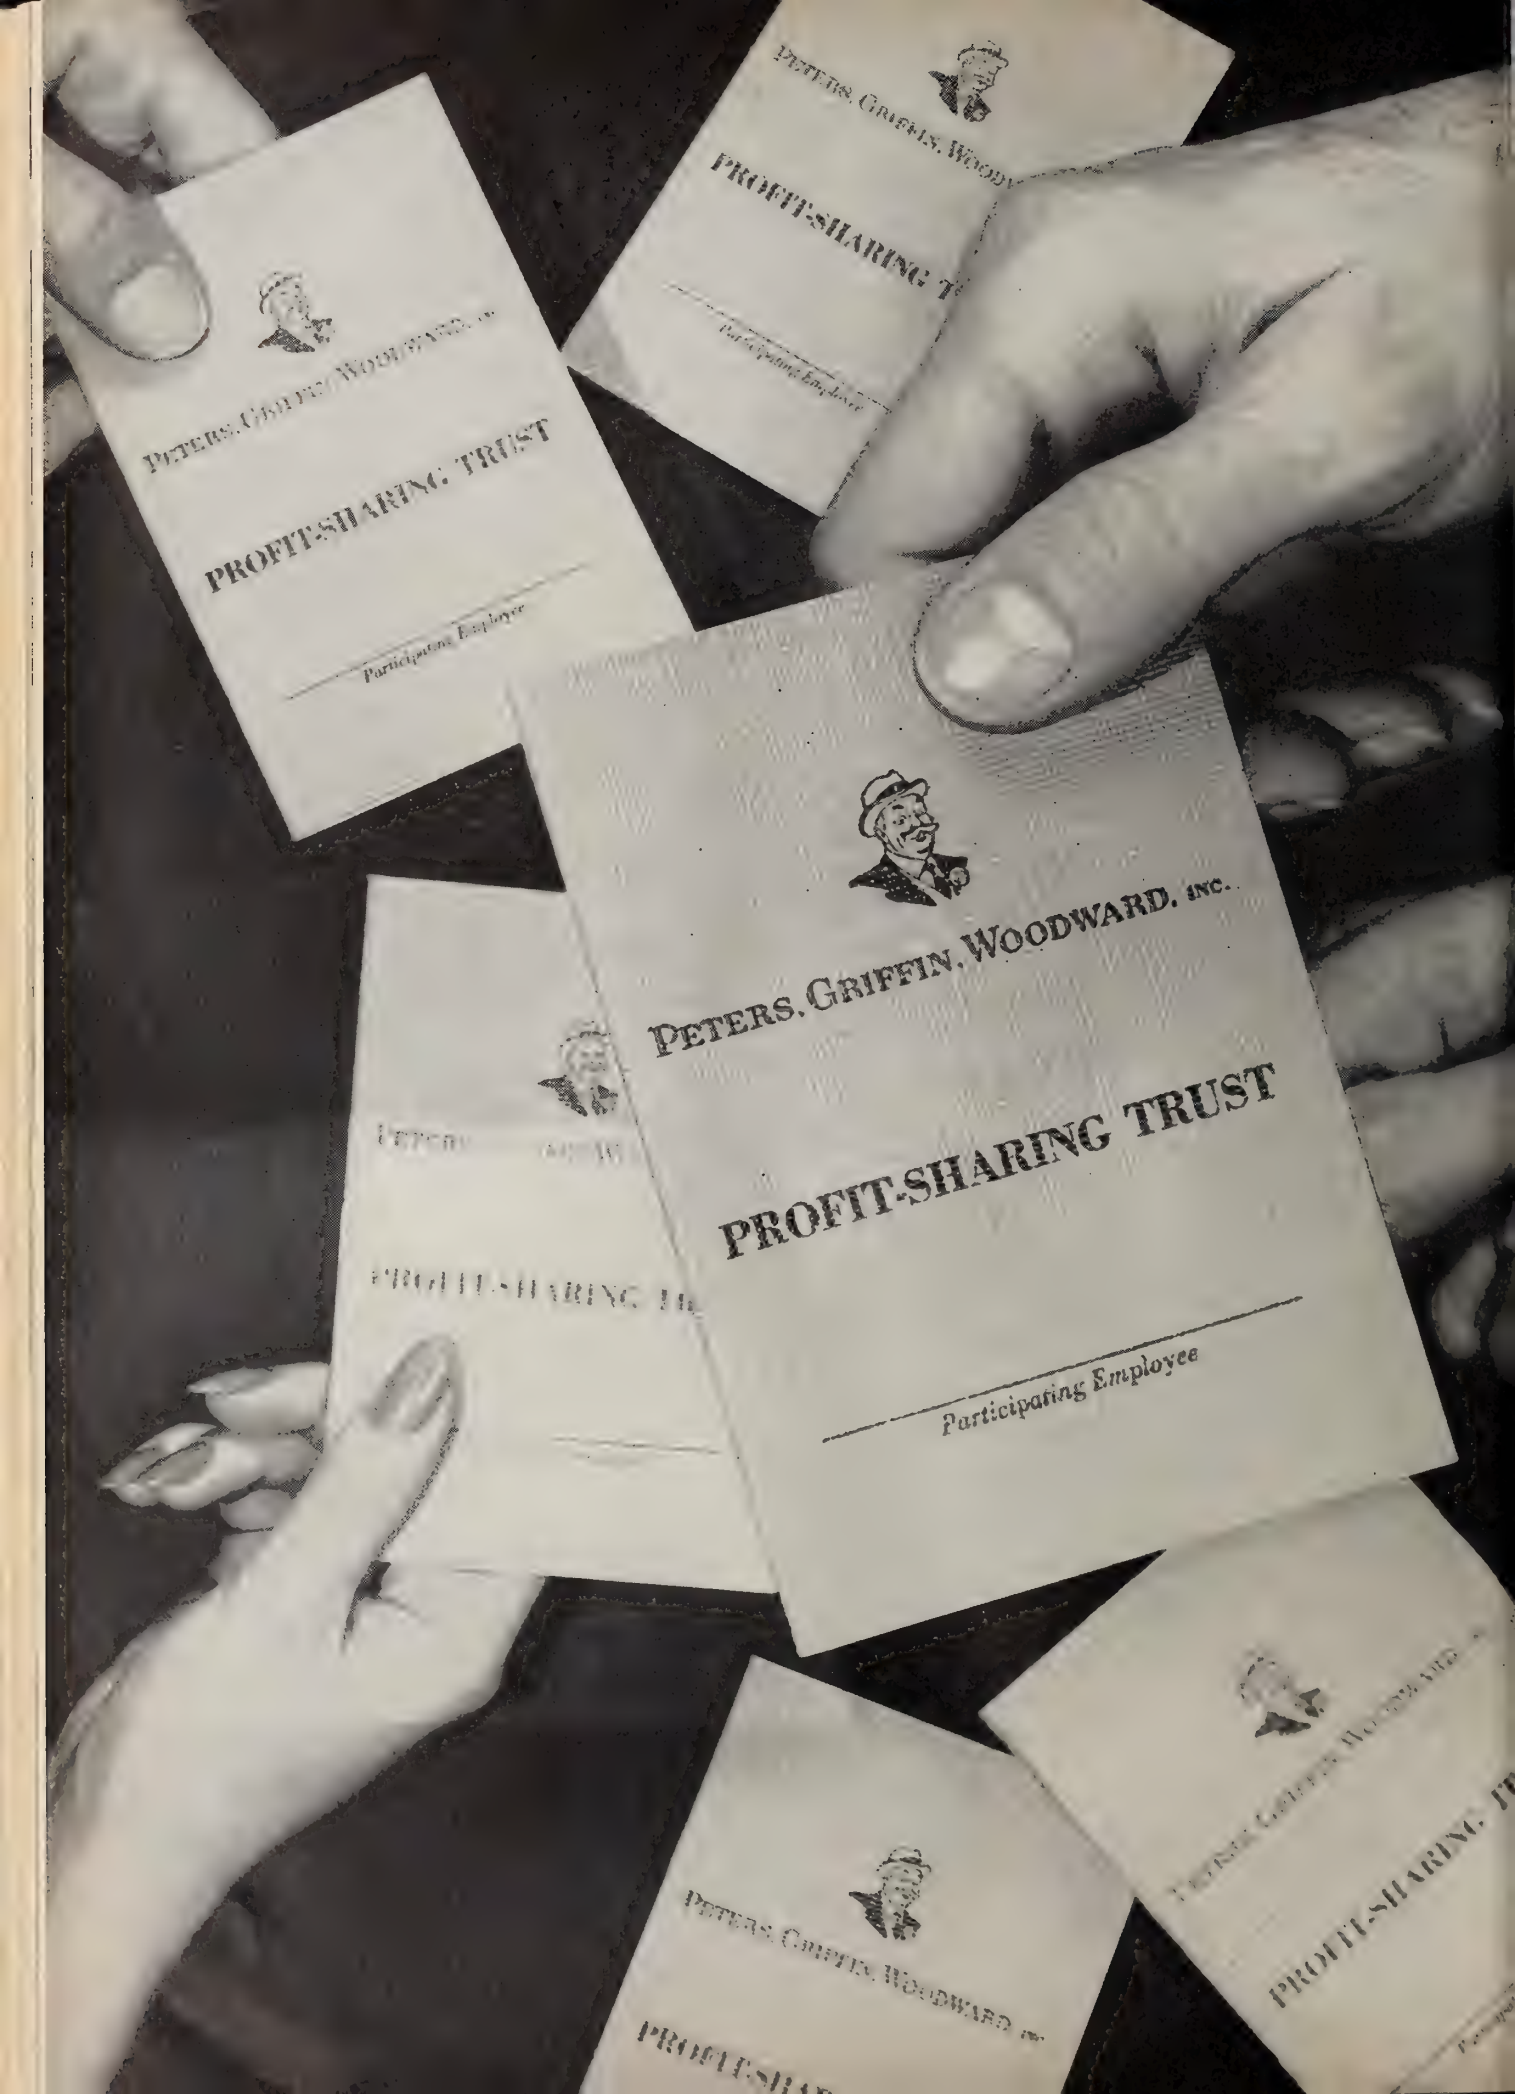
Trend Cited • The trend in television among large corporations is toward quality programming, Revlon executives stated in citing duPont with its *Show of the Month* and Chevrolet with the *Dinah Shore Show*.

Revlon is keeping its plans close to the chest. "This is a quality story," said one executive, and "we don't want a money label." (There have been reports of a minimum $6 million time and talent tab for the project but the cosmetics firm will not discuss budgets.)

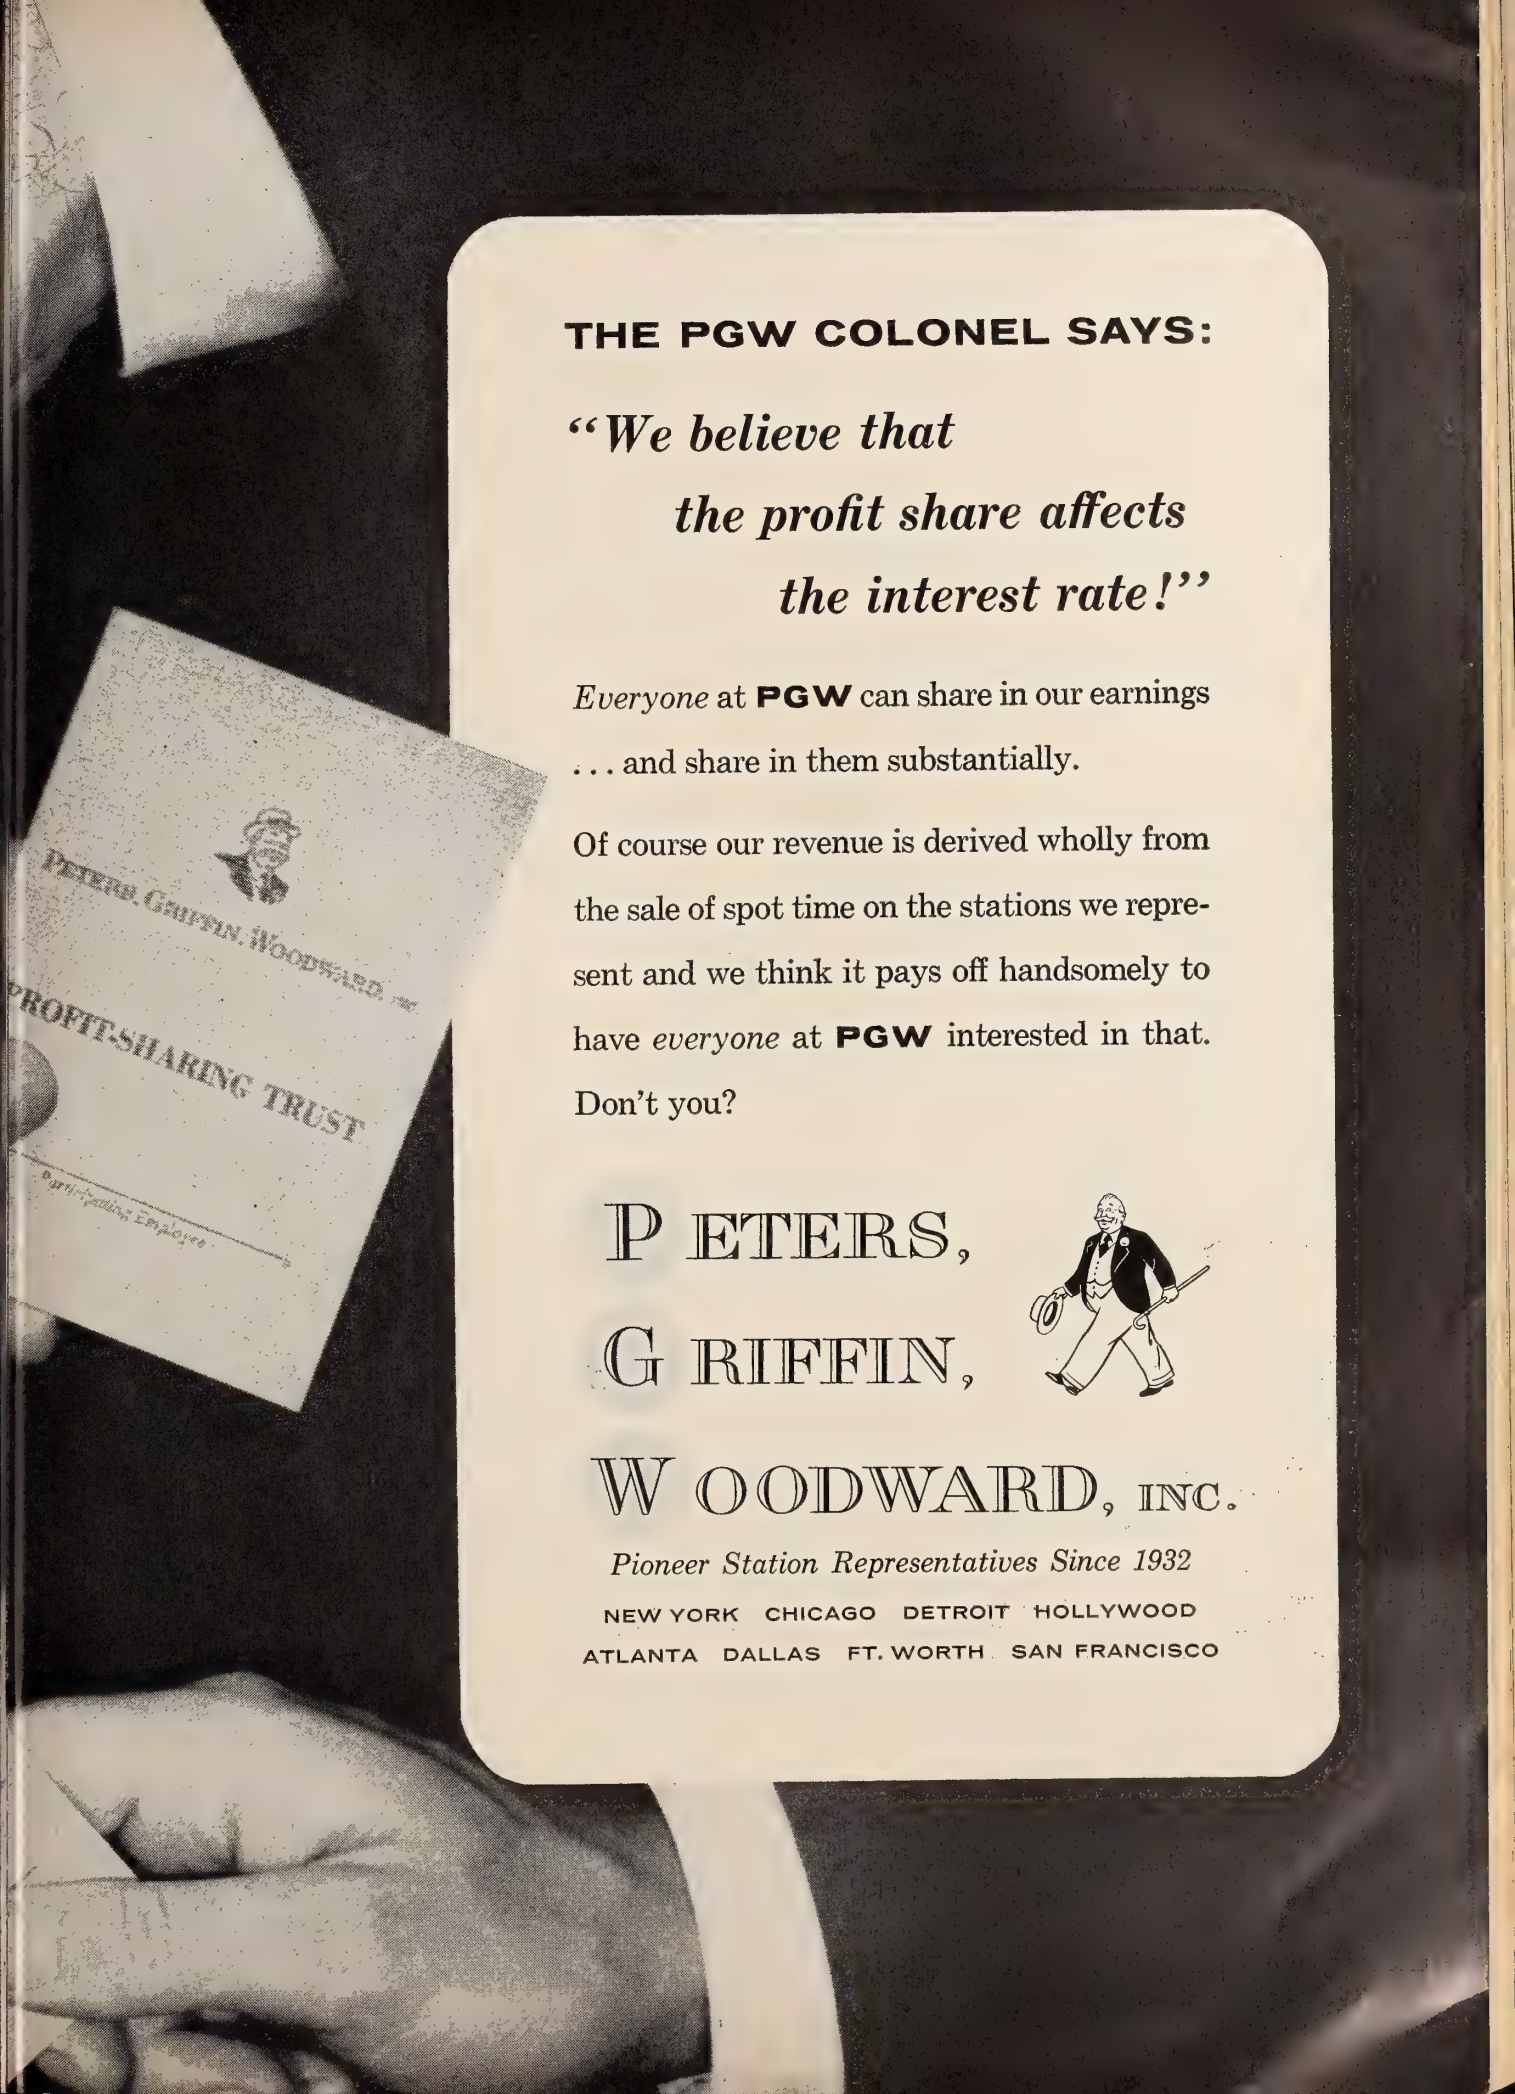


Programming in *Revlon Party* will cover the course, drawing material from comedy, variety, musical and dramatic formats. Dramatic vignettes will be used but one whole program will not be devoted solely to a dramatic production.

Revlon also plans specially-prepared commercials, which will be handled by the company-organized unit. This includes spot commercials as well as those prepared for the network show. Warwick & Legler will be agency of record on the show but "centralization of responsibility," as expressed by Mr. Beirn, will rest with Revlon.



The sponsor has committed itself to the series and to its "concept." Put another way by Mr. Green: "We are committed to the truth that we are not a nation of idiots and that television need not be the triumph of mediocrity."



Rich colors

A one-minute, color commercial for Revlon International, said to cost $15,000 to produce, was completed last week by Robert Lawrence Productions, New York. The color "spectacular" will be distributed in 62 countries, excluding the U.S., starting the beginning of June. It will be dubbed in 14 languages. Thirteen new shades of lipstick are presented in the commercial, according to Warren E. Adams, advertising manager of Revlon International. The company placed the order for the commercial with Lawrence Productions.

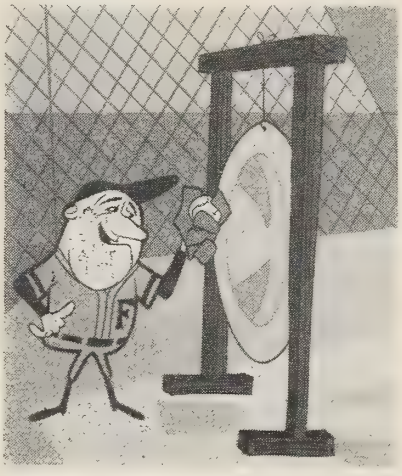
NEW YORK CHICAGO DETROIT HOLLYWOOD
ATLANTA DALLAS FT. WORTH SAN FRANCISCO

SRA, H-R to boost sagging spot radio

Radio, faced with a depression in the flow of national spot business, is fighting back.

Station Representatives Assn., will soon be attacking on the agency-advertiser front with a new presentation that promotes radio as a national spot carrier. SRA is also expected to supplement this barrage on the agency level with a suggested call on stations to man the battlements, asking that they beef up the radio sales image.



Already underway by one station representative — H-R Representatives Inc.—is a project called "Operation Groundswell" that is independent of SRA. As explained by H-R Vice President James M. Alspaugh, the project's objective is to "put the romance back into radio."

As conceived by H-R, "Operation Groundswell's" drive is in two parts: one on the national level and the other by the stations in local markets.

To Survey Audience • At the national level H-R has retained Marketing Planning Corp., a subsidiary of McCann-Erickson, New York, to conduct a new radio audience survey. This research, for which H-R reportedly is investing a few thousand dollars, will form the basis for a specially-prepared brochure to be used for "missionary" work or hard sell to agency management, particularly on the plans board or policy level. The firm will also concentrate on direct calls on the advertiser and has launched a campaign that will sell spot as an advertising medium.

At the local level, "Operation Groundswell" presents a grass roots appeal to stations. The latter are asked to make calls during May (which is National Radio Month) on representatives of "important national advertisers . . . brokers, distributors, regional sales managers." The recommendation is for stations to sell the "power of radio, not the relative competitive advantages" of the outlets.

The idea would be for stations to ask these people to write their home offices to "express amazement" over the fact that radio, the most potent medium of all, is being short-shrifted in favor of less cost-efficient and effective media."

Curve ball • Spring means baseball. Baseball means broadcasts. This, to many viewers, means watching Saturday and Sunday games on CBS-TV. That means watching commercials for Falstaff beer pitched by the Old Pro, now starting his fourth year for Falstaff (and he works the fall football season for this sponsor as well as summertime baseball). And that fact leads to a conclusion that a lot of fans are drinking Falstaff as they watch the games.

Voiced by Eddie Mayehoff, the Old Pro is a hapless cartoon character whose 55-second misadventures are produced by Playhouse Pictures of Hollywood, with Bill Melendez as director, Sterling Sturtevant as designer and Bill Littlejohn as animator. Plots of the commecials are largely provided by the Falstaff agency, Dancer-Fitzgerald-Sample, which also supervises their production.

Reproduced here are two stills from "Gong," one of six new Old Pro spots, which brings the four-year total to 60. "Gong" begins with the Old Pro tapping a large gong hanging above home plate and saying:

"My latest discovery, Elwood, is scientific sound wave method for gauging the speed of a fast ball. See that gong? The harder you fling, the louder its ring. Thusly . . . Simple, eh Strongarm? Now, when I say go, ring that bell! I'll be listening.

"Meanwhile, fans, be a bellringer yourself. Chime in and go, go, go for Falstaff."

The ball strikes the gong with a terrific sound, bowling over the Old Pro, who returns in the final scene, ears stuffed with cotton, holding a stick and a triangle as he says: "At the tone, the time will be Falstaff time! That's my beer."

Drop nighttime network radio: Mogul

Nighttime network radio as it exists today should be abandoned, Emil Mogul, president of Mogul, Lewin, Williams & Saylor Inc., New York, told the Pittsburgh Radio and Television Club last Wednesday (April 28).

Mr. Mogul claimed the "deficits" created by nighttime network radio are "contributing to the inflated costs of network television." He added: "Of course a skeleton operation should be maintained for public service programming, civil defense and possibly an accelerated national news schedule. With the money thus saved, the networks would be in a better position to upgrade the creative side of television with new talent searches, more subsidies for potentially productive writers and the like."

Mr. Mogul also recommended that a medium making a presentation to advertisers and agencies refrain from "attacking" competitive media but concentrate on the advantages of the particular medium for the client.

'Some like it hot,' in tv spot, Katz says

Forty-one name advertisers last year used more spot tv in the summer than during other seasons of the year, the Katz Agency announced in opening a summer sales drive.

The station representative is holding a series of meetings with agencies and advertisers to get its message across. Katz notes that more than 25% of all retail sales in the U.S. are made during June, July and August.

Halsey V. Barrett, manager of tv new business development at Katz, offers a breakdown of products in categories showing a high percentage of the sales coming during the summer months and comments that many agencies and their clients "over-discount" the nation's summer viewing habits. He cites Nielsen figures showing 91% of all tv homes watching tv each week during the summer, or only 3% less than during a peak period of the year.

...of the two top radio personalities in Chicago

During March, both Howard Miller and John Doremus joined the line-up of star personalities on WMAQ Radio. Miller's selections of popular music and informal comment have made him the Number One radio personality in Chicago, without interruption, since January 1956. ■ Doremus, in Chicago for less than two years, quickly became the city's Number Two radio-audience attraction, by featuring the best sort of popular music. ■ So the Q for QUALITY RADIO IN CHICAGO is now bigger than ever! The two biggest radio personalities in the city are *now* at 670 on Chicago's radio dial. ■ HOWARD MILLER, 9:05 to 11:00 a.m., Monday through Friday. JOHN DOREMUS, 4:05 to 5:30 p.m., Monday through Friday and 9:05 to 10:30 p.m., week nights.

ARB's expanded tally: all homes for all tv's

American Research Bureau is announcing today (May 4) that starting next fall it will supply total homes figures for every tv station in the U.S.

ARB said it will sample all 3,072 continental U. S. counties plus Alaska and Hawaii and will provide total area reports by quarter-hour periods for all tv markets as well as for all stations to be released at least semi-annually.

In the ARB plan, as detailed by James W. Seiler, the bureau's director, the new coverage study to be extracted from the data will report all homes able to receive any tv station, and the daily and weekly viewing by stations or clusters of counties. The bureau expects its metropolitan market reports will be well over the guaranteed 150 before the year's end.

Features of ARB reports: data on homes reached by stations outside of a particular market surveyed; rating and reporting of stations having more than a limited number of homes outside of their prime-interest market; tabulation of homes in a "different market" receiving outside tv stations, of a station's net daily and net weekly audience and of newspaper home circulation both daily and weekly.

By mid-August, a new Univac automatic computer will be installed at ARB's Beltsville, Md., headquarters to speed up market survey computing to 12-15 markets per day.

Sales inspiration at initial RAB clinic

Radio has something to offer even the most antagonistic advertiser.

Radio Advertising Bureau, New York, last week told about a salesman who talked to an auto dealer who had unkind things to say about everything on radio. In desperation the salesman asked, "Isn't there anything on radio you like?" He replied: "Sure, Bing Crosby records, but they hardly ever play them any more." Result: The salesman promptly sold the dealer a six-days-a-week Bing Crosby record show.

This case history was reported by one of 1,287 station executives attending the first week of RAB's sales clinics in seven cities. In all, 45 clinics in principal U.S. cities are scheduled during the next few weeks.

Doubling of radio's anticipated 10% gain in revenue—if the perspective of National Radio Month is extended through the year—is predicted by Kevin B. Sweeney, RAB president, in talks at the sales clinics. Mr. Sweeney suggests that a year-long unified promotion front would "quadruple the regard of advertisers for the medium."

In Omaha and Seattle, the RAB president said that the principal barrier to radio's rapid progress is "our great delight in fighting one another as if the only competitors for the advertising dollar were other radio stations." Calling upon his audience to abandon this "senseless civil war," Mr. Sweeney said that "radio is doing more creatively for the advertiser—more to make his advertising dollar more effective—than any other medium."

Also participating in the "unity" theme are Miles David, RAB promotion director, and Warren Boorom, RAB director of member service, who supervised clinics in Portland, Me., Boston, Albany and Rochester, both N.Y.

Anybody for craps?

Patrons of the art of galloping dominoes who lean too heavily on the use of lead weights and bevelled edges are the targets of the newest "per inquiry" offer to stations. It's a booklet on how to detect crooked dice and, co-incidentally, the publisher bases in Las Vegas.

With nary a mention of the station's established rate card, the solicitation describes the booklet as a "fascinating item," and asks, "What man who loves to 'roll the bones' once in a while could resist the temptation to buy such valuable information for only $1?"

There is much to be said for every dice player knowing all he can about protecting himself, for, as the PI man sadly admits, "Avarice is part of man's makeup."

IS THIS CRICKET? Media wonder as GOP plans newscast pitch

A new tie-up between politics and advertising, with radio and television as the connecting links, has been born in Southern California. Creator of the plan is Howard Jarvis, vice president, Los Angeles County Republican Assembly. He has appealed to Republicans to help their party get statewide radio and tv coverage 15 minutes daily for the next two years by getting friends and neighbors to sign cards pledging to buy the products of companies sponsoring the broadcasts.

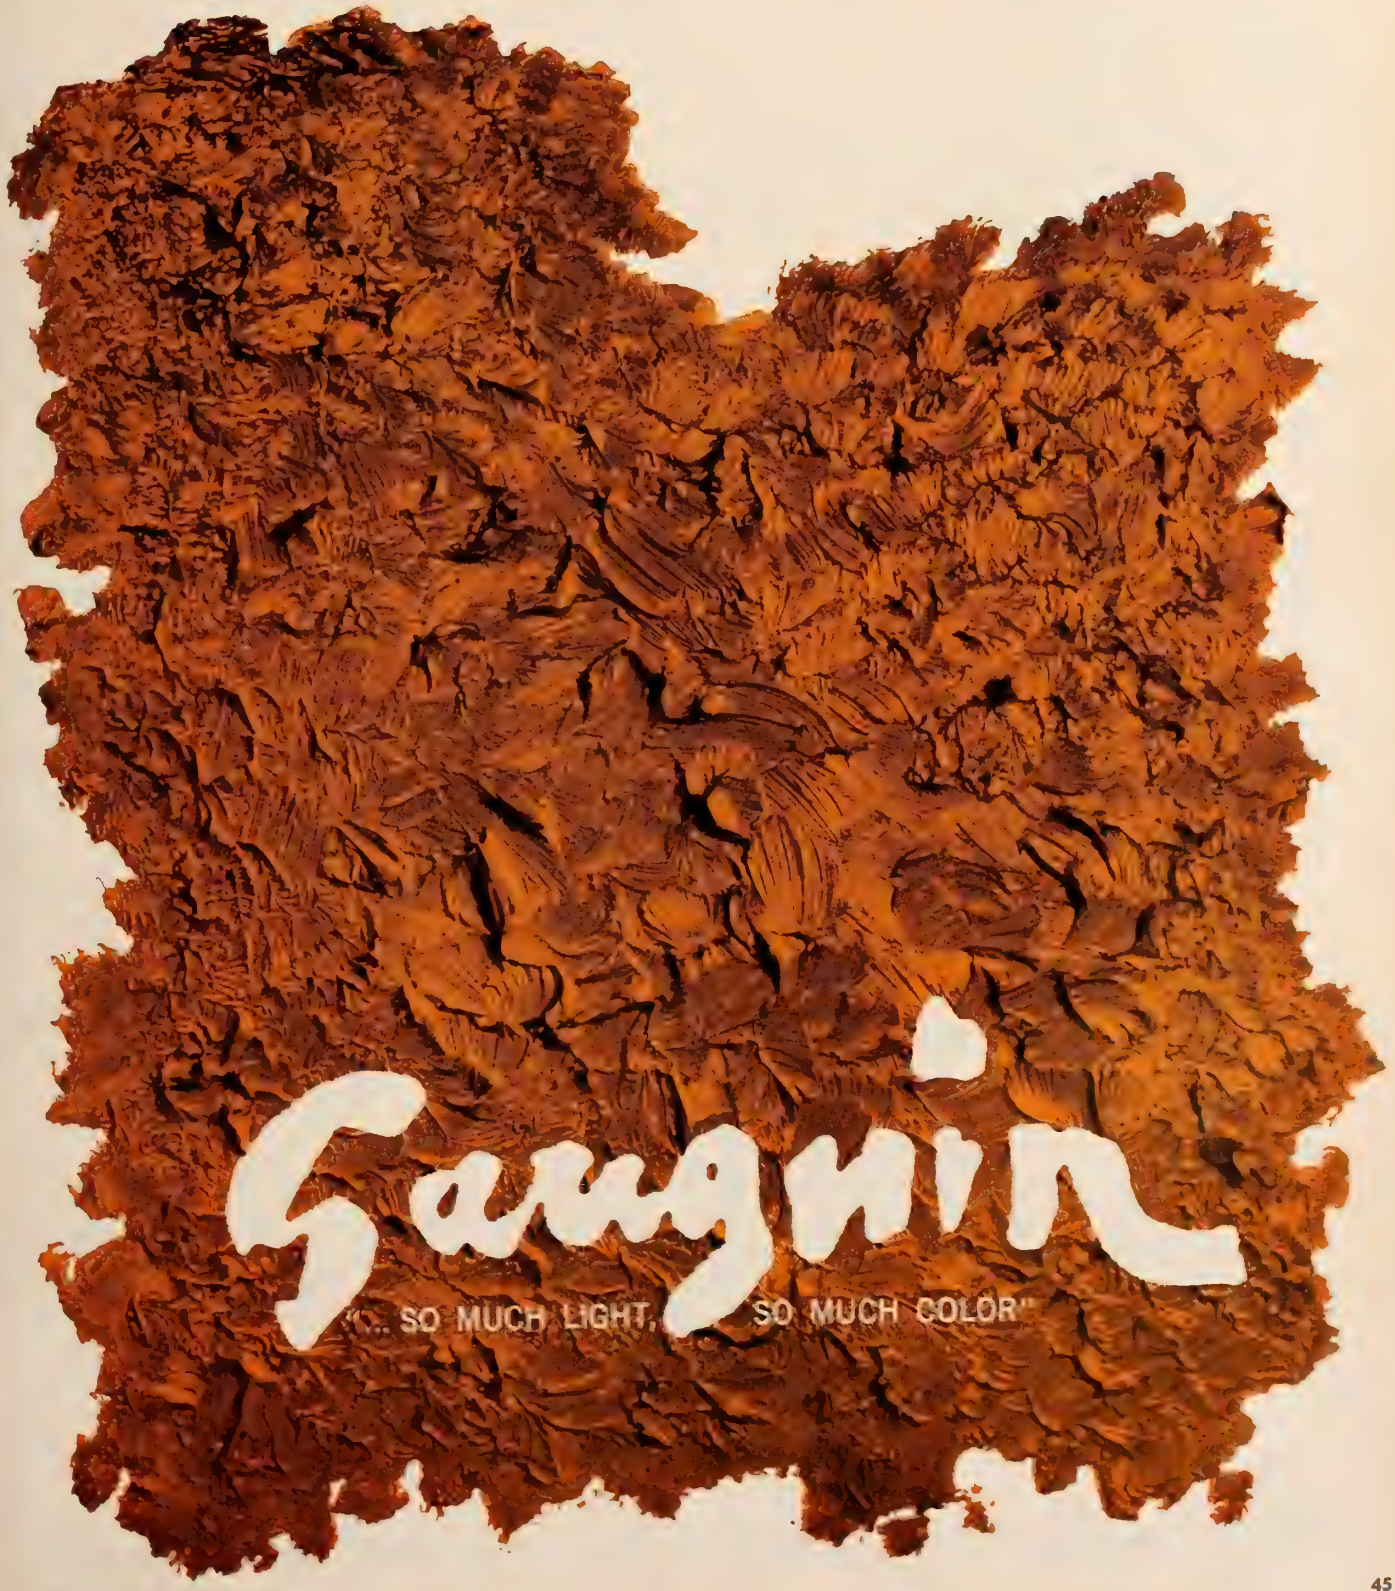
"Our crying need is to get our side on tv and radio," Mr. Jarvis states. "We need this every day for the next two years. A 15-minute statewide tv and radio broadcast each day for these two years costs over $1 million.

"We don't have this money, but we have found sponsors that will spend it and buy the time for us, if we will get 50,000 of our people to sign a pledge that they will buy products our sponsors will advertise. Of course, the signers are not obligated to buy anything at all, but if the products are right and the broadcasts are right, our signers should be glad to buy these products as they need them to get our side effectively on the air."

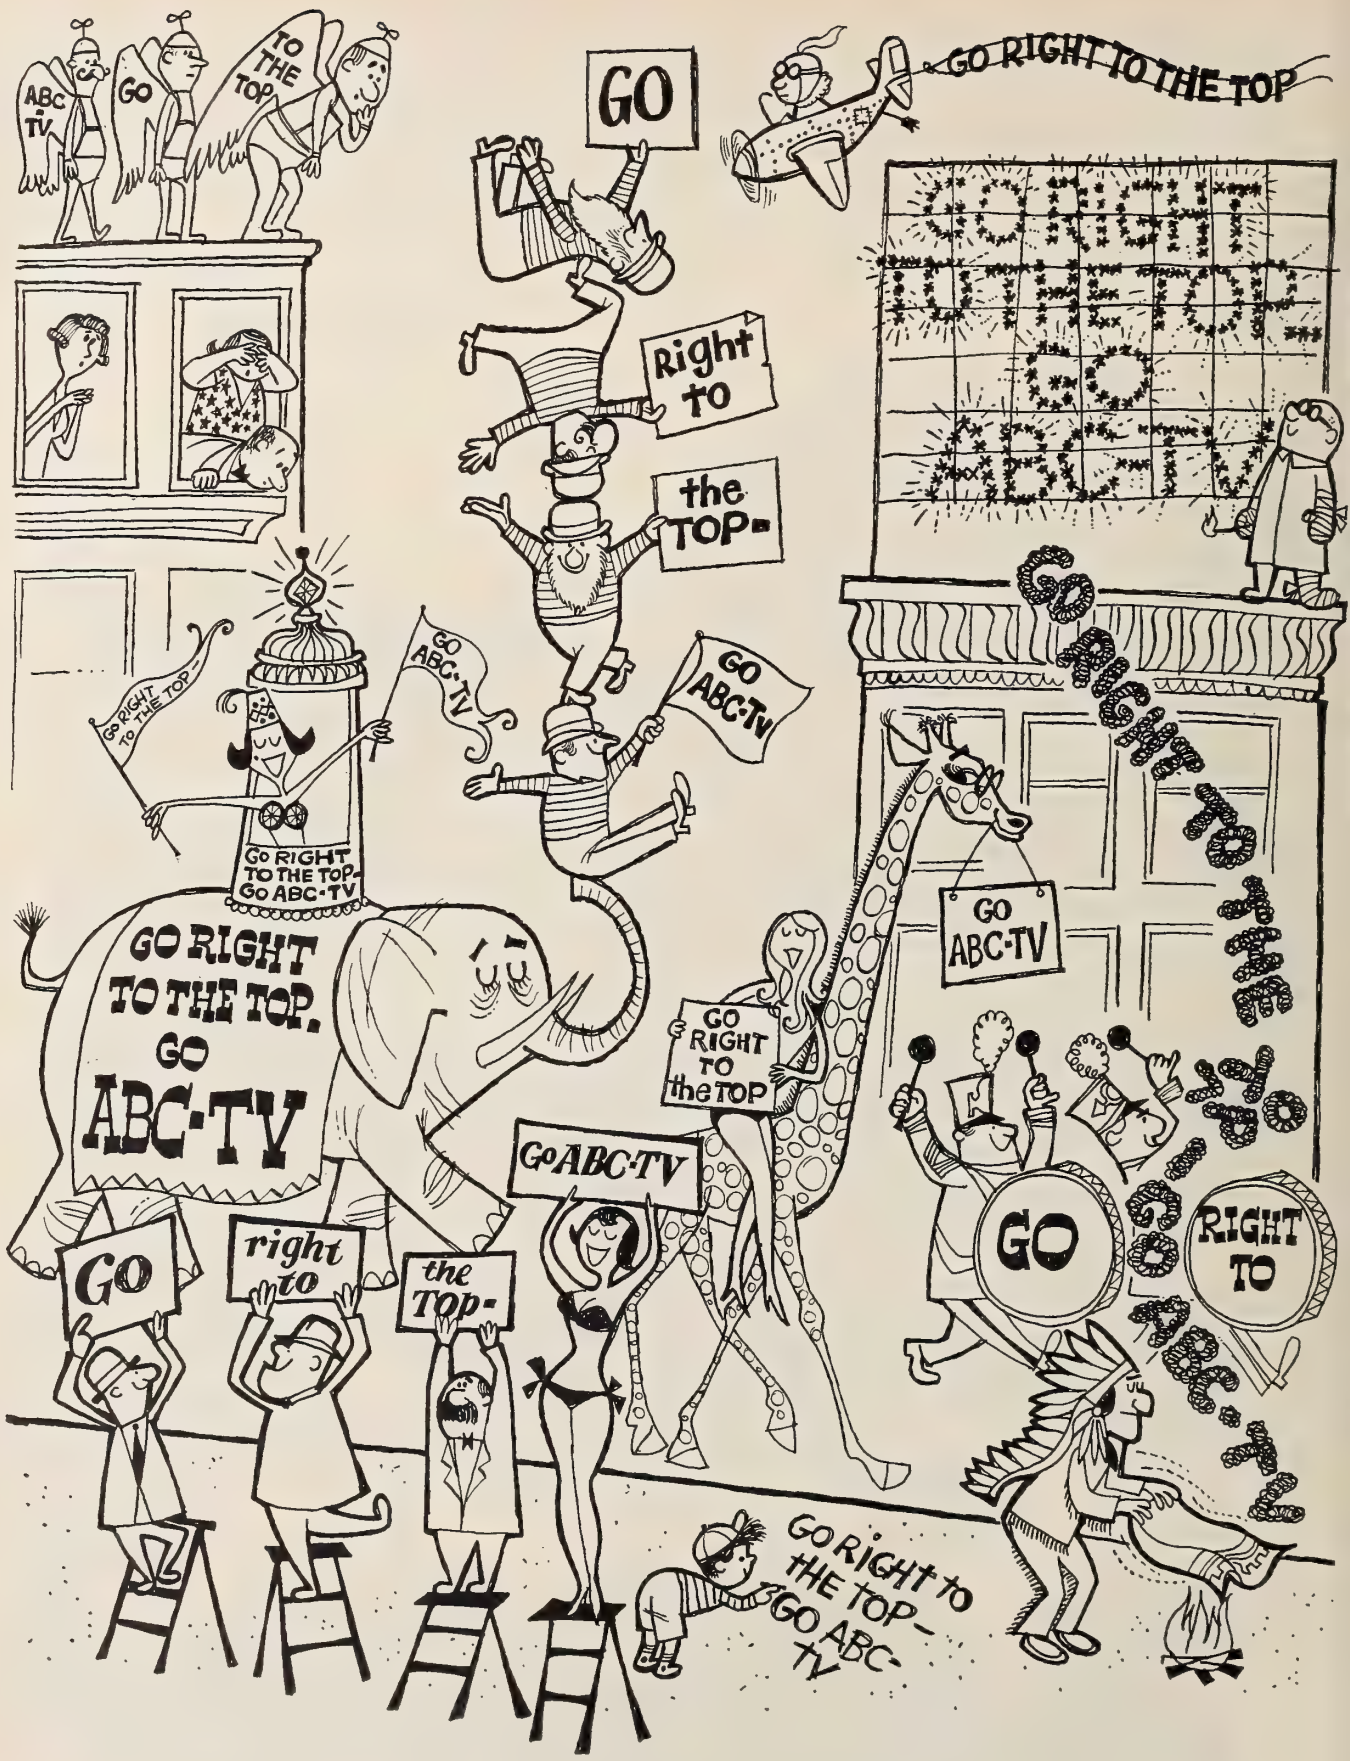
Goal 50,000 • Noting that the broadcasts will reach 400,000 people every day, the letter says: "We need 2,000 of our people to get 25 signers each. When this is done we are on the air."

Mr. Jarvis said that the proposed programs will be newscasts, which he will prepare and deliver. Asked if the political label would not make them unacceptable to stations, he replied that there will be no political label. "They will not be sponsored by the Republican Party," he said, "but by commercial companies, like any other newscasts."

Asked in that case how these broadcasts would aid the Republican Party, Mr. Jarvis said they will "aid the party by presenting both sides of the news and not leaving out the conservative side.



"The idea has been cleared with the FCC and is perfectly legal," he stated. However, the FCC stated last Thursday (April 30) that it had received no such request.



California broadcasters said they were unfamiliar with Mr. Jarvis' plan, but all expressed the view that they probably would not accept any series designed to get the side of one political party on the air. Without knowing the full details, none was willing to reject it either.

On February 8, WNBQ presented a special preview, in color, of the Art Institute of Chicago's historic Paul Gauguin exhibition. Because of its unusual interest the program was colorcast on the NBC Television Network. Critical response was warm and wide-spread. The Chicago Sun Times called it an "artistic coup." The Chicago Tribune said it was "superb." And from the nation's Capital: "a work of art as a TV show." From New York: "a masterly achievement." "So Much Light, So Much Color" was one in WNBQ's monthly series, "Chicago Showcase," exploring the cultural range for Chicago viewers. It is an important phase of the balanced schedule which provides rewarding television for every taste . . . and which marks WNBQ as the quality television station in Chicago.

Research radio, Californians advised

Lack of qualitative research on the composition and behavior of listeners is a major cause of loss of business by radio stations, a panel of media executives from Stromberger, La Vene, McKenzie, Los Angeles agency, told Thursday's (April 30) luncheon meeting of Southern California Broadcasters Assn. The agency group, chairmaned by Harmon O. Nelson, vice president and radio-tv director, pulled no punches in criticizing local broadcasters for not providing better information for the agency to use in selling radio to clients. Radio accounts for 12% of the agency's billings.

"Outdoor and radio are the two most poorly researched media," Earl Timmons, the agency's media and research director, asserted. "Research may be costly," he commented, "but it may prove more costly not to do it." He suggested that a joint effort by SCBA might provide valuable information about who listens to radio in the area, when they listen and how they listen. Mr. Timmons pointed out one common criticism which needs answering: that much of today's radio programming is tuned in purely as background music and no attention is paid to either programs or commercials. He offered to get a group of agency research directors to act as an advisory committee in setting up such a joint research project should the broadcasters desire such help.

• Business briefly

Time sales

• Renault Inc. of France will sponsor a one-hour special, produced, written by and starring Ernie Kovacs on NBC-TV Fri. May 22, 8-9 p.m. Barry Shear will direct. Renault earlier signed for alternate week sponsorship of *Playhouse 90* on CBS-TV (AT DEADLINE, April 27). Agency: Needham, Louis & Brorby, N.Y.

• *General Electric Theatre* (CBS-TV Sun. 9-9:30 p.m.) has been renewed and begins its sixth season Sept. 20. The new format will include 10 live or tape shows produced by the network in addition to the filmed programs from Revue Productions, Hollywood. Agency: BBDO, N.Y.

• CBS Radio reports new orders from Longines-Wittnauer Watch Co., N.Y., through Victor A. Bennett Co. there; Renuzit Home Products Co., Philadelphia, through Arndt, Preston, Chapin, Lamb & Keen there, and Savings & Loan Foundation, Washington, and Cowles Magazine Inc., N.Y., both through McCann-Erickson, N.Y.

• Sealtest Foods Div., National Dairy Products Corp., N.Y., will be sole sponsor of *Bat Masterson* for 52 weeks beginning Oct. 1. The NBC-TV western, currently sponsored by Sealtest and Kraft Foods (Wed. 9:30-10 p.m.) moves to Thurs. 8-8:30 p.m. next season. The show is to be seen on 116 stations serving Sealtest markets. Agency: N.W. Ayer & Son, N.Y.

• Jos. Schlitz Brewing Co., Milwaukee, has expanded its radio spot schedule to

PREVIEW: The Rambler tv roadmap

American Motors' Rambler car likes the look of the Friday-night spot tv road as the shortest route to spring sales success. Starting April 24, and continuing every Friday through June 12, the Rambler's saturation drive is expected to reach 96.4% of the nation's tv homes.

Chauffeuring Rambler is Geyer, Morey, Madden & Ballard Inc., New York, which has prepared eight-second IDs and minute commercials. They will be seen each week on some 170 stations in 76 key markets, the agency reports. The schedule calls for an average of five eight-second IDs to hit in prime time and two 60-second commercials to follow up later in the evening.

The interest in Friday night saturation was explained by E.B. Brogan, Rambler advertising manager at GMM&B's Detroit office, who said research done by the agency and the company indicated that this new tv campaign should produce immediate traffic on the day most families shop for cars—Saturday. "This campaign," he said, "gives seven opportunities each Friday night in major dealer markets to reach an estimated 65% of the potential tv audience, representing 96.4% of the nation's tv homes."

The Rambler IDs utilize the "visual squeeze" technique of Transfilm Inc., New York, which condenses a lengthy pictorial message into telescoped time. Each ID message singles out a particular Rambler feature plus a view of the car. Three live action 60-second commercials have been prepared for the campaign. In these, humorous characters emphasize sales features. Rambler's single unit construction is characterized by a "squeak man" whose job in a car service shop is threatened by this innovation. Another uses a hat blocker who is unhappy because "the good headroom in Ramblers eliminates the crushed hats that he repairs."

Rambler's former tv activity has included campaigns to introduce new models and early network sponsorship of *Disneyland*. Rambler's radio activity is not being slowed down by the tv barrage. Advertising on NBC and CBS will be continued, it was reported.

HE'S TALL, SHE'S SMALL . . .

RAMBLER FITS BOTH

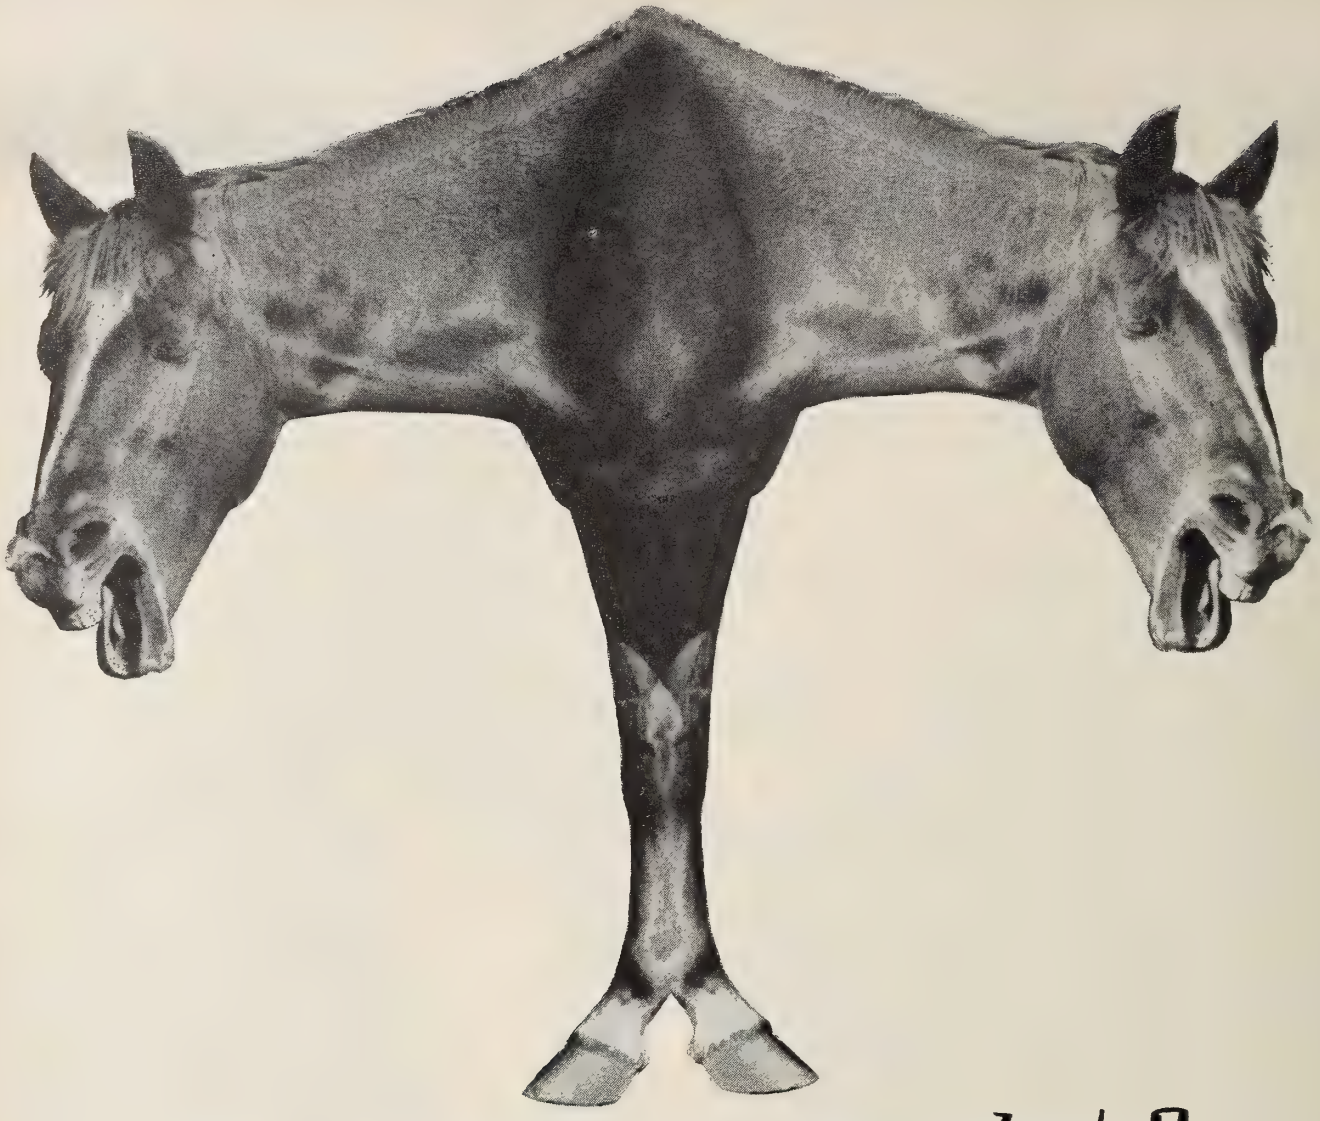
FINAL SHOT

Friday night IDs (above) and animated 60-second spots are aimed at weekend shopping traffic

"Roanoke bigger than London, England?"

Sure it is. There are more U. S. citizens in Roanoke, Va., than in London, England. Furthermore, more of them watch WSLS-TV.

We don't really *need* wild comparisons to sell the Roanoke market, but they help to gain your interest.



Now that we have it (we hope) we won't keep you long. All along the line NCS No. 3 shows us No. 1 Daily *and* Weekly, Daytime *and* Nighttime in Roanoke. WSLS-TV reaches more homes than any other station in the greater Roanoke market of 420,000 tv families. Blair Television Associates will take it from there.

LOUISVILLE

NBC SPOT SALES, Exclusive National Representatives

some 250 stations in 100 markets. (An estimated 16,000 spots will be broadcast in New York in a 39-week period. About 12,000 spots will be placed in Chicago in 39 weeks.) The stepped-up schedule will run through August.

• Wilson & Co. (Ideal Dog Food), Chicago, buys spot radio schedule in 23 markets to supplement Mark Stevens' *Take Five* tv series in 17 other markets in forthcoming summer drive promoting "7-Course Meal" for pets. Agency: Kenyon & Eckhardt, Chicago.

• Bankers Life & Casualty Co. (White Cross Insurance Plan), Chicago, renews *Paul Harvey News* on ABC Radio for 52 weeks effective immediately. Agency: Phillips & Cherbo Inc.

• Eastman Chemical Products Inc. (subsidiary of Eastman Kodak), Kingsport, Tenn., will sponsor the NBC-TV telecast of the National Open Golf Championship's final three holes (Sat., June 13, 4:30-6 p.m.). Perry Smith will produce the telecast, sixth consecutive rendition of the classic by NBC, which is to take place at the Winged Foot Golf Club, Mamaroneck, N.Y. Agency: Doherty, Clifford, Steers & Shenfield, N.Y.

• Borden Foods Co., N.Y., May through August is expanding spot tv coverage on its instant whipped potatoes. The number of markets will be upped by one-third to 107 with frequency of spots-per-week to vary from 5 to 15. An equal number of 20-second and 1-minute spots will be used. Agency: Lennen & Newell, N.Y.

• Radio figures heavily in the warm-weather advertising plans of Shulton Inc., N.Y. For Bronztan suntan lotion there is to be a seven week-end spot campaign in 26 markets beginning June 5 and in 22 other markets, week-end spots will run for three weeks beginning June 25. Spots are one-minute with frequency varying from 10 to 20 per week-end. Further Bronztan promotion is scheduled for CBS Radio's Robert Q. Lewis daytime show (substituting for Authur Godfrey) July 2-31. Plans call for Thursday and Friday exposure alternating with one 10-minute segment one week, two 10-minute segments the next. In addition, Shulton has mapped out a two-week Father's Day spot radio campaign for Old Spice products starting June 8: daily spots in 25 markets, ranging from 5 to 10 per week, and 10 to 20 spots over the week-end of June 12 in 22 markets. Agency: Wesley Assoc., N.Y.

• American Dairy Assn., Chicago, buys alternate week half-hours of Lawrence Welk's *Top Tunes and New Talent* on ABC-TV this fall (Thurs., 10-11 p.m. EST). Agency: Campbell-Mithun.

• Eastman Kodak Co., Rochester, N.Y., will sponsor a 90-minute television tour of Disneyland Park, Calif., on ABC-TV (Mon., June 15, 7:30-9 p.m.). Hosts for the special will be Walt Disney and Art Linkletter. Agency: J. Walter Thompson, N.Y.

• Bell & Howell (photographic equipment), Chicago, buys special one-hour documentary, *Why Berlin?* on NBC-TV Friday (May 8, 8-9 p.m. EDT). The company is "testing commercial feasibility of special programs keyed to important world happenings and made available in prime, week-night time." The Friday program will feature filmed segments and commentary by news analyst Chet Huntley.

• S.C. Johnson & Son, through Foote, Cone & Belding, and Pet Milk Co., through Gardner agency, have renewed *The Red Skelton Show* on CBS-TV Tuesdays 9:30-10 p.m. They have shared sponsorship of show since January 1955.

• R.J. Reynolds Tobacco Co. through William Esty Co. will be participating sponsor of *77 Sunset Strip* (ABC-TV Fri.) next fall when hour-long show is to be seen half-hour earlier than its present 9:30 p.m. starting time. Renewing sponsors: American Chicle Co. and Whitehall Labs Div. of American Home Products Corp. through Ted Bates, and Harold F. Ritchie Inc. through Kenyon & Eckhardt.

• Slenderella International, Stamford, Conn., which launched a spot tv campaign in 12 markets last January, is extending this effort to 28 markets throughout the country at a cost of $120,000 per month. Using minute announcements before 6 p.m. and from 9-12 p.m., extension of the tv campaign was said to be prompted by a 65% increase in business since January. Agency: Products Services, Inc., N.Y.

• Gillette Safety Razor Co., through Maxon Inc., has renewed sponsorship of *Cavalcade of Sports* fights (NBC-TV Fri. 10 p.m. to conclusion). Order is for 52 weeks beginning July 3. Gillette, credited with being first sponsor of televised bouts (WNBT [TV] New York [now WRCA-TV], Sept. 29, 1944) has presented regular Friday night fights on NBC-TV since Nov. 8, 1954.

• General Mills, Minneapolis, and General Time Corp. (Westclox), LaSalle, Ill., have signed for series of 10 tv specials to be taped by Talent Assoc. in pact with Metro-Goldwyn-Mayer (BROADCASTING, April 6). But thus far, no one network has edge for business (most of it to be slotted in next fall season). Series represents outlay of some $2,250,000 in talent costs. First of series, "Meet Me in St. Louis," was on CBS-TV on April 26 (with Philco sharing part of sponsorship tab). BBDO, N.Y., is agency for both advertisers.

• NBC Radio estimates net revenue for orders during the three-week period ending April 15 at nearly $1 million. Big spender is the Greyhound Corp., entering network radio for the first time, which launches a 12-week summer campaign on *Monitor* June 20. Greyhound's agency: Grey Adv., N.Y. Among other advertisers: Longines-Wittnauer Watch Co., N.Y., through Victor A. Bennett Co. there; B.T. Babbitt Inc. (Savoy car polish) N.Y., through Brown & Butcher there; United Fruit Co., N.Y., through BBDO; Socony Mobil Oil Co., N.Y., through Compton; American Motors Corp., Detroit, through Geyer, Morey, Madden & Ballard.

Final sales

Philadelphians are hearing a soft-sell on where to go to get buried. They are getting the last word in commercials in three WFLN stereophonic music programs for Kirk & Nice, a local funeral home.

K&N (founded 1761) incorporates historical vignettes of Philadelphia in its commercials. The spots tell of a person, building or occurrence from the city's past. Then the announcer tells how the sponsor, too, is a part of Philadelphia's history.

Kirk & Nice's agency, Ball & Assoc., sends releases to the neighborhood weeklies to announce the landmarks to be featured in the commercials. K&N has decided to keep the programs on a year-round basis.

Agency appointments

• Norwich Pharmacal Co., Norwich, N.Y., has named Cohen & Aleshire, N.Y., as agency for its $1 million Nebs pain reliever account. Nebs had been destined for Fletcher Richards, Calkins & Holden which was to have included C&A until merger talks died (AT DEADLINE, April 20). Last year Nebs entered the national market on all-print basis, switching almost entirely to spot tv at mid year. Previous agency: Foote, Cone & Belding.

• Mytinger & Casselberry (distributor

Spring fashion along Bool Mich • Chicago's ad fraternity discarded traditional gray flannel for these costumes and proceeded to lampoon themselves at a fund-raising gridiron dinner conducted by the Chicago Federated Adv. Club and Chicago Unlimited in the Morrison Hotel Monday evening (April 27).

A performers' eye view of Michigan Avenue was presented in a musical revue, "Mr. Billings' Dream Account," built around the misadventures of Frisbie Billings, account executive at Bushwa, Billings & Whoopero, mythical Chicago agency, and a prospective client, Harry Big, president of True Blue Glue Co. Alan M. Fishburn, head of his own production firm, was executive producer.

Proceeds of the $25-per-plate dinner were divided between the two organizations, with CFAC monies to be applied toward its new headquarters. Frank M. Baker, Grant, Schwenck & Baker, is president of CFAC and Henry Ushijima of Colburn Film Studios is president of CU, an organization devoted to furthering the interests of local talent, services and facilities.

Among the skits presented: "The Thinking Men," "Sales and Dolls," "Name-Dropping Time," "Compulsion—Urge or Purge" and "Dream Campaign" built around *Playboy* magazine "playmates."

of Nutrilite food supplement, Magi-Care cosmetics), appoints Donahue & Coe, L.A. Accounts previously were with J. Walter Thompson.

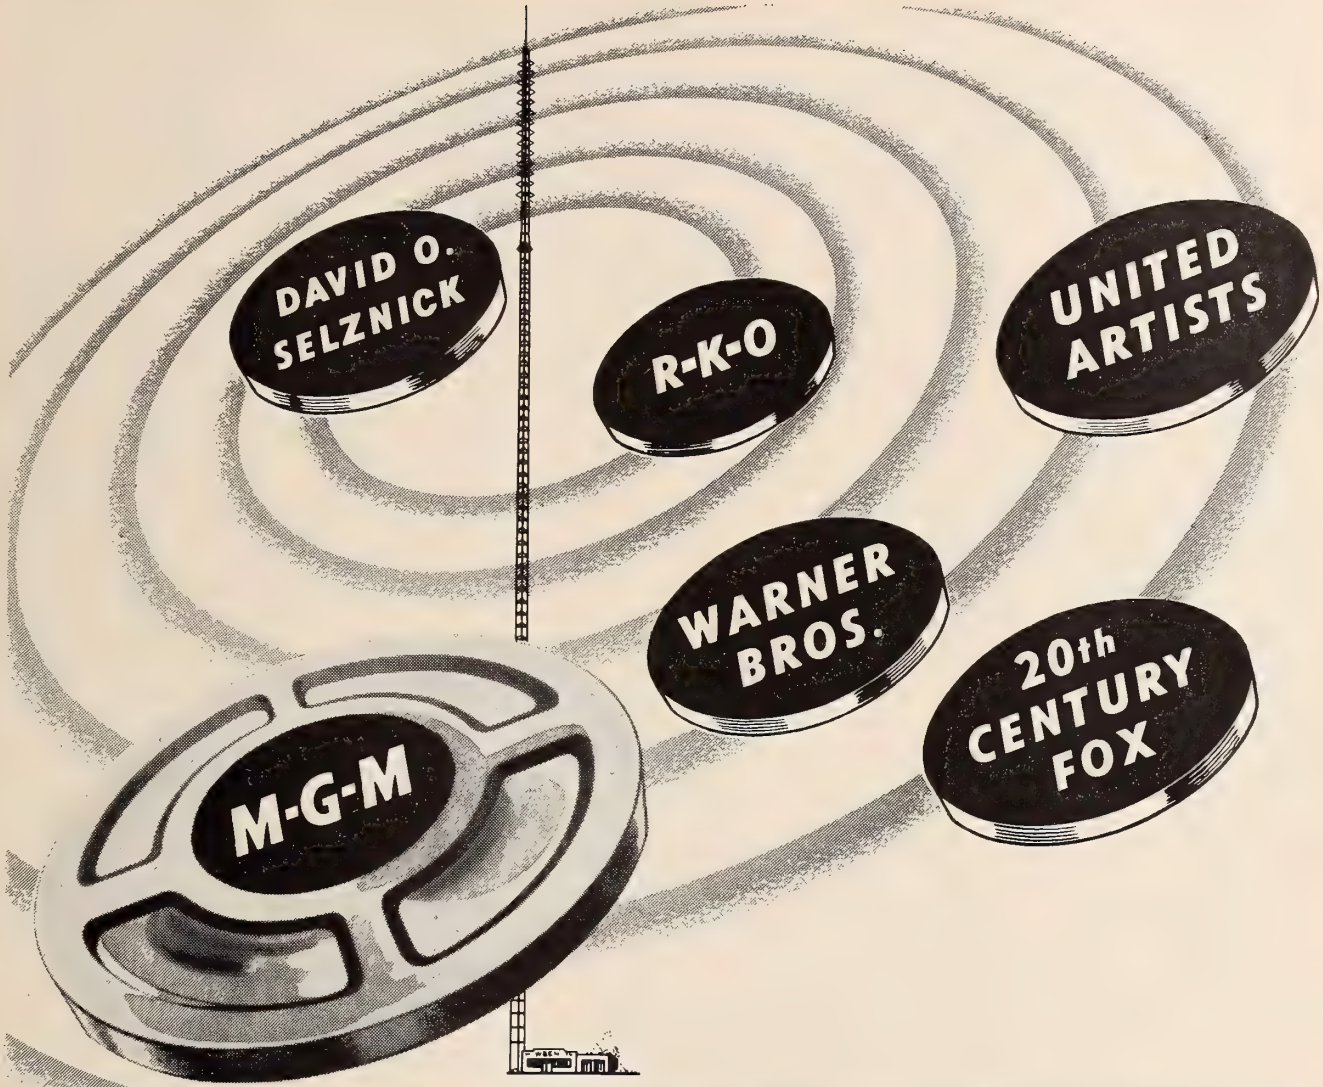
• Polo Grounds Speedway Inc., N.Y., names William Warren Jackson & Delaney there. Roughly 40% of the budget will go to local broadcast media, mainly radio, in promoting auto-racing season April 25-Sept. 6.

• Armour & Co (meat packer), Chicago, appoints Foote, Cone & Belding, same city, to handle several canned meats and Dash dog food accounts (representing an estimated $2.7 million), effective July. Accounts (both using radio-tv) transferred from N. W. Ayer & Son, which continues to handle other Armour products outside grocery products division.

• Colgate-Palmolive Co., N.Y., awards $3 million Wildroot hair preparations account to Ted Bates Inc., N.Y. Bates, one of several Colgate agencies, already handles about $27.5 million worth of C-P business. Wildroot was pulled out of BBDO after 30-year relationship soon after C-P purchased Wildroot (BROADCASTING, March 30). Since BBDO handles some Lever business, C-P apparently suspected there would be conflict.

• Also in Advertising

• The term "king-sized," usually reserved for cigarettes, was applied last week by WRCA-TV New York to station breaks. The advertiser: Tidewater Oil Co., which via Foote, Cone & Belding, has purchased 30-second station breaks in prime time at a cost of $4,000 per break. Tidewater combined the 10- and 20-second spots into a single break and was placed on WRCA-TV between NBC-TV's *Restless Gun* and *Tales of Wells Fargo* on Monday, 8:30 p.m. The schedule runs 12 weeks.



• Colgate-Palmolive Co., N.Y., reported last week that the company plans to enter the pharmaceutical business but has not set a timetable for the expansion. Edward H. Little, chairman and president, said Colgate will manufacture both proprietary (no doctor's prescription needed) and ethical (prescription) drugs.

• Max Factor & Co. has acquired tv rights to the Miss Universe contest for the fourth consecutive year, but has yet to decide which Los Angeles tv station will telecast the highlights of the contest ceremonies in neighboring Long Beach. As in previous years, the cosmetics firm will be co-sponsor of the competition itself, with the City of Long Beach and Catalina Inc., swim suit maker, also sharing in financing the contest. For the past two years KTTV (TV) L.A. has broadcast some 15 hours of contest proceedings.

• Young & Rubicam Inc., New York, has opened a new International Div. Branch office in Geneva, Switzerland, it was announced today (April 27) by George H. Gribbin, president of Y&R. The agency's London office will supervise the new branch, which will be managed by Colin McIver, who has been director in charge of marketing, media and research and chairman of the plans board in the London office.

• The Detroit Copy Club and the Art Directors Club of Detroit gave 66 awards April 15 for excellence in advertising. Campbell-Ewald Co. is the highest overall winner with 17 awards; McCann-Erickson Inc. next with nine; Kenyon & Eckhardt Inc., seven; McManus, John & Adams Inc., six, and W. B. Doner & Co. won five awards.

• New radio-tv market survey subscribers of the Pulse Inc., New York, announced last week were: Dancer-Fitzgerald-Sample Inc., and the Getschal Co., both of New York; Eisaman-Johns Advertising of Hollywood, and radio recorders and McNeill & McCleery Advertising, both of Los Angeles.

Recently launched on our 11:30 p.m. Theatre, the M-G-M Golden Treasury of Films joins the star-studded firmament of top film entertainment seen only in WBEN-TV land.

WBEN-TV

puts another great film package into orbit

To the Western New York star-watchers this adds another good reason why "there's more on Channel 4". WBEN-TV Late Night Movies offer the most and best in film entertainment. The best product from the best studios, all intended to build the best late night audience.

And it's doing the job — as every rating service shows. Our national representatives, Harrington, Righter and Parsons, have all the facts and figures and will be happy to show you how your product and promotion can get top billing in the rich Western New York market when you put it up there with the stars on WBEN-TV 11:30 p.m. Theatre.

THE BUFFALO EVENING NEWS STATION

1959 INCOME ESTIMATES UP

Tv stations look for 7.2% boost, radio median 2.5%

Five out of every six tv stations expect a substantial increase in revenues this year over 1958.

Four out of every seven radio stations expect revenues to rise.

These forecasts are based on a survey conducted by Charles H. Tower, NAB broadcast personnel-economics manager.

The study shows the median increase expected by tv stations is 7.2% whereas radio stations look for a 2.5% increase.

Mr. Tower surveyed 195 tv and 733 radio stations. Networks were not surveyed.

All of the nine market-size classes of radio and tv stations predict 1959 revenues will run ahead of 1958, according to the study. Most optimistic of radio stations were those in markets of 1-2½ million population where the increase is figured at 6.9% over 1958. Second largest radio rise is in the 500,000-1 million class where the figure is 6.5% higher.

A big increase of 10.1% is anticipated for tv stations in markets under 25,000 population. Next is the 1 million-up class where the rise is expected to be 9.7%.

The analysis of radio stations shows 57.6% expect an increase over 1958, 12.4% a decrease and 30% no change. Of tv stations, 84% expect an increase, 4.4% a decrease and 11.6% no change.

NAB's breakdown by radio and tv stations, showing comparative results of 1959, 1958 and 1957 forecasts, follows:

RADIO
ESTIMATED PERCENTAGE INCREASES IN TOTAL REVENUE

Market Size	Median % Increase '59 over '58	Median % Increase '58 over '57	Median % Increase '57 over '56

Daylight time vs. theatre owners

A little game of clock roulette, instigated by Minnesota theatre owners on the eve of Daylight Savings Time, almost drove the state's businesses, churches and private homes back to the sun dial. But a last minute rescue effort, spurred by broadcasters, calmed the confusion and made the morning of April 26 just another peaceful Sunday morning.

A report last week from WCCO Minneapolis-St. Paul, which credited all broadcasters with a part in righting the mixup, gave this account of the incident:

Minnesota metropolitan areas were preparing to turn their clocks ahead 2 a.m. Sunday, April 26, when movie theatre owners obtained a court writ at 10:30 a.m. the preceding day instructing county boards not to proceed with daylight time changes.

The owners and two unions of movie employes told the court that in recent legislative action the Minnesota assembly had repealed the local option law, albeit unintentionally. The court ordered a halt until hearings on May 18.

By Saturday noon, airlines, railroads, bus lines, major utilities, churches and schools were in a dilemma, debating whether or not to halt machinery for changing to daylight time.

One of the spearheading moves to eliminate the confusion was made by WCCO, which like other stations, flashed the news and hurried bulletin details. WCCO said its listeners phoned in plans to boycott theatres, organize committees to move clocks ahead anyway and even to picket Chief Justice Roger Dell, who had ordered the delay.

County boards did not agree with his ruling. At 2:30 p.m., the Ramsey (St. Paul) board said that it considered the court order ineffective because the board had voted the daylight time change when local option was in effect. Radio stations bulletined this development.

WCCO then contacted commissioners in Anoka and Hennepin (Minneapolis) counties, who, in an exclusive WCCO report, said they also considered the court action too late and that their counties would go ahead with daylight time.

At 4:30 p.m. General Manager Larry Haeg of WCCO announced that his station would change to daylight as originally planned. Listeners called in their thanks for station coverage, confessing that they had been confused by newspapers carrying outdated information which had reached their homes in late afternoon.

On Monday, April 27, Minnesota Attorney General Miles Lord went before the state supreme court with a plan to end its delay order. Governor Orville Freeman also asked state employes to report for work on daylight time.

By Monday afternoon, all people in the affected counties had set their clocks ahead, waiting for the next court action and a fast accurate report of its decision by WCCO and other Minnesota stations.

NAB legislative subcommittee formed

Two industrywide labor practices that often plague broadcasters—secondary boycotts and coercive picketing—received White House attention last week.

President Eisenhower at his Wednesday (April 29) news conference sharply criticized the Senate-passed labor bill (S1555) because it failed to provide protection against these practices.

The labor situation last week included these developments:

• NAB's Labor Advisory Committee took affirmative steps Wednesday to strengthen the role taken by broadcast management in the legislative field.

• NBC filed several suits against the National Assn. of Broadcast Employes & Technicians, charging violation of contract through a network work stoppage by 1,500 NABET members (story page 60).

The NAB committee, headed by Ward Quaal of WGN-AM-TV Chicago, formed a three-man legislative subcommittee to serve as a working body dealing with broadcast labor matters. Members are Leslie C. Johnson, WHBF-AM-TV Rock Island, Ill., subcommittee chairman; William Grant, KOA-AM-TV Denver, and Mr. Quaal.

This task force will operate on a 12-month basis. It will study legislative developments and guide industry participation in Congressional hearings and other political affairs.

Developments in the field of collective bargaining were scanned by members of the NAB committee, covering both network and station problems. Sen. Barry Goldwater (R-Ariz.) addressed the committee's luncheon. Pending legislation was discussed in detail.

Ike Disappointed • President Eisenhower's strong stand was taken after Charles S. Von Fremd, CBS newsman, asked him to comment on the Senate labor bill. The President said the whole labor situation has been described as "worse than malfunctioning, even racketeering in some few labor organizations and among certain individuals" in the report by Sen. John L. McClellan (D-Ark.), head of the labor rackets committee.

The President said he was "very much disappointed" in the Senate bill, citing three points. "The secondary boycott is not dealt with properly and effectively; blackmail picketing the same way; and then the field of clarifying the relationships of states to those areas where the National Labor Relations Board has refused to assert any jurisdiction."

Secondary boycotts and coercive picketing were described as factors in recent labor situations at WKRG-AM-TV Mobile, Ala., and WCKY Cincinnati. International Brotherhood of Electrical Workers conducted a picketing and pressure campaign in Mobile after losing an NLRB-conducted election. Last Jan. 28 WKRG-AM-TV employes voted 16-1 in favor of an independent union (BROADCASTING, Feb. 16).

In Cincinnati, AFTRA put pressure on its members to refrain from transcribing commercials for use on WCKY even though the transcriptions were being made for an advertising agency or package producer. An NLRB examiner found no violation. NLRB has not yet ruled on his finding (BROADCASTING, Nov. 3, 1958).

Wometco Enterprises stock offering made

Stock of Wometco Enterprises Inc., owner of WTVJ (TV) Miami, WLOS-AM-FM-TV Asheville, N.C. and 20% of WFGA-TV Jacksonville, Fla., was made available to the public Wednesday (April 29).

The offering of 290,000 shares of class A common stock was made at $10.75 a share. At the end of trading Thursday (April 30), the stock was $12.25 bid, $13.25 asked.

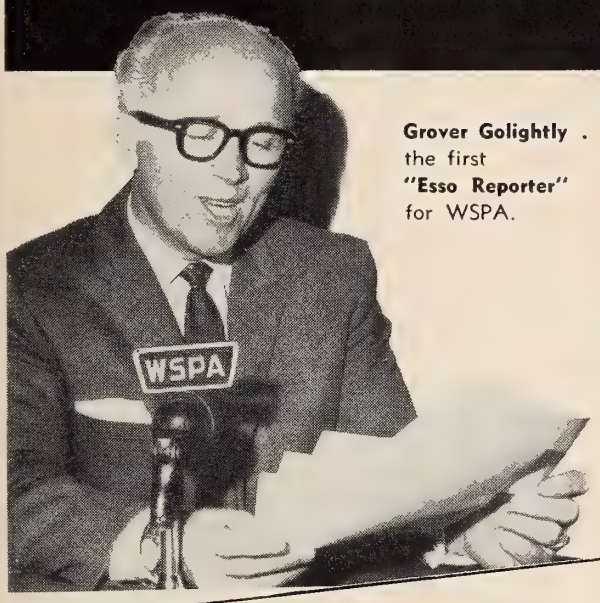
The stock offered represents 35% of the outstanding Class A shares of the company. Mitchell Wolfson and his family own 55% and Sidney Meyer, seller of the stock being offered to the public, now owns 10% (BROADCASTING, April 6).

The stock is being handled by a nationwide underwriting group managed by the Lee Higginson Corp.

Besides its radio-tv stations, Wometco operates 22 motion picture theatres in Florida.

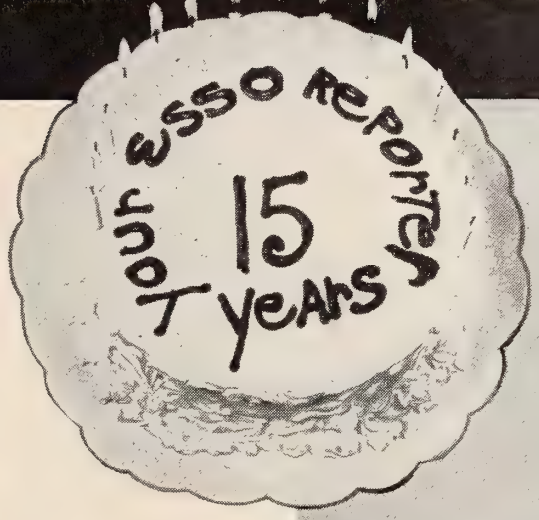
KHTV (TV) schedules June debut broadcast

Target date for KHTV (TV) Portland, Ore., to commence operation is June 1.



Stuart Nathanson, KHTV's sales manager, has signed Gill-Perna as national representative. Nat Jackson and Marlowe Branagan are news director and promotion manager, respectively.

WHTV has contracted for $120,000-worth of GE studio and remote equipment. It will be on ch. 27.



Labor issues • Members of NAB's Labor Advisory Committee went into secondary boycotts, coercive picketing and other employment issues at their April 29 meeting in Washington. Attending were (front row, l to r): Joseph Schertler, Westinghouse Broadcasting Co.; Richard M. Brown, KPOJ Portland, Ore.; Robert B. Jones Jr., WFBR Baltimore; Ward L. Quaal, WGN Chicago, chairman; Leslie C. Johnson, WHBF Rock Island, Ill.; William C. Fitts Jr., CBS; Clifford Kirtland, Transcontinent Television Corp. Standing: Harold Grams, KSD St. Louis; Joseph F. Keating, MBS; William Grant, KOA Denver; Calvin J. Smith, KFAC Los Angeles; Louis Gratz and Ole Morby, Time, Inc.; A.A. Church, Storer Broadcasting Co.; Richard L. Freund, ABC.

Manager
Radio Station WSPA
224 East Main Street
Spartanburg, South Carolina

Dear Mr. Holmes:

On March 27, 1959 Your Esso Reporter has a birthday on WSPA. The broadcast will be significant because it will mark the completion of 15 years of our program on your station.

In these days of constant change it is pleasant to recognize that another full year has passed during which your station and our company have worked together to provide a public service to the people of Spartanburg.

This anniversary is an ideal occasion to pause for a moment in recognition of the American Free Press in action. Your Esso Reporter is an outstanding example of service to the community with benefit to all. It's a perfect time, too, to say thank you to you and your staff for your cooperation in presenting the program in our behalf and to wish Your Esso Reporter "Happy Birthday" on WSPA.

Sincerely,

R M Gray

RMG/sh

Since its' establishment as the first radio station in South Carolina in 1929, WSPA has considered newscasting of paramount importance to its' public service program.

"Your Esso Reporter" is part of a total of 26 national and local newscasts daily over WSPA.

This vital part of WSPA programming is made possible by a six-man local news staff, the services of United Press, a special Washington correspondent and by world wide coverage from CBS.

Changing hands

ANNOUNCED • *The following sales of station interests were announced last week, subject to FCC approval:*

• KGMS Sacramento, Calif.: Sold to A.C. Morici and A.R. Ellman, owners of KIST Santa Barbara, Calif., and KRAM Las Vegas, Nev., by Irving J. Schwartz, William S. (Steve) George and Jack F. Matranga for $500,000. The sale was handled by Lincoln Dellar & Co. KGMS is on 1380 kc with 1 kw directional, and is affiliated with MBS.

• KPAM, KPFM (FM) Portland, Ore.: Sold to Gospel Broadcasting Co. (headed by KRWC Forest Grove, Ore., partner F. Demcy Mylar) by Broadcasters Oregon Ltd. for $200,000. KPAM is on 1410 kc with 5 kw, day. KPFM (FM) is on 97.1 mc with 3.3 kw.

• WILA Danville, Va.: Sold to Eastern Broadcasting Corp. (Roger Neuhoff, sales planning coordinator WRC-TV Washington, majority owner, Robert C. Walker II, general manager of WCHV Charlottesville, Va., and others) by S.L. Goodman for $45,000. Mr. Goodman retains WYSR Franklin and WYTI Rocky Mount, both Virginia. The sale was handled by Blackburn & Co. WILA is on 1580 kc with 1 kw, day.

APPROVED • *The following transfers of station interests were approved by the FCC last week (for other Commission activities see* FOR THE RECORD, *page 98):*

• KROW Oakland, Calif.: Sold to The McLendon Pacific Corp. by KROW Inc. (Sheldon F. Sackett) for $800,000. Comr. Robert Bartley dissented on the multiple ownership issue. Other McLendon Corp. stations include: KLIF Dallas, KILT Houston and KTSA San Antonio, all Texas, WAKY Louisville, Ky., and KEEL Shreveport, La. KROW is on 960 kc with 1 kw.

• WOLF Syracuse, N.Y.: Sold to Ivy Broadcasting Co. by T. Sherman Marshall and others for $329,000. Ellis R. Erdman, president of Ivy Broadcasting, has interests in WTKO Ithaca, N.Y., WSKI Montpelier, Vt., and WACK Newark, N.J. George Abbott, vice president of the purchasing firm, has a minority interest in WTKO. WOLF is on 1490 kc with 250 w.

• WTNJ Trenton, N.J.: Sold to Delaware Valley Broadcasting Co. (Edward L. Cossman, president) by WOAX Inc. for $200,000. WTNJ is on 1300 kc with 250 w, day.

• KLIK Jefferson City, Mo.: Sold to KLIK Broadcasting Inc. by Empire Broadcasting Co. for $183,750. Oscar K. Fine, president of KLIK Broadcasting, and others have interests in KFEQ-AM-TV St. Joseph, Mo.; T.M. Nelson, executive vice president, has an interest in WILO Frankfort, Ind., and WOHP Bellefontaine, Ohio. KLIK is on 950 kc with 5 kw, day.

How sure are you? . . . .

?

. . . . about the station purchase you are about to make. Do you have the assurance of thorough investigation by experts that it is just as represented? When your transaction is negotiated through Blackburn & Company you have the assurance that representation is accurate, investigation is complete, and full reliability is assured. Another good reason why Blackburn and Company is foremost in radio-tv transactions, nationwide.

WNTA-TV, WHCT (TV) offer joint package

WNTA-TV Newark was scheduled to begin a feed of seven of its live and taped programs to ch. 18 WHCT (TV) Hartford today (May 4), with the two stations linked by a direct coaxial cable from WNTA-TV.

Ted Cott, vice president in charge of owned and operated stations for NTA, said advertisers may buy the programming on the stations as "a package." It will cost an advertiser $40 above the WNTA rate to add a one-minute spot on WHCT for an evening program and $30 for a one-minute spot on a daytime program. The advertiser, he said, will be adding a potential 364,000 homes to his coverage and his message "will be viewed in an area that contains well above-average income families." Mr. Cott reported that 20 WNTA advertisers have signed to add WHCT.

The taped programs involved are those featuring Alexander King and Henry Morgan plus *Open End, One Night Stand* (all once-a-week) and *The Mike Wallace Interview* (Monday-through-Friday). The live shows are *The Mike Wallace Newsbeat* and the *Richard Willis Show* (Monday-Friday).

ABC in the West

KGB San Diego, Calif., and KRXL Roseburg, Ore., have become ABC affiliates, the network reported last week. Advertisers, ABC noted, can now buy a total of more than 100 stations in the 12 western states, including the Arizona and Intermountain networks, or 40 stations in the three Pacific Coast states, or a California network alone, all through a single order with ABC.

With daylight time, four programs formerly on the Don Lee Broadcasting System moved to ABC: three news programs with Frank Hemingway, Cliff Engle and John Holbrook, and the quiz show *Tello Test*. These programs were offered first to ABC affiliates, then, if they did not want them, to the stations which previously carried them on Don Lee. Result, it was said, is that the programs, all with multiple sponsors, have added a few markets which have ABC stations but did not have Don Lee outlets and dropped a few where time could not be cleared since the break-up of the Don Lee network (BROADCASTING, March 30).

In Eastern Iowa most front ends look like this.

NABET PICKETS ON 49TH STREET

They hit the pavement Monday morning in protest over foreign help on tape

NBC-TV ON AIR DESPITE NABET

300 supervisors replace 1,500 strikers in vtr dispute

NBC was prepared to continue its radio and television programming schedule over the weekend with supervisory and management personnel who were replacing about 1,500 members of the National Assn. of Broadcast Employes & Technicians who walked off their jobs last Monday (April 27).

NBC re-emphasized its intention to remain on the air despite a report late Thursday evening that Local Council 16, International Brotherhood of Teamsters, had pledged support to NABET. Spokesmen for NABET said the council planned to notify its local membership in New York to "support" the work stoppage and NABET interpreted this to mean that its picket lines would be respected, starting last Friday. Teamster members truck scenery and other props to NBC.

An NBC spokesman said late Thursday that the network "expects the teamsters to continue working just as the other unions are." He added that "in any event, we fully intend to continue normal operations."

The dispute flared up over the video taping in Paris of the *Today* program, scheduled to be broadcast last Monday through Friday. When NABET personnel refused to handle the tapes on Monday, the tv network went off the air from 7 to 9 a.m. but maintained continuous broadcasting schedule thereafter. The radio network was off the air 55 minutes on Monday.

The network termed the union's move "a strike in violation of the contract." NABET countered by saying its workers were "locked out" and claimed its action resulted from "a violation" of

the pact by NBC, as well as from a failure by the network to live up to "certain reassurances."

How it Started • Genesis of the dispute was this: the *Today* program members were in Paris on April 24 and started to tape the first of five programs that would originate there for presentation in New York last week (Mon.-Fri., 7-9 a.m.). Arrangements had been made with NABET whereby nine union technicians were to participate in the taping of the shows, together with personnel engaged by Intercontinental Television Corp., an organization set up recently to produce taped programs abroad. The first tape was flown to New York, edited and was scheduled to go on *Today* last Monday. The NABET technicians there declined to handle it, saying that they had been advised that the "basic operating jobs" in producing the tapes had been handled by French technicians hired by ITC and not by union staffers. They contended that this was a violation of the NBC-NABET contract.

At this point, NBC spokesmen said, they asked the technicians to put a substitute film on the air, but NABET workers refused. NBC officials claim they told the union employes to leave the studio. NABET officials later said that the technicians were told to leave the premises.

NBC's position is that NABET violated a "no strike" clause in their contract. Company officials said there is provision for an impartial umpire or arbitrator to intervene in a dispute and pointed out that NABET acted without recourse to an umpire or arbitrator.

NABET's Position • G. Tyler Byrne, international executive vice president of NABET, outlined the union's position in this way:

"We have a contract with NBC that gives us complete jurisdiction over NBC-owned or controlled programs, of which *Today* is one. There is no limiting language on this jurisdiction; it makes no difference whether the program is taped here or abroad. The contract states that NABET personnel must perform 'the basic operation positions'. The language is unmistakably clear on this.

"Our technicians who were over in Paris telephoned us on April 24 to complain that French technicians—and not they—were performing the basic jobs. We immediately called NBC and advised some of their officials of this circumstance. We had their personal assurances that it would be rectified. It wasn't. We again brought it to the attention of the network and again received their assurances. But nothing was done."

Mr. Byrne asserted there was an aspect of the dispute that was more significant than the stoppage. He said there is "a trend" by networks toward producing more and more programs abroad and using what Mr. Byrne calls "runaway shops" (non-union organizations). NABET is determined to "put a stop to this situation," Mr. Byrne declared, because "this is a threat to the job security of our workers."
